## **APPENDIX A**

---

### **COMMUNITY OUTREACH SUMMARIES**

# **Engagement Summary**

**Public Outreach  
Spring 2023**

# Public Engagement Summary of Input

During the first public engagement campaign of the US 287 Vision Zero Safety & Mobility Study, a virtual meeting room was available from February 28 – March 19, 2023 for the public to learn about the study's background, goals, timeline, and safety and mobility analysis results to-date. The meeting also collected public feedback through a comment form, survey, and interactive map.

## Primary Engagement Goals

- ▶ Identify public priorities for eliminating fatal and serious accidents
- ▶ Gather feedback on locations and types of multimodal safety concerns
- ▶ Understand key destinations along the US 287 corridor

## PUBLIC INPUT & ENGAGEMENT

**91** open-ended responses

**38** purpose and need survey responses

**43** map comments **36** likes/dislikes

**14** zip codes represented  
Top three zip codes: 80026, 80516, 80501

# Survey Responses by Zip Code

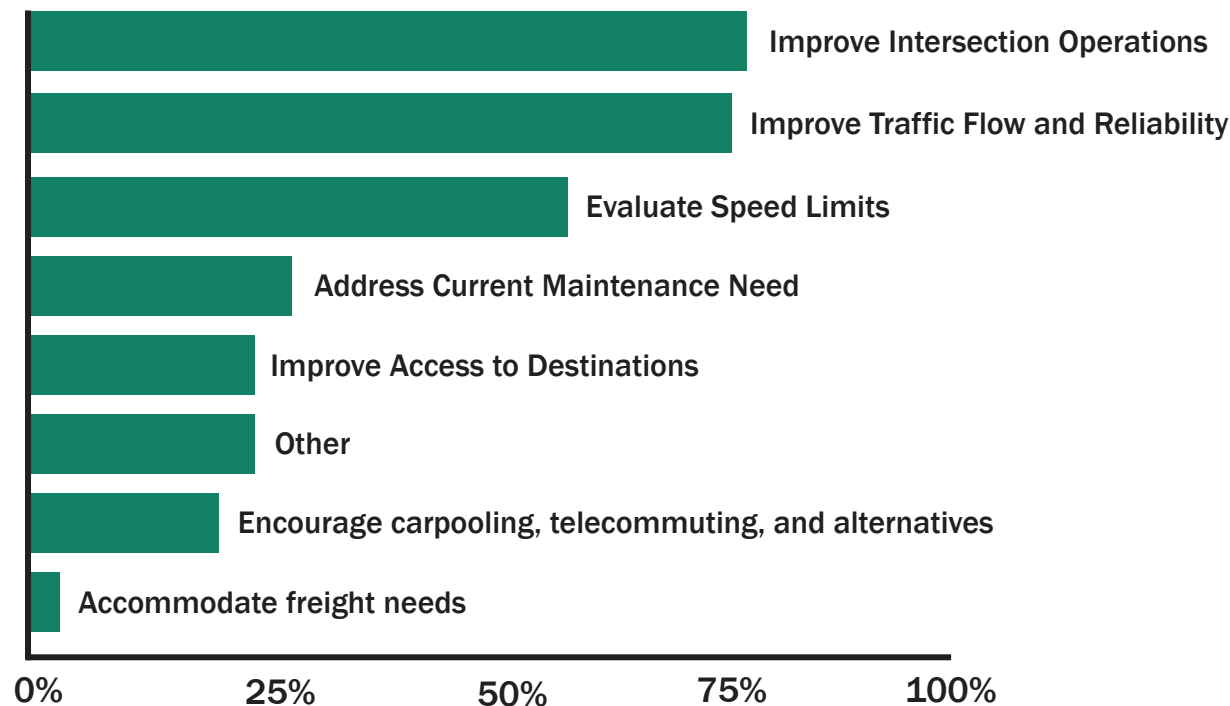

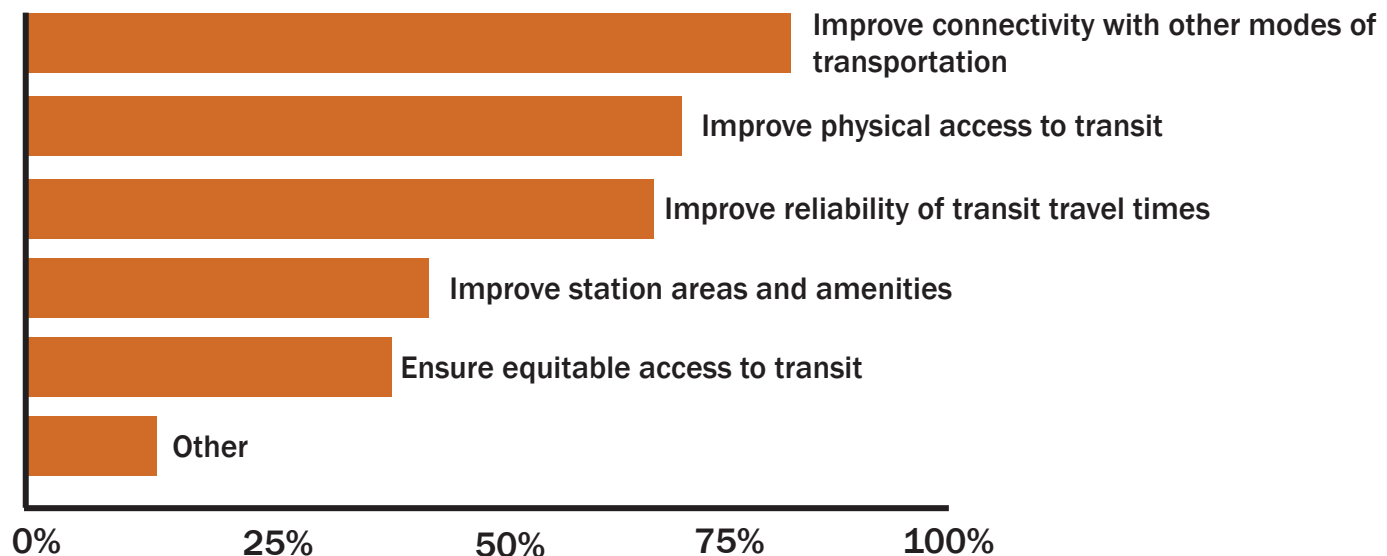

# Purpose and Need Survey

A survey was administered to gather feedback on safety improvements needed to support people walking, driving, rolling, taking transit, and driving on US 287. Responses will inform the project's Purpose and Need Statements, which are required on applications for federal grant opportunities and construction funding.

**Question 1: Regarding motorized traffic (cars, trucks, freight), what are the best ways to eliminate fatal and serious injury crashes? (Please select three).**

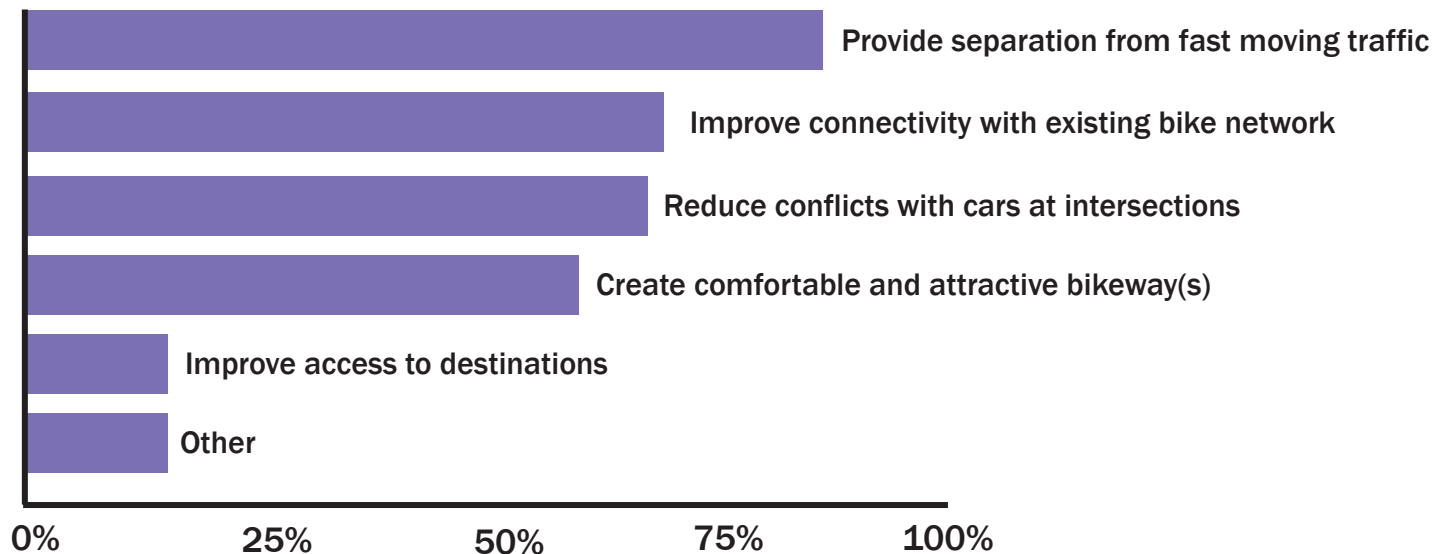

**Question 2: The US 287 Bus Rapid Transit Feasibility Study sought transit-related service enhancements and capital investments. The US 287 Vision Zero Safety & Mobility Study will recommend safety improvements. How can the goals of these two studies be integrated? (Please select three).**

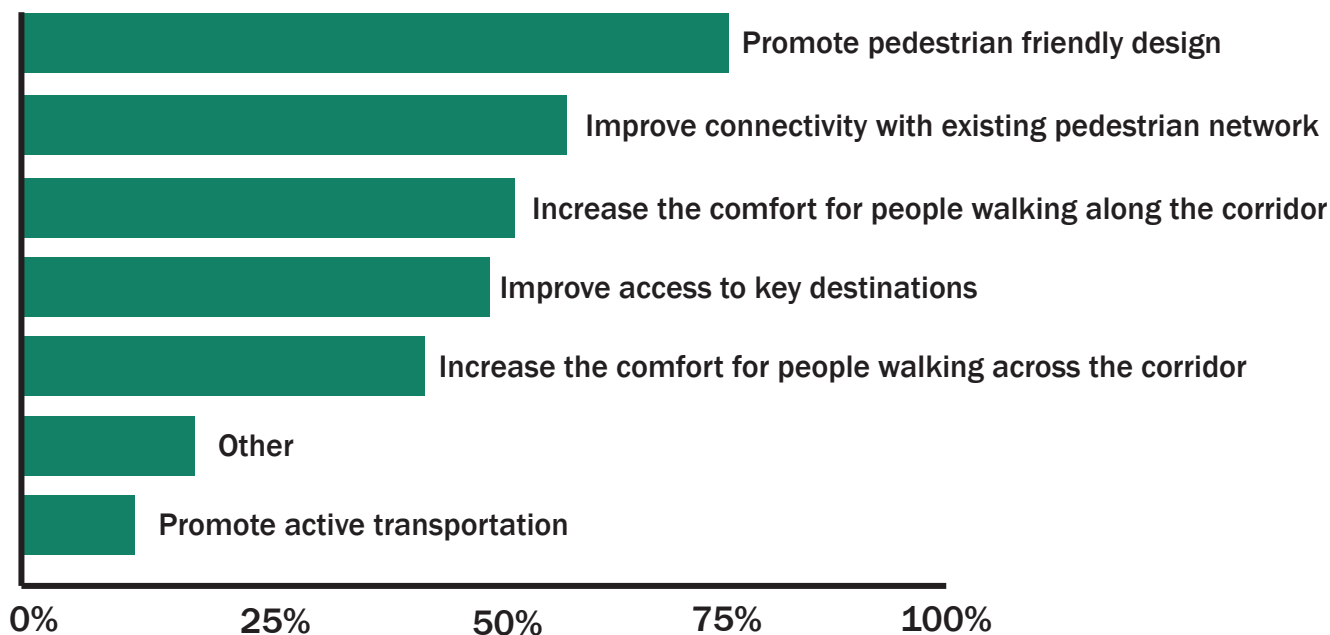

# Purpose and Need Survey

**Question 3: How can we best eliminate fatal and serious crashes for bicyclists? (Please select three).**

**Question 4: How can we best eliminate fatal and serious crashes for people walking and rolling along the corridor?**

# Public Input Themes

Public feedback was submitted through the comment form, survey, interactive map, and direct outreach to project staff. The input was categorized into 10 themes to track community sentiment around improvement priorities. The distribution of comments by theme is organized from highest to lowest percentage on the following two pages (some comments touched on multiple themes and were sorted into more than one theme category). Comments submitted through the interactive map were also organized into the themes and shown on a map at the end of the summary.

15%

## Separated Multimodal Facility

The most regularly mentioned theme from the community comments was a desire for separated facilities for multimodal travelers, creating a buffer from high-speed traffic along the corridor.

*"When speeds are above 45...I feel uncomfortable being on a road shoulder no matter how wide it is. It needs to be a physically separate bike path at that point."*

14%

## Speed Limit Enforcement

Along many sections of the corridor, speed limits are not adhered to, which many feel leads to more dangerous conditions.

*"Support safety by consistently enforcing speed limits and traffic rules."*

14%

## Median

Emphasis was placed on the importance of a median or barrier to separate northbound and southbound lanes on US 287.

*"The most efficient means of separating the oncoming traffic would be rumble strips and concrete lane barriers."*

13%

## Multimodal Connectivity

Requests were made to increase multimodal connectivity along the corridor, such as through providing safe and comfortable connections to destinations.

*"There is no sidewalk on the west side of Highway 66 to the businesses on the southwest corner of Highway 287. This forces walkers to cross 287 twice at intersections where the speed limit is 60 miles per hour."*

# Public Input Themes

12%

## Pedestrian Safety

There was a desire for increased pedestrian safety using solutions such as grade separated crosswalks and accessibility enhancements at intersection crossings.

*"Any crosswalk that crosses 287 HAS to have lights, sound, or a signal of some kind."*

12%

## Traffic Signal Operations

Better signal timing was cited for its potential to improve traffic flow and reduce dangerous driving conditions along the corridor.

*"Reduce 'yellow light speed up' syndrome."*

12%

## Vehicular Operations

Specific safety concerns along the corridor and at/or approaching intersections were shared, highlighting unclear driver expectations and unsafe driver behaviors, such as at locations where lanes merge.

*"Left turning traffic out of Walmart on 287 at Parkridge Ave frequently turns wide, hitting traffic coming out of the Willis heights neighborhood."*

4%

## Education

Public education could help reduce the dangerous behaviors that most commonly lead to crashes.

*"Some of it seems cultural - humans behaving recklessly and without regard for anyone else's life or safety."*

4%

## Roundabouts

A handful of respondents stated the potential value of replacing signalized intersections with roundabouts.

*"Selective use of this option [roundabouts] would be most effective at a few undeveloped intersections."*

2%

## Weather Impacts

Site specific safety concerns related to weather were identified.

*"Snow is consistently plowed into the sidewalks preventing pedestrian traffic without using the busy highway."*

# **Engagement Summary**

**Public Comments  
and Surveys**

**Fall 2023**

# Public Engagement Summary of Input

During the Fall 2023 Public Engagement of the US 287 Vision Zero Safety & Mobility Study, a self-paced virtual Open house was available from August 21 – September 17, 2023 for the public to learn about the study's progress to date, including safety analysis, recommendations, and a concept for a proposed walk-bike path. The meeting also collected public feedback through a comment form, surveys, and an interactive map.

## Primary Engagement Goals

- ▶ Gather feedback on proposed safety recommendations
- ▶ Learn about key destinations and support for the proposed walk and bike path
- ▶ Share information about the proposed median barrier

## PUBLIC INPUT & ENGAGEMENT

**208** Total Participants

**98** Open-Ended Responses

**82** Map Comments

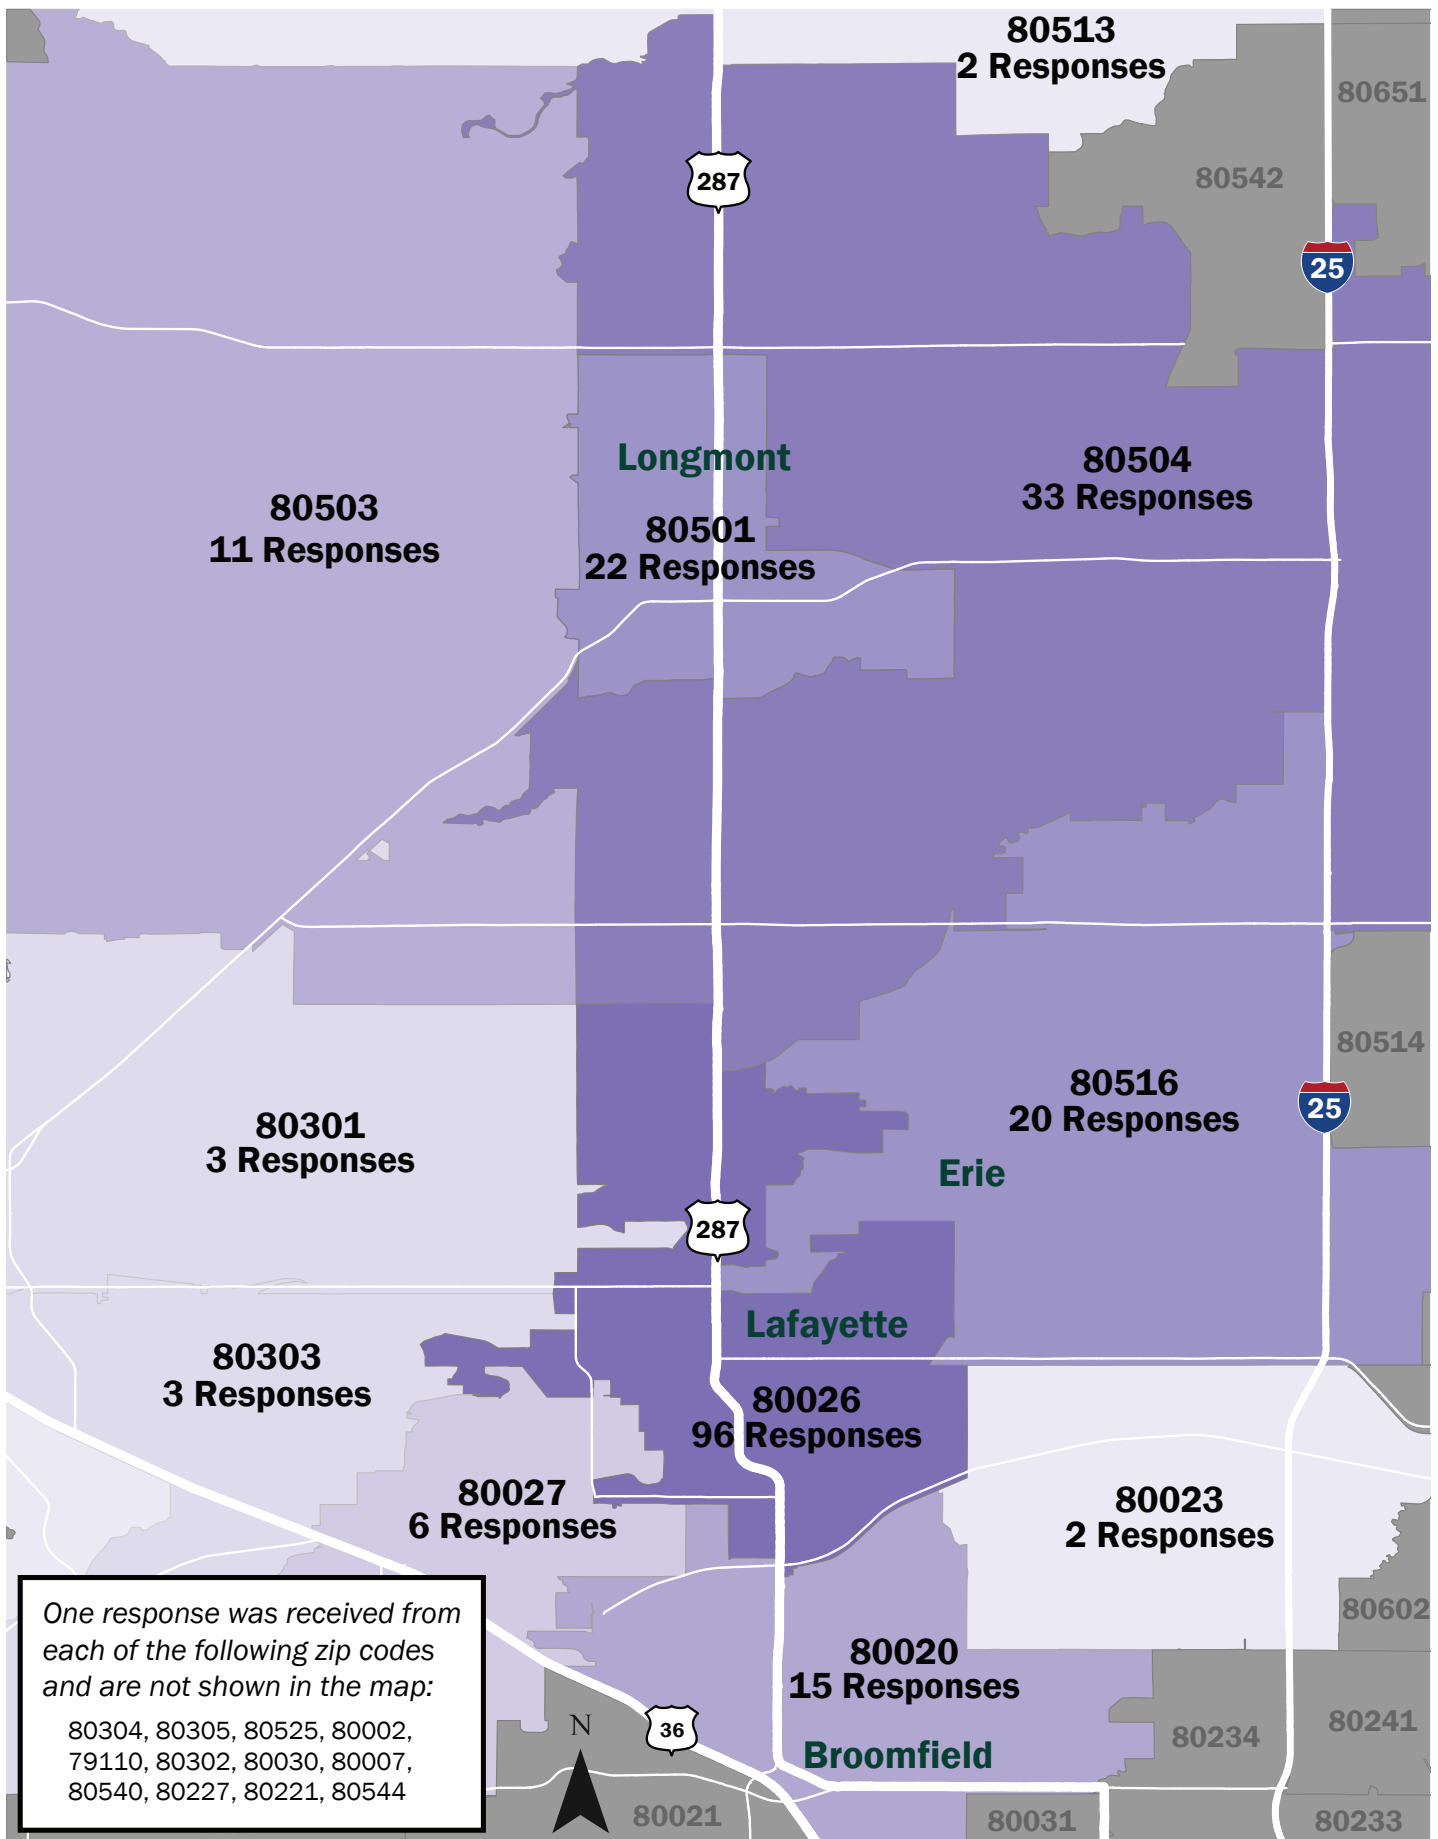

**23** Zip Codes Represented

Top Three Zip Codes: 80026, 80504, 80501

# Survey Responses by Zip Code

## Open-Ended Comment Summary

In this phase of public engagement, community members had the opportunity to submit open-ended feedback via:

- ▶ Median Barrier Survey
- ▶ Walk & Bike Path Survey
- ▶ Safety Recommendation Map Survey
- ▶ Email

Word Cloud compiled from all open-ended comments.

The following broad themes were identified following analysis of all open-ended comments:

# Safety

## Speed

## Traffic Operations

## Enforcement

## Bike & Pedestrian

## Development

## Median

# Transit

## Other

# Open-Ended Comment Themes

Theme percentages do not add up to 100% due to some comments addressing more than one theme.

## Safety

is mentioned in  
**79%**  
of all comments

**Many comments explicitly acknowledge one or more safety problems along the corridor.**

- Support safer infrastructure for bicyclists and pedestrians.
- Need for signage and visibility improvements along the corridor.

## Project Impact

This study has recommended many safety improvements for intersections and sections throughout the corridor, including developing concept designs for five locations. Safety recommendations include: advance warning signs and flashing beacons to increase driver awareness of upcoming intersections; raised crossings at some right-turn bypass lanes and improved crosswalk striping to improve the visibility of people walking and bicycling; and a weather station to support proactive snow plowing.

## Speed

is mentioned in  
**32%**  
of all comments

**Vehicle speed is a top concern for a number of residents, with a focus on both the lowering of speed limits and enforcement of existing and future speed limits.**

- Lowering the speed limit to 45 mph is requested along the more developed segments of the corridor.
- Two comments suggested the speed is currently too slow, mainly due to the number of traffic signals and high traffic volume.

## Project Impact

CDOT completed a speed study to evaluate potentially reducing posted speed limits through Lafayette. The results of the study should be available in early 2024. Traffic signal timing coordination to the posted speed limit in urban areas is recommended in the near-term.

## Traffic Operations

is mentioned in  
**30%**  
of all comments

**Traffic patterns and signal timing are impacting roadway users and decreasing safety along the corridor.**

- Signal timing affects motorists who may not have enough time to execute turning movements or find that they are frequently stopped at signals.
- People trying to bicycle or walk across intersections noted that they do not have enough time to cross at some signals.
- A number of comments requested traffic signals at currently unsignalized intersections, noting an increase in traffic volumes due to new development.
- Some comments asked for restricting right-on-red turns.

## Project Impact

Signal timing evaluations are recommended at all signalized intersections along the corridor. Protected left turn signal operations to reduce broadside crashes and increase safety for crossing bicyclists and pedestrians are recommended at key intersections. No Right Turn on Red is recommended for many signalized intersections in urbanized sections of Longmont and Lafayette.

# Open-Ended Comment Themes

Theme percentages do not add up to 100% due to some comments addressing more than one theme.

## Enforcement

is mentioned in  
**26%**  
of all comments

**Many comments reflect on the need for increased enforcement along the corridor.**

- Motorists frequently run red lights.
- Municipal revenue from traffic enforcement (i.e. tickets) could be used to fund the implementation of this study's recommendations.

## Project Impact

Increased enforcement, including speed photo radar, is recommended corridor-wide.

## Bike & Pedestrian

is mentioned in  
**25%**  
of all comments

**One out of four comments note that US 287 is currently unsafe and uncomfortable for people walking and bicycling.**

- Many comments indicate a need for safer bicycle and pedestrian facilities and intersection crossings along the corridor.
- Focus on increasing safety for school children and other vulnerable users.
- Five comments suggest that driving should be the transportation mode of highest priority.

## Project Impact

Pedestrian/bicycle-focused recommendations include intersection improvements such as turning radius reduction to slow vehicle speeds and crosswalk "bulbouts" in some locations to shorten pedestrian crossing distances. A separate walk and bike feasibility analysis was completed and the preferred alignment recommended.

## Development

is mentioned in  
**15%**  
of all comments

**Impacts from growing development along the corridor contribute to safety issues and decrease comfort along the corridor.**

- Development along and near 287 has contributed to increased traffic volume.
- Noise and exhaust from vehicle traffic – especially trucks – discourage bicyclists and pedestrians from using 287 as well as affect nearby residents' quality of life.

## Project Impact

Many recommendations have been included to improve safety in response to traffic volumes along the corridor, including engineering mitigations to reduce speeds, improve traffic signal operations, and increase the safety of people walking and bicycling.

# Open-Ended Comment Themes

Theme percentages do not add up to 100% due to some comments addressing more than one theme.

## Median

is mentioned in  
**10%**  
of all comments

**Many comments are in favor of a median barrier to improve safety along the corridor.**

- It is important to consider design factors such as safety of U-turns.
- Some comments note that the median barrier alone will not address an underlying safety concern of excessive speeds.

## Project Impact

As part of this study, a 12-mile median barrier concept for two rural segments of US 287 has been developed, and planning-level analysis of U-turn movements and locations conducted. Boulder County has applied for a \$21 million grant to install the median barrier.

## Transit

is mentioned in  
**5%**  
of all comments

**Improved transit service would increase connectivity and reduce vehicle volumes along the corridor.**

- Comments generally favor Bus Rapid Transit, though some comments indicate concern about limited bus service, or a preference for light rail service instead.
- There is interest in integrating transit improvements with safe infrastructure for pedestrians and bicyclists traveling to and from transit stops.

## Project Impact

All future BRT stops along the corridor were evaluated for safety improvements, including opportunities to increase access to and from the stops for people walking and bicycling. When applicable, the conceptual designs developed in this study incorporated future BRT operations, such as bypass lanes.

## Other

is mentioned in  
**14%**  
of all comments

**Other comment themes include use of funding, technology, and agency collaboration.**

- Some comments indicated frustration that funding is not being used to address speed-related issues, and a few other comments opposed this study and its recommendations more generally as a poor use of public funds.
- There is interest in EV charging options along the corridor.
- A few comments indicated that agency collaboration on this corridor can be confusing or unclear, and community members' complaints have been unaddressed.

## Project Impact

All community feedback from this study will be communicated to the US 287 Coalition, which is comprised of local elected officials and staff for the communities of Fort Collins, Berthoud, Loveland, Longmont, Erie, Lafayette, and Broomfield, as well as transportation partners like NFRMPO, DRCOG, RTD, and CDOT.

# Individual Survey Results

Following presentation of the proposed walk and bike path and median barrier concept, community members were invited to fill out surveys regarding current travel behaviors, expected usage of new facilities, and other thoughts regarding the proposed improvements.

## WALK & BIKE PATH SURVEY - 60 PARTICIPANTS

What mode do you currently use to travel on or across US 287? Participants can select multiple modes.

**59 out of 60** participants note that they **drive** on the corridor.

In addition to driving:

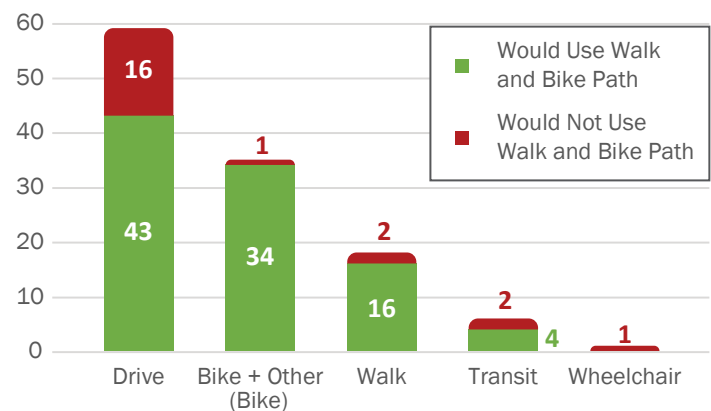

**35** participants also **bike** on the corridor.

**18** walk

**6** take **transit**

And **1** participant indicated that they travel by **wheelchair** on the corridor.

Participants across transportation modes were asked if they would use the proposed walk and bike path. Nearly all participants who travel the corridor by bike indicated they would use the path, whereas about three in four drivers indicated they would.

## MEDIAN BARRIER SURVEY - 24 PARTICIPANTS

The majority of open ended responses to the median barrier survey were in support of the project, while some indicated that a median barrier is a step in the right direction but alone would not be enough to improve safety along the corridor. Several comments suggested modifications and considerations for the median barrier, such as extending it or locating in other areas, but there was no direct opposition to the median barrier concept in this survey.

**As this project moves forward into design, the project team will continue to conduct outreach with property owners along the corridor.**

Do you live or own property along US 287 in the proposed median barrier area?

Note: No participants answered that they live or own property in the proposed median barrier area north of Longmont.

# Individual Survey Results

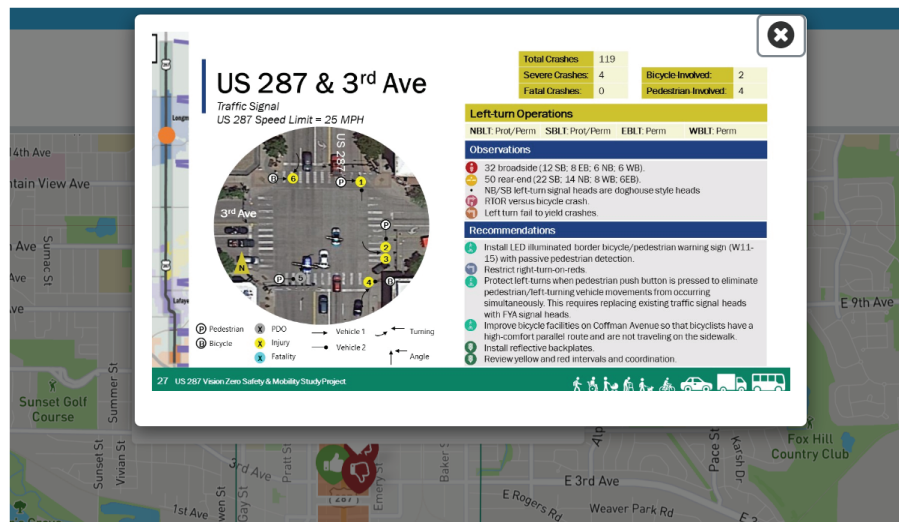

Location and Distribution  
of Map Comments:

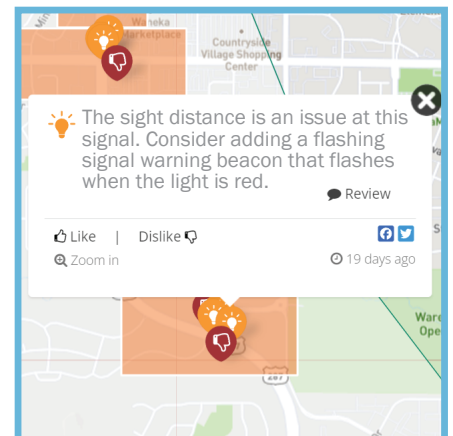

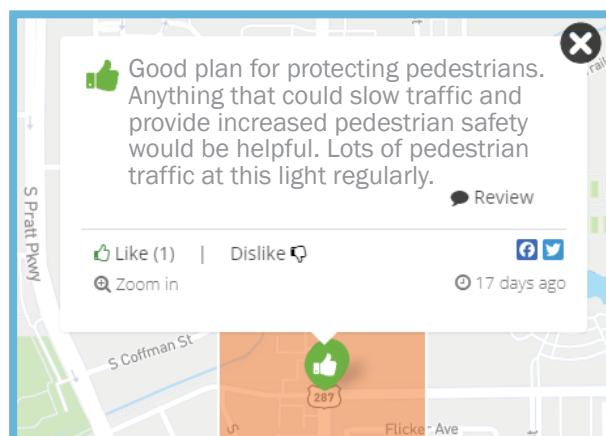

## SAFETY IMPROVEMENTS MAP SURVEY - 32 PARTICIPANTS

### 82 MAP COMMENTS

Recommended safety improvements were displayed on an interactive map platform for community members to review and provide their feedback in the form of map pins.

