3. Purpose of LAT ([CRS 1-7-509](#) and [Rule 11](#))
 - The Logic and Accuracy Test (LAT) is the second of three tests that are required during an election. The first is the Hardware Diagnostic Test, which verifies that all of the voting system's input, output and communication devices contain the proper firmware/ software releases and are in working order. The LAT follows hardware verification and ensures that the equipment will correctly count and tabulate votes. After the election, a post-election audit will compare a manual tally of select ballots against election results in order to provide a statistical assessment that the election results are correct.
 - The purpose of the LAT is to test the compatibility of the election ballots through the scanning and tabulation equipment to confirm that every voting position on the ballot is accurately counted where a properly marked selection is made. It also includes testing the electronic voting machines (DRE/DAU/eSlate) and the voter-verifiable paper audit trail (V-VPAT) for accuracy.
4. Board representative responsibilities:
 - As representative of the Test Board you will be participating and/or witnessing the LAT from beginning to end ensuring key requirements are met
 - Review LAT requirements checklist
 - Schedule requirement:
 - Tuesday, October 9 from 10 a.m. - 4:00 p.m.
 - Wednesday, October 10th from 9 a.m. - 4:00 p.m.
 - Thursday, October 11 at 3:30 p.m.
 - No process shall be delayed due to the absence of a participant

Boulder County Clerk & Recorder Elections Division

5. Voting and Individual Tally explanation

- Voting - mark ballots per voter instructions (fill in box completely; no X or V)
 - Follow voter instructions for correcting a choice when there is intent to vote an option
 - If a mistake (wrong choice, stray mark, hesitant mark) is made in a contest that you did not intend to vote or you are unable to correct your voting choice, make a written note in the contest area confirming mistake and/or request a replacement ballot from staff
 - Ballots that are damaged or improperly marked are reviewed and/or rejected in the scanning portion of testing. Catching and correcting a mistake immediately prevents delays in testing later
- The manual verification worksheet (MVW) is used to record member ballot tallies, provides the ability to record a summary of contest options voted and is used during the Results Audit portion of testing
 - Overvotes account for a contest in which a choice has been made for more candidates than allowable, per instruction
 - Undervotes account for a contest for which no selection is made and/or less selections are made than allowable, per instruction
 - If the contest shows “No candidate for this office”, there is no selection to be made and no undervote to be accounted for

6. The buddy system:

- After each participant has voted his/her set of ballots, he or she will team up with another participant and will complete the MVW and electronic voting portion in teams of two
 - Participant will not be associated with the scanning or tabulation process
 - Participant must be affiliated with a separate party (bi-partisan teams)

7. Electronic (DRE) voting (may be completed simultaneously with ballot scanning)

- Disabled Access Unit (DAU/eSlate) is an electronic voting machine that provides voting accessibility to voters who may be otherwise unable to mark a paper ballot privately and independently
 - DAU includes an audio ballot reader with headphones, and can accept adaptive devices for voters with mobility impairments
- LAT includes test of DAUs for accuracy, with at least two audio ballots voted to ensure proper recording
- Members will witness the public counter is set to zero and a “zeroed” report will be produced prior to voting

8. Ballot scanning(may be completed simultaneously with electronic voting)

- The scan station is designed to capture an image of a voter’s paper ballot, process the image of that ballot using the Ballot Now Software, and capture the voter’s choices
 - These are called Cast Vote Records (CVRs)
- The LAT tests these systems to ensure the choices are being accurately captured and recorded
 - We want to make sure that a choice for Candidate A is being recorded as a vote for Candidate A, and not Candidate B and that there is compatibility between the ballots (proper printing and alignment), and the equipment
- Members will witness the public counter is set to zero and a “zeroed” report will be produced prior to scanning

Boulder County Clerk & Recorder Elections Division

- The scanning station also provides for the resolution of voter intent as prescribed by the Colorado Secretary of State
 - Ballots that have been overvoted and properly corrected will be flagged and resolved per state guidelines
 - Notations of any corrections required shall be made on the MVW for use in result auditing and discrepancy resolution
- Prior to scanning, there will be a review of the ballots by staff to look for damaged or improperly marked ballots that would require manual review or duplication during the election cycle
 - Damaged Ballots: A damaged ballot is one that has been torn, bent, or otherwise mutilated or rendered unreadable, so that it cannot be processed by the optical scanner. [\(Rule 27.1.3\)](#)
 - Damaged ballots shall include all ballots that contain a foreign substance that could potentially interfere with the optical scan machine (i.e. food, drink, etc.). [\(Rule 27.1.3\(a\)\)](#)
 - Damaged ballots may include ballots that are marked in a medium other than the medium indicated in the ballot instructions. [\(Rule 27.1.3\(b\)\)](#)
 - Improper markings: X's or V's as well as obvious stray marks, hesitant marks, incomplete marks or parts of written notes that are within the target area of a contest option where no other choice has been made

