

Emergency Notifications from Boulder County Communications

Information on Boulder County's Emergency Notification System

Everbridge provides confirmation status for alerts. The confirmation status, as defined by Everbridge is as follows:

- **Confirmed:** the contact has confirmed receiving the message during the broadcast duration.
- **Confirmed Late:** the contact has confirmed receiving the message after the broadcast duration has ended. This status is only available on SMS and Mobile Push Alert delivery paths.
- **Not Confirmed:** the contact has not yet confirmed receiving the message or may have attempted to confirm after the allowed time. All contacts are in this status at the beginning of a notification.
- **Unreachable:** the contact has not received the notification and the status will show as 'Not Delivered' and provide a reason why.

One thing to note is that "confirmation" means that the recipient of the alert followed the instruction to confirm receipt of the message (e.g. press 1 or click link). This confirmation is designed to stop the system from repeatedly sending the alert to additional contact methods for each recipient. It does not necessarily mean that those messages weren't received, it means that the recipient didn't press 1 or click the link.