Many participants provided “other suggestion” map comments with insights into traffic patterns and issues at specific intersections. Some comments indicated concerns with how certain safety improvements such as eliminating right turn on red would impact traffic flow at several intersections, and several comments expressed concern with high speeds throughout the corridor and unsafe conditions for bikes and pedestrians.

# **Engagement Summary**

**Draft Report**

**Public Review**

**Fall 2023**

# Public Engagement Summary of Input

From November 17 to December 3, 2023, community members had the opportunity to review the US 287 Vision Zero Safety & Mobility Study draft report. A survey was available to provide feedback regarding how well the recommendations met study goals and identify any additional corridor issues that should be examined in future studies.

## Primary Engagement Goals

- ▶ Gather feedback on whether the recommendations will eliminate serious injury and fatal crashes along US 287.
- ▶ Gather feedback on whether the recommendations will improve mobility along US 287 for people using any travel mode.
- ▶ Identify additional corridor issues Boulder County and the US 287 Coalition should examine following completion of the study.

## PUBLIC INPUT & ENGAGEMENT

**160** Total Participants

**104** Open-Ended Responses

**20** Zip Codes Represented  
Top Three Zip Codes: 80026, 80020, 80504

# Survey Responses by Zip Code

# Open-Ended Comment Summary

In this phase of public engagement, community members had the opportunity to submit open-ended feedback regarding the Draft Report via email or by taking a survey with two multiple choice and one open ended question.

**Participants were asked to state their level of agreement with the following statements:**

These recommendations will eliminate serious injury and fatal crashes along US 287.

These recommendations will improve mobility along US 287 for people using any travel mode.

**Participants were asked if there are additional corridor issues Boulder County and the US 287 Coalition should examine following the completion of this Study, and if so, what.**

Word Cloud compiled from all open-ended comments.

Many of the open-ended and emailed comments referenced experiencing excessive speeds and that speed limits were too high along the corridor. Others expressed a continued need for multimodal and transit connectivity and safety. Several comments provided suggestions or concerns regarding existing conditions at specific intersections or segments of the corridor, such as signal timing or turn geometry issues. Other themes identified throughout the open-ended comments revolved around enforcement needs, residential barriers for safety and noise mitigation, concerns regarding Bus Rapid Transit and light rail, and suggestions for other corridors throughout Boulder County.

# Open-Ended Comment Themes

*Among the open-ended comments, the following themes arose most frequently.*

## Speed

**Many comments identify high speeds and signal timing as a continued concern contributing to feeling unsafe as a driver or non-motorized user along the corridor.**

- Re-evaluation of speed limits is requested throughout the corridor.
- Lack of enforcement is identified in some comments as a concern, and several comments request increased enforcement presence to combat both speeding and red light running.

## Project Impact

The study recommended addressing both speeding and signal timing improvements along the corridor. In Fall 2023, CDOT completed a speed study to evaluate potentially reducing posted speed limits along US 287 through Lafayette. The results of the study should be available in early 2024. Traffic signal timing coordination to the posted speed limit in urban areas is recommended in the near-term. Other signal timing updates were recommended such as improving left-turn operations. Additionally, enforcement of speeds and red-light running was recommended.

## Multimodal Connectivity

**Participants expressed a desire for improvement of multimodal facilities for non-motorized users, such as connections with bicycle facilities along and intersecting the corridor and proposed BRT stations.**

- Safe and frequent crossing locations are a high priority for participants.
- Several comments identify concerns regarding access to transit facilities for pedestrians and bicyclists.

## Project Impact

The proposed Walk-Bike Path would provide an off-street, separated facility along the US 287 corridor. Based on public feedback, it is recommended that a proposed walk-bike path be separated from US 287 as far as possible from the roadway, and connect with existing transit and future BRT stations. In segments where there are right of way constraints, it is recommended that a physical, vertical barrier be installed to protect people walking and people biking on the walk-bike path from potential conflicts with vehicles. Additionally, the study recommends completing gaps in the multimodal network to create complete connections to proposed BRT stations and intersecting pedestrian and bicycle facilities.

## Specific Intersection Improvements

**Some comments indicated concerns or suggestions regarding specific intersections along the corridor.**

- Participants identified the intersection with Dillon Road/NW Parkway as an area of confusion that contributes to feeling unsafe.
- Other intersections identified by multiple open-ended comments include Stonehenge Drive, Dawson Drive, and Arapahoe Road.

## Project Impact

Safety improvements were identified for each intersection along the corridor with identifiable crash trends. These recommendations were informed by engineering standards, site visits, and public feedback. Engineering safety improvements include traffic signal improvements, signage improvements, turning movement improvements, access management, pedestrian and bicycle improvements, and a center median barrier. Non-engineering recommendations include enforcement, education, encouragement, and equity mitigations.

Ute Highway

Total Crashes	1222
Severe Crashes:	27
Fatal Crashes:	3

## Observations

- The 3 fatal crashes were 2 pedestrian and 1 bicycle.
- Several locations with broadside crashes and approach turn crashes accessing driveways.
- Pedestrian zone between 2nd Avenue and Longs Peak Avenue. Pavement markings on sidewalk to walk bike.
- There were 4 pedestrian/bicycle crashes at mid-block crossing location between 5th Avenue and 6th Avenue.
- Significant number of rear end crashes between signalized intersections.
- Significant number of parked vehicle crashes. The majority happen between 2nd Avenue and 9th Avenue.

**US 287 VISION ZERO SAFETY AND MOBILITY STUDY**  
Signals & Speed Limits  
Study Area Middle Extent

# Non-Intersection Crashes

## Recommendations

- Recommend corridor-wide access control plan.
- Prioritize installing a median for access control at high crash driveways (picture of locations to the right).
- Install RRFB or PHB at midblock crossing locations between 3<sup>rd</sup> Avenue and 4<sup>th</sup> Avenue, 4<sup>th</sup> Avenue and 5<sup>th</sup> Avenue, and 5<sup>th</sup> Avenue and 6<sup>th</sup> Avenue. Can utilize existing overhead mast arm equipment. **The city installed RRFBs this summer at the above midblock locations.**
- Consider advanced intersection warning signs with activated beacons in the southbound direction approaching Park Ridge Avenue (entering urban area).
- Review yellow and red intervals and coordination throughout the corridor.
- Enforcement: increased speeding, red-light running, and DUI enforcement.
- Education: city-wide education campaign for bicycle safety.

## Observations

- 14 approach turn (13 SB; 1 NB)
- 31 rear end (20 SB; 10 NB; 1 EB)
  - 4-section FYA signal heads in each direction

## Recommendations

- Evaluate updating SB left turn to protected only during peak periods (4-section FYA already installed).
- Consider advanced intersection warning signs with activated beacons in the southbound direction approaching Park Ridge (entering urban area).
- Install reflective backplates.
- Review yellow and red intervals and coordination.

A vertical map of Louisiana showing the location of Longmire. An orange dot marks Longmire, situated north of Lafayette and south of Lake Charles. The map includes labels for 'Longmire' and 'Lafayette', and a highway shield for '282'.

US 287 Speed Limit = 45 MPH

## Left-turn Operations

## Observations

- 

## Recommendations

- Left-turn signal operations have been updated to protected only which will mitigate approach turn crashes. No additional recommendations.
- Intersection Compliance Monitoring cameras.
- Install object marker sign (OM3-L) at each of the channelized right turn islands.
- Reconstruct the SBR channelized right turn geometry to improve turn visibility.
- Install reflective backplates on EB/WB through traffic signal heads
- Review yellow and red intervals and coordination.
- BRT Recommendations: NB/SB BAT lane queue jumps.

## Left-turn Operations

NBLT: Perm

SBLT: Perm

EBLT: Perm

WBLT: Perm

## Observations

- 19 approach turn (12 NB; 7 SB)
- 16 broadside (6 NB; 5 WB; 4 SB; 1 EB)
- 26 rear end (13 SB; 11 NB; 1 WB; 1 EB)

- Ped/bike trend: left-turns failing to yield ROW to ped/bike
- Ped/bike trend: RTOR versus bike

## Recommendations

- Evaluate updating NB/SB left turn to permitted-protected or protected only during peak periods. This requires replacing existing signal heads with FYA.
- Install LED illuminated border bicycle/pedestrian warning sign (W11-15) with passive pedestrian detection.
- Restrict right-turn-on-reds.
- Protect left-turns when pedestrian push button is pressed to eliminate pedestrian/left-turning vehicle movements from occurring simultaneously. This requires replacing existing traffic signal heads with FYA signal heads.

- Enhance bicycle lane crossing markings across 287.
- Improve bicycle facilities on Coffman Avenue so that bicyclists have a high-comfort parallel route and are not traveling on the sidewalk.
- Install reflective backplates.
- Review yellow and red intervals and coordination.
  - BRT Recommendations: NB/SB BAT lane queue jumps.
- Re-stripe EB/WB intersection approaches to accommodate a bicycle lane (see CDOT design).

## Left-turn Operations

NBLT: Prot/Perm	SBLT: Prot/Perm	EBLT: Perm	WBLT: Perm
-----------------	-----------------	------------	------------

## Observations

- 24 approach turn (10 NB; 7 SB; 4 WB; 3 EB)
- 18 broadside (6 SB; 5 EB; 4 NB; 3 WB)
- 22 rear end (16 NB; 3 EB; 2 SB; 1 WB)
- Left-turns failing to yield ROW to ped/bike
- RTOR versus bike
  - NB/SB signal heads are doghouse

## Recommendations

- Evaluate updating left-turn operations to protected only during peak periods. **Longmont is working towards implementation on this recommendation.** Updating to protected left-turns will eliminate conflict between pedestrians and left-turning vehicles.
- Install LED illuminated border bicycle/pedestrian warning sign (W11-15) with passive pedestrian detection.
- Restrict right-turn-on-reds in westbound direction.
- Improve bicycle facilities on Coffman Avenue so that bicyclists have a high-comfort parallel route and are not traveling on the sidewalk. Install reflective backplates
- Review yellow and red intervals and coordination.
  - BRT Recommendations: NB/SB BAT lane queue jumps; remove/replace channelized right-turn island to accommodate the BRT lane and replace existing traffic signal.
  - City of Longmont currently has an ongoing TIP project at this intersection where recommendations include a full intersection rebuild, potential grade separation of pedestrians/bicycles at Oligarchy Ditch (south of intersection), and protected pedestrian/bicycle movements at the intersection

## Left-turn Operations

NBLT: Perm	SBLT: Perm	EBLT: Perm	WBLT: Perm
------------	------------	------------	------------

## Observations

- 18 approach turns (12 SB; 6 NB).
- 11 broadside (6NB; 4 SB; 1EB).
- 29 rear end (17 SB; 9 NB; 2 EB; 1 WB).
- Left-turns failing to yield ROW to ped/bike.
- RTOR versus bike crash.

## Recommendations

- Evaluate updating NB/SB left-turn phasing operations to being permitted/protected or protected-only during peak periods. This would require replacing existing signal heads with FYA signal heads.
- Install LED illuminated border bicycle/pedestrian warning sign (W11-15) with passive pedestrian detection.
- Protect left-turns when pedestrian push button is pressed to eliminate pedestrian/left-turning vehicle movements from occurring simultaneously. This requires replacing existing traffic signal heads with FYA signal heads.
- Improve bicycle facilities on Coffman Avenue so that bicyclists have a high-comfort parallel route and are not traveling on the sidewalk.
- Install reflective backplates.
- Review yellow and red intervals and coordination.
  - BRT Recommendations: NB/SB BAT lane queue jumps.

## Recommendations

Evaluate updating left-turn phasing operations to protected-only during peak periods. This would require replacing existing signal heads with FYA signal heads.	Widen EB/WB approaches to accommodate a bicycle lane (see CDOT design).
Protect left-turns when pedestrian push button is pressed to eliminate pedestrian/left-turning vehicle movements from occurring simultaneously. This requires replacing existing traffic signal heads with FYA signal heads.	Enhance bicycle lane crossing markings across 287.
Install LED illuminated border bicycle/pedestrian warning sign (W11-15) with passive pedestrian detection.	Improve bicycle facilities on Coffman Avenue so that bicyclists have a high-comfort parallel route and are not traveling on the sidewalk.
Restrict right-turn-on-reds.	Review yellow and red intervals and coordination.

- BRT Recommendations: NB/SB BAT lane queue jumps.

# US 287 & 1st Ave

Traffic Signal

US 287 Speed Limit = 35 MPH

Total Crashes 67

Severe Crashes: 4

Fatal Crashes: 0

Bicycle-Involved: 0

Pedestrian-Involved: 0

## Left-turn Operations

NBLT: Prot/Perm

SBLT: Perm

EBLT: Perm

WBLT: Prot/Perm

## Observations

48 rear end (33 SB; 14 NB; 1WB) – 4 severe injury

## Recommendations

- ⬅ Evaluate installing an exclusive left-turn lane (may not be possible with SB traffic operations down to one through lane).
- ⬅ Evaluating restricting left turns at this intersection (through/left may be causing some of the rear-end crashes; close proximity to railroad tracks).
- ⬅ Evaluate clearance internals and coordination through Main Street corridor (rear-end crashes).
- 🚦 Update existing doghouse style traffic signal heads to FYA signal heads.
- 🚦 Install reflective backplates.
- 🚦 Review yellow and red intervals and coordination.

# US 287 & Boston Ave

Side-Street Stop Controlled

Pedestrian-Involved:	0

## Left-turn Operations

NBLT: N/A	SBLT: N/A	EBLT: N/A	WBLT: N/A
-----------	-----------	-----------	-----------

## Observations

- 7 broadside (6 WB; 1 EB).
- 9 rear end (5 NB; 4 SB).

## Recommendations

-  Evaluate for traffic signal. It looks like there is freight traffic in the area so could consider using 70% factor for the traffic signal warrant. This is also where the BRT will turn onto Coffman Street. Traffic signal is recommended for optimal BRT operations.
-  If it does not meet traffic signal warrant, consider median to restrict westbound left turns.
-  Extend EB/WB bike lane through the intersection on the west side. If the intersection does not meet traffic signal warrant, evaluate installing a PHB to assist bicycle crossings across 287.

# Non-Intersection Crashes

Erie Planning Boundary: MM 305.37-312.41

Total Crashes	311
Severe Crashes:	14
Fatal Crashes:	6

## Observations

- Most overrepresented crashes are head-on and sideswipe (opposite direction).
- 6 fatal crashes (5 head on, 1 pedestrian).
- 14 severe injury crashes:
  - 4 fixed object/embankment
  - 3 head on
  - 3 sideswipe (opposite direction)
  - 1 sideswipe (same direction)
  - 2 overturning
  - 1 bicycle

## Recommendations

- Install concrete barrier/median in rural undivided areas.
- Corridor wide signal operation evaluation for the limits of the new barrier/median. Left-turn movements will be relocated to U-turn movements at signalized intersections so it will be important to evaluate signal timings and operations for new turning movements.

# US 287 & Oxford Rd

## Left-turn Operations

NBLT: N/A

SBLT: N/A

EBLT: N/A

WBLT: N/A

## Observations

- \* Broadside crashes are overrepresented (6 WBL crashes).
- Future trail (BERT) crossing at or near intersection.

## Recommendations

- Proposed study focus area (concept).
- \* Install traffic signal.
- \* If traffic signal is not installed, consider channelizing northbound right-turn lane and relocating westbound stop bar further to the west to minimize number of lanes to cross to make a left turn.
- Multimodal improvements (transit stops).

# US 287 & Isabelle Rd

Traffic Signal

US 287 Speed Limit = 60 MPH

Total Crashes	106
Severe Crashes:	6
Fatal Crashes:	1

Bicycle-Involved:	0
Pedestrian-Involved:	0

## Left-turn Operations

NBLT: Perm/prot	SBLT: Perm/prot	EBLT: Perm/prot	WBLT: Perm/prot
-----------------	-----------------	-----------------	-----------------

## Observations

- Approach turn crashes were overrepresented (SB-16; NB-10), including one fatal.
- This intersection was reconstructed in 2021. There are bike lanes on east and west side of intersection 3-section FYA signal heads.
- Video observations were completed during the PM peak because comments received about challenging SBL movement. Our observations included minimal gaps for left turning vehicles due to high vehicle volumes and speeds.

## Recommendations

- Evaluate updating left-turn phasing to protected only during peak periods in NB/SB direction. Extend left-turn arrow green time to minimize cycle failure.

# Non-Intersection Crashes

Lafayette Study Area: MM 300.78-305.37

Total Crashes 352

Severe Crashes: 4

Fatal Crashes: 1

## Observations

- Speed limits are 55 MPH through urban area of Lafayette.
- Speed limit drops to 50 MPH for a short distance in NB direction around Diamond Circle; SB remains 60 MPH.

## Recommendations

- Consider a speed limit study through Lafayette and potentially reduce speed limits. Reducing speeds will reduce chances of injury and minimize barriers for pedestrians and bicyclists.
- Strengthen pedestrian/bicycle crossings and connections to the BRT station.
- Improve snow removal/clearing efforts around S-curve (Empire to South Boulder Road).
- Install warning signs (W1-8L/R) around S-curve.

# US 287 & Arapahoe Rd

Traffic Signal \*Erie and Lafayette to Coordinate\*  
US 287 Speed Limit = 60 MPH

Total Crashes	141
Severe Crashes:	5
Fatal Crashes:	1

Bicycle-Involved:	0
Pedestrian-Involved:	1

## Left-turn Operations

NBLT: Prot	SBLT: Prot	EBLT: Perm/Prot	WBLT: Perm/Prot
------------	------------	-----------------	-----------------

## Observations

- 93 rear-end crashes (46% NB and 28% SB).
  - Crashes spiked in 2019 and 2020 (possibly because of construction).

## Recommendations

- Additional follow-up with Lafayette, Erie, Boulder County, and CDOT is required to determine if SIU B, SIU C or Superstation Design focuses on this intersection.
- Review yellow and red intervals and coordination.
- Consider advanced intersection warning signs with activated beacons in the SB direction.
- Consider reducing speed south of the intersection to 45 MPH or 50 MPH.
- BRT Recommendations: Transit Signal Priority (TSP) on US 287.

# US 287 & Lucerne Dr

Traffic Signal \*Erie and Lafayette to Coordinate\*  
US 287 Speed Limit = 60 MPH

\*Proposed concept design Baseline Road to Arapahoe Road\*

Total Crashes	20
Severe Crashes:	1
Fatal Crashes:	0

Bicycle-Involved:	0
Pedestrian-Involved:	0

## Left-turn Operations

NBLT: Prot/Perm	SBLT: Prot/Perm	EBLT: Prot/Perm	WBLT: Prot
-----------------	-----------------	-----------------	------------

## Observations

- 13 rear-ends (6 NB; 6 SB)
  - Traffic signal installed between May 2018 and September 2019.
  - Future development includes a King Soopers with access at this location.
  - Brick wall on east side of Lucerne Drive block line of sight for drivers to see bicyclists traveling north/south on the east side of 287.

## Recommendations

- Evaluate crash data since 2020 to determine if new development impacted traffic crashes.
- Evaluate updating left-turn operations as new development opens. This would require replacing traffic signal heads with FYA signal heads. Further analysis including signal operations analysis and CDOT left-turn warrant analysis is required.
- Install pedestrian refuge island on the north and south legs to provide a two-stage crossing for pedestrians. This requires restriping lane configurations to accommodate the pedestrian refuge island. The new lane configurations would create the left-turns to have a negative offset so it is recommended that if pedestrian refuge islands are installed that left-turn operations are protected. This recommendation/concept is from the Fox Tuttle memorandum found here: <https://assets.bouldercounty.gov/wp-content/uploads/2021/02/memo-on-BRT-station-area-concepts.pdf>
- Strengthen pedestrian/bicycle crossings and connections to the BRT station.
- Review yellow and red intervals and coordination.
- Reducing speeds will reduce chances of injury and minimize barriers for pedestrians and bicyclists.
- BRT Recommendations: Transit Signal Priority (TSP).

# US 287 & Diamond Cir

Traffic Signal

US 287 Speed Limit = 50 MPH(NB); 60 MPH(SB)

Total Crashes	142
Severe Crashes:	1
Fatal Crashes:	2

Bicycle-Involved:	2

------------	------------	------------	------------

## Observations

- 28 broadside (8EB; 2 NB; 12 SB; 6 WB)
- 19 fixed object (majority were curb/raised median and in the southbound direction)
- 113 rear-end (46 SB; 39 NB; 17 EB; 11 WB)
- The fatal crash was a broadside crash where a WB driver struck a NB driver.
- Pedestrian crashes did not have narratives
- Community Feedback: Critical crossing location for Angevine Middle School students.

## Recommendations

- Consider advanced intersection warning signs with activated beacons in southbound direction.
- Install object marker sign (OM3-L) at each of the channelized right turn islands.
- Reconstruct the NBR and SBR channelized right turn geometry to improve turn visibility (align design with BAT queue jump lane).
- Install raised crossing in EB and WB channelized right turn islands. This requires Lafayette to take over snow removal maintenance from CDOT or CDOT to update their maintenance policy at channelized right turns.
- Review yellow and red intervals and coordination.
- Install reflective backplates.
- Reducing speeds will reduce chances of injury and minimize barriers for pedestrians and bicyclists.
- South Boulder Road Corridor Study kicks off in June. Pass along recommendations to be incorporated in that study.
- BRT Recommendations: NB/SB BAT lane queue jumps and Transit Signal Priority (TSP); Replace porkchop island and relocate existing signal on pork chop islands.

  - Completed Cone of Vision Analysis and Sight Distance Analysis (next slide)

# US 287 & Public Rd

## Cone of Vision and Signal Visibility Analysis

US 287 Speed Limit = 55 MPH

**Cone of Vision (MUTCD 4D-4):** all traffic signals are within requirements for visibility

**Table 4D-2. Minimum Sight Distance for Signal Visibility**

85th-Percentile Speed	Minimum Sight Distance
20 mph	175 feet
25 mph	215 feet
30 mph	270 feet
35 mph	325 feet
40 mph	390 feet
45 mph	460 feet
50 mph	540 feet
55 mph	625 feet
60 mph	715 feet

Note: Distances in this table are derived from stopping sight distance plus an assumed queue length for shorter cycle lengths (60 to 75 seconds).

**Visibility of Signal Faces (MUTCD 4D.12):** Sight distance visibility for 55 MPH speed limit is along the curve.

# US 287 & Public Rd

Traffic Signal

US 287 Speed Limit = 55 MPH

Channelized right-turn geometry

## Recommendations

- Consider advanced intersection warning signs with activated beacons in the northbound direction (entering residential and business access area).
- Install near-side traffic signal head on mast arms for northbound and southbound directions.
  - Consider reducing speeds through area where roadway curves.
- Reconstruct the NBR and SBR channelized right turn geometry to improve turn visibility.
- Install reflective backplates.
- Review yellow and red intervals and coordination.
  - BRT Recommendations: Transit Signal Priority (TSP).

# US 287 & Empire (CO 42)

Traffic Signal

US 287 Speed Limit = 55 MPH

Total Crashes	122
Severe Crashes:	4
Fatal Crashes:	0

Bicycle-Involved:	2
Pedestrian-Involved:	0

## Left-turn Operations

NBLT: Prot

SBLT: Perm/Prot

EBLT: Perm/Perm

WBLT: Perm/Prot

## Observations

- 9 approach turns (6 SB; 2 WB; 1 EB)
- 14 broadside (8 SB; 4 NB; 2 EB)
- 68 rear end (27 SB; 25 NB; 10 EB; 6WB)

- 13 fixed object (6 NB; 5 EB; 2 SB)
- Bike crashes do not have narratives.
- Community feedback: Good Samaritan visitors and employees with limited mobility do not feel comfortable walking across the parking lot to access the bus stop or crossing US 287 at existing intersections.

## Recommendations

- Evaluate updating left-turn phasing to protected only during peak periods in SB direction. This would require removing existing signal heads and installing FYA signal head. Further analysis including signal operations analysis and CDOT left-turn warrant analysis is required.
- Install object marker sign (OM3-L) at each of the channelized right turn islands (align design with BAT queue jump lane).
- Review yellow and red intervals and coordination.
- Strengthen pedestrian/bicycle crossings/connection to BRT station.
- Reconstruct the SBR channelized right turn geometry to improve turn visibility.
- Review yellow and red intervals and coordination.
- Install reflective backplates.
- BRT Recommendations: NB/SB BAT lane queue jumps and Transit Signal Priority (TSP); Replace porkchop island and relocate existing signal on pork chop islands; new mid-block bus stop with pedestrian underpass located between Empire Road/Exempla Circle and Campus Drive/South Point Drive.

Channelized right-turn geometry

---	---

## Recommendations

- Need to confirm who owns/maintains this intersection.
- Remove NB left-turn arrow pavement markings and install with straight arrow pavement marking. Install no left-turn sign on the mast arm. Replace existing traffic signal head with straight-arrow signal head.
- Reconstruct the NBR channelized right turn geometry visibility (align design with BAT queue jump lane).
- Install pedestrian/bicycle facilities to connect to proposed BRT bus stop locations. Consider Boulder County TMP recommendation to connect to RTD AB route and proposed park-n-ride.
- Install dashed white lines for dual left turn lane movements.
- Reconstruct traffic signals to reduce fixed object crashes (double mast arm traffic signal pole in median).
- Reconstruct the NBR channelized right turn geometry to improve turn visibility.
- Install reflective backplates.
- Review yellow and red intervals and coordination.
- BRT Recommendations: NB/SB BAT lane queue jumps and Transit Signal Priority (TSP); replace porkchop island and relocate existing signal on pork chop islands.

# Non-Intersection Crashes

Broomfield Study Area: MM 298.04-299.34

Total Crashes	267
Severe Crashes:	5
Fatal Crashes:	0

## Observations

- Significant number of rear-end crashes between signalized intersections. The majority are occurring in the southbound direction.
- Sideswipe and rear-end crashes occurring between 287 ramps and Midway Boulevard, typically because of lane changes.
- Public feedback: it's awkward entering the northbound right-turn lane for Miramonte Boulevard with people entering the right-turn lane from the King Soopers driveway.

# Non-Intersection Crashes

*Broomfield Study Area: MM 298.04-299.34*

## Recommendations

- Consider advanced intersection warning signs with activated beacons in the southbound direction approaching Miramonte Boulevard (entering business access area).
- Complete queuing and sight distance analysis at crest of the hill to the north of 10<sup>th</sup> Avenue intersection.
- Review yellow and red intervals and coordination throughout the corridor.
- Sideswipe/rear-end mitigations south of Midway Boulevard are included in the Midway Boulevard summary slide.

Severe Crashes:	0
Fatal Crashes:	0

Bicycle-Involved:	0
Pedestrian-Involved:	0

## Left-turn Operations

NBLT: N/A	SBLT: N/A	EBLT: N/A	WBLT: N/A
-----------	-----------	-----------	-----------

## Observations

- 29 rear end crashes (27 SB; 2 NB). Rear ends are likely queue spill back from Midway Boulevard.
- 8 Broadside crashes involving NBL movement (6 are occurring between Noon and 5PM)

## Recommendations

- The repurposing of turn lanes and auxiliary lanes to accommodate the BAT lane will help reduce the number of lanes for NB left-turning vehicles to cross.

# US 287 & Midway Blvd

Traffic Signal

US 287 Speed Limit = 35 MPH

Total Crashes 242

Severe Crashes: 3

Fatal Crashes: 0

Bicycle-Involved: 0

Pedestrian-Involved: 3

## Left-turn Operations

NBLT: Prot

SBLT: Prot

EBLT: Perm/Prot

WBLT: Perm/Prot

## Observations

- EB/WB are 4-section signal heads
- 170 rear-end (80 SB; 48 NB; 25 EB; 17 WB)
- 25 approach turn (11 NB; 10WB)

- 22 sideswipes (12 NB; 6 SB; 4 WB)
- 3 severe crashes were approach turn crashes (1 NB; 1 SB; 1 WB)

## Recommendations

- CDOT will be reconstructing the intersection to accommodate a dual SB left-turn lane. The SE channelized right-turn island will be reconstructed to accommodate a second receiving EB lane on the east leg to accommodate the dual SB left turns. Cycle lengths will be shortened to reduce queuing. SBLT is recommended to remain protected-only.
- Geometric improvements to channelized right-turn lanes from the Midway Boulevard Corridor Study concepts.
- NB approach turns likely mitigated with updating left-turn phasing to protected only.
- Confirm if EBL/WBL are operating as permitted/protected or protected-only during peak periods. Consider operating as protected only during peak periods.
- Consider installing Leading Pedestrian Interval.
- Consider installing signage to WBL movements to access US 287 ramp to encourage proper lane utilization.
- Review yellow and red intervals and coordination.

## Driveway Access Southeast of Intersection Recommendation:

- Evaluate closing entrance access along US 287 (coordinate with property owner).
- Discuss potential closure of north access for safer pedestrian/bicycle access across the north driveway.

## **APPENDIX C**

---

### **SAFETY TOOLBOX**

# **US 287 Vision Zero Safety & Mobility Study**

## **Safety Toolbox**

# Introduction

- This Safety Toolbox was compiled in 2023 as a component of the US 287 Vision Zero Safety & Mobility Study. It includes information about the crash types that are the most frequent on US 287 and identifies supporting engineering, enforcement, education, encouragement, and equity countermeasures. It is intended to help community members understand which ideas—and why—are being considered to improve safety and mobility along US 287, and to help inform Boulder County's decision making.
- It is important to note that the assortment of crash types in this toolbox is not a complete list of crash types that may be found in other locations. As such, **the crash mitigation techniques included in this toolkit should not be implemented along other roadways without first studying the crashes that occur in those areas.** The following alternative sources provide descriptions of additional crash trends and mitigations:
  - [Federal Highway Administration Proven Safety Countermeasures](#)
  - [Virginia Department of Transportation General Crash Patterns & Countermeasures](#)
- Some mitigation efforts should be considered for all crash types. These include enforcement mitigations, such as lowering speed limits, as well as many of the education, encouragement, and equity measures outlined in this toolkit.

# Crash Type Template

Describes the crash type, such as typical circumstances involved in the crash type and where it most commonly occurs.

This is an overview of information provided for each crash type on the following pages.

## Typical Contributing Factors

Describes the typical roadway characteristics, driver behaviors, and other factors that may contribute to the crash type.

Crash diagram to help visualize each crash type.

## Potential Solutions:

List of potential countermeasures that may mitigate the crash type.

# Left Turn/Approach Turn (Vehicle – Vehicle)

This crash type includes a left-turning driver that failed to yield right-of-way and collides with a vehicle traveling in the opposite direction straight through the intersection. These types of crashes can occur at unsignalized intersections or at signalized intersections where left-turns are permitted.

## Typical Contributing Factors

**Visibility of oncoming vehicles:** The sight distance for vehicles making left turns at intersections can be restricted by vehicles in the opposing left-turn lane.

**Number of travel lanes:** Roadways with a higher number of travel lanes are more challenging to judge a gap in traffic.

**High vehicle speeds:** Roadways with high vehicle speeds can be challenging to judge a gap in traffic.

**Traffic volumes:** Roadways with high traffic volumes have fewer gaps in traffic and as a result left-turning vehicles may be more likely to take risks when turning left.

## Potential Solutions:

Upgrade Left-Turn Operations

Access management

Restricting Left-Turns at Signalized Intersections

Reduce Speed Limit

# Left Turn (Vehicle – Bicyclist/Pedestrian)

This crash type includes a left-turning driver failing to yield right-of-way and striking a pedestrian or bicyclist crossing on the crosswalk.

## Typical Contributing Factors:

**Lack of visibility of pedestrian/bicyclist in crosswalk:** There may be a lack of a high visibility crosswalk or adequate lighting.

**High vehicle volumes:** Drivers may be focused on identifying a gap in opposing traffic and are not focused on identifying a crossing pedestrian or bicyclist.

## Potential Solutions:

Install leading pedestrian intervals

High visibility crosswalks

Install bulbouts

Protected left-turns when push button is pressed

Install medians and pedestrian crossing islands

Improve Bicycle Lane Crossing

# Red Light Running/Broadside

This crash type includes a driver inadvertently or deliberately running a red light at a signalized intersection and colliding with another roadway user that has the right-of-way. This can also be called a T-bone crash.

## Typical Contributing Factors:

**Poor signal visibility:** The traffic signal head size may be inadequate, there may be an inadequate number of traffic signal heads for the number of travel lanes, reflective backplates may be missing, or the alignment of the roadway may make traffic signal heads challenging to see.

**Signal timing out of sync:** Some signals may be out of sync throughout the corridor or may not account for roadway grades approaching intersections.

**Congestion:** Traffic congestion can create driver frustration which can contribute to these crashes.

## Potential Solutions:

Advance warning signage with flashing beacons

Install red light cameras

Install near-side traffic signal head to improve visibility

Evaluating updating yellow and all-red time

# Failure to Yield Right-of-Way from Side Street/Broadside

This crash type occurs when a person attempting to cross from an unsignalized street misjudges a gap in traffic and is struck by a driver that has the right-of-way. This can also be called a T-bone crash.

## Typical Contributing Factors

**Number of travel lanes:** Roadways with a higher number of travel lanes are more challenging to judge a gap in traffic. Auxiliary lanes may reduce sight distance.

**High vehicle speeds:** Roadways with high vehicle speeds can be challenging to judge a gap in traffic.

**Traffic volumes:** Roadways with high traffic volumes have fewer gaps in traffic, and as a result, left-turning vehicles may be more likely to take risks when turning left.

