## **RETURN TO LEARN**

Guidance for Students and Staff in Schools and Childcare in Boulder County Following a Positive COVID-19 Symptom Screen

Return to Learn cannot be used for anyone that has a known exposure to someone with COVID-19 within 14 days of symptom onset. Any symptomatic individual should isolate from symptom onset and pursue evaluation, including testing, as soon as possible. If symptoms develop at school and point of care testing is available, testing may be performed following an initial assessment using the Addressing Symptoms at School tool. Anyone who tests positive using any viral diagnostic test type (not antibody tests) should be treated as a case and should isolate. No additional test results can end a symptomatic positive individual's isolation period early. Symptomatic people within 90 days of a previous positive viral diagnostic test or who are fully vaccinated must consult with their child care facility or school to determine recommendations for their return.

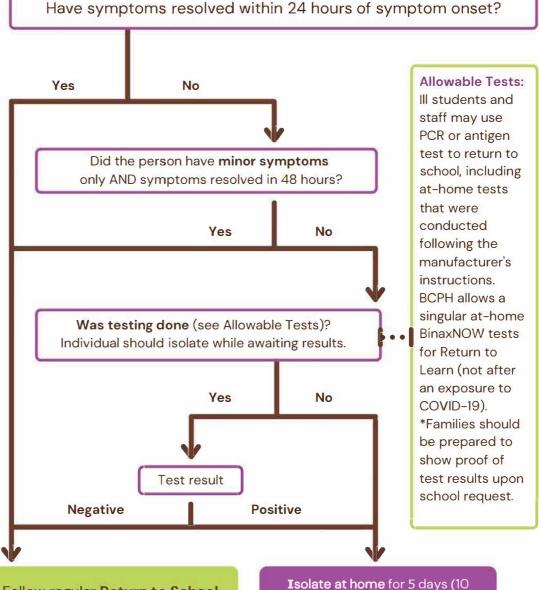

Reminder: Unchanged, usual symptoms of a documented chronic condition known to the school should not prompt exclusion.

## **Major Symptoms**

- · Fever, Chills
- Temperature of ≥ 100.4° F
- · New or worsening cough
- Shortness of breath or difficulty breathing
- · Loss of taste or smell

## **Minor Symptoms**

- Sore throat