9. Tabulation

- The Tally station is designed to take voter choices (CVRs) from one or more scan systems and tabulate the votes into a combined results report
- Today we will confirm that it is accurately tabulating those results

10. Results audit

- To complete the testing of election equipment, the results report from Tally shall be compared to the manual verification worksheets
- Any discrepancies found will be documented and researched
- This will confirm that there are no issues with the election equipment and that they are qualified for election usage

11. Discrepancy resolution (in order of escalation)

- Review for entry and recording errors
 - Review MVW for too few or too many votes captured
 - Review ballots with MVW for incorrect recording and recount if needed
 - Review Ballot Now for resolution differences (if applicable)
 - Review comparison and recount if needed (if applicable)
- If error is identified as a hardware or software error on single device
 - Validate other tested equipment was not impacted
 - Mark device unsatisfactory, replace and test alternative/new device
- If error is identified on more than one device and devices are failing in similar fashion
 - Test multiple devices that could reasonably have same error
 - Mark devices unsatisfactory, replace and test alternative/new devices
 - If enough resources are not available for replacement, error shall be corrected and retesting will be completed
- If error is identified as a software or ballot programming error
 - Alert DEO for correction
 - Correct software or ballot programming error and restart testing from beginning

Boulder County Clerk & Recorder Elections Division

12. Cumulative results of testing

- When all individual results have been audited the county shall provide a cumulative result report of testing
- This will include a cumulative manual verification worksheet, and a cumulative tabulation result report
- The reports will be verified for accuracy and provided to the representatives of the board for review

13. Resetting and resealing of equipment

- At the end of the LAT the test board members will witness the resetting of all equipment used in the LAT back to its original state of readiness for the election and the resealing of equipment where applicable

14. Sign off and Statement of Qualification

- At the end of testing the representatives of the board will review all test result document, ensure all appropriate sign offs have occurred, and sign the Statement of Qualification officiating the successful completion of the Logic and Accuracy Test

15. All testing material will then be sealed and secured at the end of the LAT process

1-7-509. Electronic and electromechanical vote counting - testing of equipment required - definition - repeal. (1) (a) An electronic or electromechanical voting system shall be tested at the conclusion of maintenance and testing. The tests shall be sufficient to determine that the voting system is properly programmed, the election is correctly defined on the voting system, and all of the voting system's input, output, and communication devices are working properly.

(b) The designated election official shall conduct at least three tests on all electronic and electromagnetic voting equipment, including a hardware test, a public logic and accuracy test conducted in accordance with subsection (2) of this section, and a postelection test or audit conducted in accordance with rules promulgated by the secretary of state. Each type of ballot, including mail-in, early voting, provisional, precinct, and audio ballots, shall be tested in accordance with rules promulgated by the secretary of state. The tests shall ensure that the equipment will correctly count the votes cast for all offices and on all ballot questions and ballot issues and that the voting system will accurately count ballots of all types.

(c) (I) For all partisan elections, the designated election official shall select a testing board comprising at least two persons, one from each major political party, from the list provided by the major political parties pursuant to section 1-6-102.

(II) For all nonpartisan elections, the designated election official or coordinated election official, as applicable, shall select a testing board comprising at least two persons who are registered electors.

(III) (A) For the purposes of subparagraph (I) of this paragraph (c) only, "major political party" means any political party that at the last two preceding gubernatorial elections was represented on the official ballot either by political party candidates or by individual nominees and whose candidate at the last two preceding gubernatorial elections received at least ten percent of the total gubernatorial votes cast.

(B) This subparagraph (III) is repealed, effective January 1, 2015.

(2) (a) A public test of voting equipment shall be conducted prior to the commencement of voting in accordance with this section by processing a preaudited group of ballots produced so as to record a predetermined number of valid votes for each candidate and on each ballot question or ballot issue. The test shall ensure that the system accurately records votes when the elector has the option of voting for more than one candidate in a race. The test shall ensure that the voting system properly rejects and does not count overvotes and undervotes.

(b) The public test shall be open to representatives of the political parties, the press, and the public, subject to the rules promulgated by the secretary of state pursuant to subsection (6) of this section. Each major political party, minor political party, ballot issue committee that has an issue on the ballot, and coordinating entity may designate one person, who shall be allowed to witness all public tests and the counting of pretest votes. If an observer or designee hinders or disturbs the test process, the designated election official may remove the person from the test area. An observer or designee who has been removed from a public test may be barred from future tests. The absence of observers or designees shall not delay or stop the public test.