## Potential Solutions:

# Right Turn on Red (Vehicle – Bicyclist/Pedestrian)

This crash type occurs when drivers are turning right at an unsignalized location or attempting to turn right on red at a signalized intersection and they are looking left to judge a gap in traffic and strike a pedestrian/ bicyclist crossing in front of their vehicle from the right.

## Typical Contributing Factors:

**Drivers only look to oncoming vehicles before judging a gap** and do not look for a pedestrian/bicyclist crossing from the sidewalk prior to turning right. **Bicyclist is located on the sidewalk** rather than within the roadway and the driver is not expecting them to be crossing.

## Potential Solutions:

# Right Turn (Vehicle – Bicyclist/Pedestrian)

This crash type occurs when a right-turning driver fails to yield right-of-way and strikes a pedestrian or bicyclist crossing in the crosswalk traveling parallel to the vehicle prior to the right-turn and or strikes a bicyclist traveling parallel to the vehicle prior to the right-turn in the on-street bicycle lane (right-hook crash).

## Typical Contributing Factors:

**Lack of bicycle lane conflict markings:** Lack of bicycle lane crossing conflict marking across the intersection.

**Lack of visibility of pedestrian/bicyclist in crosswalk:** There may be a lack of a high visibility crosswalk or adequate lighting.

## Potential Solutions:

Restrict right-turn on red

Custom two-way bicycle crossing sign at driveway access

Passive pedestrian detection

Leading Pedestrian Interval

# Head-On

This type of crash occurs when two drivers are traveling in opposite directions and a driver crosses the centerline, colliding with the other vehicle.

## Typical Contributing Factors

**Distracted driving:** This could include distractions from a cell phone, eating, drinking, adjusting the radio, or a person in the vehicle.

**Impaired driving:** Drivers who are driving under the influence of alcohol or drugs.

**Speeds:** Speeding can cause a driver to lose control of his vehicle.

**Improper passing:** Drivers may misjudge the time they have to safely pass on a two-lane road or pass in a no-pass zone may have no way to avoid colliding with an approaching vehicle.

## Potential Solutions:

Center median barrier

Reduce Speed Limit

# Sideswipe

This type of crash occurs when a driver departs from their expected path of travel and the side of their vehicle strikes the side of another vehicle. This can occur in the same direction of travel or in opposite directions of travel.

## Typical Contributing Factors:

**Improper lane changes:** Traffic congestion can create driver frustration which can contribute to improper lane changes.

**Turning vehicles:** When there are multiple turn lanes, vehicles may depart from their lane and collide with another vehicle.

Typical factors that contribute to sideswipe (opposite direction) crashes are similar to head-on crashes.

## Potential Solutions:

Center median barrier

# Rear-End

This crash occurs when one driver fails to stop and collides with the back of another vehicle. These crashes typically occur when the front driver slows down or stops for a traffic signal or turning vehicle and the following driver cannot stop in time or is distracted.

## Typical Contributing Factors:

**Distracted driving:** This could include distractions from a cell phone, eating, drinking, adjusting the radio, or a person in the vehicle.

**Impaired driving:** Drivers who are driving under the influence of alcohol or drugs.

**Speeding:** Speeding can cause a driver to not adequately stop in time to avoid collision.

**Traffic Congestion:** Drivers may experience unexpected stops in traffic due to traffic congestion.

**Traffic Signal:** Drivers may not be expecting needing to stop a traffic signal and stop quickly.

## Potential Solutions:

Update clearance intervals (yellow change interval + red clearance interval)

Advanced warning signage with flashing beacons

# Fixed Object

This type of crash occurs when a driver strikes a stationary object outside of the travel lane such as a tree, light pole, barrier, fence, etc.

## Typical Contributing Factors

**Distracted driving:** This could include distractions from a cell phone, eating, drinking, adjusting the radio, or a person in the vehicle.

**Impaired driving:** Drivers who are driving under the influence of alcohol or drugs.

**Speeds:** Speeding around curves can cause a driver to lose control of his vehicle and veer from roadway.

## Potential Solutions:

Install object markers

Rebuild existing traffic signal

# Engineering Mitigation Template

Costs are estimated in 2023 dollars, with the levels as follows:

**This is an overview of information provided for each engineering mitigation on the following pages.**

Under \$50,000

\$50,001 - \$100,000

\$100,001 - \$500,000

\$500,001 - \$1,000,000

Over \$1,000,000

## DESCRIPTION

Describes the mitigation components, noting items such as the crash types best addressed and the roadway characteristics/factors which determine whether candidate locations are suitable for their application.

## DESIGN CONSIDERATIONS

Provides best practices for mitigation placement, applicable design documents to reference and other roadway characteristics or design metrics of note.

## BENEFITS

Provides details on the major benefits of each mitigation, noting items such as Crash Reduction Factors (where available) and benefits to users of various travel modes.

## OTHER CONSIDERATIONS

Notes any potential unintended impacts or other measures that should be paired with application/installation.

# Engineering Mitigation Template - Continued

Each engineering mitigation includes a rating of safety benefit and complexity.

## Safety Benefit & Complexity Ratings:

Safety ratings for different types of modifications, also known as countermeasures, are based on the Federal Highway Administration (FHWA) Crash Modification Factor (CMF). CMFs are designated to estimate the number of crashes after a particular countermeasure is implemented. The lower the CMF, the lower the number of expected crashes. Some countermeasures are effective at reducing all types of crashes, whenever possible these are recommended. If an ‘all crashes’ countermeasure is not feasible, then ones specifically designed to increase pedestrian safety should be used.

For more information, visit at [www.cmfclearinghouse.org](http://www.cmfclearinghouse.org).

Complexity				
	Very High Complexity - Lots of time	High Complexity	Medium Complexity	Low Complexity - Little time
Safety Benefit				
	Very High Safety Benefit	High Safety Benefit	Medium Safety Benefit	Low Safety Benefit

# Traffic Signal Improvements

Upgrade Left-turn Operations

Update Clearance Intervals (Yellow Change Interval + Red Clearance Interval)

Red Light Cameras

Evaluate Intersection for New Traffic Signal

Install Near-side Traffic Signal Head to Improve Visibility

Rebuild Existing Traffic Signal

# Upgrade Left-Turn Operations

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Upgrading left-turn operations to protected-only or permitted-protected will help reduce left-turn crashes.

1. **Protected left-turn:** "Protected-only" phasing consists of providing a separate phase for left-turning traffic and allows left-turns to be made only on a green left arrow signal indication, with no pedestrian movement or vehicular traffic conflicting with the left turn. Drivers are not allowed to pass through the intersection without a green arrow even if there is no oncoming traffic.
2. **Permitted-protected left-turn:** Protected-permissive left-turn phasing is a left-turn movement of traffic at a signalized intersection having a separate left-turn phase in the signal cycle to provide a protected green arrow interval as well as a non-protected circular green ball or flashing yellow interval where left-turning vehicles must yield to opposing traffic. Permitted-protected left-turns provide more vehicular capacity at the intersection than a protected left-turn but have safety tradeoffs.

## DESIGN CONSIDERATIONS

- Volumes, speeds, and number of lanes for turning vehicles to cross are factors that should be considered when determining appropriate left-turn operations.
- Will likely require further analysis including signal operations analysis and CDOT left turn warrant analysis before recommendations are implemented.

## BENEFITS

Protected-only operations eliminate all left-turn conflicts.

# Upgrade Left-Turn Operations

PROTECTED LEFT-TURN

Source: City of Surrey

PERMITTED-PROTECTED LEFT-TURN

Source: Tacoma News Tribune

# Update Clearance Intervals (Yellow Change Interval + Red Clearance Interval)

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

The clearance interval should provide an adequate transition between two conflicting phases and consists of a yellow change interval and a red clearance interval. The intent of the yellow change interval is to warn traffic of an impending change to the right-of-way assignment. The red clearance interval is an interval after the yellow change interval in which the phase has a red signal display before the display of the green for the opposing phase. The intent of the red clearance interval is to allow time for vehicles that entered the intersection during the yellow change interval to clear the interval prior to the opposing phase.

## BENEFITS

Extending the clearance intervals may reduce rear-end crashes and red-light running crashes.

## DESIGN CONSIDERATIONS

Calculations for the yellow change interval and red clearance interval should be calculated based on equations from the Institute of Transportation Engineers.

(1) Minimum yellow vehicle change interval =  $t_1 + t_2$

Reaction time

$$t_1 = 1 \text{ sec}$$

$$t_2 = \frac{1.47V}{(2a + 64.4g)}$$

where:

$g$  = % grade divided by 100 (downhill is negative grade)  
 $a$  = deceleration rate of 10 feet per second per second

(2) All Red Clearance Interval

$$t_3 = \frac{W + L}{1.47V}$$

where:

$V$  = Posted Speed in mile per hour  
 $W$  = Intersection Width (ft), stop bar to the farthest conflicting lane  
 $L$  = Length of Vehicle (ft), assumed to be 20 feet

Phase Change Interval

Total Phase Change Interval =  $t_1 + t_2 + t_3$

# Update Clearance Intervals (Yellow Change Interval + Red Clearance Interval)

# Evaluate Intersection for New Traffic Signal

DESCRIPTION	DESIGN CONSIDERATIONS
To justify a new traffic signal, traffic conditions must be studied and investigated against the applicable nine warrants, identified in <i>Chapter 4C: Traffic Control Signal Needs Studies</i> of the <i>Federal Highway Administration Manual on Uniform Traffic Control Devices</i> .	<ul style="list-style-type: none"><li>• Complete traffic signal warrant analysis in accordance with the <i>Manual on Uniform Traffic Control Devices (MUTCD): Chapter 4C Traffic Control Signal Needs Studies</i>.</li><li>• Traffic signal design plans are required.</li><li>• Upgrade of pedestrian facilities (curb ramps and sidewalks) should be considered as part of construction.</li></ul>
BENEFITS	OTHER CONSIDERATIONS
<ul style="list-style-type: none"><li>• Provides a controlled crossing location for bicyclists and pedestrians.</li><li>• Can assist with side-street turning movements and/or left-turns from the major street to a minor street.</li></ul>	<ul style="list-style-type: none"><li>• If a traffic signal is not warranted, but a crash pattern is present, consider restricting access and updating the intersection to right-in/right-out or <math>\frac{3}{4}</math> access.</li><li>• Installation of a new traffic signal may increase rear-end crashes (which are typically low severity), but can reduce pedestrian, bicycle, and approach turn crashes which are typically more severe.</li></ul>

# Evaluate Intersection for New Traffic Signal

*Source: Roads & Bridges*

# Signage Improvements

Advance Warning Signage with Flashing Beacons

Install Object Markers

Intersection Conflict Warning System

Custom Two-Way Bicycle Crossing Sign at Driveway Access

# Advance Warning Signage with Flashing Beacons

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Advance warning signs for a traffic signal ahead with advance warning flashing beacon command attention to drivers that the traffic signal ahead has a red light. These are recommended by the MUTCD in cases where the primary traffic control is not visible from a sufficient distance to permit the driver to respond to the signal. This mitigation may be an effective countermeasure for:

- **Rear-end collisions** where a driver appears to have stopped suddenly to avoid running a red light and was struck from behind.
- **Angle collisions** caused by inadvertent red light running.
- **Queues from a red signal** occurring at a location where approaching traffic cannot be seen due to a vertical or horizontal curve.

This mitigation is appropriate for high-speed, rural, isolated intersections where the signalized intersection may be unexpected or where there may be sight distance issues.

## BENEFITS

- Warns drivers of upcoming traffic signal in an area where it may be unexpected for unfamiliar drivers (rural to urban land uses).
- Reduce angle/red-light running crashes and rear-end crashes.

## DESIGN CONSIDERATIONS

- Activated advance-warning flashers require link to traffic controller at intersection.
- A key factor in operating an advance-warning flasher is determining an appropriate time for coordinating the onset of flash with the onset of the yellow interval at the traffic signal. The recommended practice is to time the onset of flash as a function of posted speed for the distance from the flasher to the stop bar. Timing the onset of flash for speeds greater than the posted speed encourages speeding to clear the intersection before the onset of the red interval.

# Advance Warning Signage with Flashing Beacons

Source: SWARCO McCain, Inc

# Install Object Markers

## DESCRIPTION

Object markers are used to mark obstructions within or adjacent to the roadway. These obstructions are commonly physical objects such as guard rails, utility poles, or bridge abutments.

## BENEFITS

Alert motorists to obstructions or impediments within proximity of the travel lane.

## DESIGN CONSIDERATIONS

Refer to *Manual on Uniform Traffic Control Devices (MUTCD)* Chapter 3C.

## EXAMPLE IMAGE

Source: SafetySign.com

# Intersection Conflict Warning System

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

An intersection conflict warning system (ICWS) is typically used in rural areas to assist drivers to safely cross side-street STOP controlled intersections. The system alerts drivers on major roadways with flashing beacons and the language “Entering Traffic When Flashing”. Drivers on the minor roads will see the flashing lights and the language “Traffic Approaching When Flashing.”

## DESIGN CONSIDERATIONS

## BENEFITS

Alerts drivers if opposing traffic is approaching to assist with turning from the side street to the major street safely.

## EXAMPLE IMAGE

Source: Minnesota Crossroads

# Custom Two-Way Bicycle Crossing Sign at Driveway Access

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Custom two-way bicycle and pedestrian crossing signage at unsignalized intersections or driveways where bicyclists and pedestrians are crossing on the sidewalk are beneficial to increase awareness that pedestrians and bicyclists may be crossing in the counterflow direction.

## DESIGN CONSIDERATIONS

Effective at driveway locations or unsignalized locations where there may be a high number of right-turning vehicles.

## BENEFITS

Alerts drivers entering the roadway at an unsignalized intersection or driveway that pedestrians and bicyclists may be crossing from the opposite direction.

## EXAMPLE IMAGE

Source: Google Maps

# Turning Movement Improvements

Improve Channelized Right-Turn Lane Geometry

Restrict Right-Turn-on-Red

Restricting Left-turns at Signalized Intersections

# Improve Channelized Right-Turn Lane Geometry

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Improving the angle of the channelized right-turn geometry includes sharpening the flat approach angle in traditional channelized right turn designs, reducing the turning radius, and adjusting the corner island to create a more perpendicular approach and increase line of sight for turning vehicles approaching through traffic. The crosswalk can be placed further upstream at a location where a pedestrian is more visible and the motorist can more easily separate the tasks of watching for pedestrians and watching for cross-street traffic gaps.

## BENEFITS

- Sharper angles slow both the speed of the approach and exit speed. Slower speeds create less of a barrier for pedestrians.
- Improves line of sight for right-turning vehicles.
- Improves visibility of pedestrians/bicyclists cross at crosswalk.

# Improve Channelized Right-Turn Lane Geometry

SAFETY BENEFIT

COMPLEXITY

## DESIGN CONSIDERATIONS

- Truck turning templates should be run to ensure large vehicles and/or fire trucks can be accommodated at the right-turning movements.
- Traffic signal poles located on the right-turn island may need to be relocated.

## EXAMPLE IMAGE

Source: FHWA

# Restrict Right-Turn-on-Red

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Prohibiting right turns on red is a simple, low-cost measure. The signal changes can benefit pedestrians and bicyclists with minimal impacts on traffic. This countermeasure should be used in locations with substantial pedestrian and bicycle volumes, specifically where a number of crashes have occurred that involve pedestrians/bicyclists traveling in the counterflow direction.

## BENEFITS

Removes conflict between pedestrians and bicyclists crossing the street with the right-of-way and vehicles attempting to turn red.

## DESIGN CONSIDERATIONS

- Could affect traffic operations if there are a large number of right-turning vehicles.
- Should be reinforced with education and enforcement for most effective results.

# Restrict Right-Turn-on-Red

Source: The San Francisco Chronicle

# Restricting Left-Turns at Signalized Intersections

SAFETY BENEFIT

COMPLEXITY

DESCRIPTION	DESIGN CONSIDERATIONS
Left turns are restricted at an intersection based on signage or geometric design.	<ul style="list-style-type: none"><li>• A center median may be installed to restrict left-turns.</li><li>• In cases where a median can not be accommodated, appropriate signage should be installed on the signal mast arm (R3-2).</li></ul>
BENEFITS	OTHER CONSIDERATIONS
Separates pedestrian/bicycle movements from vehicle movements.	The existing left-turn movements will be rerouted at a different location and a diversion analysis may be necessary.

# Restricting Left-Turns at Signalized Intersections

Source: iStock/@RiverNorthPhotography

# Access Management

SAFETY BENEFIT COMPLEXITY

## DESCRIPTION

Access management refers to the design, application and control of entry and exit points along a roadway. This includes intersections with other roads and driveways that serve adjacent properties. Thoughtful access management along a corridor can simultaneously enhance safety for all modes, facilitate walking and biking and reduce trip delay and congestion. The following access management strategies can be used individually or in combination with one another:

- 1. Right-in/right-out movement:** Disallows through movements or left turns to or from a roadway or driveway, permitting only right turns in or right turns out. The movement is usually blocked by a roadway median.
- 2. ¾ movement:** Disallows through movements or left turns from the driveway access to the major street, but allows left-turns from the major street into the driveway. The outbound movement is usually blocked by a roadway median.
- 3. Consolidate driveways:** When multiple driveway accesses are located within close proximity to one another, closure or relocation of multiple access points to one consolidated access point.

## DESIGN CONSIDERATIONS

- Consider turning volumes and alternate access points.
- Diversion analysis may be necessary to understand whether vehicle volumes shifting elsewhere may create other challenges.

## BENEFITS

Can help to reduce potential conflicts at intersections by restricting left turning movements.

Restrict Right-turn on Red

Rectangular Rapid Flashing  
Beacon (RRFB)

Pedestrian Hybrid Beacon (PHB)

Center Median Barrier

# High Visibility Crosswalks

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Highly reflective crosswalk markings installed in patterns (i.e., bar pairs, continental, ladder) that are visible to both drivers and pedestrians from farther away compared to traditional transverse line crosswalks. Highly visible and reflective markings alert drivers of a crossing location. Marked crosswalks guide pedestrians and alert drivers to a crossing location, so it is important that both drivers and pedestrians clearly see the crossings.

## BENEFITS

Make pedestrians more visible and can help pedestrians where to cross.

## DESIGN CONSIDERATIONS

- Use highly reflective materials such as inlay or thermoplastic tape, instead of paint or brick.
- Crosswalk bars should be 24 inches wide and spaced to avoid the wheel path.
- The maximum space between markings should not exceed 60 inches.
- Stop bars should be installed 4 foot minimum to complement the crosswalks.
- Near schools or high pedestrian areas, ladder crosswalks are preferred.

# High Visibility Crosswalks

Source: DDOT DC

# Improve Bicycle Lane Crossing

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Alert left-turning and right-turning vehicles of a bicycle crossing within a bicycle lane through the intersection. The bicycle lane crossing increases the visibility of the facility, identifies potential areas of conflict, and reinforces priority to bicyclists in turning conflict areas. There are two main types of intersection bicycle lane crossings:

1. **Green bicycle striping conflict markings**
2. **Chevron striping conflict markings**

## BENEFITS

- Promotes the multimodal nature of a corridor.
- Increase the visibility of bicyclists.
- Raises motorist and bicyclist awareness to potential areas of conflict.
- Increases motorist yielding behavior.
- Helps reduce bicycle conflicts with turning movements.

## DESIGN CONSIDERATIONS

A bicycle lane must be present on both sides of the intersection (i.e. approaching and departing bicycle lane).

# Improve Bicycle Lane Crossing

# Install Bulbouts (Curb Extensions)

## CONCRETE/PERMANENT

SAFETY BENEFIT

COMPLEXITY

## PAINT & POST/SEMI-PERMANENT

SAFETY BENEFIT

COMPLEXITY

### DESCRIPTION

Bulbouts (also called curb extensions) extend the curb line at intersections through paint and flexible delineators or concrete construction to physically and visually narrow the roadway.

### BENEFITS

- Reduces pedestrian and bicycle crossing distance.
- Creates a narrower travel way for vehicles which can reduce vehicle speeds.
- Provides an opportunity for community placemaking by providing space for public art within the extended area.

### DESIGN CONSIDERATIONS

- Right-turn wheel path of the design vehicle is a critical element in determining the size and shape of the bulbout.
- Can be constructed with low-cost materials such as paint, flex posts, and rubber speed cushions.
- Concrete bulbouts (permanent) likely impact drainage which results in higher project costs.

# Install Bulbouts (Curb Extensions)

CONCRETE/PERMANENT BULBOUTS

# Raised Pedestrian Crossings in Channelized Right-Turns Islands

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Raised crosswalks in channelized right-turn islands are ramped speed tables spanning the entire width of the channelized right-turn lane. These crosswalks increase visibility of pedestrian crossing areas and allow them to cross at grade with the sidewalk. They also act as traffic-calming measures to slow turning vehicles.

## DESIGN CONSIDERATIONS

- Signage should be installed on the approach to warn drivers of pedestrian/bicyclist crossing.
- Effects on drainage should be considered.

## BENEFITS

- Reduces vehicular speeds approaching the pedestrian crossing and prior to turning.
- Increases visibility of the pedestrian/bicyclist crossing.

## OTHER CONSIDERATIONS

Snow plowing/maintenance.

# Raised Pedestrian Crossings in Channelized Right-Turns Islands

Source: Google Maps

# Passive Pedestrian Detection

SAFETY BENEFIT

COMPLEXITY

DESCRIPTION	DESIGN CONSIDERATIONS
	<ul style="list-style-type: none"><li>Other design treatments that may be beneficial in conjunction with passive pedestrian detection includes:<ul style="list-style-type: none"><li>Restricting right-turn on red</li><li>Protect left-turns when pedestrian push button is pressed</li></ul></li></ul>
BENEFITS	EXAMPLE IMAGE
Warns turning vehicles when there is a pedestrian or bicyclist in the crosswalk.	 <p>Source: LightGuard Systems</p>

# Protected Left-Turns When Push Button is Pressed

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Left turns are protected when the pedestrian push button is pressed to eliminate vehicle left-turns and pedestrian crossing movements from occurring simultaneously.

## DESIGN CONSIDERATIONS

This requires that a 3-section or 4-section Flashing Yellow Arrow (FYA) signal head is installed for the left-turn movement.

## BENEFITS

Eliminates conflict between left-turn movements and pedestrian crossings, but is not always protected to help with vehicular capacity at the intersection.

## EXAMPLE IMAGE

Source: David L. Ryan/The Boston Globe/Getty Images

# Medians and Pedestrian Crossing Islands (Pedestrian Refuge Island)

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Medians or pedestrian crossing islands should be considered along multi-lane roadways, particularly in areas with a significant mix of pedestrian and vehicle traffic and intermediate or high travel speeds. Some example locations that may benefit from raised medians or pedestrian crossing islands include, mid-block areas, approaches to multi-lane intersections and areas near transit stops or other pedestrian-focused sites.

## BENEFITS

Allows pedestrians to cross in two stages.

## DESIGN CONSIDERATIONS

- Consider needs of design vehicle (passenger car, bus, or truck), as well as Americans with Disabilities Act (ADA) requirements for the refuge space (4 to 8 feet recommended).
- Confirm if the design creates a negative left turn offset for the left turning vehicles. If it does, upgrade left-turn signal operations to protected-only so it does not create sight visibility issues for left-turning vehicles.

# Medians and Pedestrian Crossing Islands (Pedestrian Refuge Island)

Source: Go Active Long Beach

# Install Leading Pedestrian Interval

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

A leading pedestrian interval (LPI) gives pedestrians and people on bikes the opportunity to enter an intersection 3-7 seconds before vehicles are given the green indication. LPIs provide increased visibility of crossing pedestrians, reduced conflicts between pedestrians and vehicles, and increased likelihood of motorists yielding to pedestrians.

## BENEFITS

Allows pedestrians or bicyclists to begin crossing the intersection prior to vehicles entering the intersection.

## DESIGN CONSIDERATIONS

## EXAMPLE IMAGE

# Rectangular Rapid Flashing Beacon (RRFB)

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

An RRFB is a pedestrian/bicyclist-actuated conspicuity enhancement used in combination with a pedestrian/bicycle, crossing warning sign to improve safety at uncontrolled, marked crosswalks at intersections and midblock. Compliance rates vary by posted speed limit, crossing distance, and one-way versus two-way roadways. RRFBs are particularly effective at multilane crossings with speed limits less than 40 mph.

## BENEFITS

Provides enhanced visibility for active users while crossing. RRFBs can result in motorist yielding rates as high as 98% at marked crosswalks.

## DESIGN CONSIDERATIONS

- Effective at multi-lane crossings with speed limits less than 40 mph and roadways with traffic volumes up to 15,000, depending on the number of lanes and posted speed.
- Placed on both ends of a crosswalk. If the crosswalk contains a pedestrian refuge island, an RRFB should be placed to the right of the crosswalk and on the median.
- RRFBs can draw power from standalone solar panel units, but may also be wired.

# Rectangular Rapid Flashing Beacon (RRFB)

Source: Carmanah

# Pedestrian Hybrid Beacon (PHB)

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

A PHB is a type of signal at an uncontrolled marked crossing at intersections or midblock that remains dark until activated by a user wanting to cross. Once activated, the signal cycles to yellow and then red during the walk phase.

## BENEFITS

- PHBs help pedestrians cross high-volume and high-speed roadways where insufficient gaps in traffic may exist.
- Can reduce pedestrian crashes by 55%<sup>1</sup>.

## DESIGN CONSIDERATIONS

- PHBs are a candidate treatment for roads with three or more lanes that generally have traffic volumes above 9,000.
- Strongly recommended for all midblock and intersection crossings where the roadway speed limits are equal to or greater than 40 mph.
- Intended for installation at midblock locations, but can be installed at intersections.

# Center Median Barrier

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Median barriers are longitudinal barriers that separate opposing traffic on a divided highway and are designated to redirect vehicles striking either side of the barrier. Median barriers significantly reduce the number of cross-median crashes, which are typically attributed to the relatively high speeds that are typical on a divided highway.

## BENEFITS

Eliminates vehicles from crossing the centerline and causing head-on or sideswipe (opposite direction) crashes.

## DESIGN CONSIDERATIONS

## EXAMPLE IMAGE

# Enforcement Mitigation Template

Costs are estimated in 2023 dollars, with the levels as follows:

**This is an overview of information provided for each enforcement mitigation on the following pages.**

Under \$50,000

\$50,001 - \$100,000

\$100,001 - \$500,000

\$500,001 - \$1,000,000

Over \$1,000,000

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Describes the enforcement mitigation components, noting items such as the crash types best addressed and the roadway characteristics/factors which determine whether candidate locations are suitable for their application.

## BENEFITS

Provides details on the major benefits of each enforcement mitigation, noting items such as Crash Reduction Factors (where available) and benefits to users of various travel modes.

## DESIGN CONSIDERATIONS

Provides best practices for enforcement mitigation placement, including companion signage requirements.

## OTHER CONSIDERATIONS

Notes any potential unintended impacts or other measures that should be paired with application/installation.

# Red Light Cameras

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

A red-light camera is a type of traffic enforcement camera that photographs a vehicle that has entered an intersection after the traffic signal controlling the intersection has turned red. The system activates when motion is detected just prior to the stop bar after the traffic signal has turned red. The camera automatically programs vehicles that run red lights, and captures a video and a photo of the license plate and driver that assists authorities in their enforcement of traffic laws.

## BENEFITS

- Automatically enforce compliance with traffic signals.
- Reduce broadside/red-light running crashes which typically have a high rate of serious injury or fatality.
- Valuable tool to change driver behavior in areas that have a known red-light running trend.

## DESIGN CONSIDERATIONS

Best practice is to place signs indicating the presence of automated red light enforcement systems.

Automated enforcement assists with counteracting racial disparities in traffic enforcement, yet it's also important to investigate tiered fine structures for low-income drivers to ensure equitable application.

## OTHER CONSIDERATIONS

Red-light cameras may increase rear-end crashes because drivers may slam on their breaks and may increase rear-end crashes. However, rear-end crashes are typically less severe than broadside crashes that are caused by running red lights.

# Red Light Cameras

Source: Derek Jensen

Note: some intersections along the corridor have red light cameras noted as a recommendation, identified with the traffic signal improvements icon.

# Speed Radar Enforcement

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

A speed enforcement camera is a type of traffic enforcement camera that photographs speeding vehicles. The camera automatically notes vehicles that are operating above the enforcement trigger (many jurisdictions set this limit as 10 mph over the speed limit) and captures a video and a photo of the license plate and driver that assists authorities in their enforcement of traffic laws.

## BENEFITS

- Offers automatic enforcement of posted speed limits.
- Valuable tool to change driver behavior at areas that have a known excessive speeding trends.
- Injury crash reductions following speed camera installation are estimated to be in the range of 20 to 25% at sites with fixed cameras.

## DESIGN CONSIDERATIONS

Best practice is to place signs indicating the presence of automated speed enforcement systems.

Automated enforcement assists with counteracting racial disparities in traffic enforcement, yet it's also important to investigate tiered fine structures for low-income drivers to ensure equitable application.

## OTHER CONSIDERATIONS

Applicability across the U.S. varies as some states have prohibitions in their laws to prevent automated enforcement and others have enabling legislation concerning its use.

# Speed Radar Enforcement

*Source: City of Ottawa*

Note: Colorado Gov. Polis signed Senate Bill 23-200 in June 2023, allowing cities statewide to install automated speed-enforcement cameras on any roadway type.

# Reduce Speed Limit

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Reducing speed limits paired with enforcement will allow operating speeds to be appropriate for the context of the roadway. Crashes that occur at lower speeds tend to be less severe.

## BENEFITS

- Reducing speed limits and operating speeds will reduce the opportunity for crashes resulting in serious injury or fatality, especially with crashes involving pedestrians or bicyclists.

## DESIGN CONSIDERATIONS

- Reducing the speed limit often needs to be supplemented to updates in roadway design elements such as traffic calming, reducing travel lane widths, removing travel lanes, or roundabouts to achieve drivers obeying lower speed limits.

# Additional Enforcement Mitigation Strategies

## DESCRIPTION

- Identify **educational alternatives** which offer non-financial consequences for minor citations such as speeding.
  - Example: [Share the Road Safety Class \(SRSC\)](#) from Portland's Vision Zero Program.
- Prioritize **education on safe driving behaviors, bicycle/pedestrian safety topics and anti-racism/implicit bias training** with local police departments.
  - Example: Transportation Alternatives Vision Zero cities' [commitments with law enforcement agencies](#).
- Investigate **stop data collection** efforts to measure the effectiveness of policing strategies and access the degree of group (mis)representation
  - Example: [Policing Equity Guidebook](#)

# Education, Encouragement & Equity Mitigations Template

**This is an overview of information provided for each education, encouragement, and equity mitigation on the following pages.**

Costs are estimated in 2023 dollars, with the levels as follows:

Under \$50,000

\$50,001 - \$100,000

\$100,001 - \$500,000

\$500,001 - \$1,000,000

Over \$1,000,000

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Describes the mitigation purpose, involved parties and application types.

## BENEFITS

Provides details on the major benefits of each mitigation, noting related goals.

## OUTREACH CONSIDERATIONS

Provides best practices for inclusive outreach strategies.

## OTHER CONSIDERATIONS

Notes any potential unintended impacts which should be accounted for or other measures that should be paired with application.

# Education, Encouragement & Equity Mitigations

## EDUCATION & ENCOURAGEMENT MITIGATIONS

Proactive outreach and safety education is critical to building sustained community awareness around risky travel behaviors and existing safety concerns.

## EQUITY MITIGATIONS

To ensure equitable application outcomes, the impact on historically disadvantaged communities should be considered before implementing any of the mitigations proposed in this toolkit.

# Education & Encouragement Campaigns

SAFETY BENEFIT

COMPLEXITY

## DESCRIPTION

Compelling and impactful education and encouragement campaigns aim to equitably reach diverse stakeholder groups in their messaging. Involving travelers of all ages and abilities is paramount, including students and their caregivers. Developing partnerships with community members and established stakeholder groups is crucial to building trusted relationships. Educational campaigns may involve PSAs on radio/TV/social media, printed/billboard ads or in-person outreach.

## BENEFITS

- Instilling a sense of collective action towards improving safety outcomes reminds travelers of all modes that they have a role to play in ensuring everyone arrives safely at their destination

## OUTREACH CONSIDERATIONS

- Language-inclusive outreach is critical to ensure messaging is appropriately tailored.
- Appropriately compensating outreach liaisons builds trust and signals their role's importance.
- Consider how local news sources report on traffic safety – for example, reporting incidents as “crashes” instead of “accidents.”

### **CENTER MEDIAN BARRIER MEMORANDUM**

# Memorandum

**Date:** October 5, 2023

**To:** Bryce Reeves - CDOT, Katrina Klobberdanz – CDOT, Alex Hyde-Wright – Boulder County

**From:** Consor Engineers

**Subject:** US 287 Center Median Barrier **DRAFT**

## Introduction

The US 287 Vision Zero Safety and Multimodal Mobility Study analyzed crash data along the US 287 corridor from Midway Boulevard in Broomfield to Horseshoe Circle in Unincorporated Larimer County. The crash analysis identified crash trends and identified recommendations with the goal of eliminating all traffic fatalities and severe injuries along the corridor. There are two segments identified along the US 287 corridor that have an above-average rate of fatal and severe crashes where the majority of the fatal and severe crashes were caused by vehicles crossing over the centerline into the opposite direction of traffic resulting in head-on crashes or sideswipe (opposite direction) crashes. These crash types are occurring along rural areas where the highway is undivided with high posted speed limits. A center median barrier is recommended in the two segments to improve safety and mitigate crossover crashes. This technical memorandum summarizes the safety analysis supporting the center median barrier recommendation, the alternative types of center median barriers that were evaluated, the design criteria used to evaluate the alternatives, and the proposed recommendation for a cast-in-place concrete center median barrier. Intersection and driveway-related crashes were also analyzed, but recommendations are included in a separate deliverable – this memorandum focuses strictly on the areas identified for the installation of center median barriers.

## Background and Safety Analysis

The project team analyzed all intersection, non-intersection, and driveway access crashes from January 1, 2010, to December 31, 2020. For the purpose of this memorandum, only non-intersection crashes in areas that were identified for a center median barrier are discussed. **Figure 1** displays the study limits of the corridor. The corridor was divided into six segments (Segments A-F) based on the where roadway characteristics change (i.e. number of lanes, rural versus urban). Segments D and F are highlighted in orange and are the segments along US 287 where the median design was focused. These segments are rural areas of the corridor where the highway is undivided and there are high speed limits.

