

ADDENDUM #2
Public Works – Resource Conservation
Automation of Fiber Line at BCRC
RFP # 7205-21

March 17, 2021

The attached addendum supersedes the original Information and Specifications regarding RFP # 7205-21 where it adds to, deletes from, clarifies or otherwise modifies. All other conditions and any previous addendums shall remain unchanged.

Please note: Due to COVID-19, BIDS will only be accepted electronically by emailing purchasing@bouldercounty.org.

1. Question: Can the County provide a percentage of plastic bags or film in the inbound material? It's likely counted at the moment in the rejects number but knowing the plastic bags content in the inbound material would help refine the design.

ANSWER: The County has not broken out film as an unique fraction.

2. Question: Can the County provide some material composition on the ONP bales? Any ONP bale audits would be helpful.

ANSWER: The County has provided bale audit ranges in addendum 1. We do not identify out-throws by type.

3. Question: Does the County have a preferred location for any compressor additions? Can we offer alternatives or other locations for any compressor additions?

ANSWER: Yes, the County expects the proposer to identify required compressor needs. The current system has 2 compressors Primary-450ACFM

and secondary - 213 ACFM = 663 ACFM. We currently use 250 CFM with a 20% buffer for optical units and 140 CFM for the robotics.

4. Question: Appendix A is for produced composition. Is there an inbound material composition received at tipping floor available? Understanding the proposer is expected to produce #56 grades, can you provide percentage of each outthrows material: OCC, kraft bags, boxboard and kraft carrier board in the inbound material?

ANSWER: No. Addendum 1 provides produced composition and average product quality range for ONP products.

5. Question: Is prevailing wage required for both mechanical and electrical installation?

ANSWER: There are no prevailing wage requirements for this project.

6. Question: In the Addendum 1: answer to Question 1 says "The target range of quality for #56/#58 grades would be as follows: 0-8% outthrows/ 0-2% prohibitive prior to manual sorting." However, the ISRI spec #56 is 0-3% outthrow and 0-2% prohibitive. Which spec shall prevail?

ANSWER : Addendum 1 clarifies the expectation regarding ONP products produced. The proposer is designing a system that can achieve the range identified. 0-8% out-throws and 0-2% prohibitives prior to manual sorting.