(c) The testing board shall convene and designate at least one member to represent the board during the testing, sign the necessary reports, and report to the board. The programs and ballots used for testing shall be attested to and sealed by the board and retained in the custody of the designated election official. The absence of a member of the testing board shall not delay or stop the test.

(d) Upon completion of the testing conducted pursuant to this section, the testing board or its representative and the representatives of the political parties, ballot issue committees, and coordinating

entities who attended the test may witness the resetting of each device that passed the test to a preelection state of readiness and the sealing of each such device in order to secure its state of readiness.

(e) The testing board or its representative shall sign a written statement indicating the devices tested, the results of the testing, the protective counter numbers of each device, if applicable, the number of the seal attached to each device upon completion of the testing, any problems reported to the designated election official as a result of the testing, and whether each device tested is satisfactory or unsatisfactory.

(3) Notice of the fact that the public test will take place shall be posted in the designated public place for posting notices in the county for at least seven days before the public test. The notice shall indicate the general time frame during which the test may take place and the manner in which members of the public may obtain specific information about the time and place of the test. Nothing in this subsection (3) shall preclude the use of additional methods of providing information about the public test to members of the public.

(4) (a) If any tested device is found to have an error in tabulation, it shall be deemed unsatisfactory. For each device deemed unsatisfactory, the testing board shall attempt to determine the cause of the error, attempt to identify and test other devices that could reasonably be expected to have the same error, and test a number of additional devices sufficient to determine that all other devices are satisfactory. The cause of any error detected shall be corrected, and an errorless count shall be made before the voting equipment is approved. The test shall be repeated and errorless results achieved before official ballots are counted.

(b) If an error is detected in the operation or output of an electronic voting device, including an error in spelling or in the order of candidates on a ballot, the problem shall be reported to the testing board and the designated election official. The designated election official shall correct the error.

(c) A voting device deemed unsatisfactory shall be recoded, repaired, or replaced and shall be made available for retesting unless a sufficient number of tested backup devices is available to replace the unsatisfactory device. The backup device may not be used in the election unless the testing board or its representative determines that the device is satisfactory. The designated election official shall announce at the conclusion of the first testing the date, place, and time that an unsatisfactory device will be retested, or, at the option of the testing board, the designated election official shall notify by telephone each person who was present at the first testing of the date, place, and time of the retesting.

(5) The designated election official shall keep records of all previous testing of electronic and electromechanical tabulation devices used in any election. Such records shall be available for inspection and reference during public testing by any person in attendance. The need of the testing board for access to such records during the testing shall take precedence over the need of other attendees for access so that the work of the testing board will not be hindered. Records of testing shall include, for each device, the name of the person who tested the device and the date, place, time, and results of each test. Records of testing shall be retained as part of the official records of the election in which the device is used.

(6) The secretary of state shall promulgate rules in accordance with article 4 of title 24, C.R.S., prescribing the manner of performing the logic and accuracy testing required by this section.

Participant Logic and Accuracy Reference Sheet

The Logic and Accuracy Test follows hardware verification and ensures that the equipment will correctly count votes. The LAT includes testing the compatibility of the election ballots through the scanning and tabulation equipment and confirms that every voting position on the ballot is accurately counted for all properly voted positions. It also includes testing the electronic voting machines (DRE/DAU/eSlate) and the voter-verifiable paper audit trail (V-VPAT) for accuracy.

Common acronyms:

- **MVW:** Manual Verification Worksheet
- **MBB:** Mobile Ballot Box
- **CVR:** Cast Vote Record
- **eCM:** eSlate Cryptographic Module
- **DRE:** Direct Record Electronic
- **DAU:** Disabled Access Unit (interchanged with DRE and eSlate)
- **eSlate:** Product name (Hart InterCivic) for the DRE
- **JBC:** Judges Booth Controller
- **V-VPAT:** Voter-Verifiable Paper Audit Trail
- **VBO:** Verifiable Ballot Option

Voting your ballot:

1. Mark ballots as indicated on the voter instructions (fill in box completely; no X or v) ([Rule 11.5.3.5](#))
2. Follow the voter instructions for correcting any choice when there is intent to vote scenario.
3. If a mistake (vote, stray mark, hesitant mark) is made in a contest in which you did not intend to vote or you are unable to correct your voting choice, make a written note in the contest area confirming your mistake and request a replacement ballot from staff.