DiExSys Vision Zero Suite (VZS) was used for the crash analysis. VZS is a Highway Safety Manual (HSM) compliant safety software that uses predictive analytics and diagnostic pattern recognition to help identify correctable crash trends to achieve zero traffic fatalities and severe injuries. VZS provides predictive, diagnostic, and analysis tools which reveal the nature and magnitude of the safety problems on the network, segment, and intersection levels. Several reports from VZS were utilized to determine crash trends and which crash types were overrepresented in each of these segments. **Appendix A** displays the crash reports exported from VZS.

Figure 1 Study Area Segments for Non-Intersection Crashes

## Safety Analysis Findings

Crash analysis results indicated that there is a crossover crash trend occurring in Segments D and F where vehicles crossover the centerline into the opposite direction of travel that result in head-on or sideswipe (opposite direction) crashes. **Table 1** and **Table 2** display the number of head-on and sideswipe (opposite direction) crashes in Segment D and Segment F, respectively. Although crossover crashes are about 11-13% of total crashes in this segment, they result in a significant number of severe and fatal crashes. Half of the severe injury crashes and 83% of the fatal crashes in Segment D are the result of a crossover crash. Over half of the severe injury crashes and one-third of the fatal crashes in Segment F are the result of a crossover crash.

*Table 1. Segment D Crash Data Summary*

Segment D Summary	All Crashes (#)	Head on Crashes (#)	Sideswipe Opposite Direction (#)	Crossover Centerline Crashes (Head on and Sideswipe)	
				# of Crashes	% of Crashes
<b>Total Crashes</b>	311	18	17	35	11%
<b>Severe Injury Crashes</b>	16	5	3	8	50%
<b>Fatal Crashes</b>	6	5	0	5	83%
<i>*Crossover crashes are a summary of head-on and sideswipe (opposite direction) crashes.</i>					

*Table 2. Segment F Crash Data Summary*

Segment F Summary	All Crashes (#)	Head on Crashes (#)	Sideswipe Opposite Direction (#)	Crossover Centerline Crashes (Head on and Sideswipe)	
				# of Crashes	% of Crashes
<b>Total Crashes</b>	128	5	12	17	13%
<b>Severe Injury Crashes</b>	11	2	4	6	55%
<b>Fatal Crashes</b>	3	1	0	1	33%
<i>*Crossover crashes are a summary of head-on and sideswipe (opposite direction) crashes.</i>					

**Table 3** displays the corridor-wide crossover crashes compared to crossover crashes occurring on Segment D and Segment F. All of the fatalities caused by crossover crashes along US 287 study area are occurring in Segments D and F. Over ninety percent of the severe crashes caused by crossover crashes along US 287 study area are occurring in Segments D and F. Crossover crashes are correctable with the installation of a center median barrier. A center median barrier is recommended in Segments D and F to mitigate the crossover crashes that typically result in fatality or serious injury.

*Table 3. Corridor-wide versus Segment D and Segment F Crossover Crash Summary*

	Corridor Wide Crossover Crashes	Segment D Crossover Crashes	Segment F Crossover Crashes	Segment D & F Combined Crossover Crashes	Segment D & F % of Total Corridor Crossover Crashes
<b>Total Crashes</b>	73	35	17	52	71%
<b>Severe Injury Crashes</b>	15	8	6	14	93%
<b>Fatal Crashes</b>	6	5	1	6	100%
<i>*Crossover crashes are a summary of head-on and sideswipe (opposite direction) crashes.</i>					

### U-turn Safety

A center median barrier will assist in eliminating crossover type crashes and left-turn related crashes that are occurring at non-public roadway accesses. Most non-public roadway accesses will become right-in/right-out due to the center median barrier. Traffic destined for such locations must use alternate routes, some of which may involve left-turning vehicles to be rerouted to U-turns at strategically placed center median openings (designed for U-turns) or signalized intersections. *NCHRP Report 524* describes research on the safety of U-turns at unsignalized locations and concludes that there is no indication of U-turns at unsignalized median openings being a major safety concern. Future design considerations will include evaluating the spacing of median openings, sight distance, and proximity to the signalized intersection. It is also recommended that a corridor-wide traffic signal analysis be completed in the limits of the center median barrier to understand and help mitigate the impacts on left-turn operations. As a result of a higher number of left-turning movements at intersections it is recommended to evaluate left-turn operations (potentially upgrading to protected only during peak periods) and the length of the green, yellow, all red, and red intervals for left-turns to accommodate the increased U-turn movements.

## Alternatives Analysis

Several alternatives were evaluated as part of the recommendation including no action, rumble strips, and various types of median barriers. It was determined that the installation of a median barrier is preferred. Median barriers are longitudinal barriers that separate opposing traffic on a divided highway and are designed to redirect a vehicle striking either side of the barrier rather than allowing vehicles to cross the centerline into opposing traffic. Center median barriers eliminate most of the potential for crossover crashes, which are attributed to the relatively high speeds that are typical on highways. Three types of median barriers were evaluated for installation on US 287: cast-in-place concrete, cable rail, and metal-beam guard rail. Note that rumble strips will be included adjacent to the proposed center barrier regardless of the type of barrier selected.

### No-Action Alternative

The no-action alternative maintains the status quo in terms of safety for the corridor. Figure 2 displays the existing cross-section of the roadway. This alternative does not restrict vehicles from crossing the center line on the rural resulting in crossover crashes on the rural, high-speed segments. If no action is taken, the high rate of fatal and severe-injury crashes will likely continue and potentially increase with corridor and regional growth that will continue to drive increasing corridor traffic volumes. Therefore, the no-action alternative is dismissed from further evaluation.

*Figure 2. US 287 Existing Conditions that Would Remain with the No-Action Alternative*

### **Rumble Strips**

Rumble strips are a series of raised strips across a road or along its edge, changing the noise a vehicle's tires make on the surface. Studies have shown that rumble strips are effective in warning drivers of the edge of the road and/or travel way and therefore reduce crashes. Rumble strips currently exist adjacent to the outside shoulder edge lines throughout most of the rural segments of the US 287 corridor in Boulder County and CDOT is currently working on a project to add rumble strips on the side of the road where they are not already implemented. Installation of additional rumble strips adjacent to the center two-way left turn lane would help to alert drivers that they are crossing over to an area that they are not supposed to be traveling in. Although this alternative would likely reduce the high number of crossover head-on and opposite-direction crashes on the rural segments of US 287 corridor in Boulder County, it would not prevent many of these incidents, and the high rate of fatal and severe injury crashes would continue. Therefore, the rumble strip alternative is dismissed from further evaluation. It should be noted that the addition of rumble strips for the line delineating the shoulder area adjacent to the median barrier will be included with whichever median barrier alternative is implemented.

### **High-Tension Cable Rail Barrier**

High-tension cable rail barriers are flexible barriers, made from steel cables mounted on steel posts, resulting in less occupant impact force as it absorbs energy from the crash, capturing or redirecting the vehicle. Due to larger deflection, median width is an important consideration. These barriers are more adaptable to slopes typically found in medians. Cable barriers tend to require more frequent maintenance and repair than other barrier types. **Figure 3** displays an example of a cable rail barrier.

*Figure 3. Example of a Cable Rail Barrier*

The 2017 *CDOT Cable Barrier Guide* states “A 10-foot offset should be maintained from the edge of the travel lane to the median barrier so an impacting vehicle is unlikely to deflect the barrier into opposing travel lanes. In addition, the 2011 *AASHTO Roadside Design Guide* states that for High-Tension Guardrails deflection of the cable rail is “6.6 ft to 9.2 ft depending on the system, the post spacing, and the length of the barrier test”. For the rural segments of the US 287 corridor in Boulder County, there is currently a 16 foot wide two-way left turn lane which allows for the installation of a cable rail barrier system with only a 7-8 foot wide shoulder for each direction. In addition, the 2011 *AASHTO Roadside Design Guide* states in Chapter 6 “if a barrier must be located immediately adjacent to a high-speed, high-volume traffic lane, a rigid barrier requiring no significant maintenance is required. Given these findings, the cable rail barrier alternative is dismissed for further evaluation.

### **Cast-In-Place Concrete Barrier**

Cast-in-place barriers are usually rigid and result in little to no deflection. They redirect rather than absorb energy from the impact. Rigid concrete barriers seldom require repair or maintenance. Some agencies have used portable concrete barriers as median barriers. These barriers require repositioning after an impact but are typically less maintenance than a post mounted barrier. **Figure 4** displays an example of a cast-in-place concrete barrier.

*Figure 4. Example of a Cast-In-Place Concrete Barrier (US 85 (Santa Fe) between Aspen Grove and Sumner)*

## Metal-Beam Guard Rail Barrier

Metal-beam guard rail barriers are considered semi-rigid barriers, where the W-beam or box-beam is mounted to steel or timber posts. When impacted, they are designed to deform and deflect, absorbing some of the crash energy and redirecting the vehicle. Metal-beam guardrails often do not require maintenance after minor impacts. They deflect less than cable barriers, so they can be located closer to objects where space is limited. **Figure 5** displays an example of a metal-beam guard rail barrier.

*Figure 5. Example of a Metal-Beam Guard Rail Barrier*

## Median Barrier Alternatives Analysis

An alternatives analysis was performed to determine the recommendation for the preferred median barrier type. For this evaluation, only the cast-in-place concrete and guard rail median barrier alternative were considered as the other barrier types were dismissed from further evaluation as described in the previous section. The following steps were taken as part of the alternatives analysis:

1. Calculate **installation costs** based on quantities of barrier identified from the conceptual design development.
2. Calculate average **annual maintenance costs** and maintenance costs over 30 years accounting for inflation based on historical maintenance data provided by CDOT Region 4.
3. Perform a **life-cycle cost analysis** including installation costs and maintenance costs for 30 years.
4. Identify **other considerations** that may impact the recommendation.
5. Select the **recommended** median barrier alternative.

## Installation Cost

The installation cost criteria is the total upfront costs to build the center median barriers adjusted for inflation for the expected lifetime of the median barrier. The installation cost includes the one-time cost that it will take to construct the center median barrier simply based on the estimated cost for installation of the proposed median barrier. Conсор developed a conceptual design and cost estimate for the median barrier installation in 2023. There are several costs

associated with construction but the only variable cost between the guard rail and cast-in-place concrete rail alternatives is the cost for purchasing and installing the barrier median materials. **Table 4** shows the cost comparison of the two alternatives. Unit prices are based on CDOT cost data for recent construction projects. The cast-in-place alternative is expected to have an installation cost twice as much as the guard rail alternative.

*Table 1. Median Barrier Installation Cost Summary*

Initial Cost for Median Barrier Installation		
	Cast in Place Concrete	Guardrail
Linear Feet	63,753	63,753
Cost/Linear Foot	\$150	\$75
Total Cost	\$ 9,562,950	\$4,781,475

## Annual Maintenance Cost

The annual maintenance costs describe the costs associated with annual maintenance that occurs, typically due to the center median barrier being impacted by a vehicle in a crash. Error! Reference source not found. summarizes the historical annual maintenance cost for guard rail and concrete barrier from 2019 to 2023 as provided by CDOT Region 4. For guardrail barriers, maintenance is often required after incidents where the guardrail is struck by a vehicle. The CDOT data shows that the total annual maintenance cost for Region 4 was approximately \$450,000 in 2019 and has been steadily increasing each year due to inflation. For concrete barrier, maintenance is generally only required to remove graffiti and not typically required after a guardrail is struck by a vehicle. The CDOT data shows that the annual maintenance costs for concrete barrier were typically less than \$1,000. There is one outlier value in the data set over \$60,000 in 2022 due to one incident where the concrete barrier was struck by a large truck and damaged to the point where repair was required. In addition, the maintenance costs in 2023 were higher than typical due to one incident where the barrier was struck and inspection was needed, but it was determined that repair was not required. It cannot be predicted how often incidents that require repair to a concrete barrier occur and therefore we have included these variable maintenance costs in the calculation of an average total maintenance cost of \$12,775.29 for concrete barrier. For the guard rail barrier, we have assumed the year 2023 value of \$639,553 as the total maintenance cost to account for inflation. These assumed total maintenance cost values were then divided by the total length of guard rail barrier and concrete barrier respectively to determine the assumed annual maintenance cost per linear foot for the two barrier types. **Table 6** displays a summary of the historical CDOT maintenance data and our calculations. Based on the historical data, it was calculated that the annual maintenance cost for guard rail was \$0.83 per linear foot and the annual maintenance cost for cast-in-place concrete barrier was \$0.08 per linear foot. The cost per linear foot was multiplied for the length of proposed median barrier for the rural segments of US 287 to calculate the assumed Year 1 Maintenance Cost based on historical data.

Table 2. Historical Median Barrier Annual Maintenance Costs (provided by CDOT)

Year	Guardrail Maintenance Cost	Cast in Place Concrete Maintenance Cost
2019	\$ 446,998.99	\$ 492.04
2020	\$ 469,813.43	\$ 254.42
2021	\$ 517,850.60	\$ 808.08
2022	\$ 579,388.53	\$ 60,825.00
2023	\$ 639,553.84	\$ 1,496.92
Assumed Annual Total Maintenance Cost <sup>1</sup>	\$ 639,553.84	\$ 12,775.29

1. It was assumed the annual maintenance value for guardrail barrier was the 2023 value due to inflation. It was assumed that the annual maintenance value for cast-in-place concrete barrier was the average of all values.

Table 6. Annual Maintenance Cost Calculations

		Guard Rail	Cast in Place Concrete
A	Assumed Annual Total Maintenance Cost	\$ 639,553.84	\$ 12,775.29
B	Total Linear Feet of Historical Data	768,344.60	164,069.07
Annual Maintenance Calculations:			
C	Assumed Annual Maintenance Cost per Linear Foot (A/B)	0.83	0.08
D	Total Linear Feet of New US 287 Median	63,753	63,753
	<b>Year 1 Assumed Maintenance Cost (C*D)</b>	<b>\$ 53,066.65</b>	<b>\$ 4,964.15</b>

Table 7 shows calculations for 30 years of maintenance costs assuming an 3% annual inflation rate. Note that the CDOT data for Region 4 shows an average annual inflation rate of over 9% for the past four years. We chose to use a 3% inflation rate because the inflation rate over the past four years has been unusually high and 3% represents a more typical historic inflation rate. The total estimate 30-year maintenance cost is \$236,171.42 for cast-in-place concrete barrier and \$2,524,668.06 for guard rail barrier.

Table 7. Projected Annual Median Barrier Annual Maintenance Costs

		Guard Rail Barrier	Concrete Barrier
Assumed Annual Inflation Rate		3%	3%
Year #	Year	Maintenance Cost	Maintenance Cost
1	2025	\$53,066.65	\$4,964.15
2	2026	\$54,658.65	\$5,113.07
3	2027	\$56,298.41	\$5,266.46
4	2028	\$57,987.36	\$5,424.46

<b>Total 30 Year Maintenance Cost</b>		<b>\$2,524,668.06</b>	<b>\$236,171.42</b>

## Life-Cycle Cost Analysis

Life-cycle cost is defined as the cost of an asset over its full life. For the alternatives analysis, a 30-year lifespan was assumed and the initial installation cost was added to the 30-year maintenance cost to calculate the total lifecycle cost. **Table 8** displays the life cycle cost calculations for cast-in-place concrete and guard rail barrier. The cast-in-place concrete barrier has a projected life cycle cost approximately 25% greater than the guard rail barrier.

*Table 8. Lifecycle Cost Calculations*

Barrier Type	Initial Installation Cost (A)	30 year Maintenance Cost (B)	Total Lifecycle Cost (A+B)
Cast-in-Place Concrete	\$9,562,950.00	\$236,171.42	\$9,799,121.42
Guard Rail Barrier	\$4,781,475.00	\$2,524,668.06	\$7,306,143.06
<b>Cost Difference</b>	\$2,492,978.36		
<b>Percent Difference</b>	25%		

## Additional Median Barrier Selection Considerations

When considering whether to use cast-in-place concrete barrier or guard rail barrier for the center median barrier materials on the rural segments of US 287 in Boulder County we must consider the following factors:

- Life-cycle cost: The life-cycle cost analysis shows that the concrete barrier life-cycle cost is 25% more than the guard rail barrier life-cycle cost.
- Funding for initial installation: Funding for initial installation has not yet been identified, but it is very likely that that majority of funding for installation will be from a Federal Government grant supplemented with a mix of State and Boulder County funds. Boulder County has recently applied for a Safe Streets for All (SS4A) federal grant and, if accepted, this would pay for 80% of the installation costs with the additional funding being covered by Boulder County and CDOT. If this grant is not accepted, Boulder County will continue to seek other federal grants to pay for the installation of the median barrier.
- Available Maintenance Resources: Maintenance of the rural segments of US 287 in Boulder County where the median barrier is proposed is the responsibility of CDOT. CDOT has stated that they have a limited maintenance budget that does not increase significantly on an annual basis. **Table 9**, below, shows the four-year average of CDOT Region 4's annual budget and expenditures for both guard rail and concrete barrier. As this table shows, CDOT has adequate budget for maintaining the existing concrete barrier but they currently have approximately \$38,000 annual budget shortfall for maintaining guardrail. If guardrail were added with this project, this shortfall would more than double immediately and would increase significantly more over time with inflation.

*Table 9. CDOT Guard Rail and Concrete Barrier Budget Excess/Shortfall Summary*

	<b>Guard Rail Barrier</b>	<b>Concrete Barrier</b>
Budget	\$ 72,877.47	\$ 2,157.34
Expenditures	\$ 110,987.82	\$ 479.02
Budget Excess/Shortfall	\$ (38,110.35)	\$ 1,678.32

- **Maintenance Delay Impacts:** Whenever maintenance is required for a center median barrier, the adjacent travel lane must be closed temporarily before and during the maintenance activities. This results in travel time delay for the vehicles traveling through the corridor. Guard rail barrier typically requires more maintenance than Cast-in-Place Concrete Barrier; thus, Guard Rail has more travel time delay than cast-in-place concrete barrier.
- **Maintenance Safety Impacts:** The lane closures needed for maintenance of a guard rail median barrier after impacts exposes maintenance workers to high speed (over 65 mph) traffic. In this case, the maintenance workers would be working in the fast lane adjacent to the median barrier. In addition, irregular lane closures, particularly closures of the left lane, can cause residual crashes resulting in property damage, injuries, and sometimes fatal crashes. It is difficult to put a dollar value to this residual impact, but based on the data that CDOT provided, this impact will be negligible for the minimal required maintenance of the concrete barrier and it will be significant for the regular maintenance required for the guard rail barrier.

### Median Barrier Recommendation

Based on the discussion above, we recommend that the **cast-in-place concrete barrier** alternative be constructed in the rural segments of US 287 in Boulder County. The primary reason for this recommendation is the significant added maintenance costs to CDOT which would be more than ten times greater for guard rail barrier compared to concrete barrier and the current underfunded available budget that CDOT has for maintaining guard rail.

## Summary

A crash analysis along the US 287 corridor from Midway Boulevard in Broomfield to Horseshoe Circle in Unincorporated Larimer County as part of the US 287 Vision Zero Safety and Multimodal Mobility Study led to the findings of a crash trend of crossover crashes that has led to head on crashes and sideswipe (opposite direction) crashes in two rural areas which has resulted in a high rate of severe and fatal crashes. Crossover crashes often result in severe injury and fatal crashes and the majority of this crash type is occurring on this corridor in the two rural segments. To achieve the goal of zero fatal and severe crashes in these two segments, a center median barrier was recommended. Several types of center median barriers were identified as alternate designs and an alternatives analysis was performed to provide a recommendation. Based on the analysis, a cast-in-place concrete center median barrier is recommended to be installed along these rural segments for the US 287 corridor.

### Future Considerations

There are several design factors or additional analysis that will need to be considered and will be addressed during the design phase for the median barrier. The list below describes future considerations as part of the median barrier design:

- Whether or not additional median barrier openings should be added to accommodate U-turns. Currently the median barrier concept design is only showing median openings at public roadway intersections on US 287. Research, analysis, and coordination with emergency services should be completed to determine if additional median openings should be provided to allow more opportunities for U-turns for left turning traffic that will be restricted with the addition of the median barrier.
- Vertical and horizontal sight distance should be evaluated at proposed openings to ensure there is adequate visibility.
- Traffic analysis should be completed at signalized intersections to understand and mitigate the impacts of additional left and U-turn movements. Potential updates may include changing the left turn phasing to protected only and increasing the green times for the left-turn phases and/or increasing the time for the clearance intervals (yellow and all red times).

### **EMERGENCY SERVICES COORDINATION MEETING SUMMARY AND TECHNICAL MEMORANDUM**

# US 287 Vision Zero Safety & Mobility Study

**Emergency Services Coordination**  
September 15, 2023

CDR ASSOCIATES  
COLLABORATIVE DECISION RESOURCES

Pinyon Kimley»Horn  
Environmental, Inc. Expect More. Experience Better.

# Vision Zero Safety & Mobility Agenda

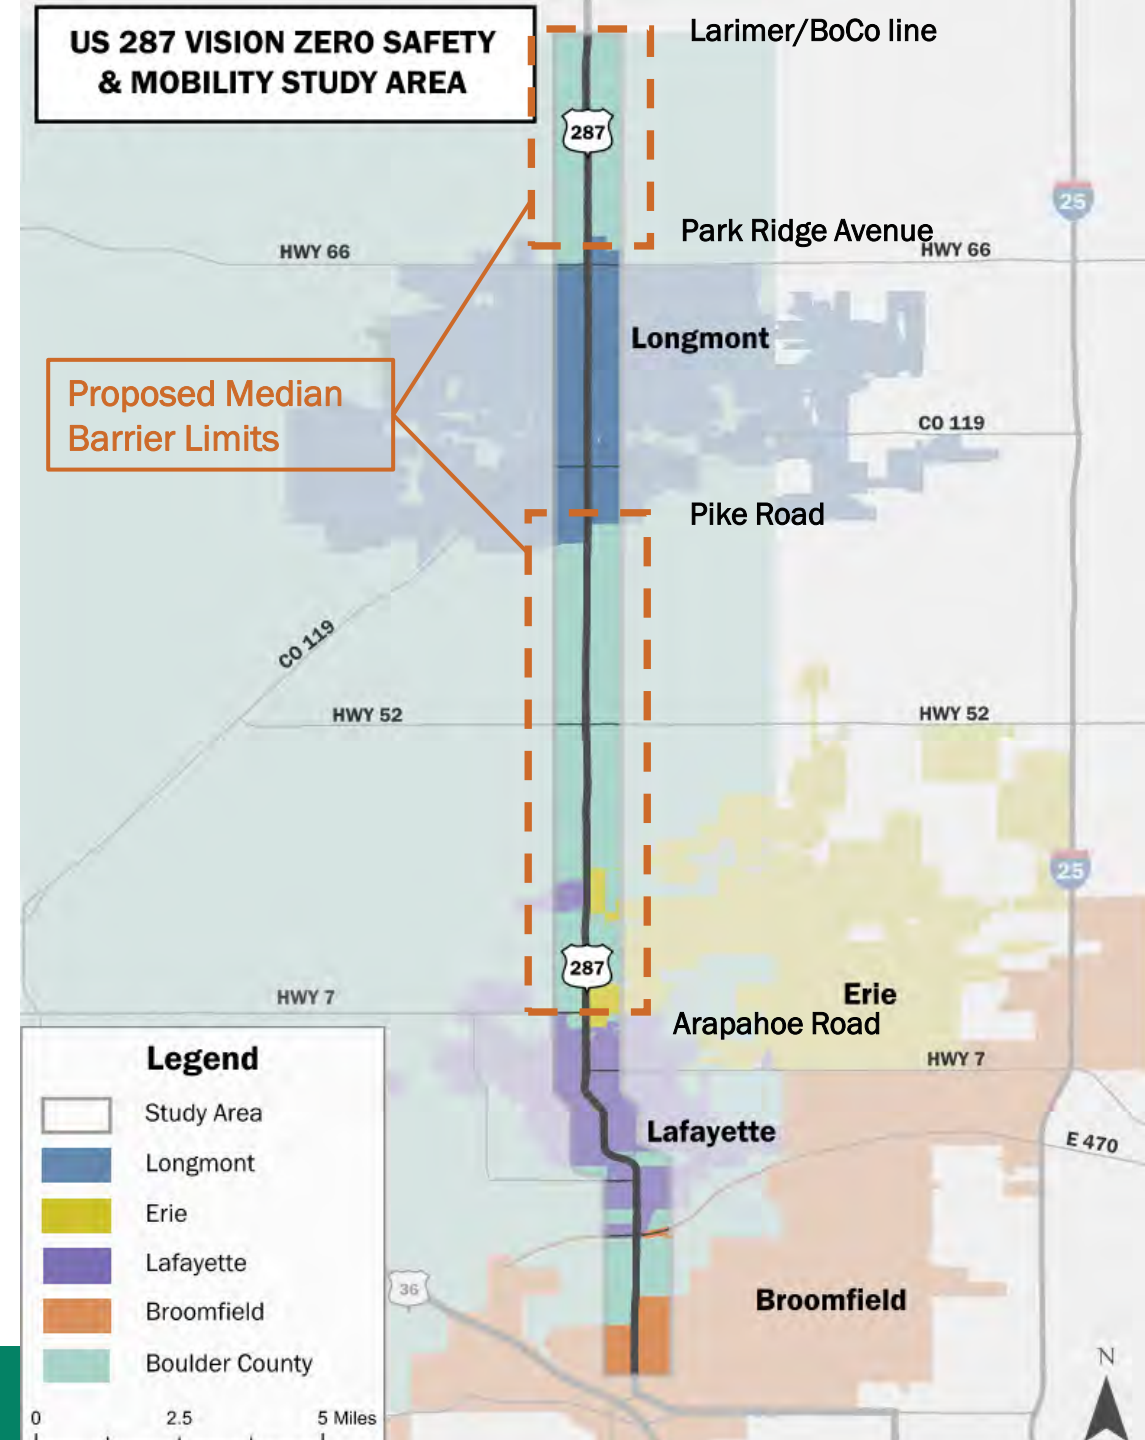

- Introductions
- Background
  - Study area limits and safety overview
  - Head on crash trend
  - Median Barrier Recommendation
  - SS4A Implementation Grant
- Median barrier analysis completed to date and discussion

# Study Area

- 24-mile corridor
  - Broomfield (Midway Boulevard) to northern Boulder County line
- Six key stakeholders
  - Broomfield, Lafayette, Erie, Longmont, Boulder County, CDOT
- Urban, rural, and suburban
- DRCOG High Injury and Critical Corridor
- NAMS corridor
- BRT Feasibility Study

# Corridor Safety Overview

**US 287 is a dangerous roadway.**

**830** crashes annually with **4%** resulting in a severe injury or fatality

**30+** crashes per mile

**29%** of all fatal crashes in Boulder County were on US 287 (2021-22)

**34** people died and 311 persons were severely injured (2011-20)

**24** more loved ones have lost their lives on the corridor since 2021.

# Median Barrier Analysis

Crossover crashes in these two segments accounted for:

**71%** of total corridor crossover crashes  
**93%** of total corridor **severe injury** crossover crashes  
**100%** of total corridor **fatal** crossover crashes

Median barriers installed on rural four lane highways result in a **97%** reduction in crossover crashes.

Source: FHWA

32 lives would have been saved by the proposed median barrier since 2011.

# Median Barrier Alternatives

Cable Rail

Guard Rail

Cast-in-Place

Preferred Alternative

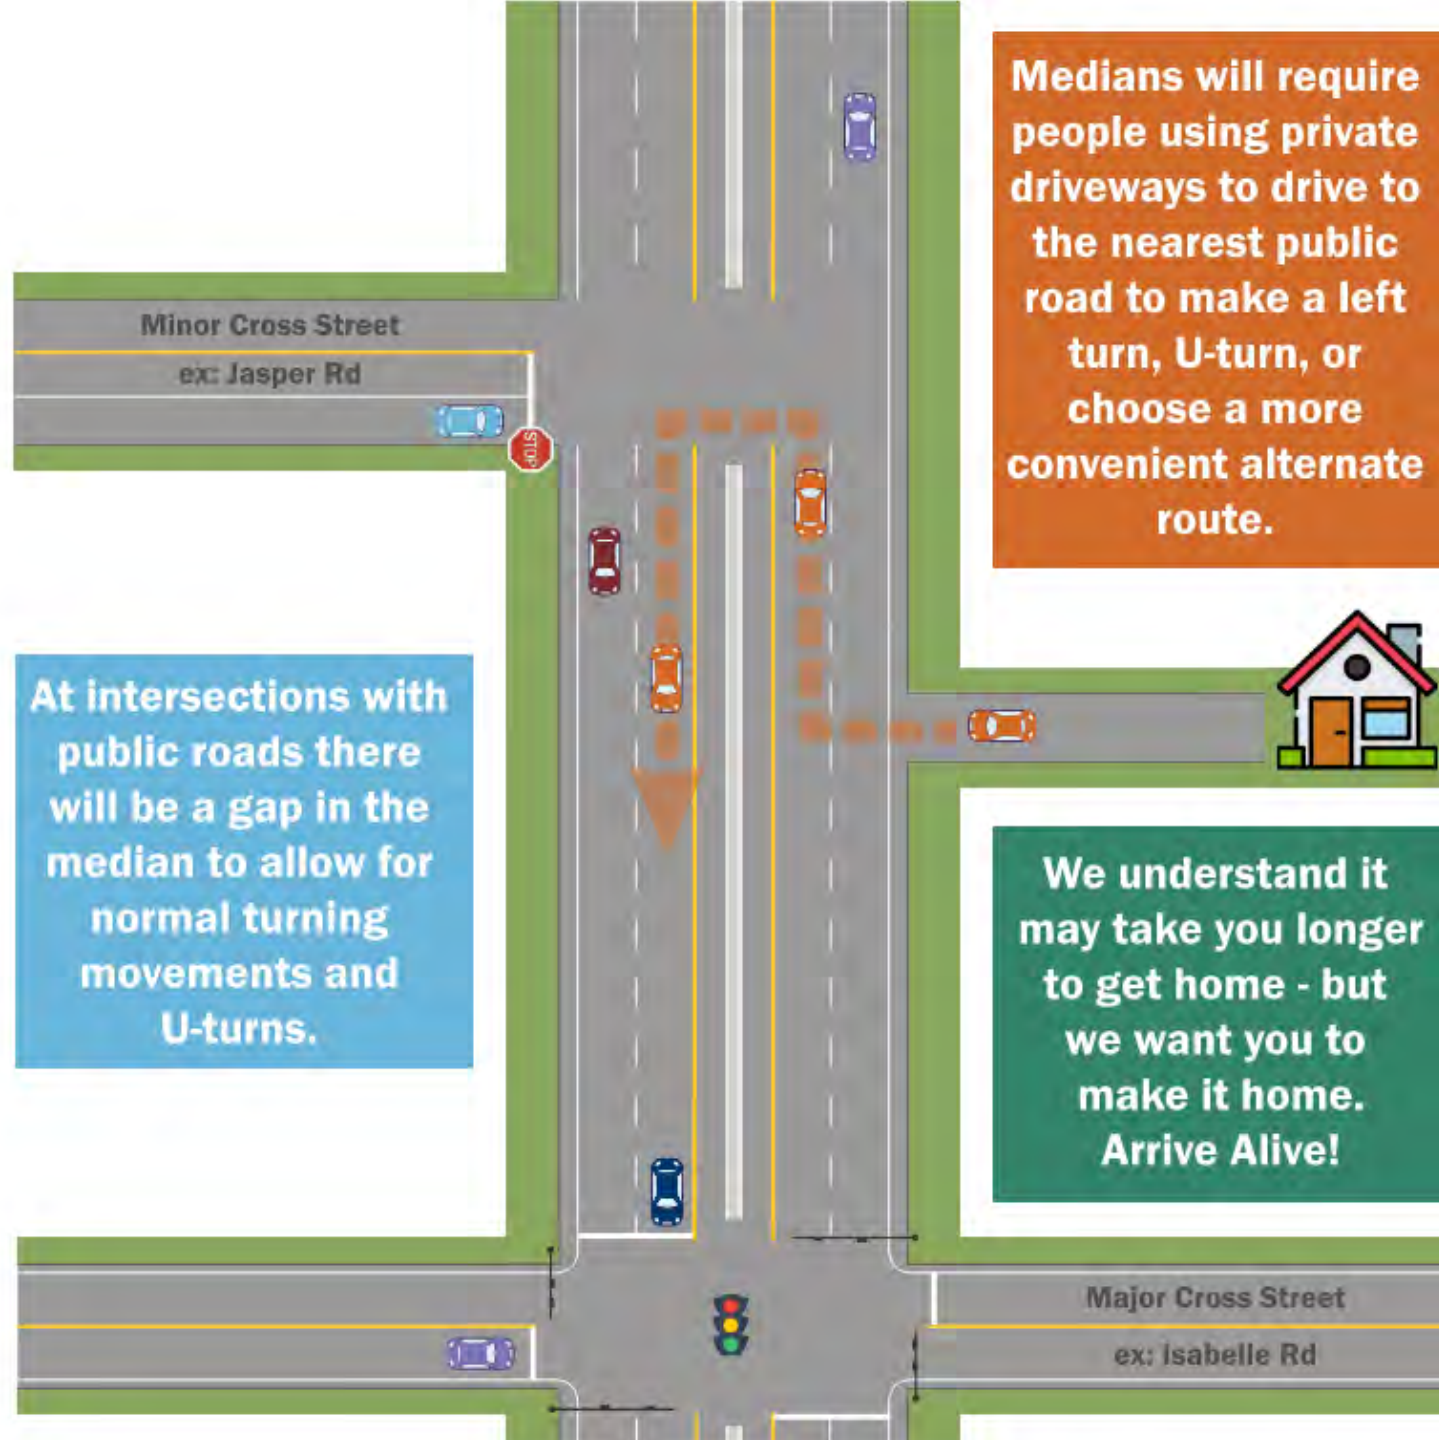

# Median Barrier – Proposed Cross Section

# Median Barrier

- Maintain access at public intersections
- Private driveway access will be analyzed (generally will be right in, right out)
- Coordination with Emergency Services
- Modifying access points can be controversial – but will save lives

# SS4A Implementation Grant Application

July 2023 - submitted a Safe Streets for All (SS4A) Implementation Grant application for funding for the construction of median barriers in the rural segment.

## THE PROJECT

Boulder County seeks federal investment to:

### Construct

**12.1 miles of median barrier on US 287**

This project would have prevented **22 fatalities** since 2012 and saved the region approximately **\$21 million** annually (in 2021 dollars) due to the economic loss of life.

**\$16.8**  
million

Boulder County is requesting \$16.8 million to leverage \$4.2 million in local funds to deliver these safety improvements.

