The answer to Question 12, Will there be a process for someone to have addressed household hazardous waste, e.g., propane tanks, batteries, ammunition, etc., before people conduct asbestos surveys? In Oregon, this was referred to as the step 1 process, should read:

No. We do not anticipate finding much household hazardous waste due to the nature of this disaster. Please see the answer to question 3, addressed on Addendum 1: Surveys will be required to stay in front of debris removal contractors; correct. There are currently an estimated total of 828 parcels included in the County's PPDR program. And, the estimated total project timeline is 4 months. The County needs a survey completion rate of a minimum of 8 per day (based on a 6 day work week) for the duration of the project.
