## **SPECIFICATIONS**

### **Purpose**

Boulder County is soliciting the services from a qualified scouter and developer who guides, advises, facilitates, develops, or produces either 1.) projects that will result in carbon reductions and/or the purchase(s) or production of verified and certified carbon offsets/credits, or 2.) local/regional direct investment in carbon offsetting, carbon reduction, or carbon-removal projects that are able to be third-party -verified. The goal of this solicitation is to remove or offset 100% of the cannabis-industry's approximately 6,500 MTCO<sub>2</sub>e annual emissions.

### **Background**

In February of 2014 the [Board of Boulder County Commissioners](#) authorized the creation of the Boulder County Energy Impact Offset Fund established through [Resolution 2014-41](#), which requires commercial cannabis cultivators to either source their electricity through renewable energy or pay a 2.16 cent surcharge per kWh. The fees from this surcharge are then placed into the Boulder County Energy Impact Offset Fund (EIOF). This fund in turn, is used to educate and support best in industry practices with regards to reducing energy usage as well as for funding other carbon reduction or offset projects. Below is the EIOF Mission statement, which highlights how the funds should be spent on projects that offset carbon emissions.

#### Boulder County Energy Impact Offset Fund (BCEIOF)

Mission: To support measures that offset the carbon emissions

Examples include (but are not limited to):

- Low interest loans or grants to income qualified property owners for rooftop solar or energy efficiency measures.
- Programs that accelerate the adoption of new technologies and operational methods that will result in less energy intensive cannabis grow operations.
- Programs that improve the industry's integration with local agricultural practices and organic farming methods for the purposes of reducing our dependence on fertilizers derived from fossil fuels.
- Purchasing and installing energy monitoring equipment at cultivation establishments and industry education for the use of this data.

With EIOF monies, Boulder County (“County”) seeks to establish a contract(s) with either a qualified Broker or project developer (“Contractor”) to support the mission of the Energy Impact Offset Fund through two potential pathways:

1. direct investment of these funds in local or regional carbon reduction/carbon removal projects that qualify for third-party verification; and/or
2. The purchase of carbon offsets (see carbon offset specifics below).

*\*Please note: Respondents are welcome to respond to either option or a combination of both options.*

The County anticipates spending no more than \$400,000 on all products and services rendered through this contract. We anticipate a Phase 2 of this work in future years, which would greatly expand on this work. Based on contractor performance and availability of additional funding, we may extend the contract for Phase 2. Future funding for Phase 2 may be sourced from the EIOF (described here) or from the Boulder County Innovation Fund (which will be announced at a later date).

**Option 1: Direct Investment in Local or Regional Projects or Carbon Removal Technology  
(strongly preferred option)**

The direct investment pathway is for project developers who have shovel ready or future projects that result in high impact carbon removal or reduction projects in Boulder County or throughout Colorado. Projects can include energy efficiency, biochar, Carbon Capture and Storage (CCS), (enhanced oil recovery does not qualify), carbon removal technology, oil and gas methane reductions, renewable natural gas, reforestation, regenerative agriculture, renewable energy deployment, point source GHG pollution reduction, or other projects and technology that result in the reduction or removal of greenhouse gas emissions. Projects eligible for consideration should have the following characteristics:

- Projects must be geographically bound to the state of Colorado;
- Projects or technology installation must be ready to implement by the end of 2022;
- Projects must have a defined budget;
- Projects or technology developers must provide a detailed analysis of the projected greenhouse gas emissions reductions associated with proposed projects. These projected emission offsets—reductions or removals—must be calculated using accepted methodologies and will be subjected to third party verification. *(PLEASE NOTE: The final contract will include provisions outlining consequences for under-delivery of greenhouse gas emissions reductions or delayed or incomplete project implementation)*
- Projects that have demonstrated and quantifiable ecosystem services co-benefits that enhance resilience to climate change enabled through carbon capture;

- Strong preference for equity-oriented projects such as those that benefit low-income communities;
- If proposing multiple projects, please prepare project prioritization criteria to help the County move toward a list of actionable project types ranked by a combination of factors including cost, ROI, emissions reduction potential, project timeline, etc.