2023 Safe Streets and Roads For All (SS4A) Grant

**Arrive Alive: US 287**  
**Median Safety Project**

# Median Barrier Analysis

- Maintain access at public intersections
- Private driveway access will be analyzed (generally will be right in, right out)

# Discussion Questions

- How frequent does emergency services need median openings for U-turns for emergency response?
  - Is this something you've dealt with at other divided highways?
  - Example: US 34 (east of Loveland)
  - <https://www.google.com/maps/@40.4071216,-104.9737955,205m/data=!3m1!1e3?entry=ttu>
- What is the appropriate design vehicle for U-turns?
- Are the existing major intersections appropriate for U-turns or should vehicles be rerouted?
- What turn movements are needed for emergency service operations (i.e. which lane do you turn from, can you crossover and travel in the opposite direction, etc.)?

# Notes:

- Jeff Webb: Design to accommodate a ladder truck.
  - Ladder trucks are slightly larger than what is shown in the turn template concept designs.
  - Can provide turning templates for the ladder truck (likely 45' overall length and 24' wheel base length).
- Emergency services responds to all crashes, not just the ones that cross the centerline
  - Majority of the responses are to crashes at intersections.
  - Mountain View has responded to dozens of crashes on US 287 in the last year
  - The movements of private vehicle drivers are not predictable and can't count on them to move over. Bulbouts will be necessary because a fire truck could be making a U-turn from any given lane based on which lane frees up.
  - To be most conservative, design the U-turn bulbouts assuming the fire truck would be turning from the left lane.
- Consor to send the proposed concept design and emergency services can provide feedback about where would need additional breaks in the median
  - There is potential for emergency response to take a different route or have a different jurisdiction respond based on the location and U-turn restrictions.
  - It will be important to have more breaks in the long sections (Gaynor Lake Road to Pike Road is an example where there may be a long stretch with no public roadways in between).
- U-turns at intersections with channelized right turn islands (example: Isabelle Road) will require significant reconstruction of signal infrastructure to be able to accommodate U-turns. Would a median break approximately ¼ mile before the intersection work to accommodate a u-turn prior to the intersection.
  - This would be OK, but would need to make sure the traffic is not stacked back to the U-turn location.
  - Sometimes the Opticom does not change through traffic to green early enough.
- Fire department does not drive in the opposite direction of travel.
- When responding to a crash, will often use the first fire truck parked at an angle before the crash to act as a barricade.
- Unintended consequence of the median barrier: may need to close both lanes of traffic when responding to crash because less median "work" space.

# Meeting Attendees and Action Items

## Meeting Attendees

- Paul Frank, Boulder County Vision Zero
- Alexandra Phillips, Boulder County Crash Analysis Team & Bike Planner
- Dan Higgins, Fire Chief Longmont
- Jeff Webb, Fire Marshal Mountain View Fire
- Steve Silverman, 911 Communications Director for 287 jurisdiction
- Katrina Kloberdanz, CDOT
- Bryce Reeves, CDOT
- Jessica Hernandez, Consor
- Ben Waldman, Consor
- Nikki Riemer, Consor

## Action Items

- Jeff Webb to send turn template/dimensions for ladder truck
- Consor to send median concept. Emergency services to mark up for emergency service preference of frequency and locations of U-turns.

# Memorandum

**Date:** August 9, 2023

**To:** Boulder County Emergency Services

**From:** Consor Engineers

**Subject:** US 287 Center Median Barrier & Emergency Services Coordination Memo

## Introduction

The US 287 Vision Zero Safety and Multimodal Mobility Study is currently underway. As part of the project, crash data was analyzed along the US 287 corridor from Midway Boulevard in Broomfield to Horseshoe Circle in Unincorporated Larimer County. The crash analysis identified crash trends and identified recommendations with the goal of eliminating all traffic fatalities and severe injuries along the corridor. There were two segments identified along the US 287 corridor that had an above-average rate of fatal and severe crashes where most of the fatal and severe crashes were caused by vehicles crossing over the travel lane into the opposite direction of traffic resulting in head-on crashes or sideswipe (opposite direction) crashes. These crash types are occurring along rural areas where the highway is undivided with high posted speed limits. A center median barrier is recommended in the two segments to improve safety and mitigate crossover crashes. Several median barrier alternatives were evaluated, and the proposed recommended median barrier is a cast-in-place concrete median barrier. Boulder County recently applied for a Safe Streets For All Implementation Grant to obtain funding for installation of the median. It is recommended to have median openings for U-turns at all public accesses and at locations where there is greater than one-mile distance between public accesses. The purpose of this memorandum is to summarize the work done to date to understand U-turn turning templates at typical intersections and to facilitate the discussion with emergency services to understand the requirements needed to maintain emergency service response times. Our goal is to work collaboratively with Boulder County emergency services and perform additional analysis as needed to accommodate emergency response vehicles.

## U-Turn Analysis

### Design Vehicles

Three design vehicles were used to understand U-turn turning templates at several intersections along the corridor. The following describes the vehicle types and the assumed dimensions:

1. **Fire truck** – A fire truck turn template was used to understand the required area for emergency services to make a U-turn to access an emergency located between public accesses. Turn templates were run for fire trucks making a U-turn from the left-turn lane and from the middle travel lane.

2. **Passenger Vehicle with Trailer** – A Passenger Vehicle with Trailer template was used to understand the required area for vehicles pulling a trailer to make a U-turn to access private property. There are many farms located within the proposed center median areas and it is anticipated that vehicles pulling trailers with equipment/animals or vehicles pulling RV trailers must be accommodated.

3. **SU-30** – A SU-30 template was used to understand the required area for box truck delivery vehicles to make a U-turn to access private property. These vehicle types have a large U-turn footprint but are not permitted to use an outside lane to make a turn like firetrucks.

## U-turn Locations

Our team analyzed U-turns at three typical locations along the corridor based on the characteristics of the intersection. The fire truck, passenger vehicle with trailer, and SU-30 U-turn turning templates were analyzed at the following intersections:

1. **Dawson Drive** – minor, 3-leg intersection; unsignalized
2. **Lookout Road** – major, 4-leg intersection; signalized
3. **Isabelle Road** – major, 4-leg intersection; channelized right-turn islands; signalized

## Conclusion

There were three turn templates run at three typical intersections. **Appendix A** displays a summary of all turn templates run at each intersection. The results of the turn templates are intended to understand the vehicle path for U-turns caused by the installation of the center median and facilitate discussion with Local Agency and Boulder County Emergency Services to ensure our design adequately accommodates emergency response vehicles.

## Future Considerations and Discussion

- Confirm accommodation and typical operations of emergency services vehicles along the US 287 corridor.
- We understand that Local Agency and Boulder County Emergency Services may have different dimensions for their fire truck turn template. If provided, the team can re-run U-turn templates using the Boulder County emergency services vehicle.
- Signal operations may need to be updated to accommodate U-turns during emergency vehicles responses to ensure opposing traffic has a red light when fire trucks are making a U-turn to ensure there are no conflicting movements.
- Specific locations of median openings to accommodate U-turns where openings between public access roadways are greater than one mile are still being considered.

## **APPENDIX G**

---

### **WALK-BIKE PATH FEASIBILITY ROLL PLOTS**

### Dismissed Parallel Routes

109<sup>th</sup> Street is a parallel roadway approximately a quarter mile east of US 287 that was analyzed for an alternate route for the walk-bike path. Figure A below displays the segment of 109<sup>th</sup> Street that was analyzed as a parallel route. This route was dismissed for a variety of reasons:

1. The roadway is narrow and would require widening to accommodate pedestrian and bicycle infrastructure.
2. Several segments of this roadway are currently not paved and would require upgrading.
3. The roadway crosses multiple major roadways at unsignalized locations (Isabelle Road, Jasper Road, and Lookout Road) that would require signalization (Rectangular Rapid Flashing Beacon, Pedestrian Hybrid Beacon, or full traffic signal) to accommodate pedestrian and bicycle crossings.

*Figure A: 109<sup>th</sup> Street Dismissed Alternative*

### **SUPPLEMENTAL CONCEPTUAL DESIGN PACKETS AND COST ESTIMATES**

# US 287 Vision Zero & Safety Project

## Concept Design

### Longmont Pedestrian/Bicycle Improvements

# Contents

- Project Overview
- Safety Analysis and Recommendations
- CDOT Safety Recommendations

# Project Overview

- There are several intersections in downtown Longmont that were identified as having pedestrian and bicycle crash trends.
- CDOT has completed concept designs to improve pedestrian and bicycle safety at 9<sup>th</sup> Avenue, Mountain View Avenue, 17<sup>th</sup> Avenue, and 23<sup>rd</sup> Avenue. CDOT is currently moving these concept designs into the final design phase.
- The US 287 Vision Zero Project is moving these CDOT concepts forward and documenting additional recommendations to be considered as part of final design.

# Safety Analysis and Recommendations Summary

↑ Angle

(X) Fatality

Total Crashes 74

Severe Crashes: 9

Fatal Crashes: 1

Bicycle-Involved: 4

Pedestrian-Involved: 6

## Left-turn Operations

NBLT: Perm

SBLT: Perm

EBLT: Perm

WBLT: Perm

## Observations

- 19 approach turn (12 NB; 7 SB)
- 16 broadside (6 NB; 5 WB; 4 SB; 1 EB)
- 26 rear end (13 SB; 11 NB; 1 WB; 1 EB)

- Ped/bike trend: left-turns failing to yield ROW to ped/bike
- Ped/bike trend: RTOR versus bike

## Recommendations

- Evaluate updating NB/SB left turn to permitted-protected or protected only during peak periods. This requires replacing existing signal heads with FYA.
- Install LED illuminated border bicycle/pedestrian warning sign (W11-15) with passive pedestrian detection.
- Restrict right-turn-on-reds.
- Protect left-turns when pedestrian push button is pressed to eliminate pedestrian/left-turning vehicle movements from occurring simultaneously. This requires replacing existing traffic signal heads with FYA signal heads.

- Enhance bicycle lane crossing markings across 287.
- Improve bicycle facilities on Coffman Avenue so that bicyclists have a high-comfort parallel route and are not traveling on the sidewalk.
- Install reflective backplates.
- Review yellow and red intervals and coordination.
  - BRT Recommendations: NB/SB BAT lane queue jumps.
- Re-stripe EB/WB intersection approaches to accommodate a bicycle lane (see CDOT design).

SBLT: Prot/Perm

EBLT: Prot/Perm

WBLT: Prot/Perm

## Observations

- 58 approach turns (27 SB; 11 NB; 10 WB; 10 EB)
- 31 broadside (15 SB; 6 EB; 5 WB; 5 NB)
- 77 rear end (31 NB; 25 SB; 16 EB; 5 WB)

- Doghouse style signal heads each direction
- Fatal crash was a broadside crash
- Left-turns failing to yield ROW to ped/bike
- RTOR versus bike crash

## Recommendations

- Evaluate updating left-turn phasing operations to protected-only during peak periods. This would require replacing existing signal heads with FYA signal heads.
- Protect left-turns when pedestrian push button is pressed to eliminate pedestrian/left-turning vehicle movements from occurring simultaneously. This requires replacing existing traffic signal heads with FYA signal heads.
- Install LED illuminated border bicycle/pedestrian warning sign (W11-15) with passive pedestrian detection.
- Restrict right-turn-on-reds.

- Widen EB/WB approaches to accommodate a bicycle lane (see CDOT design).
- Enhance bicycle lane crossing markings across 287.
- Improve bicycle facilities on Coffman Avenue so that bicyclists have a high-comfort parallel route and are not traveling on the sidewalk.
- Review yellow and red intervals and coordination.
- BRT Recommendations: NB/SB BAT lane queue jumps.

## Left-turn Operations

NBLT: Prot/Perm

SBLT: Prot/Perm

EBLT: Prot/Perm

WBLT: Prot/Perm

## Observations

- 29 approach turns (10 EB; 8 WB; 6 NB; 5 SB)
- 17 broadside (6WB; 4 NB; 4SB; 4 EB)
- 12 sideswipe (11 SB; 1 WB)
- 38 rear end (12 NB; 12 SB; 8 EB; 6 WB)
- All left-turn signal heads are doghouse style signal heads

- A fatal bicycle-involved crash occurred when southbound vehicle traveling straight through the intersection struck a northbound bicyclist that crossed in the west crosswalk and turned right to cross eastbound.
- Crash trend: left-turns failing to yield ROW to ped/bike
- Crash trend: RTOR versus bike crash

## Recommendations

- Install bulb-outs on southwest and southeast corners; reduce turning radii on the northeast corner (see CDOT design).
- Evaluate updating left-turn phasing operations to protected-only during peak periods. This would require replacing existing signal heads with FYA signal heads.
- Install LED illuminated border bicycle/pedestrian warning sign (W11-15) with passive pedestrian detection.
- Restrict right-turn-on-reds.

- Protect left-turns when pedestrian push button is pressed to eliminate pedestrian/left-turning vehicle movements from occurring simultaneously. This requires replacing existing traffic signal heads with FYA signal heads.
- Improve bicycle facilities on Coffman Avenue so that bicyclists have a high-comfort parallel route and are not traveling on the sidewalk.
- Install reflective backplates.
- Review yellow and red intervals and coordination.

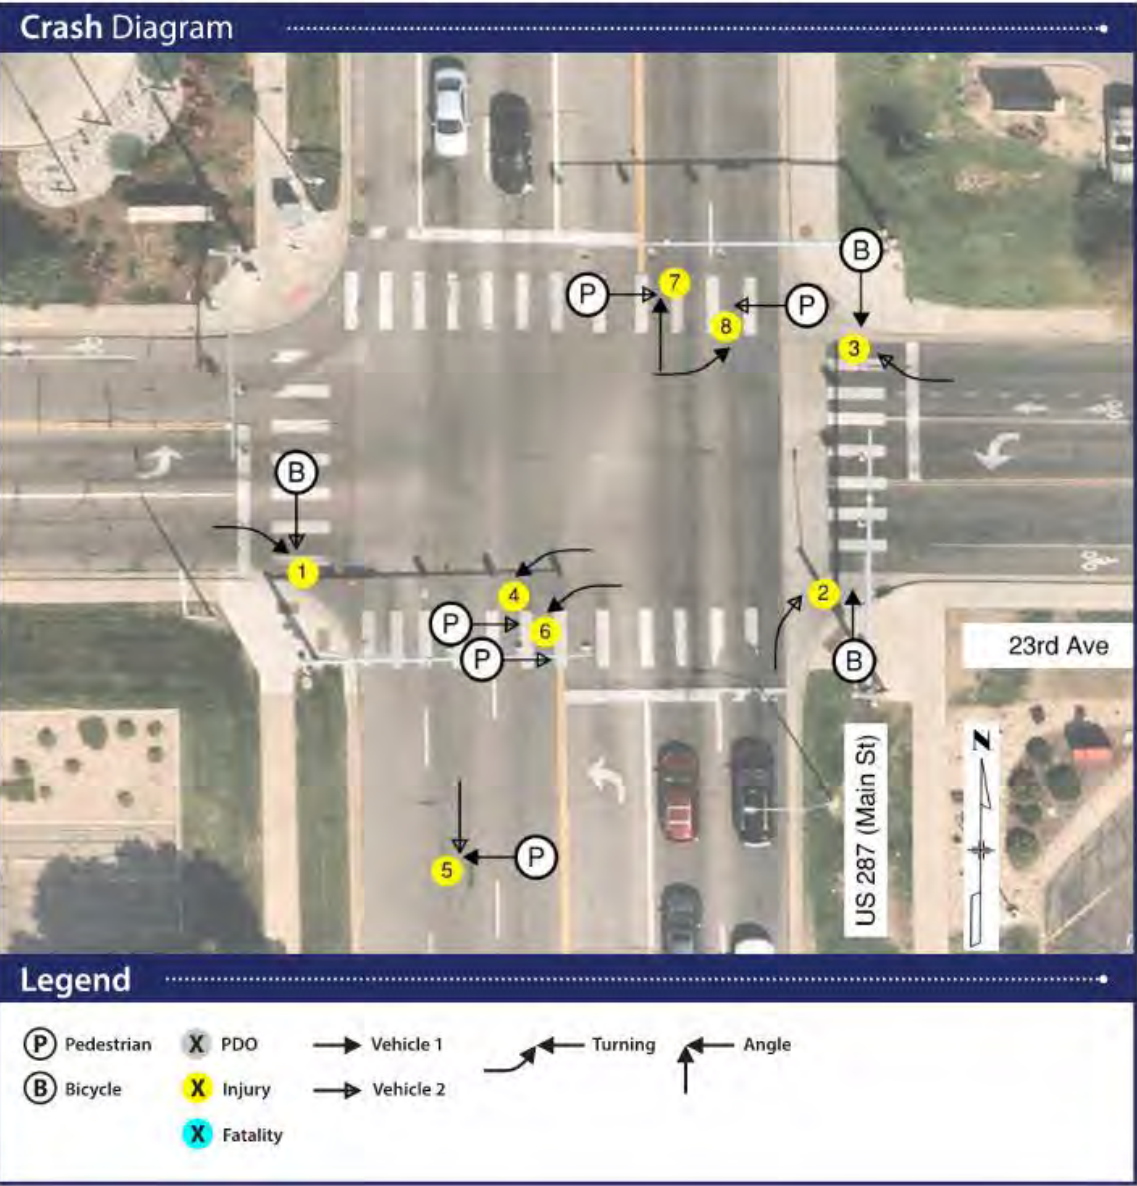

# CDOT Concept Designs

Figure 43: US 287 & 23rd Ave Crash Summary, Field Observations & Countermeasures

### Crash Summary

- This intersection shows a pattern of bicycle crashes that occur when bicycles are traveling in the opposite direction of the vehicle traffic adjacent to them. As they approach the intersection during the pedestrian phase, right turning motorists stopped at the traffic light are looking left for a gap in traffic. Bicycles approach and enter the crosswalk as vehicles move forward and hit them.
- Pattern of left and right turning vehicles hitting bicycles and pedestrians in the crosswalk
- 50% of crashes occurred in dawn, dusk or dark but lit conditions.
- All but one of the at-fault persons whose ages were provided, fell between the age of 9 and 21.

### Field Observations

- Diagonal curb ramps are not ideal as they don't align with crosswalks.
- Push buttons may not meet PROWAG or ADA requirements for accessibility.
- Right turning motorists looking for a gap to turn while not looking for conflicting pedestrians.
- Bicycle sharrow pavement markings on east leg are confusing as the sharrow is offset from the bicycle and arrow ahead symbols and old dashed pavement markings clutter the area.
- The northeast corner is not well lit at night.
- Bollard on northwest corner appears to have been previously struck by a vehicle.
- Vertical grade and sight obstructions on west side of intersection may create visibility conflicts with pedestrians/bikes traveling north/south with vehicles traveling east.

### TOP Countermeasures

- On street bicycle lane improvements at the intersection
- Protective-permissive left turn signal when warranted (northbound and southbound)

### Additional Countermeasures

- Improve intersection illumination
- Reflective backplates for signal heads
- "Turning traffic yield to ped/bike" signage
- General Maintenance (ADA, pavement surface, signal timings)

Figure 44: US 287 & 17th Ave Crash Summary, Field Observations & Countermeasures

### Crash Summary

- This intersection shows a pattern of bicycle crashes that occur when bicycles are traveling in the opposite direction of the vehicle traffic adjacent to them. As they approach the intersection during the pedestrian phase, right turning motorists stopped at the traffic light are looking left for a gap in traffic. Bicycles approach and enter the crosswalk as vehicles move forward and hit them.
- Pattern of left and right turning vehicles hitting bicycles and pedestrians in the crosswalk.
- 70% of crashes occurred between noon and 10:00pm
- 40% of at-fault persons are between the age of 54 and 75, another 40% were not reported
- 50% of crashes occurred between the hours of 11:00am and 1:00pm

### Field Observations

- Right turning motorists looking for gap to turn while not looking for conflicting pedestrians.
- Northeast corner east/west sidewalk is 4.6 feet and backed by a retaining wall. The narrow sidewalk against back of curb puts pedestrians very close to moving vehicles.
- Nighttime lighting seems adequate.
- Bicycles primarily use the sidewalk to cross and travel.
- Curb ramps are less than ideal as they are not directional.
- Push buttons may not meet PROWAG or ADA requirements for accessibility.
- Ped "Walk" timing feels short.
- On street bike lane striping is not readily apparent at the intersection.
- Intersection pavement is showing signs of alligator cracking.
- Some crosswalk markings are faded.

### TOP Countermeasures

- On street bicycle lane improvements at the intersection
- Leading Pedestrian Interval and No Right Turn on Red

### Additional Countermeasures

- "Turning traffic yield to ped/bike" signage
- General Maintenance (ADA, pavement surface, signal timings)

## Crash Diagram

## Legend

## Crash Summary

- This intersection shows a pattern of bicycle crashes that occur when bicycles are traveling in the opposite direction of adjacent vehicle traffic. As they approach the intersection during the pedestrian phase, right turning motorists stopped at the traffic light are looking left for a gap in traffic. Bicycles approach and enter the crosswalk as vehicles move forward and hit them.
- All the bicycles are listed as at-fault (i.e. Vehicle 1). The crash reports noted a few are due to bicycles not dismounting before entering the crosswalk. This law has since been removed as it was not effective, and the definition of "dismount" was unclear.
- 60% of crashes occurred between noon and 6:00pm

## Field Observations

- The building in the northeast corner of the intersection creates poor sight distance between westbound right turning vehicles and southbound traveling bicycles and pedestrians, approaching the intersection.
- Trees hanging over the sidewalk in the northeast corner of the intersection create shadows over the sidewalk making it more difficult to see approaching bicycles and pedestrians.
- The geometry of the pedestrian ramp and location of the signal controller cabinet and signal pole in the southwest corner of the intersection may encourage northbound bicycles and pedestrians into the road via the east/west ramp, which does not meet driver expectations for eastbound moving vehicles.
- Intersection illuminance could be improved.

## TOP Countermeasure

- LED illuminated border bicycle/pedestrian warning signage (W11-15) with passive pedestrian detection

## Additional Countermeasures

- Increase intersection illuminance
- Relocate traffic signal cabinet and redesign curb ramp
- Restrict right-turn-on-red (RTOR)
- Signage
  - "No Turn on Red" (R10-11)
  - "Turning Vehicles Yield to Ped/Bike" (R10-15)
  - "Wrong Way" (R5-1b)/"Ride With Traffic" (R9-3cP)

### Crash Summary

- This intersection shows a pattern of bicycle crashes that occur when bicycles are traveling in the opposite direction of adjacent vehicle traffic. As they approach the intersection during the pedestrian phase, right turning motorists stopped at the traffic light are looking left for a gap in traffic. Bicycles approach and enter the crosswalk as vehicles move forward and hit them.
- Two of the crashes, one of which was a fatality, involved a bicycle or pedestrian that walked in front of thru moving traffic.
- 75% of at-fault persons were between the age of 18 and 31
- 50% of crashes occurred in June or July

### Field Observations

- The gas station sign in the northeast corner obstructs the view of bicycles and pedestrians traveling southbound toward the intersection. The location of the southbound sidewalk between the grass strip and the gas station parking lot also puts pedestrians at a place where drivers do not expect them.
- Westbound right turning motorists have poor visibility looking south at northbound through traffic due to the large trees in the southeast corner of the intersection. As a result, when making a right turn on red, vehicles primary focus is on finding an acceptable gap in northbound approaching traffic.
- The building in the northwest corner creates poor sight distance between southbound right turning vehicles and eastbound bicycles/pedestrians.
- Parking for northbound and southbound traffic is permitted within the influence of the intersection, resulting in poor intersection sight distance.

### TOP Countermeasure

- Bulb-outs (southwest and southeast corners)
- Reduce turning radii (northeast corner) and narrow northbound outside through lane.

### Additional Countermeasures

- Restrict parking on northbound and southbound approaches to the intersection
- Modify location of the gas station sign in the northeast corner to improve sight distance
- Signage
  - "Turning Vehicles Yield to Ped/Bike" (R10-15)
  - "Wrong Way" (R5-1b)/"Ride With Traffic" (R9-3cP)
- Signal Timing (if additional measures are needed beyond the top countermeasure)
  - Protected left turns on mainline
  - Restrict RTOR on side street and add overlap phase
  - Install Flashing Yellow Arrow (FYA) and utilize Leading Pedestrian Interval

# US 287 Vision Zero & Safety Project

## Plateau Road

# Contents

- Project Overview
- Safety Analysis and Recommendations
- Traffic Operations Analysis Results

# Project Overview

- There is a broadside crash trend at US 287 & Plateau Road where eastbound left-turns are failing to yield right-of-way.
- A traffic signal warrant was recently completed as part of the Wallace 4<sup>th</sup> Addition Traffic Study and the Plateau intersection did not meet traffic signal warrants in the existing conditions.
- The City of Longmont does not have plans to signalize this intersection in the next 10 years.
- As a result, turning movement restrictions are recommended to update the intersection to a right-in/right-out or  $\frac{3}{4}$  movement (left turns restricted on Plateau Road, but allowed on US 287). A traffic analysis was performed to determine if these turning movement restrictions would have negative impacts on adjacent intersections.

-----------	-----------	-----------	-----------

## Observations

7 EBL broadside crashes.

## Recommendations

- Evaluate for traffic signal.
- If intersection does not meet traffic signal warrants, restrict left turns with installation of median (right-in/right-out).

# Traffic Operations Analysis Results

# Traffic Analysis Summary

- A traffic analysis using Synchro 11 software and signal plans provided by the City of Longmont were used to analyze the operational impacts of restricting left-turning movements at Plateau Road. The existing, right-in/right-out, and  $\frac{3}{4}$  movement scenarios were evaluated.
- Diversion assumptions and corresponding traffic counts due to assumed diversion are documented in this section.
- Traffic counts were collected during the AM and PM peak periods at US 287 & Plateau Road and US 287 and Pike Road on Tuesday, August 29, 2023.
- Conclusion: The two alternatives do not negatively impact traffic at US 287 & Pike Road.

# Level of Service

- To measure and describe the operational status of the local roadway network and corresponding intersections, transportation engineers and planners commonly use a grading system called level of service (LOS) put forth by the Transportation Research Board's HCM 2010. LOS characterizes the operational conditions of an intersection's traffic flow; ranging from LOS A (indicating free flow traffic conditions with little or no delay) to LOS F (representing over-saturated conditions where traffic flows exceed the design capacity, resulting in long queues and delays).

## Intersection Level of Service

Level of Service	Signalized Intersection - Average Control Delay (Seconds)	Unsignalized Intersection - Average Control Delay (Seconds)
A	< 10	< 10
B	> 10 to 20	> 10 to 15
C	> 20 to 35	> 15 to 25
D	> 35 to 55	> 25 to 35
E	> 55 to 80	> 35 to 50
F	> 80	> 50

## **Concept Design Packet Dawson Drive**

# Contents

- Project Overview
- Sight Distance Analysis Results
- Key Findings and Next Steps
- Safety Analysis and Recommendations
- Concept Design (attached separately)

# Project Overview

- Dawson Drive is the entrance to the Alexander Dawson School.
- CDOT completed a traffic signal warrant analysis in Spring 2023. The intersection did not meet traffic signal warrants per Chapter 4C in the Manual on Uniform Traffic Control Devices (MUTCD).
- Dawson Drive would be a location where U-turns are allowed after median installation. There were comments during the Technical Advisory Group Meeting about sight distance concerns regarding U-turns due to the downgrade slope north of the intersection. Project team completed a sight distance analysis.

Conclusion: Sight distance is greater than 1,000 ft, therefore this intersection meets sight distance requirements outlined in AASHTO.

# **Key Findings and Additional Questions for Discussion**

# Key Findings

- A traffic signal is not warranted at Dawson Drive.
- Dawson Drive meets sight distance requirements; therefore, we are assuming there will be U-turns allowed at this intersection.
- A SU-30 vehicle can not make the U-turn without conflicting with the edge of pavement and off-street Multi-Use Path.
- A passenger car with a trailer can make a northbound to southbound U-turn without conflicting with the edge of pavement and off-street Multi-Use Path. However, there is not adequate space for a southbound to northbound U-turn and a U-turn bulbout will be required.

# Next Steps

- Confirm appropriate design vehicle.
  - Recommendation: Passenger vehicle with trailer, and assume that an SU-30 or large truck would find an alternate route.
  - Will CDOT or Boulder County make the decision on confirming the design vehicle?
- Confirm if U-turn bulbout should be designed.
  - A passenger truck with trailer requires bulbout for SBD to NBD U-turn.
- Coordination with emergency services will be scheduled for mid-September to understand fire truck U-turn requirements.

# **Safety Analysis and Recommendations Summary**

# US 287 & Dawson Dr

Side-Street Stop Controlled

US 287 Speed Limit = 60 MPH

Total Crashes	6
Severe Crashes:	0
Fatal Crashes:	0

Bicycle-Involved:	0
Pedestrian-Involved:	0

## Left-turn Operations

NBLT: N/A

SBLT: N/A

EBLT: N/A

WBLT: N/A

## Observations

- Entrance to the Alexander Dawson High School.
- Downhill grade to the north which may cause higher SB speeds and limited sight distance for eastbound left-turning vehicles.
- Recent fatalities.

## Recommendations

- Proposed study focus area (concept).
- Multimodal improvements (transit stops).

# US 287 Vision Zero & Safety Project

## Jasper Road

# Contents

- Overview
- Safety Analysis and Recommendations Summary
- Signal Warrant Analysis (*Estimate Based on Available Data*)

# Project Overview

- Broadside crashes caused by westbound left turns failing to yield right-of-way are overrepresented.
- This crash pattern would be mitigated by a traffic signal at US 287 & Jasper Road.
- A signal warrant analysis is required, however as of the time of this project, the Town of Erie has not collected counts at the intersection.
- There are traffic counts on Jasper Road available about 1.5 miles east and historical traffic counts on US 287 south of Lookout Road.
- Since there are minimal land uses along Jasper Road, the available traffic counts were used to estimate if this intersection:
  - Would likely meet traffic signal warrants,
  - Would likely not meet traffic signal warrants, or
  - If the intersection was on the volume thresholds of meeting signal warrants.
- Based on the analysis, the intersection is on the threshold of meeting traffic signal warrant and it is recommended that new traffic data is collected and a formal traffic signal warrant analysis is performed.

# Safety Analysis and Recommendations Summary

# US 287 & Jasper Rd

Side-Street Stop Controlled

## Left-turn Operations

NBLT: N/A	SBLT: N/A	EBLT: N/A	WBLT: N/A
-----------	-----------	-----------	-----------

## Observations

- ✳️ Broadside crashes are overrepresented (6 WBL crashes).
- Future trail (BERT) crossing at or near intersection.

## Recommendations

- Proposed study focus area (concept).
- 🚦 Install traffic signal.
- 🔄 If traffic signal is not installed, consider channelizing northbound right-turn lane and relocating westbound stop bar further to the west to minimize number of lanes to cross to make a left turn.
- Multimodal improvements (transit stops).

# Existing Data on Jasper Road

# Warrant 1: Eight-Hour Vehicular Volume

Warrant 1: Eight-Hour Vehicular Volume (MUTCD Section 4C.02) is met when:

- A. The vehicles per hour given in both of the 100 percent columns of Condition A in Table 4C-1 exist on the major-street and the higher-volume minor-street approaches, respectively, to the intersection; or
- B. The vehicles per hour given in both of the 100 percent columns of Condition B in Table 4C-1 exist on the major-street and the higher-volume minor-street approaches, respectively, to the intersection.

In applying each condition the major-street and minor-street volumes shall be for the same 8 hours. On the minor street, the higher volume shall not be required to be on the same approach during each of these 8 hours. Table 2 displays the volume thresholds from the MUTCD. Traffic volumes are above the listed in the table for Condition A; thus, Warrant 1 is met.

**Table 4C-1. Warrant 1, Eight-Hour Vehicular Volume**

Condition A—Minimum Vehicular Volume									
Number of lanes for moving traffic on each approach		Vehicles per hour on major street (total of both approaches)				Vehicles per hour on higher-volume minor-street approach (one direction only)			
Major Street	Minor Street	100% <sup>a</sup>	80% <sup>b</sup>	70% <sup>c</sup>	56% <sup>d</sup>	100% <sup>a</sup>	80% <sup>b</sup>	70% <sup>c</sup>	56% <sup>d</sup>
1	1	500	400	350	280	150	120	105	84
2 or more	1	600	480	420	336	150	120	105	84
2 or more	2 or more	600	480	420	336	200	160	140	112
1	2 or more	500	400	350	280	200	160	140	112
Condition B—Interruption of Continuous Traffic									
Number of lanes for moving traffic on each approach		Vehicles per hour on major street (total of both approaches)				Vehicles per hour on higher-volume minor-street approach (one direction only)			
Major Street	Minor Street	100% <sup>a</sup>	80% <sup>b</sup>	70% <sup>c</sup>	56% <sup>d</sup>	100% <sup>a</sup>	80% <sup>b</sup>	70% <sup>c</sup>	56% <sup>d</sup>
1	1	750	600	525	420	75	60	53	42
2 or more	1	900	720	630	504	75	60	53	42
2 or more	2 or more	900	720	630	504	100	80	70	56
1	2 or more	750	600	525	420	100	80	70	56

# Warrant 1: Eight-Hour Vehicular Volume

Table 4C-1. Warrant 1, Eight-Hour Vehicular Volume

Condition A—Minimum Vehicular Volume									
Number of lanes for moving traffic on each approach		Vehicles per hour on major street (total of both approaches)				Vehicles per hour on higher-volume minor-street approach (one direction only)			
Major Street	Minor Street	100% <sup>a</sup>	80% <sup>b</sup>	70% <sup>c</sup>	56% <sup>d</sup>	100% <sup>a</sup>	80% <sup>b</sup>	70% <sup>c</sup>	56% <sup>d</sup>
1	1	500	400	350	280	150	120	105	84
2 or more	1	600	480	420	336	150	120	105	84
2 or more	2 or more	600	480	420	336	200	160	140	112
1	2 or more	500	400	350	280	200	160	140	112

Condition B—Interruption of Continuous Traffic									
Number of lanes for moving traffic on each approach		Vehicles per hour on major street (total of both approaches)				Vehicles per hour on higher-volume minor-street approach (one direction only)			
Major Street	Minor Street	100% <sup>a</sup>	80% <sup>b</sup>	70% <sup>c</sup>	56% <sup>d</sup>	100% <sup>a</sup>	80% <sup>b</sup>	70% <sup>c</sup>	56% <sup>d</sup>
1	1	750	600	525	420	75	60	53	42
2 or more	1	900	720	630	504	75	60	53	42
2 or more	2 or more	900	720	630	504	100	80	70	56
1	2 or more	750	600	525	420	100	80	70	56

## Conclusion:

- Condition A: Likely will not meet
- Condition B: There are 4 hours (out of 8 required hours) that meet the 75 vph threshold and there are 3 hours that are within 10 vph.
- The 8-hour Vehicular Volume warrant is close to the threshold of meeting warrants.

