PROPOSAL INSTRUCTIONS

1. Purpose/Background

Boulder County is seeking a qualified Civil Engineering firm to develop preliminary designs for two bridge replacements to make the crossings more resistant to flooding impacts and to make the cross-sections consistent with recent planning efforts. The scope of work and requirements are unique for each project. Each project will be managed individually, with its own budget, under a single contract awarded to one consulting firm. The two locations and brief scope descriptions are as follows:

- *State Highway 7 (Arapahoe Road) at Dry Creek (CDOT Bridge #D-16-BW):* [The Boulder County Floodplain Management and Transportation System Resilience Study](#) showed that this location would cause extreme negative impacts if damaged in a flood event. Also, the recently completed CO 7 PEL recommends a wider cross-section across the bridge for multimodal improvements. Lastly, the bridge has one of the lowest structural sufficiency ratings on CO 7 between Boulder and Brighton. A hydraulic analysis is expected to determine size and clearance height necessary to accommodate future flooding. Work may include a structure selection report.
- *Kenosha Road at Coal Creek:* The alignment of Coal Creek as it crosses Kenosha Road has fewer constraints, with the majority of the flow issues north of the road where the creek flows underneath the Martha Mathews Ditch. As such, alternative alignments for both the road and creek will be considered as part of the design process. A hydraulic analysis will be needed to determine size and clearance of the Kenosha Road crossing of Coal Creek. Creek mitigation alternatives could also be analyzed up- and down-stream of the crossing to accommodate future flooding.

The goal for each location is to develop a preliminary design with enough detail to use in a future FEMA grant application. The preliminary designs should make each crossing resilient to future flood disasters, allowing the road to remain open and avoid damage to the roadway or structure, while also having a Benefit-Cost Analysis (BCA) of 1.0 or greater if possible (based on FEMA's BCA tool). The designs shall be accompanied by an opinion of probable construction cost as well as any additional right-of-way needed permanently or temporarily

during construction. Cost estimates shall be sufficient to submit grant applications for additional funding for final design and construction through the [FEMA Building Resilient Infrastructure and Communities \(BRIC\)](#) program.

Funding for this project is provided through the FEMA Pre-Disaster Mitigation Advanced Assistance program and must comply with all FEMA requirements. **Due to grant funding deadlines, all work for the project must be completed by February 11, 2022. Specifications and a sample contract with a FEMA specific addendum are attached. The successful proposer shall execute the attached addendum as part of any contract with the county and comply with all FEMA requirements set forth in that addendum.**

2. Written Inquiries

All inquiries regarding this RFP will be submitted via email to the Boulder County Purchasing Office at purchasing@bouldercounty.org on or before 2:00 p.m. **March 5, 2021**. A response from the county to all inquiries will be posted and sent via email no later than **March 10, 2021**.

Please do not contact any other county department or personnel with questions or for information regarding this solicitation.

SPECIFICATIONS

PROJECT INFORMATION

The awarded consultant will complete planning and preliminary design at two locations. The primary goal for each location is to develop a preferred alternative along with a preliminary design with enough detail to use in a future FEMA grant application. The selected alternative must make each crossing resilient to future flood disasters, allowing the road to remain open and avoid damage to the roadway or structure. The design should also be consistent with the recommendations of relevant planning documents. The two locations and brief scope descriptions are (see below for map of project locations):

1. *State Highway 7 (Arapahoe Road) at Dry Creek (CDOT Bridge # D-16-BW)*: This bridge has the second lowest structural integrity in the entire State Highway 7 (CO 7) corridor between Boulder and Brighton and will need to be completely replaced within the next decade. In addition to the structural integrity, the bridge does not meet any of the possible cross-sections identified in the recently complete Planning and Environmental Linkages study. In addition to horizontal widening, the County would like to include a new multiuse underpass at this location. This connection could be used in the alignment of the East Boulder Trail. A hydraulic analysis will need to be performed as part of this project to determine size and clearance height necessary to accommodate future flooding. Work should include a structure selection report.
2. *Kenosha Road at Coal Creek*: The alignment of Coal Creek as it crosses Kenosha Road has fewer constraints, with the majority of the flow issues north of the road where the creek flows underneath the Martha Mathews Ditch. As such, alternative alignments for both the road and creek will be considered as part of the design process. A hydraulic analysis will be needed to determine size and clearance of the Kenosha Road crossing of Coal Creek. Creek mitigation alternatives could also be analyzed up and down stream of the crossing to accommodate future flooding.

Map: Project Locations

The consultant will design the project in consultation with county staff from Community Planning & Permitting and Public Works – Engineering departments as well as local partner stakeholders including the Colorado Department of Transportation, the Town of Erie, and the Mile-High Flood District.

Design and associated work shall be completed in accordance with the applicable requirements including:

- [Boulder County Multimodal Transportation Standards](#)
- Town of Erie’s Standards and Specifications for Design and Construction of Public Improvements (Kenosha Road project only)
- CDOT Standard Specifications for Road and Bridge Construction (CO 7 project only)
- American Association of State Highway Transportation Officials (AASHTO) “A Policy on Geometric Design of Highways and Streets”
- AASHTO “Roadside Design Guide”
- CDOT M&S Standards, CDOT Design Guide
- CDOT Construction Manual
- Urban Storm Drainage Criteria Manual
- Manual on Uniform Traffic Control Devices
- all applicable state, federal and local guidelines

Location Background

State Highway 7 (Arapahoe Road) at Dry Creek (CDOT Bridge #D-16-BW)

In 2018, a [Planning and Environmental Linkages](#) (PEL) study was completed for this section of State Highway 7 (CO 7). The study did not make any specific recommendation for the crossing at Dry Creek but instead provided three possible typical sections for CO 7 between 75th and US 287. Since the completion of the PEL, CDOT and the local agencies on the corridor received DRCOG funding for preliminary engineering on the corridor between Boulder and Brighton. To help guide how and what projects will be developed a Corridor Development Plan was recently completed.