### **Option 2: Carbon Offset/Credit Developer or Broker**

The County's Office of Sustainability, Climate Action & Resilience is committed to utilizing a range of different climate stabilization strategies, but all such strategies must comply with the highest standards of rigor and transparency in assessing and tracking their impact on reducing greenhouse gas impacts. Based on this commitment, the County will utilize the recently developed offsetting framework developed by a broad consortium of sector leaders called the [Oxford Principles for Net-Zero Aligned Carbon Offsetting](#). All considerations of purchase of carbon offsets will need to align with the 4 principles outlined in this Framework, particularly a focus and priority on projects that achieve substantive atmospheric carbon removal that drive towards a goal of net zero carbon emissions at all scales.

Using these principles, the County will engage the contractor to retire carbon offsets for application against the greenhouse gas emissions of Boulder County's cannabis industry. County purchased offsets would also need to comply with the following requirements:

- Provide Carbon Credits that are third-party verified and registered with one or more the following: Climate Action Reserve, Verified Carbon Standard, Gold Standard, and American Carbon Registry, City Forest Credits.
- Preference for Colorado or Boulder County locally sourced carbon offset projects, although we would also entertain regional, national and international verified carbon credits knowing that the price differentials will be dramatically different per location.
- Provide to the County, via links to the appropriate Offset Registry, all associated project design, development, validation, third-party verification and issuance documentation for Carbon Credits that the County may consider for purchase. Provide links to the public retirement report for those credits within the associated Offset Registry to the Contract Manager or designee within ten (10) business day or as mutually agreed upon between the Contractor and the Contract Manager or designee.
- Identify vintage of all verified Carbon Credits or proven equivalent. Coordinate with County to identify 2020-2021 vintage and newer Carbon Credits or carbon removal certificates.
- Retire all Carbon Credits and Green-e Climate Certified Carbon Credits, or proven equivalents purchased by the County within five (5) business days of receiving written notification from the Contract Manager or designee (or as otherwise mutually agreed upon between the Contractor and Contract Manager or designee). No Carbon Credits

or Green-e Climate Certified Carbon Credits, or proven equivalent shall be re-sold or exchanged.

- Provide a retirement certificate for each County purchase, within thirty (30) business days or as mutually agreed upon between the Contractor and the Contract Manager or designee. The retirement certificate shall include:
  - Serial numbers of the Carbon Credits
  - Specific Offset Registry in which the Carbon Credits have been retired
  - Project name
  - Volume total
  - A Screenshot of offset credit retirement from the Offset Registry
- No Carbon credits shall be re-sold or exchanged. The Contract/broker will provide a retirement certificate for each County purchase, within thirty (30) business days or as mutually agreed upon between the Contractor and the County Contract Manager or designee.

All purchases made by other local government entities will be transactions between that entity and the awarded vendor; Boulder County will not be responsible for any such purchases.

**Evaluation of Proposals**

Contractor will exercise complete authority over its personnel and agents and will be fully responsible for their actions.

13. Termination for Non-Appropriation: The other provisions of this Contract notwithstanding, the County is prohibited by law from making commitments beyond the current fiscal year. Payment to Contractor beyond the current fiscal year is contingent on the appropriation and continuing availability of funding in any subsequent year. County has reason to believe that sufficient funds will be available for the full **Contract Term**. Where, however, funds are not allocated for any fiscal period beyond the current fiscal year, County may terminate this Contract without penalty by providing seven (7) days' written notice to Contractor.

Upon County's request, Contractor must correct rejected work at Contractor's sole expense within the time frame established by the County. Upon completion of the corrections satisfactory to the County, County will remit payment to Contractor.

c. Deny Payment: County may deny payment for any Work that does not comply with the requirements of the Contract or that Contractor otherwise fails to provide or complete, as determined by the County in its sole discretion.