Hours and vehicle volume data that meet Condition B or are within 10 vph of meeting Condition B

8:00	67
9:00	77
10:00	76
11:00	78
12:00 PM	77
3:00	65
4:00	65

# Warrant 2: Four-Hour Vehicular Volume

Warrant 2: Four-Hour Vehicular Volume (MUTCD Section 4C.03) is met when the plotted points representing the vehicles per hour on the major street (total of both approaches) and the corresponding vehicles per hour on the higher-volume minor-street approach (one direction only) all fall above the applicable curve in from MUTCD Figure 4C-1.

\*Note: 115 vph applies as the lower threshold volume for a minor-street approach with two or more lanes and 80 vph applies as the lower threshold volume for a minor-street approach with one lane.

# Warrant 2: Four-Hour Vehicular Volume

\*Note: 115 vph applies as the lower threshold volume for a minor-street approach with two or more lanes and 80 vph applies as the lower threshold volume for a minor-street approach with one lane.

## Conclusion:

- There are 4 hours in the data set that are within 4 vehicles of the side street volume threshold.
- The 4-hour Vehicular Volume warrant is close to the threshold of meeting warrants.

Hours and vehicle volume data that are within 4 vehicles of meeting thresholds

9:00	77
10:00	76
11:00	78
12:00 PM	77

# Warrant 3: Peak Hour

Warrant 3: Peak Hour (MUTCD Section 4C.04) is intended for use at a location where traffic conditions are such that for a minimum of one hour of an average day, the minor-street traffic suffers undue delay when entering or crossing the major street.

Warrant 3 is met when the plotted point representing the vehicles per hour on the major street (total of both approaches) and the corresponding vehicles per hour on the higher-volume minor-street approach (one direction only) for 1 hour (any four consecutive 15-minute periods) of an average day falls above the applicable curve in MUTCD Figure 4C-3 for the existing combination of approach lanes.

\*Note: 150 vph applies as the lower threshold volume for a minor-street approach with two or more lanes and 100 vph applies as the lower threshold volume for a minor-street approach with one lane.

# Warrant 3: Peak Hour

## Conclusion:

- There is no one hour throughout the day close to the 100 vph threshold.
- The peak hour warrant will likely not be met.

# Conclusion

- Based on the signal warrant analysis using the existing traffic counts to estimate the volumes at the intersection:
  - 8-hour and 4-hour vehicular volumes are close to meeting the traffic signal warrants
  - Peak hour vehicular volume traffic signal warrant was not met
- Because the 8-hour and 4-hour vehicular volume thresholds are close to meeting traffic signal warrants, it is **recommended that updated traffic counts at the US 287 & Jasper Road intersection are collected and a formal traffic signal warrant analysis is performed.**

# **US 287 Vision Zero & Safety Project**

## **Concept Design Packet Arapahoe Avenue to Baseline Road**

# Contents

- Project Overview
- Safety Analysis and Recommendations
- Concept Design

# Project Overview

- This area has seen an increase in development over the last several years which has made improved bicycle and pedestrian connections and access control management a priority.
- There is a BRT Super Station planned at US 287 & Arapahoe Road.
- Speed limits in the area are inconsistent in the northbound and southbound directions and have high posted speed limits for the surrounding land uses. CDOT will be conducting a speed study in this area to evaluate reducing speed limits and updating to be consistent.
- There are several planning efforts at US 287 & Arapahoe Road including SIU B, SIU C, and the Super Station project. Our team did not recommend any major improvements at this intersection as this intersection is receiving a lot of attention from other projects.

# Safety Analysis and Recommendations Summary

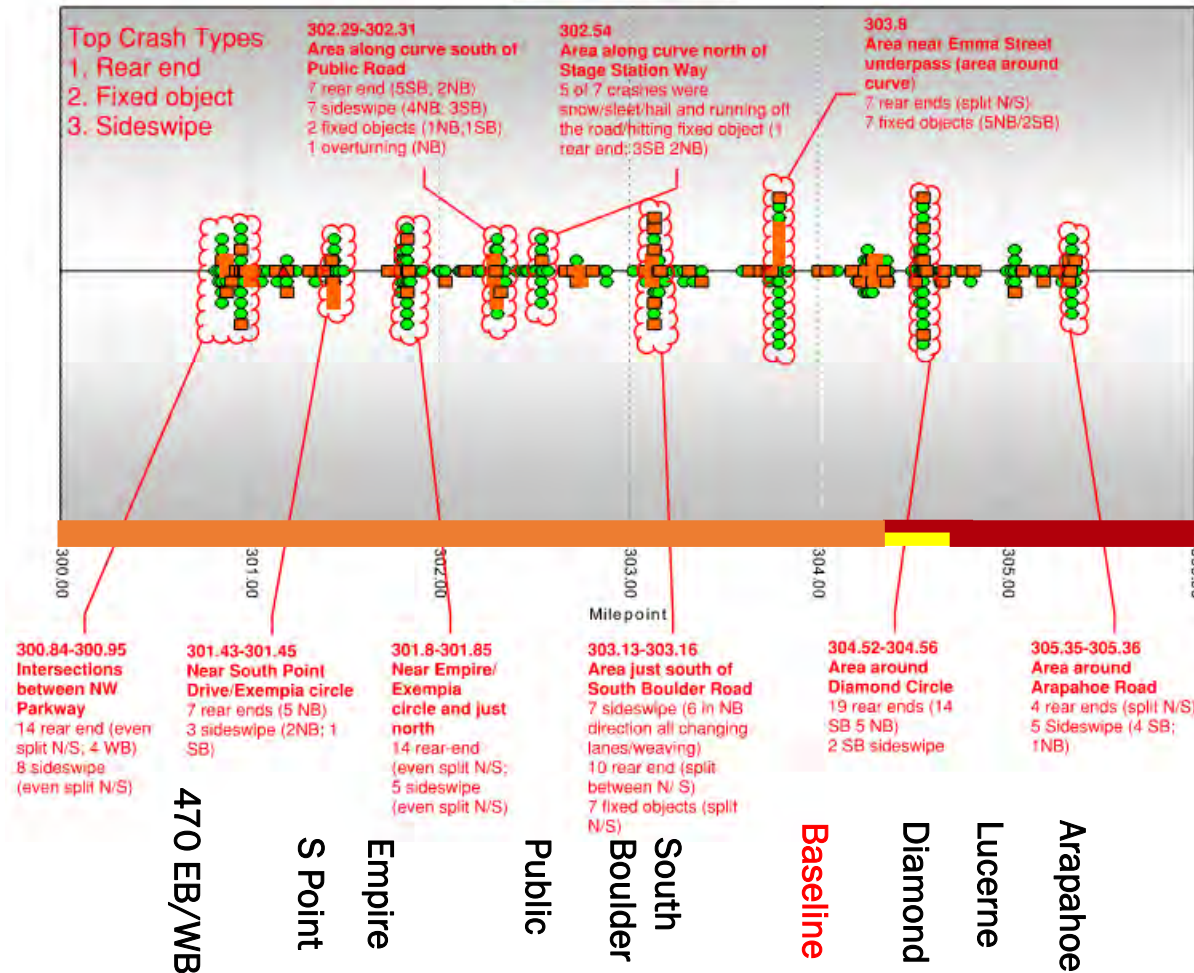

# Non-Intersection Crashes

Lafayette Study Area: MM 300.78-305.37

50 MPH 55 MPH PDO Injury Fatal 60 MPH

Total Crashes 352

Severe Crashes: 4

Fatal Crashes: 1

## Observations

- Speed limits are 55 MPH through urban area of Lafayette.
- Speed limit drops to 50 MPH for a short distance in NB direction around Diamond Circle; SB remains 60 MPH.

## Recommendations

- Consider a speed limit study through Lafayette and potentially reduce speed limits. Reducing speeds will reduce chances of injury and minimize barriers for pedestrians and bicyclists.
- Strengthen pedestrian/bicycle crossings and connections to the BRT station.
- Improve snow removal/clearing efforts around S-curve (Empire to South Boulder Road).
- Install warning signs (W1-8L/R) around S-curve.

# US 287 & Arapahoe Rd

Traffic Signal \*Erie and Lafayette to Coordinate\*  
US 287 Speed Limit = 60 MPH

Total Crashes	141	Bicycle-Involved:	0
Severe Crashes:	5	Pedestrian-Involved:	1
Fatal Crashes:	1		

## Left-turn Operations

NBLT: Prot	SBLT: Prot	EBLT: Perm/Prot	WBLT: Perm/Prot
------------	------------	-----------------	-----------------

## Observations

- 93 rear-end crashes (46% NB and 28% SB).
  - Crashes spiked in 2019 and 2020 (possibly because of construction).

## Recommendations

- Additional follow-up with Lafayette, Erie, Boulder County, and CDOT is required to determine if SIU B, SIU C or Superstation Design focuses on this intersection.
- Review yellow and red intervals and coordination.
- Consider advanced intersection warning signs with activated beacons in the SB direction.
- Consider reducing speed south of the intersection to 45 MPH or 50 MPH.
- BRT Recommendations: Transit Signal Priority (TSP) on US 287.

# US 287 & Lucerne Dr

Traffic Signal \*Erie and Lafayette to Coordinate\*  
US 287 Speed Limit = 60 MPH

Total Crashes	20
Severe Crashes:	1
Fatal Crashes:	0

Bicycle-Involved:	0
Pedestrian-Involved:	0

## Left-turn Operations

NBLT: Prot/Perm	SBLT: Prot/Perm	EBLT: Prot/Perm	WBLT: Prot
-----------------	-----------------	-----------------	------------

## Observations

- 13 rear-ends (6 NB; 6 SB)
  - Traffic signal installed between May 2018 and September 2019.
  - Future development includes a King Soopers with access at this location.
  - Brick wall on east side of Lucerne Drive block line of sight for drivers to see bicyclists traveling north/south on the east side of 287.

## Recommendations

- Evaluate crash data since 2020 to determine if new development impacted traffic crashes.
- Evaluate updating left-turn operations as new development opens. This would require replacing traffic signal heads with FYA signal heads. Further analysis including signal operations analysis and CDOT left-turn warrant analysis is required.
- Install pedestrian refuge island on the north and south legs to provide a two-stage crossing for pedestrians. This requires restriping lane configurations to accommodate the pedestrian refuge island. The new lane configurations would create the left-turns to have a negative offset so it is recommended that if pedestrian refuge islands are installed that left-turn operations are protected. This recommendation/concept is from the Fox Tuttle memorandum found here: <https://assets.bouldercounty.gov/wp-content/uploads/2021/02/memo-on-BRT-station-area-concepts.pdf>
- Strengthen pedestrian/bicycle crossings and connections to the BRT station.
- Review yellow and red intervals and coordination.
- Reducing speeds will reduce chances of injury and minimize barriers for pedestrians and bicyclists.
- BRT Recommendations: Transit Signal Priority (TSP).

\*Proposed concept design Baseline Road to Arapahoe Road\*

# US 287 & Diamond Cir

Traffic Signal

US 287 Speed Limit = 50 MPH(NB); 60 MPH(SB)

Total Crashes	142
Severe Crashes:	1
Fatal Crashes:	2

Bicycle-Involved:	2
Pedestrian-Involved:	1

## Left-turn Operations

NBLT: Prot	SBLT: Prot	EBLT: Prot	WBLT: Prot
------------	------------	------------	------------

## Observations

- Fatal crashes (1 ped, 1 broadside)
- 7 approach turn (4 SB; 2 NB)
- 15 broadside (5 EB; 5 SB; 4 NB; 1 WB)
- 100 rear-end (49 NB; 46 SB; 3 WB; 2 EB)
- No narratives for pedestrian/bicycle crashes

## Recommendations

- Review yellow and red intervals and coordination.
- Strengthen pedestrian/bicycle crossings and connections to the BRT station.
- Reducing speeds will reduce chances of injury and minimize barriers for pedestrians and bicyclists.
- BRT Recommendations: NB/SB BAT lane queue jumps and Transit Signal Priority (TSP).

\*Coordinate recommendations with TMP Recommendations\*

\*Proposed concept design Baseline Road to Arapahoe Road\*

# US 287 & Baseline Rd

Traffic Signal

US 287 Speed Limit = 55 MPH

Channelized right-turn geometry

**\*Proposed concept design Baseline Road to Arapahoe Road\***

Total Crashes	205
Severe Crashes:	0
Fatal Crashes:	0

Bicycle-Involved:	0
Pedestrian-Involved:	1

## Left-turn Operations

NBLT: Prot	SBLT: Prot	EBLT: Prot	WBLT: Prot
------------	------------	------------	------------

## Observations

- 132 rear end (45 SB; 41 NB; 22 WB; 21 EB)
- 25 sideswipe (10 NB; 6 WB; 5 SB; 3 EB)
- 22 broadside (6 EB; 6 WB; 5 NB; 5 SB)
  - Pedestrian crash: NB vehicle traveling straight struck a pedestrian crossing EB against the signal.

## Recommendations

- Reconstruct the SBR channelized right turn geometry to improve turn visibility (align design with BAT queue jump lane).
- Review yellow and red intervals and coordination.
- Reducing speeds will reduce chances of injury and minimize barriers for pedestrians and bicyclists.
- Tighten right-turn radii into the King Soopers parking lot (north of intersection—include in concept).
  - BRT Recommendations: NB/SB BAT lane queue jumps and Transit Signal Priority (TSP); Replace porkchop island and relocate existing signal on pork chop islands.

------------	-----------	-----------	-----------

## Observations

<ul style="list-style-type: none"> <li>43 broadside (22 SB; 16 NB; 5 WB)</li> <li>12 approach turn (7 SB; 5 NB)</li> </ul>	<ul style="list-style-type: none"> <li>9 Fixed Object (5 NB; 2 WB; 1 SB) <ul style="list-style-type: none"> <li>Southbound left-turn lanes have left-turn arrow pavement markings, but no SB left turns at this intersection.</li> </ul> </li> </ul>
--	--

## Recommendations

- Need to confirm who owns/maintains this intersection (Boulder County).**
- Remove SB left-turn arrow pavement markings and install with straight arrow pavement marking. Install no left-turn sign on the mast arm. Replace existing traffic signal head with straight-arrow signal head.
- Install pedestrian/bicycle facilities to connect to proposed BRT bus stop locations. Consider Boulder County TMP recommendation to connect to RTD AB route and proposed park-n-ride.
- Install dashed white lines for dual left turn lane movements.
- Reconstruct traffic signals to reduce fixed object crashes.
- Reconstruct the SBR channelized right turn geometry to improve turn visibility (align design with BAT queue jump lane).
- Install raised crossings in channelized right turns to strengthen trail crossing. This requires Lafayette to take over snow removal maintenance from CDOT at channelized right turns.
- Install reflective backplates.
- Review yellow and red intervals and coordination.
- BRT Recommendations: NB/SB BAT lane queue jumps and Transit Signal Priority (TSP); replace porkchop island and relocate existing signal on pork chop islands.

# **US 287 Vision Zero & Safety Project**

## **Concept Design Packet Midway Boulevard**

# Contents

- Project Overview
- Previous Plan Summary
- Safety Analysis and Recommendations
- DiExSys Reports
- Concept Design (attached separately)

# Project Overview

- There have been several previous planning efforts at the US 287 & Midway Boulevard intersection. Our concept design builds off previous planning efforts to move forward past recommendations.
- The Midway Boulevard Corridor Study and the US 287/120<sup>th</sup> Multimodal Corridor Study have recommendations for different driveway closures for the Shell Station at the southeast corner of US 287 & Midway Boulevard. The Project Team agrees that access control will improve safety. However, while access control is recommended, our conceptual designs do not show any closures at this point because coordination will be required with the property owner to determine which access (if any) should be closed.

# Previous Plan Summary

# Projects at US 287 & Midway Boulevard

- 2009 EIS for US 36
- Midway Boulevard Corridor Study
- Future US 287 Bus Rapid Transit
- US 287 & Midway Boulevard Operational Improvements

# 2009 EIS for US 36

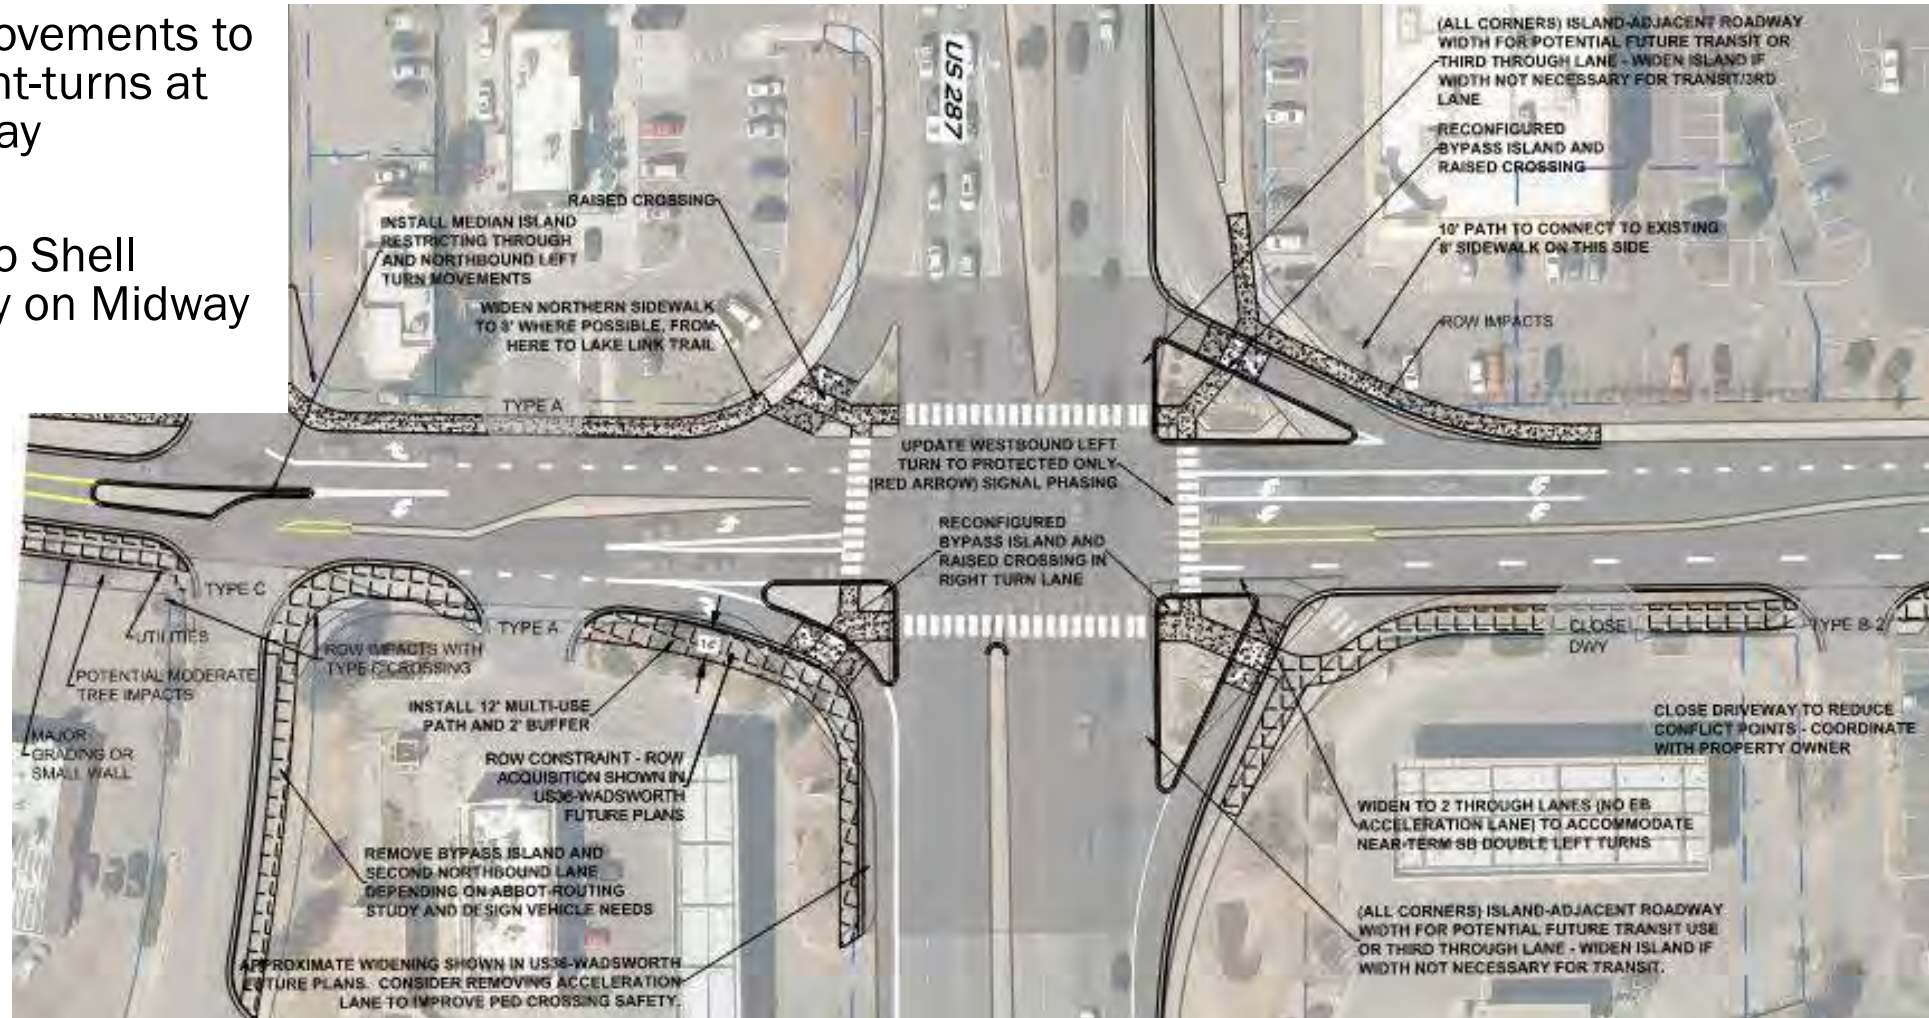

- **2009 EIS for US 36**  
Reconstruct the US 287&  
Wadsworth interchange

# Midway Boulevard Corridor Study

- Geometric improvements to channelized right-turns at US 287 & Midway Boulevard.
- Closes access to Shell Station driveway on Midway Boulevard.

# US 287/120<sup>th</sup> Multimodal Corridor Study

- US 287/120<sup>th</sup> Multimodal Corridor Study
- Closes entrance access to Shell Station at southeast corner of US 287 & Midway Boulevard. Exit access remains.
- This recommendation conflicts with the recommendation from the Midway Boulevard Corridor Study which recommends closing the driveway access along Midway Boulevard.

# Future US 287 Bus Rapid Transit

- Future US 287 Bus Rapid Transit  
Right turn and auxiliary lanes become BAT lanes

## LEGEND:

-  BUS/BUSINESS ACCESS & TRANSIT LANE
-  ROAD WIDENING
-  QUEUE LENGTH
-  PROPOSED BUS STOP

# US 287 & Midway Boulevard Operational Improvements

- Install dual SB left-turn lanes.
- Remove and rebuild channelized right-turn island to accommodate two EB receiving lanes on the east side of the intersection.
- Shorten-cycle lengths to reduce queuing.

# **Safety Analysis and Recommendations Summary**

# US 287 & Midway Blvd

Traffic Signal

US 287 Speed Limit = 35 MPH

Total Crashes 242

Severe Crashes: 3

Fatal Crashes: 0

Bicycle-Involved: 0

Pedestrian-Involved: 3

## Left-turn Operations

NBLT: Prot

SBLT: Prot

EBLT: Perm/Prot

WBLT: Perm/Prot

## Observations

- EB/WB are 4-section signal heads
- 170 rear-end (80 SB; 48 NB; 25 EB; 17 WB)
- 25 approach turn (11 NB; 10WB)

- 22 sideswipes (12 NB; 6 SB; 4 WB)
- 3 severe crashes were approach turn crashes (1 NB; 1 SB; 1 WB)

## Recommendations

- CDOT will be reconstructing the intersection to accommodate a dual SB left-turn lane. The SE channelized right-turn island will be reconstructed to accommodate a second receiving EB lane on the east leg to accommodate the dual SB left turns. Cycle lengths will be shortened to reduce queuing. SBLT is recommended to remain protected-only.
- Geometric improvements to channelized right-turn lanes from the Midway Boulevard Corridor Study concepts.
- NB approach turns likely mitigated with updating left-turn phasing to protected only.
- Confirm if EBL/WBL are operating as permitted/protected or protected-only during peak periods. Consider operating as protected only during peak periods.
- Consider installing Leading Pedestrian Interval.
- Consider installing signage to WBL movements to access US 287 ramp to encourage proper lane utilization.
- Review yellow and red intervals and coordination.

## Driveway Access Southeast of Intersection Recommendation:

- Evaluate closing entrance access along US 287 (coordinate with property owner).
- Discuss potential closure of north access for safer pedestrian/bicycle access across the north driveway.

- NOTES:
1. BUS LANE STRIPING IS STILL BEING DISCUSSED AT A REGIONAL LEVEL AND WILL BE FINALIZED DURING THE FINAL DESIGN PHASE.
  2. COORDINATE APPROVAL OF RAISED CROSSING WITH CDOT AND BROOMFIELD FIRE DEPARTMENT.

THE PROJECT TEAM AGREES THAT ACCESS CONTROL WILL IMPROVE SAFETY. HOWEVER, WHILE ACCESS CONTROL IS RECOMMENDED, OUR CONCEPTUAL DESIGNS DO NOT SHOW ANY CLOSURES AT THIS POINT BECAUSE COORDINATION WILL BE REQUIRED WITH THE PROPERTY OWNER TO DETERMINE WHICH ACCESS (IF ANY) SHOULD BE CLOSED.

## I. Introduction

### I.1 Project Overview

Boulder County, in partnership with the Colorado Department of Transportation (CDOT), Denver Regional Council of Governments, and local municipalities, has retained Consor to provide design services for the US Route 287 (US 287) Vision Zero Safety and Mobility Study (Project) located along the US 287 corridor, between approximately State Highway (SH) 66 and US 36, in Boulder County, County of Broomfield, Town of Erie, City of Lafayette, and City of Longmont, Colorado. The purpose of the Project is to provide conceptual design for safety and mobility improvements with the following objectives: identifying opportunities to eliminate fatal and serious injury crashes in alignment with Boulder County's Vision Zero safety policy and Transportation Master Plan; assessing opportunities to improve safety and connectivity for people walking and bicycling along the corridor; and improve safety and mobility the transit station areas identified in prior studies.

Pinyon Environmental, Inc. (Pinyon) has been retained to prepare this Environmental Conditions Report (Report) in support of the conceptual design development and implementation. The Project area for this analysis generally extends from SH 66 to US 36 (Figure I), with analysis occurring within approximately 100ft from the roadway in rural segments and 30 feet from the roadway in urban segments. The Project area which is inclusive of all proposed concept limits. Resource Project areas may vary due to available data and analysis required, as further discussed in Section 3.0.

**Figure I. Project Area**

## I.2 Recommended Improvements

Based on a review of safety data and input provided by public and stakeholder feedback, the Team identified a five priority safety and mobility improvements at discrete locations in the corridor:

- **Dawson Drive Intersection Improvement:** Improvements of US 287, including striping and widening to accommodate U-turn bulbout at the intersection for agricultural, commercial, and emergency response vehicles. The proposed design is located entirely with the right of way (ROW).
- **Arapahoe Road to Baseline Road Improvements:** General improvements at the Diamond Circle and West Baseline Road intersections, such as left turn upgrades, median reconstruction, signage, striping, relocation of bus shelters, and pedestrian crossing upgrades. In addition, improvements to various access ways throughout the corridor, including the installation of raised pedestrian crossing to connect existing sidewalks. The proposed design is located entirely with the ROW.
- **Dillon Road Intersection Improvement:** General improvements at the four-leg signalized intersection, including traffic signal improvements, signage, reconstruction of channelized right-turn movements, and pedestrian crossing upgrades. The proposed design is located entirely with the ROW.
- **Miramonte Boulevard Intersection Improvement:** Improvements will include updating intersection geometry to accommodate dual southbound left-turn lanes and updates to cycle timing to reduce delay; installation of directional ramps; pedestrian crossing updates; median improvements; and relocation of bus shelters. The proposed design is located entirely with the ROW.
- **Midway Boulevard Intersection Improvement:** General improvements at the four-leg signalized intersection, including updates to intersection geometry to accommodate dual southbound left-turn lanes; updates to cycle timing to reduce delay; reconstruction of challenges right-turn islands; upgrades to pedestrian crossings; and property access improvements. Minor ROW impacts are anticipated at this location.

In addition, two multi-use path (MUP) concepts to improve connections for existing and planned bicycle facilities were developed:

- **MUP Clear Zone Path:** Approximately 12-foot-wide multi-use path separated from the roadway alignment by a “clear zone”, which is an unobstructed area that allows a driver to stop safely or regain control of a vehicle that (Figure 2).

**Figure 2. MUP Clear Zone Path**

- **MUP Barrier Path:** Approximately 12-foot-wide multi-use path separated from the roadway alignment by a barrier and up to a 5-foot median (Figure 3).

**Figure 3. MUP Barrier Path**

Alignment of these two MUP concepts (located to the east or west of the vehicular travel lanes) are still under evaluation, as they will be utilized based on feasibility at each improvement location (i.e., ROW or environmental constraints). However, the alignments were identified to occur in two segments of US 287 corridor: Pike Road to Arapahoe Road (approximately 9.5-miles), and Dillon Road to Miramonte Boulevard (approximately 1.75 miles).

### **1.3 Purpose and Content**

The objective of this Report is to provide an understanding of the environmental context and potential constraints related to the recommended improvements. Pinyon conducted desktop evaluation of the following resources, as further described in Sections 2 and 3.

- Hazardous Materials
- Wetlands and Other Waters of the United States (WOTUS)
- Wildlife/Threatened and Endangered Species
- Historic Resources
- Parks and Recreational Resources
- Environmental Justice
- Land Use, including Farmlands in prime and unique soils.

Based on qualitative assessment of the location, sensitivity, and potential magnitude of impact of the design provided, Pinyon identified the anticipated types of environmental clearance(s), permitting, next steps and/or permitting requirements associated with each recommended improvement, as discussed in Sections 4 and 5 of this Report.

The level of future analyses that will be needed for environmental clearance and permitting is dependent on numerous factors, such as the use of state and/or federal funding, and/or need for state and/or federal approvals. It is assumed that at the very least, a state nexus would apply as US 287 is a state-owned transportation facility maintained by CDOT; therefore, CDOT coordination and clearance processes would apply. A federal nexus may also apply; commonly triggered by Federal Highway Administration (FHWA) funding or permitting required by agencies such as the US Army Corps of Engineers (USACE), US Fish and Wildlife Service (USFWS), or State Historic Preservation Office (SHPO).

## 2. Regulatory Review and Background of Environmental Resources

### 2.1 Hazardous Materials

#### 2.1.1 Federal Regulations

##### 2.1.1.1 *Comprehensive Environmental Response, Compensation, and Liability Act (42 United States Code [USC] Part 103, Sec. 9601 et seq.)*

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) was enacted in 1980 (42 USC §9601 et seq.) and subsequently amended by the Superfund Amendments and Reauthorization Act (42 USC §9601 et seq.). CERCLA (also known as “Superfund”) is designed to clean up closed and abandoned sites contaminated with hazardous substances. The law authorizes the United States Environmental Protection Agency (EPA) to identify parties responsible for contamination of sites and compel the parties to clean up the sites. Sites potentially impacted by hazardous substances are reported to the EPA, and additional investigation is conducted. Based on the results of the investigation, the EPA either determines that no further action is necessary at the federal level (but may refer the site to the state for additional activities) or places the site on the National Priorities List (NPL). Sites remain on the NPL until clean-up activities have been completed and the site is delisted.

##### 2.1.1.2 *EPA Standards and Practices for All Appropriate Inquiries/American Society of Testing and Materials (40 Code of Federal Regulations [CFR] Part 312)*

The EPA has established federal standards and practices for conducting all appropriate inquiries related to the previous ownership and uses of a property to qualify for landowner liability protections under CERCLA.

##### 2.1.1.3 *National Emission Standards for Hazardous Air Pollutants (NESHAP) (40 CFR Part 61, Subpart M)*

The EPA air toxics regulation for asbestos is intended to minimize the release of asbestos fibers during activities involving asbestos handling. The air toxics provision of the Clean Air Act (CAA) requires the EPA to develop and enforce regulations to protect the public from exposure to airborne contaminants. In accordance with Section 112 of the CAA, the EPA establishes NESHAP. The asbestos-specific NESHAP regulation, promulgated in 1973, provides a method for identifying asbestos-containing materials (ACMs) and defines a process to categorize, abate, transport, and dispose of these materials.

##### 2.1.1.4 *Occupational Safety and Health Administration Asbestos Standards (General Industry 29 CFR 1910, Subpart Z; Construction 29 CFR 1926)*

Occupational Safety and Health Administration (OSHA) has standards to protect workers from the hazards of asbestos depending on the type of workplace. The General Industry Standard provided by OSHA covers exposures occurring from activities such as brake and clutch repair, maintenance work, and manufacture of asbestos-containing products. The Construction Standard provided by OSHA covers construction, alteration, repair, maintenance, renovation, and/or demolition of structures containing asbestos.

##### 2.1.1.5 *OSHA Lead Standard for the Construction Industry (Title 29 CFR 1929.62)*

OSHA has standards to protect workers from the hazards of lead in a variety of forms, including metallic lead, all inorganic lead compounds, and organic lead soaps. The standard establishes maximum limits of exposure to lead for all workers covered, including permissible exposure limits and action levels. This standard applies to construction where a worker may be exposed to lead due to alteration, repair, demolition, salvage, or other disturbance of materials covered with lead-based paint (LBP).

#### **2.1.1.6 Resource Conservation and Recovery Act (40 CFR Parts 260-299)**

The Resource Conservation and Recovery Act (RCRA) (42 USC §321 et seq.), enacted in 1976, establishes a framework for the management of both solid waste and hazardous waste. RCRA Subtitle C authorizes the EPA to develop regulations for cradle-to-grave management of these wastes. In Colorado, the Colorado Department of Public Health and Environment (CDPHE) has promulgated regulations for management of both solid waste (6 Code of Colorado Regulations [CCR] 1007-2) and hazardous waste (6 CCR 1007-3).