In 2019, Boulder County completed [the Floodplain Management and Transportation Resilience Study and Action Plan](#) (Study). The Study identified potential future flood vulnerabilities due to climate change based on multiple downscaled Global Climate Model runs using historical rainfall in Boulder County. This model was incorporated into a model called City Simulator to assess impacts from potential future flood events. In the study, CO 7 at Dry Creek was identified as highly vulnerable to flooding and could disrupt the most trips due to flooding in unincorporated Boulder County in the future.

Based on the most recent modeling, the road adjacent to the bridge overtops at the 25-year flood recurrence interval. The bridge on CO 7 at Dry Creek should be designed to ensure the road can remain open during future flood events.

Kenosha Road at Coal Creek

The Town of Erie is working with the Mile-High Flood District to improve several sections of Coal Creek upstream of Kenosha Road. These improvements greatly improve resiliency and take many areas out of the Coal Creek Floodplain. However, the full effectiveness of these improvements will not be in place until the Kenosha Road crossing and 1,000 foot section of Coal Creek north of Kenosha (collectively referred to as Reach 1 in the Coal Creek and Rock Creek Major Drainageway Study) is addressed.

The 2014 [Coal Creek and Rock Creek Major Drainageway Study](#) (Study) identifies the lower section of Coal Creek as in need of restoration and flood resiliency improvement. Currently, there is a 29' bridge with no piers on Kenosha Road that crosses Coal Creek. The study recommended a 59' bridge and an increase in the road elevation of 2'. Consultant will develop alternatives for improving Kenosha Road crossing and restoring a short section of Coal Creek north of the crossing (See Exhibit A for project location details and planned creek improvements). The [East County Line Road/Weld County Road 1 Master Plan](#) also includes details and recommendations for Kenosha Road.

Improving stream flow on Coal Creek using natural channel design approaches at the Town of Erie's Kenosha Road crossing and on County-owned property to the north of Kenosha Road will improve resiliency for the open space property, protect critical transportation corridors along both Kenosha Road and County Line Road, and take approximately 23 residential structures out of the floodplain along both sides of County Line Road.

Reach 1 is multi-jurisdictional in nature with the road owned by the Town of Erie, downstream property owned by Boulder County, and the benefiting neighborhood within unincorporated Weld County.

County granting extra time to complete the Work will not entitle Contractor to additional compensation from County. This Contract will remain in full force and effect during any time period that Contractor is permitted to finish completing the Work.

7. Extension of Contract Term (Additional Work): Upon mutual agreement of the Parties, this Contract may be extended until the **Final End Date**. During any extended **Contract Term**, the terms of this Contract will remain in full force and effect, unless otherwise amended in writing by the Parties. Where the Contractor will provide additional services for additional compensation beyond the initial **Contract**

Amount, the Parties must execute a written amendment before the then-current **Expiration Date**. If necessary, the written amendment will incorporate an updated Scope of Work and updated Fee Schedule as exhibits. Contractor must provide a current Certificate of Insurance to the County that complies with the **Insurance Requirements** of this Contract, if any, prior to any extended **Contract Term**.

8. Schedule of Work: County may designate the hours (on a daily or weekly basis) during which Contractor can perform the Work, strictly for the purposes of minimizing inconvenience to the County and interference with County operations. Contractor will otherwise set its own work schedule.

9. Indemnity: Contractor will be liable for any damages to persons or property caused by or arising out of the actions, obligations, or omissions of Contractor, its employees, agents, representatives or other persons acting under Contractor's direction or control in performing or failing to perform the Work under this Contract. 13. Termination for Non-Appropriation: The other provisions of this Contract notwithstanding, the County is prohibited by law from making commitments beyond the current fiscal year. Payment to Contractor beyond the current fiscal year is contingent on the appropriation and continuing availability of funding in any subsequent year. County has reason to believe that sufficient funds will be available for the full **Contract Term**. Where, however, funds are not allocated for any fiscal period beyond the current fiscal year, County may terminate this Contract without penalty by providing seven (7) days' written notice to Contractor.

The institution of proceedings under any bankruptcy, insolvency, reorganization or similar law, by or against Contractor, or the appointment of a receiver or similar officer for Contractor or any of its property, which is not vacated or fully stayed within thirty (30) days after the institution of such proceeding, will also constitute a breach. In the event of a breach, the non-breaching Party may provide written notice of the breach to the other Party. If the notified Party does not cure the breach, at its sole expense, within thirty (30) days after delivery of notice, the non-breaching Party may exercise any of its remedies provided under this Contract or at law, including immediate termination of this Contract.

15. Termination for Convenience: County may terminate this Contract, in whole or in part, for any reason, upon seven (7) days' advance written notice to Contractor.

Upon completion of the corrections satisfactory to the County, County will remit payment to Contractor.

c. Deny Payment: County may deny payment for any Work that does not comply with the requirements of the Contract or that Contractor otherwise fails to provide or complete, as determined by the County in its sole discretion. Upon County request, Contractor will promptly refund any amounts prepaid by the County with respect to such non-compliant Work.

Contractor's violation of this provision will constitute a material breach of this Contract, entitling the County to terminate the contract for breach. If this Contract is so terminated, Contractor shall be liable for actual and consequential damages to the County.

22. Entire Agreement/Binding Effect/Amendments: This Contract represents the complete agreement between the Parties and is fully binding upon them and their successors, heirs, and assigns, if any.