NOTE: Ballots that are damaged or improperly marked are reviewed and/or rejected in the scanning portion of testing. Catching and correcting a mistake immediately prevents delays in testing later.

Overvotes: Keep in mind that member ballots will be used for the electronic portion of voting which does not allow for overvotes. Overvotes will be recorded as undervotes on the DAU and individual tallies will require adjustment.

Completing the MVW (2 person process; different affiliations)

For each set of ballots, use the following procedure to complete the manual verification worksheet:

1. Count out the first 10 ballots, labeling the ballot number in the top right hand corner of the ballot (i.e. #1, #2, #3) as you count.
2. Starting with ballot #1, Member 1 reads aloud the ballot number recorded in the top right corner, Member 2 verified this on the MVW.
3. Member 1 reads aloud each contest name and contest selection made, indicating any voting marks that are outside the prescribed voting method.
4. Member 2 will print his/her name on the MVW and record the selections read aloud by Member 1 on the manual verification worksheet by making a slash mark for the appropriate contest option read and makes notation of any abnormal markings as indicated.

NOTE: If a contest has not been voted, a slash mark must be recorded in the Undervote category for that contest.

If the contest shows “No candidate for this office”, there is no selection to be made and NO undervote to be accounted for

5. After 10 ballots have been recorded, member 2 confirms they have accounted for 10 ballots.

NOTE: Board member completes this process for all 25 ballots

6. When all ballots have been recorded, team members will trade roles and repeat the process with a new MVW.
7. When the second MVW has been completed, each team member will individually tally their MVW.
8. Teams will then compare and validate that the results match by reviewing each contest option, noting and resolving any discrepancies found.
9. Both members will initial their MVWs confirming they have verified it to be accurate and true and that all resolution issues have been identified and recorded.
10. After verification has been completed, teams will provide their MVW to an election support staff member.
11. The MVW is copied, initialed by the team members and then entered into the electronic cumulative manual verification spreadsheet.

It is the determination of the Logic and Accuracy Testing Board that all devices tested are qualified to be used in the 2012 General Election on November 6th, 2012.

Subject: RE: Reply requested: Boulder County Elections LAT - DEMOCRATIC PARTY

Patricia,

Thank you for your follow-up. Two items of note:

First - The Democrat's Test Packet included a blank ballot and our attempt to cast the ballot seemed to generate an odd response. While we were able to finally cast the ballot, the machine seemed to reject the blank form and attempted to send the voter back to the ballot for acceptance. We did not document the process required to cast the ballot. We did however alert the staff member we were working with and I think her name was Joan.

I'm not sure if this is a double-check to assure the process is correctly receiving a deliberate blank ballot or if its submission was not accounted for in the original process design. It did cause a few moments of delay for our test but perhaps more importantly, it might put an actual voter in the position of having to request help when they prefer not to call attention to their blank, but still valid, ballot.

I would suggest this be investigated further and also request you communicate my response with my LAT partner Phyllis Rheiner (I think that is the correct spelling).

Second – Here is the text of a portion of my LAT report submitted verbally at the 2012 Primary and also by letter to Joel Champion former BCR Chairman,

We went through the process of voting, using voting machines. I have never used these as I receive mail ballots. The machines have provisions for servicing blind voters and we were to test both the “normal” and the sight challenged process. I found this to be impossible for three reasons:

1. Staff members assisting us with the voting machines were talking and there were four test team members voting simultaneously. The competing conversations made the audio instructions provided by the voting machine difficult to hear even with headphones.
2. The instructions provided for a blind person are not the same as those provided for a sighted person and I found that trying to read and listen, then compare and follow was too complicated. I found myself ignoring the audio instructions and concentrating on the voting process so I wouldn't make a voting error.

3. I am not blind. Are the braille characters on the machine correct? If I were blind, would I be able to follow the instructions and vote correctly? Did the voting machine give an audio confirmation of whom I voted for?

This portion of the test, to me, is grossly inadequate. You need a blind person to verify that blind voters will be able to follow the process successfully.

This is the second time I have used the e-Slate for the purpose of the LAT and either,

- 1. Perhaps there was no perceived validity in my report or,**
- 2. Perhaps there was just no response perceived necessary**

The same facts mentioned above hold true for this LAT and I don't believe I could assure anyone that a sight challenged or blind person could successfully use the e-Slate. I would again suggest you have someone more qualified check the machine for usefulness.

Did anyone in the Elections Dept. follow-up on the suggestions made by LAT members? If a report was made, I think it would be good feedback to the Party Chairmen if they were sent a copy of the report. I think that would be an encouragement to party volunteers to participate in the process.

Thanks for your efforts in the LAT.