#### **2.1.1.7 Toxicity Substances Control Act (40 CFR Parts 700-760, 762, 765-766)**

The Toxicity Substances Control Act, enacted in 1976, provides guidance to the EPA and authorized states with administering compliance of this Act, particularly related to polychlorinated biphenyls (PCBs). PCBs were banned from manufacture in the US in 1979, however some products and equipment may still contain these substances. Of particular concern is electric transformers, such as those that are pole-mounted or pad-mounted.

### **2.1.2 State and Local Regulations**

#### **2.1.2.1 Underground Storage Tank Remediation, Colorado Department of Labor and Employment—Division of Oil and Public Safety (7 CCR 1101-14)**

Under the auspices of the Colorado Department of Labor and Employment—Division of Oil and Public Safety, this remediation section administers laws and regulations surrounding damage to the environment and risk to the public from leaking underground storage tanks (USTs), identifies responsibilities of the owner/operators of USTs, and provides technical guidance for response to releases from USTs.

#### **2.1.2.2 CDPHE Solid and Hazardous Waste Regulations (6 CCR 1007-2 Part 1, Section 5) and Air Quality Control Commission Regulation 8 (Part B)**

The CDPHE Hazardous Materials and Waste Management Division Regulations Pertaining to Solid Waste Sites and Facilities govern the disposal of asbestos waste and management of asbestos contaminated soil in Colorado. Air Quality Control Commission governs asbestos abatement in Colorado.

### **2.1.3 Transportation Policy**

The US Department of Transportation (DOT) and the Colorado Department of Public Safety, State Patrol Hazardous Materials Section, are responsible for regulating hazardous materials transportation. The Colorado State Patrol is responsible for reporting spills associated with highway transportation incidents to the CDPHE.

## **2.2 Wetlands and Waters of the United States**

### **2.2.1 Federal Regulations**

#### **2.2.1.1 Clean Water Act, Section 404**

The USACE regulates WOTUS under the authority of the Clean Water Act (CWA), enacted in 1972. The USACE's jurisdiction of WOTUS includes traditional navigable waters (TNWs) and their relatively permanent tributaries as well as associated wetlands (EPA, 2023a). Wetlands are “those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions” (Environmental Laboratory, 1987).

The protection of these areas is critical for maintaining the physical, chemical, and biological integrity of WOTUS. Impacts to WOTUS require permitting through the USACE. Only the USACE has the authority to make jurisdictional determinations. EPA also has authority under Section 404 of the CWA to prohibit, deny,

or restrict the use of any defined area as a disposal site (Section 404(c)), can elevate specific cases (Section 404(q)), and enforce Section 404 provisions. Section 404 of the CWA is jointly implemented by the USACE and the EPA. (EPA, 1989; EPA, 2021). The EPA's roles and responsibilities for the CWA include:

- Developing and interpreting policy, guidance, and environmental criteria used in evaluating permit applications.
- Determining scope of geographic jurisdiction and applicability of exemptions.
- Reviewing and commenting on individual permit applications.

#### **2.2.1.2**      *Executive Order 11990 Protection of Wetlands*

Non-jurisdictional wetlands are not subject to permitting by the USACE under Section 404; however, all Federal agencies are required to avoid and minimize wetland impacts to the greatest extent possible per Executive Order (EO) 11990, "Protection of Wetlands" (Federal Register, 1977). The FHWA is responsible for compliance with EO 11990 and provides guidance to avoid and minimize impacts to wetlands in FHWA Technical Advisory T6640.8A (FHWA, 1987).

#### **2.2.2**      **State Policy**

CDOT has wetland-specific requirements in addition to what is required by the USACE for compliance with EO 11990. A CDOT Wetland Finding report is required if permanent wetland impacts exceed 500 square feet, or if temporary impacts exceed 1,000 square feet, regardless of whether the USACE has jurisdiction. This does not include impacts to open water areas. Further, CDOT requires mitigation for all wetland impacts, regardless of whether they are jurisdictional, at a 1:1 ratio.

### **2.3**      **Wildlife/Threatened and Endangered Species**

Several federal and state regulations are in place to protect plant and animal species and their habitats. Biological resources discussed in this report are protected by the following federal and state regulations and policies.

#### **2.3.1**      **Federal Regulations**

##### **2.3.1.1**      *The US Endangered Species Act*

The US Endangered Species Act (ESA), passed in 1973, protects plant and animal species that are federally endangered (FE), federally threatened (FT), federally proposed endangered (PE), federally proposed threatened (PT), and federal candidate species (FC) with the goal of ensuring their long-term survival and recovery. Section 7 of the ESA charges federal agencies to aid in the conservation of listed species and requires the agencies ensure that their activities are not likely to jeopardize the continued existence of listed species or adversely modify designated critical habitats. The ESA is administered by the USFWS (USFWS, 1973).

##### **2.3.1.2**      *The Migratory Bird Treaty Act and the Bald and Golden Eagle Protection Act*

Vegetation clearing, earth-moving, bridge demolition, and other construction activities have the potential to disrupt nesting activity or destroy nests of migratory bird species. As such, migratory birds are protected under the Migratory Bird Treaty Act (MBTA). Bald Eagles (*Haliaeetus leucocephalus*) and Golden Eagles (*Aquila chrysaetos*) are given extra protection under the Bald and Golden Eagle Protection Act in addition to the MBTA (CFR, 2021b). The USFWS administers both these requirements.

#### **2.3.2**      **State Regulations**

##### **2.3.2.1**      *The Colorado Non-game, Endangered, and Threatened Species Conservation Act*

This act provides some protection within the state for listed species and establishes the state's intent to protect state endangered (SE), state threaten (ST), and state special concern (SC) species. Under the Act, Colorado

law provides for the acquisition of habitat for species listed, as well as other protective measures of the Act (CPW, 1985). Colorado Parks and Wildlife (CPW) is responsible for listing species.

#### 2.3.2.2 CDOT's 2009 Impacted Black-tailed Prairie Dog (*Cynomys ludovicianus*) Policy

CDOT's policy is based on municipal and agency policies, and the most stringent policy for a given area must be followed. For activities in the CDOT ROW, the applicable policies that must be followed are the 2009 CDOT Impacted Black-tailed Prairie Dog Policy and the Black-tailed Prairie Dog Relocation Guidelines (CDOT, 2009; CDOT, 2002).

## 2.4 Cultural Resources

### 2.4.1 Federal Regulations

#### 2.4.1.1 National Historic Preservation Act

The National Historic Preservation Act (NHPA) was passed in 1966; it contains a set of regulations commonly referred to as "Section 106". Section 106 [36 CFR Part 800] is a procedural law that requires federal agencies to consider effects of undertakings on historic properties, including archaeological resources. Historic properties are defined as prehistoric or historic districts, sites, buildings, structures, or objects that are eligible for or listed in the National Register of Historic Places (NRHP). Also included are artifacts, records, and remains (surface or subsurface) that are related to and located within historic properties and any properties of traditional religious and cultural importance to Native American Tribes (Tribes). Historic properties are evaluated for NRHP eligibility based on criteria identified by the National Park Service (NPS) and must retain sufficient integrity to convey historic significance.

Cultural resource evaluations typically use an age threshold of 50 years when identifying potentially historic resources. Infrastructure projects often use 45 years as the year-built threshold to account for planning studies that are often completed several years before construction. Additionally, the 45-year build threshold accommodates extended reviews, as necessary, while minimizing the need to reevaluate project effects to individual resources. In some instances, resources determined to have exceptional importance that are less than 45 years old may be considered eligible to the NRHP.

Federal agencies must involve interested Tribes in the planning process for federal undertakings. Consultation with a Tribe recognizes the government-to-government relationship between the US government and sovereign tribal groups. Federal agencies must be sensitive to the fact that cultural properties of religious and cultural significance to one or more Tribe may be located on ancestral, aboriginal, or ceded lands beyond modern reservation boundaries. Consulting Tribes are offered the opportunity to identify concerns about cultural resources and comment on how a project might affect them. If it is found that a project would affect cultural resources that are eligible for inclusion on the NRHP and are of religious or cultural significance to one or more consulting Tribes, their role in the consultation process may also include participation in resolving how best to avoid, minimize, or mitigate those effects. By describing the proposed undertaking and the nature of known cultural sites, and consulting with the interested Native American community, federal agencies strive to effectively protect areas important to Native American people.

#### 2.4.1.2 Section 4(f) of the DOT Act

This act, passed in 1966, contains a regulation referred to as Section 4(f) [23 CFR Part 774]. Section 4(f) requires agencies under the authority of the DOT to avoid the use of Section 4(f) resources, including historic sites listed on or eligible for the NRHP as well as certain designated land uses. Section 4(f) is a substantive law, and the use of a Section 4(f) resource is only permitted if no feasible and prudent alternative to the use can be identified. Please refer to the Parks and Recreational Resources section of this report for more discussion on Section 4(f) as it relates to non-historic resources.

## **2.4.2 State Regulations**

### **2.4.2.1 Colorado Register of Historic Places Act [24 Colorado Revised Statute 80.1]**

This act was passed in 1975 with the intent to preserve the cultural and historic places in the state for the “education and enjoyment of the residents of this state, present and future.” The Colorado Register of Historic Places Act primarily creates the State Register of Historic Places (SRHP), like the NRHP, and a framework for nominating sites to the State Register. All properties listed in the NRHP are automatically included in the Colorado State Register. The Register of Historic Places Act also includes a stipulation for review of proposed actions by state agencies. This stipulation is generally satisfied within the context of Section 106 review for projects requiring compliance under Section 106; however, a separate state-level compliance process is required when no federal process is applicable to a state action. CDOT and SHPO have established a process for State Register review, which is outlined in the CDOT National Environmental Policy Act (NEPA) Manual (CDOT, 2020).

## **2.5 Parks and Recreational Resources**

### **2.5.1 Federal Regulations**

#### **2.5.1.1 Section 4(f) of the DOT Act**

This regulation, passed in 1966, affords special protection to publicly owned parks; recreational resources; wildlife and waterfowl refuges; and publicly or privately owned historic sites. Before approving a project that uses Section 4(f) property, FHWA must determine there is no feasible and prudent alternative that avoids the Section 4(f) properties and that the project includes all possible planning to minimize harm to the Section 4(f) properties; or FHWA makes a finding that the project has a de minimis impact on the Section 4(f) property. For publicly owned public parks, recreation areas, and wildlife and waterfowl refuges, a de minimis impact is one that will not adversely affect the activities, features, or attributes of the Section 4(f) property. A de minimis impact determination does not require analysis of feasible and prudent avoidance alternatives. This document discusses both Section 4(f)/non-historic resources (wildlife refuges and recreation facilities) and Section 4(f)/historic resources. Use of a Section 4(f) property occurs when:

- land is permanently incorporated into a transportation facility;
- there is a temporary occupancy of land that is adverse in terms of the statute’s preservation purpose; or
- there is a constructive use (The project’s impacts are so severe that the protected activities, features, or attributes of an adjacent property are substantially impaired).

#### **2.5.1.2 Section 6(f) of the Land and Water Conservation Fund (LWCF) Act**

Section 6(f) of the LWCF Act (Section 6(f)), passed in 1965, prohibits the conversion of property acquired or developed with grants from this fund to a non-recreational purpose without the approval of the NPS.

## **2.6 Environmental Justice**

Federal Environmental Justice (EJ) legislation was created out of concerns that land uses and facilities were being placed in minority and low-income populations without regard to the consequences of these actions. The term “EJ” refers to the social equity in sharing the benefits and the burdens of specific projects and/or programs.

### **2.6.1 EO 12898**

This EO applies to federal actions to address EJ in minority populations and low-income populations. It was drafted in response to Title VI of the Civil Rights Act of 1964, which states, “No person in the United States

shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance.”

Guidance on how to implement EO 12898 and conduct EJ analyses was issued by the Council on Environmental Quality (CEQ, 1997). The CEQ guidance states that minority and low-income populations occur where either:

- the minority or low-income population of the affected area exceeds 50%; or
- the population percentage of the affected area is meaningfully greater than the minority population percentage in the general population or other appropriate unit of geographical analysis.

Minorities constitute races and ethnic groups and include the following (as identified by the United States Census Bureau): Black/African Americans, American Indian/Alaskan Natives, Asians, Native Hawaiian/Pacific Islanders, and Hispanics.

Low-income is defined as persons/families with incomes at or below the poverty level as determined by the Department of Health and Human Services or the Census Bureau. CDOT has further refined the definition of low-income to be specific to the area in which the project is located. Instead of using the national poverty level, CDOT assesses low-income status based on the median income for the state and local municipality.

The EO requires projects that involve federal agencies or federal funds be analyzed to determine whether there is a potential for disproportionately high and/or adverse impacts from the project on minority or low-income populations in comparison to populations that are not minority or low-income in the Project area. Disproportionately high and/or adverse effects are defined as being:

- predominately borne by a minority population and/or a low-income population; or
- suffered by the minority population and/or low-income population in an appreciably more severe or greater magnitude than the adverse effect that would be suffered by the non-minority population and/or non-low-income population.

## 2.6.2 **Colorado Senate Bill 21-260**

Section 28 of Colorado Senate Bill 21-260 (SB-260) was signed in 2021 and establishes the Environmental Justice and Equity Branch within CDOT and requires direct work with Disproportionally Impacted (DI) Communities in the project planning, environmental study, and project delivery phases of Regionally Significant Transportation Capacity Projects. The Environmental Justice and Equity Branch must identify and address technological, language, and information barriers that may prevent DI communities from fully participating in transportation decisions that affect health, quality of life, and access for disadvantaged and minority businesses.

DI Communities include communities with high proportions (greater than 40%) of low income, minority, and/or housing cost-burdened communities. “Cost-burdened” is defined in SB-260 24-38.5-302 (I) as a household that spends more than 30% of its income on housing. “Low income” is defined in SB-260 24-38.5-302 (II) as meaning the median household income is less than or equal to 200% of the federal poverty guideline.

## 2.6.3 **FHWA Order 6640.23.**

This order was published in 1998, and it was updated in June 2012; it is titled 6640.23A FHWA Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, and it serves as the agency’s policy regarding EJ. There are three basic tenants at the core of the EO, which are also in FHWA’s policy:

- I. Avoid, minimize, or mitigate disproportionality high and adverse human health and the environmental effects, including social and economic effects on tribal governments, minority, and low-income populations.

2. Ensure the full and fair participation by all potentially affected communities in the transportation decision-making process.
3. Prevent the denial of, reduction in, or significant delay in the receipt of benefits by minority and low-income populations.

Order 6640.23A also states: “When determining whether a particular program, policy, or activity will have disproportionately high and adverse effects on minority populations and/or low-income populations, FHWA managers and staff should take into account mitigation enhancement measures and potential offsetting benefits to affected minority and/or low-income populations” (FHWA, 2012).

## **2.7 Land Use**

Land uses are typically regulated by management plans, policies, ordinances, and regulations that determine the types of activities that are allowed or that protect specially designated or environmentally sensitive uses.

### **2.7.1 Local Land Use Zoning Regulations**

The Project area is along US 287 from Longmont in the north to Broomfield in the south. Several cities in the Project area including Longmont, Lafayette, and Broomfield have land use regulations in place that promote coordinated development. This includes zoning regulations and design standards.

### **2.7.2 Local Comprehensive Plans**

Longmont, Lafayette, and Broomfield have comprehensive plans in place. A primary goal of the Longmont Multimodal and Comprehensive Plan is to create a complete, balanced, and connected transportation system, while also creating livable centers, corridors, and neighborhoods (Longmont, 2016). The City of Lafayette’s Legacy Lafayette Comprehensive Plan provides a planning framework and includes policies that guide development; it was developed to reflect community values related to growth and changes in land use including density (Lafayette, 2021). The City and County of Broomfield’s Comprehensive Plan’s overall vision includes preparing for growth and allowing for adaptability, increasing multimodal transportation, and providing a mix of land use to meet the needs of its citizens (Broomfield, 2016).

### **2.7.3 Farmland Protection Policy Act**

The Farmland Protection Policy Act was established in 1994 with the goal to minimize the conversion of farmland to non-agricultural use. The Natural Resources Conservation Service (NRCS) defines farmland classifications as follows:

- “Prime Farmland” which has the best combination of physical and chemical characteristics for producing food, feed, fiber, forage, oilseed, and other crops with minimum inputs of fuel, fertilizer, pesticides, and labor;
- “Farmland of Statewide or Local Importance” which is used to produce food, feed, fiber, forage, or other crops;
- “Farmland of Unique Importance” which is land currently used to make high-valued food and fiber such as citrus or tree nuts; and
- “Not Prime Farmland” which includes farmland that is none of the above.

### 3. Methodology

An inventory of environmental resources within the Project area was conducted through desktop evaluation of readily available information to identify site conditions and the general proximity resources. No formal field surveys and/or resource verification (e.g., wetland delineation) were performed. Existing environmental conditions are documented herein; as design progresses during future phases of project implementation, additional research, or field verification, may be required to accurately define the location of resources and potential impacts or mitigation opportunities.

#### 3.1 Hazardous Materials

Pinyon completed a desktop review for compliance history of facilities within and near the Project area, as identified through review of aerial imagery and publicly available local, state, and federal records (CDPHE, 2023; EPA, 2023b); a regulatory database was obtained as part of this desktop review (ERIS, 2023). Facilities that may pose a potential risk of impacting the Project as a result of the use, storage, and/or disposal of petroleum and/or hazardous materials were identified (Appendix A-1).

The magnitude of the Project impact from a regulated material is dependent on several factors including: the distance between a potential source of a regulated material and the Project; status of regulated facilities (e.g., active or inactive); known or suspected releases into soil, surface water or groundwater; the hydrogeologic relationship of the source of a regulated material to the Project; and the depth and/or duration of construction. These factors have been considered as part of the evaluation of whether a regulated material has the potential to impact the Project. Facilities were categorized as either having a low or high potential to impact the Project:

- **Low Potential:** Facilities that fit this category include:
  - Facilities with minimal indications of an existing release, past release, or material threat of a release of regulated materials into the ground (soil), groundwater, or surface water that could impact the Project.
  - Facilities located hydraulically down-gradient of the Project.
  - Those facilities where regulated materials are known or suspected in the Project; however, there is a low potential for those materials to be exposed during construction.
- **High Potential:** Facilities that fit this category include:
  - Facilities with indications of an existing release, past release, or material threat of a release of any regulated materials into the ground (soil), groundwater, or surface water, and the possibility of migration from the contaminant source into the Project.
  - Those same facilities that have caused a migration of the contaminants into the Project, and where construction would likely result in exposure of media impacted by those contaminants (e.g., soil, soil vapor, groundwater).

Pinyon has utilized these criteria in evaluating impact potential from regulated materials to the Project.

#### 3.2 Wetlands and Waters of the United States

Pinyon completed a desktop review of the following publicly available information sources to identify potential WOTUS that may occur within the Project:

- Aerial imagery and ground-based photography (Google Earth Pro, 2023)
- United States Geological Service (USGS) topographic maps and National Hydrography Dataset (NHD) (USGS, 2022a; USGS, 2022b; USGS, 2022c; USGS, 2023)
- USFWS National Wetlands Inventory (NWI) maps (USFWS, 2023a)

Available data were reviewed and compiled into a desktop dataset for potential wetlands and WOTUS within the Project area (Appendix A-2); a site visit or a formal USACE delineation was not completed.

### 3.3 Wildlife/Threatened and Endangered Species

Pinyon used the following publicly available desktop information to identify if threatened, endangered, or sensitive species may occur in the Project area:

- Aerial imagery and ground-based photography (Google Earth Pro, 2023)
- USFWS Information for Planning and Consultation (IPaC) system (USFWS, 2023b)
- CPW and Colorado Natural Heritage Program (CNHP) species data (CPW, 2023a; CNHP, 2023)
- CPW species profiles for federally listed threatened and endangered species (CPW, 2023b)
- USFWS NWI maps (USFWS, 2023a)

Available data were reviewed and compiled into a desktop dataset for potential habitat for sensitive species; however, species-specific surveys were not completed.

### 3.4 Cultural Resources

A resource-specific Project area, Cultural Resources Project area (CRPA) was developed to identify cultural resources that may be impacted by the Project (Appendix A-3). The CRPA generally consists of US 287 plus a 150-foot buffered area around the roadway ROW. Previously surveyed cultural resources were identified through a file search of COMPASS database maintained by the Colorado Office of Archaeology and Historic Preservation (OAHP), History Colorado. The COMPASS file search requested through OAHP was submitted on March 29, 2023, and results were received on April 13, 2023.

In addition, Pinyon conducted a desktop analysis to assess the CRPA for previously recorded cultural resources and newly identified, potentially historic resources utilizing the following resources:

- Aerial imagery and ground-based photography (Google Earth Pro, 2023; NETR, 2023)
- CDOT's State Highway Inventory and Online Transportation Information System (OTIS) database (CDOT, 2023)
- Boulder and Broomfield County Assessor's Office records (Boulder County, 2022)
- USGS historic topographic maps (USGS 1904; USGS, 1950; USGS, 1961; USGS, 1984; USGS, 2022)

Historic resource evaluations typically use an age threshold of 50 years when identifying potentially eligible historic resources. Infrastructure projects often use 45 years as the year-built threshold to account for planning studies, which are often completed several years before construction. Therefore, resources constructed in 1978 or before are considered in this report. In some instances, resources determined to have exceptional importance that are less than 45 years old may be considered eligible to the NRHP.

### 3.5 Parks and Recreational Resources

Pinyon completed a desktop review of the following sources to determine if any Section 6(f) or potential Section 4(f) resources occur in or near the Project area:

- Aerial and ground-based photography (Google Earth Pro, 2023)
- CPW Colorado Trail Explorer (COTrex) online mapper (CPW, 2023c)
- CDOT OTIS database (CDOT, 2023)

- Boulder Area Trails data (Boulder County, 2023a)
- Boulder County Regional Trail Plan and On-Street Bikeways Plan (Boulder County, 2001)
- City and County of Broomfield Open Space, Trails, Parks, and Recreation Master Plan (Broomfield, 2003)
- Broomfield Open Space Parks and Trails data (Broomfield, 2023)
- City of Lafayette Parks, Recreation, and Open Space Master Plan Update (Lafayette, 2019)
- City of Lafayette Parks and Open Space data (Lafayette, 2023)
- Longmont Parks, Open Space, and Trails data (Longmont, 2023)
- Longmont Parks, Recreation, & Trails Master Plan (Longmont, 2014)
- Town of Erie Parks and Trails data (Erie, 2023)

Available data were reviewed and compiled into a desktop dataset for known and potential recreational facilities (Appendix A-4). No resource-specific visits or coordination with municipalities was conducted. Recreation connections depicted are conceptual in nature; final alignments and type of connection requires coordination with partner departments, agencies, and stakeholders.

### 3.6 Environmental Justice

To assess EJ populations in the Project area, the 39 US Census Block Groups that are within or adjacent to the Project area were evaluated using American Community Survey (ACS) 5-year summary data (US Census Bureau, 2021). The Block Groups were selected based on their proximity to the Project area and the likelihood that residents within these boundaries use US 287 and would be impacted by the Project (Appendix A-5). A project must be considered a regionally significant transportation capacity project for DI communities to be analyzed under SB-260.

This evaluation compared the percentage of minority, low-income, and Limited English Proficiency (LEP) populations within these 39 Block Groups with the corresponding County percentages (Boulder or Broomfield) to determine if there are higher levels of each EJ populations in them than are present in the County.

### 3.7 Land Use

Pinyon reviewed the following data sources to evaluate existing and planned land uses, and the presence of farmlands, for parcels within 300-feet of the Project area:

- Aerial imagery and ground-based photography (Google Earth Pro, 2023)
- Longmont Multimodal and Comprehensive Plan (Longmont, 2016)
- City of Lafayette Comprehensive Plan (Lafayette, 2021)
- City and County of Broomfield Comprehensive Plan (Broomfield, 2016)
- Boulder County Comprehensive Plan (Boulder County, 2020)
- NRCS Web Soil Survey (NRCS, 2023)

Available data were reviewed and compiled into a desktop dataset for known and future land uses within the Project area (Appendix A-6).

## 4. Existing Environmental Conditions

Environmental conditions within the corridor are summarized below. Where applicable, specific resources and/or features are included within the Environmental Resource Mapbook (Appendix A). Potential impacts and next steps listed for specific Project improvements are provided in Section 5.

### 4.1 Hazardous Materials

Land use in the Project area consists of commercial, residential, and agricultural properties (Google Earth Pro, 2023). The northern (Longmont) and southern (Broomfield) portions are generally more developed with commercial and residential properties, whereas the central segment consists of agricultural land. In general, groundwater flow mimics topography, and the groundwater-flow direction is expected to be to the east. The depth to groundwater is anticipated to vary by location across the Project corridor.

A review of agency records indicates a total of 95 facilities identified within the Project area (Appendix A-1); the following four facilities were identified as having a high potential to impact the Project.

- Former Voluntary Cleanup and Redevelopment Program (VCUP) site (University of Colorado Foundation ERIS ID #300) at 1600 & 1610 Main Street. This facility has impacted groundwater migrating from an upgradient source.
- Former VCUP site at US 287 and Quail Road (Ken Pratt Blvd Extension ERIS #93). Impacted soil was identified; however, records indicate an informal Corrective Action Plan (CAP) was prepared for the facility. No other readily available information is available regarding the status of the remediation.
- Former landfill facility located on the northeast quadrant of US 287 and Miramonte Blvd (Broomfield Landfill ERIS ID #315). This is a downgradient facility with impacted soil and groundwater and a potential for Regulated Asbestos Contaminated Soils. Impacts are primarily on the southwestern portion of the property. The facility includes use restrictions for allowable improvements and groundwater use.
- There are several open Leaking UST facilities (i.e., a release that has not yet been remediated and/or closed). One upgradient facility was identified as having a high potential to impact the Project area: the Circle K Store #2709873, 425 US 287 ERIS ID #371.

Materials management may be required during ground disturbing activities and/or activities that encounter groundwater (i.e., signal poles, deep caissons) in the vicinity of these high potential facilities. In addition, bridge structures exist in the Project area; these structures may contain LBP and potential ACMs. The regulatory database with detailed listings of hazardous materials facilities is provided as Appendix B.

### 4.2 Wetlands and Waters of the United States

Desktop evaluation identified numerous potential WOTUS within the Project area (Appendix A-2). The following is an overview of features located within the corridor from north to south.

**Table 1. Potential Wetlands and Waters of the United States in the Project Area**

Feature	Description
Oligarchy Ditch	Flows to the east/southeast under US 287, through the Project area. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). Oligarchy Ditch has a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present.
St. Vrain Creek	Flows to the east/southeast under US 287, through the Project area. This feature is represented as a perennial river on the USGS topo maps (USGS, 2022). St. Vrain Creek

Feature	Description
	has a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present. Herbaceous Riparian and Forested/Shrub Riparian wetlands are mapped on the NWI within and surrounding St. Vrain Creek (USFWS, 2023a).
Left Hand Creek	Flows to the northeast under US 287, through the Project area. This feature is represented as a perennial stream on the USGS topo maps (USGS, 2022). Left Hand Creek has a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present. Herbaceous Riparian and Forested/Shrub Riparian wetlands are mapped on the NWI within and surrounding St. Vrain Creek (USFWS, 2023a).
Unnamed Roadside Swale	Roadside swale with a defined channel located on the east side of US 287 located between approximately Quail Road and St. Vrain Creek; appears to flow north toward St. Vrain Creek. Open waters and wetlands may be associated with this feature.
Unnamed Roadside Swale	Roadside swale with a defined channel located on the east side of US 287 located between approximately Pike Road and Plateau Road. Open waters and wetlands may be associated with this feature.
Dry Creek	Flows to the east/northeast under US 287, through the Project area. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). Dry Creek has a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present. There is a potential for roadside swales containing wetlands on the east and west of US 287, which ultimately flow toward this feature.
Unnamed Roadside Swales	Roadside swales lacking a defined channel are located on the east and west of US 287 from Plateau Road to Niwot Road, lining properties with apparent agricultural uses. At Oxford Road, an unnamed ditch feature is depicted as an intermittent stream on the USGS topo map, flowing east and then southeast under US 287. Open waters and/or wetlands may be associated with these features.
Unnamed Ditch	An unnamed ditch feature with potential wetlands is located west of US 287, south of Niwot Road. The feature is depicted as an Aqueduct on USGS topo maps (USGS, 2022) and freshwater emergent wetland habitat is mapped on the NWI (USFWS, 2023a).
Boulder and Whiterock Ditch	Flows to the east under US 287, through the Project area. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). Boulder and Whiterock Ditch has a well-defined channel and riparian corridor with a potential for fringe wetlands and wetlands on alluvial bars. Forested/Shrub Riparian wetlands are mapped on the NWI within and surrounding the ditch (USFWS, 2023a).
Unnamed Pond	An unnamed pond is located east of US 287, south of Boulder and Whiterock Ditch. The feature is not depicted on USGS topo maps and appears to be a man-made reservoir or water quality pond. Open waters and/or wetlands may be associated with this feature.
Unnamed Roadside Swales	Roadside swales lacking a defined channel are located on the east and west of US 287 from SH 52 to Lookout Road, lining properties with apparent agricultural uses. Open waters and/or wetlands may be associated with these features.
Unnamed Ditch	An unnamed ditch feature extends southwest/northeast under US 287, south of Lookout Road. The feature is not depicted on USGS topo maps; open waters and/or wetlands may be associated with this feature.
Legget Ditch	Flows to the northeast under US 287, through the Project area. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). Legget Ditch has a well-defined channel, consisting of either concrete or clay-lined to the west of US 287. Fringe wetlands and riparian areas may be associated with this feature.

Feature	Description
Boulder Creek	Flows to the northeast under US 287, through the Project area. This feature is represented as a perennial river on the USGS topo maps (USGS, 2022). Boulder Creek has a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present. Forested/Shrub Riparian wetlands are mapped adjacent to Boulder Creek; large areas depicted freshwater emergent wetland habitat is mapped on the NWI to the north (USFWS, 2023a).
Boulder and Weld County Ditch	Flows to the east under US 287 through the Project area, north of Jasper Road. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). Boulder and Weld County Ditch has a well-defined channel and riparian corridor with a potential for fringe wetlands and wetlands on alluvial bars.
Unnamed Roadside Swales	Roadside swales lacking a defined channel are located on the east and west of US 287 from Jasper Road to Isabelle Road, lining properties with apparent agricultural uses. Open waters and/or wetlands may be associated with these features.
Lower Boulder Ditch	Flows to the east under US 287, through the Project area. This feature is represented as a perennial stream on the USGS topo maps (USGS, 2022). Lower Boulder Ditch has a well-defined channel and may consist of clay-lined substrate. Fringe wetlands and riparian areas may be associated with this feature.
Unnamed Pond	An unnamed pond is located east of US 287, south of Boulder and Whiterock Ditch. The feature is not depicted on USGS topo maps and appears to be a man-made reservoir or water quality pond. Open waters and/or wetlands may be associated with this feature.
Leyner Cottonwood No 1 Ditch	Flows to the northeast under US 287, through the Project area. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). Leyner Cottonwood No 1 Ditch has a well-defined channel; fringe wetlands and riparian areas may be associated with this feature.
Unnamed Roadside Swales	Roadside swales lacking a defined channel are located on the east of US 287 from Isabelle Road to Arapahoe Road, lining properties with apparent agricultural uses. Open waters and/or wetlands may be associated with these features.
Erie Lake	Erie Lake is located to the east of US 287. Fringe wetlands and riparian areas may be associated with this feature.
South Boulder Canyon Ditch	Flows to the southeast under US 287, through the Project area. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). South Boulder Canyon Ditch has a well-defined channel; fringe wetlands and riparian areas may be associated with this feature west of US 287; a small outlet with a concrete lined channel is present on the east of US 287 (along with recent development and infill activities).
Unnamed Roadside Swale	A roadside swale lacking a defined channel is located west of US 287, south of East South Boulder Road. Wetlands may be associated with this feature.
Coal Creek	Flows to the east under US 287, through the Project area. This feature is represented as a perennial river on the USGS topo maps (USGS, 2022). Coal Creek has a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present. Forested/Shrub Riparian wetlands are mapped adjacent to Coal Creek on the NWI (USFWS, 2023a).
Unnamed Roadside Swales	Roadside swales lacking a defined channel are located to the east of US 287, south of Coal Creek to Exempla Circle. Wetlands may be associated with these features.
Unnamed Channel	An unnamed channel extends under US 287 in an east/west orientation. The feature has a defined channel, potentially constructed for stormwater conveyance. Freshwater emergent wetlands are mapped on the NWI (USGS, 2022).
Rock Creek	Flows to the northeast under US 287, through the Project area. This feature is represented as a perennial river on the USGS topo maps (USGS, 2022). Rock Creek has

Feature	Description
	a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present. Freshwater emergent wetlands are mapped on the NWI surrounding Rock Creek and extending to the northeast adjacent to US 287 (USFWS, 2023a). A small roadside swale also extends to the south, west of US 287; wetlands may be associated with this feature.
Unknown Wetland	An isolated wetland located to the west of US 287, south of Northwest Parkway. Freshwater emergent wetlands are mapped on the NWI (USFWS, 2023a).
Unknown Stream	A small stream flows to the northwest under US 287. This feature is represented as a disappearing stream on the USGS topo maps (USGS, 2022). Freshwater emergent wetlands are mapped adjacent to the east and west of US 287 on the NWI (USFWS, 2023a).
US 287 Detention Pond	An isolated water feature, named 287 Detention Pond, is located west of US 187 at Miramonte Boulevard. This feature is represented as a perennial lake/pond on the USGS topo maps (USGS, 2022). Fringe wetlands and riparian areas may be associated with this feature.
Community Ditch	Flows to the east under US 287, through the Project area. This feature is represented as a perennial stream on the USGS topo maps (USGS, 2022). Community Ditch has a well-defined channel. Fringe wetlands and riparian areas may be associated with this feature.
Unnamed Ditch	An unnamed ditch feature with potential wetlands extends under US 287, south of West 6 <sup>th</sup> Avenue. The feature is depicted as perennial stream on USGS topo maps (USGS, 2022). It has a well-defined channel; fringe wetlands and riparian areas may be associated with this feature extending south along the east of US 287 toward Midway Boulevard.

### 4.3 Wildlife/Threatened and Endangered Species

#### 4.3.1 Federally Listed Species

Pinyon completed a review of the USFWS online IPaC system; based on that review, there are federally listed as FE, FT, PE, and FC species with the potential to occur in the vicinity of the Project area (USFWS, 2023b).

The pallid sturgeon (*Scaphirhynchus albus*; FE) and Piping Plover (*Charadrius melodious*; FT) are included because they occur downstream of the Project area and could be impacted by projects that result in water depletions to the South Platte River or its tributaries. To address the effects depletions may have on federally listed species that depend on the river for their survival, agencies and organizations in Colorado, including public water suppliers, participate in the South Platte Water Related Activities Program (SPWRAP). If water for this project is sourced from a public water source within the South Platte River basin, potential effects to downstream species would presumably be addressed through SPWRAP via the water provider; therefore, these two species are not discussed further. Additionally, the western prairie fringed orchid (*Panthera praeclara*; FT), and Whooping Crane (*Grus americana*; FE) are included. These species have traditionally been included as downstream species like the pallid sturgeon and Piping Plover but are currently included as “wherever found.” As these species could occur downstream of the Project area, they have been addressed under the SPWRAP and are not discussed further.

The remaining federally listed species include the gray wolf (*Canis lupus*), Preble's meadow jumping mouse (*Zapus hudsonius preblei*; PMJM), tricolored bat (*Peri myotis subfauvus*), greenback cutthroat trout (*Oncorhynchus larkia stomias*), monarch butterfly (*Danaus plexippus*), and Ute ladies'-tresses orchid (*Spiranthes diluvialis*; ULTO) (Table 2).

**Table 2. Federally Listed Species with the Potential to Occur in the Project Area**

Common Name	Species	Federal Status	Habitat	Potential to Occur <sup>1</sup>
<b>Mammals</b>				
Gray Wolf	<i>Canis lupus</i>	FE	Lone, dispersing gray wolves may be present throughout the state of Colorado, but is only known to occur in northwest Colorado in areas of low human occupancy.	<b>None.</b> Suitable habitat does not occur within the Project area. Additionally, the gray wolf only needs to be considered if the activity includes a predator management program. This activity is unlikely to include a predator management program.
PMJM	<i>Zapus hudsonius preblei</i>	FT	Riparian areas of permanent or intermittent streams with herbaceous cover and adequate cover of shrubs and trees.	<b>Low.</b> Suitable habitat may be present within the Project area along the drainages.
Tricolored bat	<i>Perimyotis subflavus</i>	PE	During the winter, tricolored bats are found in caves and mines, although in the southern United States, where caves are sparse, tricolored bats are often found roosting in road-associated culverts. During the spring, summer and fall, tricolored bats are found in forested habitats where they roost in trees, primarily among leaves.	<b>None.</b> Suitable habitat does not occur within the Project area.
<b>Fish</b>				
Greenback cutthroat trout	<i>Oncorhynchus clarkii stomias</i>	FT	Formerly extirpated from its native range, the greenback cutthroat trout is known as a self-sustaining population from a single location in Colorado: a four-mile stretch of Bear Creek south of Pike's Peak. Adapted to cold, clear, oxygenated streams of moderate gradient.	<b>None.</b> Although creeks in the Project area contain the habitat requirements for this species; the greenback cutthroat trout is not known to occur in these drainages.
<b>Insects</b>				
Monarch butterfly	<i>Danaus plexippus</i>	FC	Found within a variety of habitats that feature their obligate larval host plant, milkweed ( <i>Asclepias</i> spp.).	<b>Medium.</b> Suitable habitat may occur within the Project area. Milkweed is likely to occur within the Project area.

Common Name	Species	Federal Status	Habitat	Potential to Occur <sup>1</sup>
<b>Plants</b>				
Ute ladies'-tresses orchid	<i>Spiranthes diluvialis</i>	FT	Sub-irrigated alluvial soils along streams; open meadows on floodplains including riparian areas. The species generally occurs at elevations below 6,500 feet.	<b>Medium.</b> Suitable habitat may occur within the Project area along the drainages.

FT = federally listed as threatened; FE = federally listed as endangered; FC = candidate for federal listing; PT = proposed federally listing as endangered

<sup>1</sup>Based on a review of distribution maps from NatureServe Explorer online (NatureServe, 2023) and Colorado Parks and Wildlife Species Activity Mapping (CPW, 2023a).

#### 4.3.1.1 Preble's Meadow Jumping Mouse

There is a low potential for the PMJM to occur with the Project area. The PMJM lives and reproduces in and near riparian areas located within grassland, shrubland, forest, and mixed vegetation types where dense herbaceous or woody vegetation occurs near the ground level, where available open water exists during their active season, and where there are adjacent upland habitats of sufficient width and quality for foraging, hibernation, and refuge from catastrophic flooding events (USFWS, 2010; USFWS, 2016a). Riparian vegetation typically is varied with a mixed overstory composed of willows (*Salix* spp.) and cottonwoods (*Populus* spp.) and an understory of scattered shrubs, including snowberry (*Symphoricarpos* spp.). Two major habitat components appear necessary: open water and dense vegetative cover.

In December 2010, USFWS designated revised critical habitat for the PMJM in Colorado. The revised critical habitat included a total of approximately 411 miles of rivers and streams and 34,935 acres within Boulder, Broomfield, Douglas, El Paso, Jefferson, Larimer, and Teller counties (USFWS, 2010). USFWS critical habitat is not located in the Project area. However, the closest critical habitat is approximately 21 miles northwest in an unconnected waterway (USFWS, 2010). The southern extent of the Project area (generally south of Dillon Road) is within the block clearance zone (USFWS, 2016b).

Suitable habitat may occur at several water features that cross the Project area (e.g., St. Vrain Creek, Left Hand Creek, Boulder Creek, Coal Creek, and Rock Creek), and a positive capture (defined as domestic cat mortality) was recorded in Coal Creek less than 1 mile upstream of the Project area (USFWS, 2021).

#### 4.3.1.2 Monarch Butterfly

There is a medium potential for monarch butterflies to occur in the Project area. Milkweed is an herbaceous perennial that provides significant habitat and dietary resources for monarch butterflies. Milkweed may be present within the Project area, and furthermore monarch butterflies could use the Project area to migrate. The monarch butterfly is an FC species and is not yet listed or proposed for listing under the Endangered Species Act. There are generally no consultation requirements for candidate species.

#### 4.3.1.3 Ute ladies'-tresses orchid

There is a medium potential for Ute ladies'-tresses orchid (ULTO) to occur in the Project area. The ULTO occurs at elevations below 6,500 feet in wetland and riparian habitat, including moist to wet alluvial meadows, floodplains of perennial streams, and around springs and lakes (USFWS, 1992). Generally, the preferred vegetative cover for the ULTO is relatively open; dense overgrown sites are not conducive to establishment of the species. Where the ULTO is found, soils are typically alluvial deposits of sandy, gravelly material that are saturated to within 18 inches of the surface for at least part of the growing season. The ULTO is found in

association with a number of plant species including slenderleaf false foxglove (*Agalinis tenuifolia*), creeping bentgrass, swamp milkweed (*Asclepias incarnata*), reed grass (*Calamagrostis* spp.), Canada thistle (*Cirsium arvense*), horsetail (*Equisetum* spp.), great blue lobelia (*Lobelia siphilitica*), blue-eyed grass (*Sisyrinchium* spp.), goldenrod (*Solidago* spp.), arrowgrass (*Triglochin* spp.), and swamp verbenas (*Verbena hastata*) (USFWS, 1992). Some drainages within the Project area have the potential for ULTO habitat.

#### 4.3.2 State-Listed Species

Based on a review of the CPW Threatened and Endangered List, CPW Species Activity Mapping data, and the CNHP Tracking List, there are state-listed endangered (SE), state-listed threatened (ST), and state species of concern (SC) with the potential to be impacted by work occurring in the USGS Longmont, Erie, and Lafayette, Colorado 7.5-Minute Quadrangle Maps (CPW, 2023a; CPW, 2023b; CNHP, 2023; USGS, 2022a; USGS, 2022b; USGS 2022c) (Table 3). Pinyon evaluated the potential for these species to occur in the Project area based on an assessment of habitat and species distributions. Note that state sensitive species that are also federally listed are not discussed in this section, as they were previously discussed in Section 4.3.1.

**Table 3. State Listed Species with the Potential to Occur in the Project Area**

Common Name	Species	State Status	Habitat	Potential for Occurrence in the Project area <sup>1</sup>
<b>Birds</b>				
Bald Eagle	<i>Haliaeetus leucocephalus</i>	SC	Open canopies with large, mature trees for perching and nesting. Prefer areas near open waters.	<b>High.</b> Two active Bald Eagle nests are mapped within 0.5 of the Project area between Lookout Road and Arapahoe Road (CPW, 2023a). The entire Project area is within mapped Bald Eagle winter range, and portions of the Project area occur within Bald Eagle winter forage, winter concentration, and summer forage (CPW, 2023a).
Burrowing Owl	<i>Athene cunicularia</i>	ST	Burrows in prairie dog colonies in open grasslands, especially prairie, plains, and savanna.	<b>Medium.</b> Potential Burrowing Owl habitat (black-tailed prairie dog colonies) occur within and surrounding the Project area.

Common Name	Species	State Status	Habitat	Potential for Occurrence in the Project area <sup>1</sup>
<b>Fish</b>				
Brassy minnow	<i>Hybognathus hankinsoni</i>	ST	Small, clear, sluggish weedy creeks or small rivers with sand, gravel, or mud bottom overlain with organic sediment. In Colorado, this species is known to occur in the Lower South Platte River Basin and in the backwaters of the Colorado River.	<b>Medium.</b> Suitable habitat occurs in the Project area.
Common shiner	<i>Luxilus cornutus</i>	ST	Cool, clear water; often over sand, organic matter, or vegetated substrate. In Colorado, this species is known to occur in the South Platte and Colorado river basins.	<b>Medium.</b> Suitable habitat occurs in the Project area.
Northern redbelly dace	<i>Chrosomus eos</i>	SE	Cool, clear, and shaded shallow stream channels and off-channel wetlands. Submerged vegetation needed.	<b>Medium.</b> Suitable habitat occurs in the Project area.
Stonecat	<i>Noturus flavus</i>	SC	Large creeks to small rivers. Cool and warm, slow- and fast-moving reaches with rocky substrates. Commonly inhabit shallow areas.	<b>Medium.</b> Suitable habitat occurs in the Project area.
<b>Mammals</b>				
Black-tailed prairie dog	<i>Cynomys ludovicianus</i>	SC	Shortgrass or mixed-grass prairie. Common in most of the counties of the eastern plains, especially those immediately along the Front Range.	<b>High.</b> Black-tailed prairie dog colonies were noted throughout the Project area.

Common Name	Species	State Status	Habitat	Potential for Occurrence in the Project area <sup>1</sup>
<b>Amphibians</b>				
Northern leopard frog	<i>Lithobates pipiens</i>	SC	Within or near permanent water with rooted aquatic vegetation. Commonly inhabit wet meadows and fields during the summer.	<b>Medium.</b> The Project area has preferred habitat type (i.e., permanent water with rooted aquatic vegetation).
<b>Mollusks</b>				
Cylindrical papershell	<i>Anodontoides ferussacianus</i>	SC	Shallow water near the shore in silt; can also inhabit small streams, creeks, and lakes in sand or fine gravel.	<b>Medium.</b> Suitable habitat occurs in the Project area.

ST = state listed as threatened, SE = state listed as endangered, SC = State Special Concern species (not a statutory category).

<sup>1</sup>Based on a review of distribution maps from NatureServe Explorer online (NatureServe, 2023), CPW Species Activity Mapping (CPW, 2023a), and tracking information from the CNHP Tracking Lists of threatened and endangered species (CNHP, 2023).

#### 4.3.2.1 Bald Eagle

Two locations along the Project area have Bald Eagle nests within 0.5 mile of the Project area. If construction activities are to occur during the Bald Eagle nesting season (December 1 – July 31), a qualified biologist should perform a survey to determine if the Bald Eagle nests are active or if any new/unmapped Bald Eagle nests occur within 0.5-mile of the Project area. If Bald Eagle nests are active before construction or become active during construction activities, further coordination with the CPW and/or USFWS would be required.

#### 4.3.2.2 Burrowing Owl

Black-tailed prairie dog burrows were noted at various locations throughout the Project area (Appendix A-2); therefore, there is potential that Burrowing Owls occur within the CPW-recommended buffer of the Project area (660 feet; CPW, 2020). If construction occurs within 660 feet of a prairie dog colony during the Burrowing Owl nesting season (March 15 – August 31), Pinyon recommends a Burrowing Owl survey be conducted following the guidelines outlined in *Recommended Survey Protocol and Actions to Protect Nesting Burrowing Owls* (CPW, 2021).

#### 4.3.2.3 Black-tailed Prairie Dog

Potentially active black-tailed prairie dog colonies are present at various locations throughout the Project area (Appendix A-2). Project activities should avoid impacts to the colonies when feasible. Where avoiding impacts is not feasible, Pinyon recommends the project follow guidelines outlined in Boulder County's Prairie Dog Management Policy (Boulder County, 2022). Additional information for minimizing potential impacts to the species can be found in CDOT's 2009 Impacted Black-tailed Prairie Dog Policy (CDOT, 2009).

#### 4.3.2.4 Northern Leopard Frog

There is a medium potential for the northern leopard frogs to occur in the Project area. The northern leopard frog is a SC species, which is not a statutory category; therefore, no protection or mitigation is required.

However, it is recommended that potential impacts be minimized by limiting vehicle operation designated work zones and staging areas.

#### 4.3.2.5 *Brassy Minnow, Common Shiner, Northern Redbelly Dace, Stonecat, and Cylindrical Papershell*

There is potentially suitable habitat within the lakes and/or creeks noted within the Project area for brassy minnow, common shiner, northern redbelly dace, stonecat, and the cylindrical papershell. Impacts to these species' habitats are anticipated to be minor and would be minimized by limiting vehicle and equipment operations within aquatic resources and following best management practices relating to water quality.

## 4.4 Cultural Resources

The COMPASS search returned 214 previously identified cultural resources and the desktop revealed 217 newly identified, potentially historic resources within the overall CRPA (Appendix A-3). A majority of the previously recorded resources are located along the northern half of the Project area, primarily through downtown Longmont. Newly identified, potentially historic resources were identified throughout the corridor. This desktop analysis should not be considered comprehensive, as most of the Project area has not been formally surveyed for cultural resources. Due to the number of known and potential cultural resources located within the CRPA, information for specific Project improvements is provided in Sections 4.4.1 through 4.4.3. Detailed information for the entire corridor is provided in the COMPASS Database Results and Potentially Historic Resources Tables (Appendix C).

**PLEASE NOTE:** Disclosure of the precise locations of archaeological resources to the public may be in violation of both federal and state laws. Applicable United States laws include but may not be limited to Section 304 of the NHPA (16 USC § 70w-3) and the Archaeological Resources Protection Act (16 USC § 470hh).

### 4.4.1 *Priority Safety and Mobility Improvements*

- **Dawson Drive Intersection Improvement:** Desktop review did not identify any previously recorded or newly identified, potentially historic resources intersecting the CRPA at the Dawson Drive intersection.
- **Arapahoe Road to Baseline Road Improvements:** The COMPASS file search identified three previously evaluated resources within the CRPA between Arapahoe Road and Baseline Road. Previously recorded resources within the CRPA include: the Road to Remembrance Gateway (5BL.432) located on the west side of the intersection of US 287 and Arapahoe Road; the Erie Water Supply, Boulder Canyon Ditch (5BL.5041.2) intersecting the CRPA at the intersection of US 287 and Arapahoe Road; and the Goodhue #1 Ditch (5BL.2731) intersecting the CRPA between Diamond Circle and Baseline Road. A review of readily available records revealed one newly identified potentially historic resource, 1290 North 107<sup>th</sup> Street, within the CRPA. For more information on the location of cultural resources within the CRPA, see Appendix C-3.
- **Dillon Road Intersection Improvement:** Desktop review did not identify any previously recorded or newly identified, potentially historic resources intersecting the CRPA at the Dillon Road intersection.
- **Miramonte Boulevard Intersection Improvement:** The COMPASS file search did not identify any previously evaluated resources within the CRPA at the Miramonte Boulevard intersection. A review of readily available records revealed one newly identified, potentially historic resource, 2151 Ridge Drive, within the CRPA but ultimately outside the Project area at the southwest corner of the intersection. For more information on the location of cultural resources within the CRPA, see Appendix C-3.
- **Midway Boulevard Intersection Improvement:** Desktop review did not identify any previously recorded or newly identified, potentially historic resources intersecting the CRPA at the Midway Boulevard intersection.

#### 4.4.2 Multi-Use Path: US 287 between Pike Road and Arapahoe Road

The COMPASS file search identified 24 previously evaluated resources within the CRPA between Pike Road and Arapahoe Road (Table 4). A review of readily available records revealed 43 newly identified potentially historic resources within the CRPA between Pike Road and Arapahoe Road (Table 5). For more information on the location of cultural resources within the CRPA, see Appendix C-3.

**Table 4. Summary of Previously Recorded Historic Resources**

Resource Number	Resource Name	Last Determination of Eligibility (Date)
5BL.432	Road to Remembrance Gateway	Officially Eligible for the SRHP (2021)
5BL.469	Union Pacific Railroad	Officially Eligible (2015)
5BL.488.3	Lower Boulder Ditch Segment	Field Eligible (1994) Contributing to Officially Eligible District (1994)
5BL.825	Van Thuyne Farm	Officially Not Eligible (1983)
5BL.826	Grant House – Grant Property	Officially Not Eligible (1983)
5BL.827*	Wadsworth House – Hurley Residence	Officially Not Eligible (1983)
5BL.828	Carlson Farm – Wallace Property	Field Eligible (1996)
5BL.860	Liggett Ditch	Officially Needs Data (2015)
5BL.861	Boulder-Weld County Ditch	Officially Not Eligible (1983)
5BL.862	Leyner Cottonwood No. 1 Ditch	106 Officially Eligible (2015)
5BL.1992	Leyner Farm	Field Not Eligible (1998)
5BL.3443	Hycrest Farm – Johnson-Yeager Farm	Officially Eligible (2020)
5BL.3444	Laughlin-Walker Farm – John Aken Laughlin Farm	Field Eligible (1998)
5BL.5041.2	Erie Water Supply, Boulder Canyon Ditch	Officially Not Eligible (1990)
5BL.5535	Kaestner-Schlagel Farm	Field Not Eligible (2005)
5BL.5537	Richart Property	Field Not Eligible (1995)
5BL.5736	Anderson Property	Field Not Eligible (1994)
5BL.7355	South Platte Supply Canal – Lower Boulder Ditch – Coalridge Ditch – Sullivan Ditch	Field Eligible for SRHP (2019) Contributing to Officially Eligible District (2019)
5BL.7882	Hoyt to Terry Street Transmission Line	Field Not Eligible (1998)
5BL.8718	Zaltin House – Gomez Residence	Field Not Eligible (2002)
5BL.9265	Nils Baler Farm – Joe Smith Sr. Farm	Field Not Eligible (2003)
5BL.9602	Frank Tyler Farm	Field Not Eligible (2005)
5BL.9604	Johnson-Vallat Farm – Haley Open Space	Field Not Eligible (2006)
5BL.9610	Frank Tyler Farm – Tyler Land & Livestock Company – Macy Open Space	Field Not Eligible (2005)

\* Resource not included in Appendix C-3 as these resources are protected under Section 304 of the NHPA (16 USC § 70w-3) and the Archaeological Resources Protection Act (16 USC § 470hh).

**Table 5. Summary of Newly Identified, Potentially Historic Resources**

Address	Date of Construction	Address	Date of Construction
5 Burlington Drive	1973	7963 Gaynor Way	1973-1989
606 Pike Road	1975	7931 Spinnaker Way	1973-1985
0 North 107 <sup>th</sup> Street	1912-2015	10691 Spinnaker Way	1974

#### 4.4.3 Multi-Use Path Segment: US 287 between Dillon Road and Miramonte Boulevard

The COMPASS file search identified eight previously evaluated resources within the CRPA between Dillon Road and Miramonte Boulevard (Table 6). A review of readily available records revealed five newly identified potentially historic resources within the CRPA between Dillon Road and Miramonte Boulevard (Table 7). For more information on the location of cultural resources within the CRPA, see Appendix C-3.

**Table 6. Summary of Previously Recorded Historic Resources**

Resource Number	Resource Name	Last Determination of Eligibility (Date)
5BL374	Burlington Northern Railroad	Officially Eligible (2015)
5BL2712	Rock Creek Site	Officially Eligible (1991); SRHP Listed (1993)
5BL2721	No Resource Name	Officially Not Eligible (1991)
5BL3117	No Resource Name	Officially Not Eligible (2000)
5BL3118	Joe Sabatini Place	Officially Not Eligible (1991)
5BL3121	Sanford's Convenience Plus Store	Officially Not Eligible (1990)
5BL3424	No Resource Name	Officially Not Eligible (1992)
5BL7956	No Resource Name	Field Not Eligible (1999)

**Table 7. Summary of Newly Identified, Potentially Historic Resources**

Address	Date of Construction
2205 South 112 <sup>th</sup> Street	Circa 1978

1690 South 112 <sup>th</sup> Street	1975
1756 Highway 287	1965-1971
Unnamed Concrete Ditch	Circa 1978

## 4.5 Parks and Recreational Resources

A total of 22 potential non-historic Section 4(f) resources occur within or near the Project (Table 8; Appendix A-4). In addition, one Section 6(f) resource is located in the southern portion of the Project area in the southeast corner of 6<sup>th</sup> Avenue and US 287: North Midway Park (Appendix A-4). Due to the number of potential non-historic resources mapped, only named resources (excluding bike lanes and sidewalks which are classified as transportation not recreational resources) are included in the section below; a comprehensive list of potential non-historic Section 4(f) resources, including unnamed resources, bike lanes, and sidewalks, is provided in Appendix A-4.

**Table 8. Potential Non-Historic Section 4(f) Resources**

Resource Name	Type of Resource	Managing Jurisdiction	Approximate Location
Dickens Farm Natural Area and Trails Within	Open space and trails	City of Longmont	Northeast corner of Ken Pratt Boulevard. and US 287
Saint Vrain Greenway Trail	Paved trail	City of Longmont	Northeast corner of Ken Pratt Boulevard. and US 287
Left Hand Greenway Trail	Paved trail	City of Longmont	West and east of US 287 between Missouri Ave./Quail Road and Emery Street
Erie Lake	Open space	Town of Erie	Northeast corner of Arapahoe Road and US 287
Prince Lake	Open space	Town of Erie	Southwest corner of Arapahoe Road and US 287
John Breaux Park and Trails Within	Community park and trails	City of Lafayette	East of US 287 between Emma Street and South Boulder Road
Adler-Fingru Coal Creek Open Space and Trail Within	Open space and trail	Boulder County-Lafayette-Louisville (Jointly Owned)	West of US 287 between Stage Station Way and Minotaur Drive
Coal Creek Corridor Open Space and Trail Within	Open space and trail	City of Lafayette	East of US 287 between Old Laramie Trail E and Public Road
Warembourg Open Space	Open space	Boulder County – Lafayette (Jointly Owned)	East of US 287 between Old Laramie Trail E. and 112 <sup>th</sup> Street
Sola Park and Trail Within	Community park and trail	City of Lafayette	East of US 287 between Old Laramie Trail E. and 112 <sup>th</sup> Street
Carolyn Holmberg Preserve and Trail Within	Nature preserve and trail	Boulder County	Southwest corner of Northwest Parkway. And US 287
Ruth Roberts Trail	Soft surface trail	Boulder County Parks and Open Space	US 287 between Miramonte Boulevard and Northwest Parkway
Ridgeview Open Space	Open space	City and County of Broomfield	Northeast corner of Miramonte Boulevard and US 287
Lake Link Trail	Soft surface trail	City and County of Broomfield	Northwest corner of Miramonte Boulevard and US 287

Resource Name	Type of Resource	Managing Jurisdiction	Approximate Location
287 Detention Pond and Trail Within	Other open lands and trail	City and County of Broomfield	Northwest corner of Miramonte Boulevard and US 287
Zang Spur Park and Trails Within	Community park and trails	City and County of Broomfield	Northwest corner of 10 <sup>th</sup> Ave. and US 287
Jefferson Town Center and Trail Within	Community park and trail	City and County of Broomfield	East of US 287 between Miramonte Boulevard and W. 10 <sup>th</sup> Avenue
Broomfield Trail	Paved trail	City and County of Broomfield	West and east of US 287 between Miramonte Blvd. and W. 10 <sup>th</sup> Ave.
Community Ditch Open Space and Trail Within	Open space and trail	City and County of Broomfield	West of US 287 south between 10 <sup>th</sup> Avenue and 6 <sup>th</sup> Avenue
Broomfield Professional Park Open Lands	Open space	City and County of Broomfield	Southwest corner of 6 <sup>th</sup> Avenue and US 287
North Midway Park and Trails Within	Community park and trails	City and County of Broomfield	Southeast corner of 6 <sup>th</sup> Avenue and US 287
Blue Star Memorial Park and Trails Within	Community park and trails	City and County of Broomfield	Southeast corner of 6 <sup>th</sup> Avenue and US 287

## 4.6 Environmental Justice

A total of 40 Census Block Groups were assessed; 33 are located in Boulder County, and 7 are located in Broomfield County.

Boulder County has a minority population of 24 percent; 16 of the 33 Block Groups evaluated have a higher than 24 percent minority population (Table 9). The majority of these Block Groups are located between SH 66 and CO 119 (Appendix A-5). Broomfield County has a minority population of 26 percent; 3 of the 7 Block Groups in Broomfield County have a minority population higher than 26 percent (Table 9). These Block Groups are scattered in the southern portion of the Project area (Appendix A-5).

Boulder County has a low-income population of almost 19 percent. Of the 33 Block Groups in Boulder County, 11 have a low-income percentage higher than 19 percent. These Block Groups are located mainly between SH 66 and CO 119 (Appendix A-5). Broomfield County has a low-income percentage of almost nine 9 percent, 4 of the 7 Block Groups in Broomfield County have a higher percentage of low-income populations. These Block Groups are all located south of Northwest Parkway (Appendix A-5).

Boulder County has a linguistically isolated (i.e., LEP) population of almost 2 percent. Of the 33 Block Groups, 8 have an LEP population higher than 2 percent. Broomfield County has an LEP population of 1.5 percent; of the 7 Block Groups, 2 have an LEP population higher than 1.5 percent. These LEP populations are scattered throughout the Project area (Appendix A-5).

**Table 9. Environmental Justice Populations in the Project Area.**

Census Tract Block Group	Minority Percentage	Low-Income Percentage	LEP Percentage
<b>Boulder County</b>			
Block Group 1, Census Tract 128.01	9%	0.00%	0.00%
Block Group 3, Census Tract 128.01	20%	10.34%	5.70%

Block Group 2, Census Tract 132.11	7.81%	0.00%	0.00%
Block Group 3, Census Tract 132.11	87.21%	36.86%	0.00%
Block Group 4, Census Tract 132.11	28.71%	11.40%	3.75%
Block Group 5, Census Tract 132.11	5.62%	17.60%	0.00%
Block Group 6, Census Tract 132.11	28.75%	14.66%	0.00%
Block Group 1, Census Tract 133.02	13.79%	38.86%	0.00%
Block Group 2, Census Tract 133.02	26.30%	39.76%	19.27%
Block Group 3, Census Tract 133.02	0.00%	28.14%	0.00%
Block Group 1, Census Tract 133.06	38.23%	17.93%	0.00%
Block Group 2, Census Tract 133.06	45.42%	21.84%	0.00%
Block Group 2, Census Tract 133.08	41.75%	45.26%	0.99%
Block Group 2, Census Tract 134.01	66.01%	45.50%	0.00%
Block Group 3, Census Tract 134.01	18.60%	35.51%	0.00%
Block Group 2, Census Tract 135.03	43.05%	28.38%	0.00%
Block Group 3, Census Tract 135.03	57.52%	15.16%	1.86%
Block Group 4, Census Tract 135.03	6.89%	13.38%	0.00%
Block Group 1, Census Tract 135.05	47.99%	11.08%	22.77%
Block Group 2, Census Tract 135.05	54.77%	18.57%	0.00%
Block Group 1, Census Tract 608.01	0.00%	56.25%	0.00%
Block Group 3, Census Tract 608.01	28.76%	11.06%	0.00%
Block Group 1, Census Tract 609	21.79%	13.57%	1.25%
Block Group 2, Census Tract 609	14.98%	7.58%	0.00%
<b>Broomfield County</b>			
Block Group 1, Census Tract 300	35.22%	10.14%	0.00%
Block Group 1, Census Tract 301	31.84%	19.93%	6.70%
Block Group 2, Census Tract 309	14.52%	0.00%	0.00%

Block Group 3, Census Tract 309	14.12%	0.00%	0.00%
Block Group 1, Census Tract 312.01	11.41%	26.47%	0.00%
Block Group 1, Census Tract 312.02	24.03%	2.26%	1.85%
Block Group 2, Census Tract 312.02	32.23%	16.69	0.00%
<b>State of Colorado</b>	34.82%	15.99%	2.60%
<b>Boulder County</b>	24.25%	18.96%	1.84%
<b>Broomfield County</b>	26.39%	8.93%	1.58%

*\*Highlighted percentages are higher than their respective counties.*

## 4.7 Land Use

Existing land uses in the vicinity of the Project area include mixed-use commercial, residential, and agricultural properties (Appendix A-6). The northern extent of the Project area within the City of Longmont is primarily zoned for development, either commercial or residential. The entirety of this area is designated as prime farmland if irrigated (Appendix A-7)

The central extent of the Project area, located in Lafayette from approximately CO 52 to CO 7, is comprised of agricultural land uses; soils are a mix of prime farmland if irrigated and farmland of statewide importance.

From CO 7 down to the southern extent of the Project area in Broomfield, land use is comprised of a mix of planned urban development, residential and commercial. This extent is almost entirely prime farmland if irrigation, with patches of farmland of statewide importance.

## 5. Potential Impacts and Next Steps

In support of the conceptual design phase, Pinyon has identified environmental impacts or constraints related the proposed improvements, providing recommendations on field surveys, agency consultation, and documentation that are expected to be required in the future for the construction of the Project, including the anticipated level of clearance and permitting. The jurisdictional agencies whose clearance processes were considered in this report are CDOT and FHWA, along with permitting and/or clearance requirements for the USACE, USFWS, and SHPO.

Impacts and recommendations for next steps vary by location and proposed design elements; however, the following resource recommendations and next steps are generally consistent throughout the corridor and summarized below:

- **Cultural Resources:** The level of documentation is dependent on applicable local, state, and federal regulations including but not limited to Section 106 of the NHPA, as amended (per 36 CFR § 800) and the SRHP consistent with CRS § 24-80.1 and 8 CCR § 1504-5. The following provides a guideline for potential documentation needs in future phases of the Project.
  - Resources determined Officially Eligible or those which are contributing to an NRHP District may require re-evaluation using OAHP Form 1405: Cultural Resource Re-Visitation Form.
  - Resources with field determinations of eligibility have not received official concurrence from the Colorado SHPO and may require evaluation using OAHP Form 1403: Architectural Inventory Form or OAHP Form 1400/1418: Management Data/Linear Component Form.
  - Resources determined Officially Not Eligible may require re-evaluation for NRHP or SRHP eligibility due to changing historical context or if more than 10 years have passed since the previous determination of eligibility.
  - Newly identified, potentially historic resources may require evaluation for NRHP eligibility using OAHP Form 1403: Architectural Inventory Form or OAHP Form 1400/1418: Management Data Form/Linear Component Form.
- **Environmental Justice:** There are several EJ populations located in the Project area; all Block Groups are expected to incur the same direct and indirect effects meaning that EJ populations are not anticipated to bear high or adverse impacts disproportionately. Similarly, improved safety and multi-modal connectivity will benefit all Block Groups. Should ROW impacts be required for acquisition and/or easements, parcels immediately adjacent to US 287 could be directly affected. The level of documentation anticipated will be dependent on where capacity is added, and the length of that new capacity. Improvements which are exempt as defined by CDOT will likely require completion of CDOT Template A. For improvements that do not add capacity, a CDOT EJ Template B will likely need to be completed. For improvements that do add capacity, a CDOT EJ Template C will likely need to be completed.
- **Land Use, including Farmlands:** The implementation of the proposed improvements is compatible with the vision of the City of Longmont; City of Lafayette; City and County of Broomfield; and Boulder County Comprehensive Plans. Direct impacts on land uses, including those to farmland, are expected to be minor. Should ROW impacts be required for acquisition and/or easements, it is anticipated the impacts would be minor and not expected to change land uses for the entire parcel.

For the remaining resources, existing conditions and recommendations are provided by location. If a resource is not present at the location of the proposal improvement, or it is not expected to be impacted at the location of the proposed improvement, next steps are not included for it in the tables below. The five priority safety and mobility improvements are summarized in Table 10; the MUP alignments are summarized in Table 11.

**Table 10. Summary of Findings and Recommendations – Priority Safety and Mobility Improvements**

Resource	Existing Conditions and Constraints	Recommended Next Steps	Level of Effort
<b>Dawson Drive Intersection Improvement</b>			
<b>Hazardous Materials</b>	No facilities were identified with a high potential to impact the Project area at this location.	Documentation of hazardous materials in Initial Site Assessment (ISA).	Low
<b>WOTUS/ Wetlands</b>	Roadside swales lacking a defined channel are located on the east and west of US 287 at Dawson Drive in the location of the proposed U-turn bulbout; these features are depicted as mapped freshwater emergent wetland habitat associated with Boulder Creek on the NWI (USFWS, 2023s).	<p>Formal delineation of potential WOTUS/wetlands according to USACE protocols.</p> <p>Documentation of potential WOTUS/wetlands in Biological Technical Memorandum (BTM).</p> <p>Impact analysis and Section 404 Permitting likely required for impacts to WOTUS. Likely will result in Nationwide Permit (NWP); however, if impacts are substantial (i.e., permanent impacts greater than 0.5 acre), an Individual Permit may be required. Section 404 permitting would trigger the need to comply with the ESA and Section 106 of the NHPA.</p> <p>A CDOT Wetland Finding report required if permanent wetland impacts exceed 500 square feet, or if temporary impacts exceed 1,000 square feet, regardless jurisdictional status. CDOT requires mitigation for all wetland impacts, at a 1:1 ratio, regardless of jurisdictional status.</p>	Medium
<b>Wildlife/ Sensitive Species</b>	<p>There is a medium potential for monarch butterflies to occur. Due to the potential for wetlands, minimal suitable habitat for ULTO may be present. There is a low potential for other federally or state-listed species to occur at this location.</p> <p>There is also the potential for MBTA constraints. Large trees in and within 0.5-mile of the Project area may provide nesting habitat for raptors. Small shrubs and grasses in the Project area could provide habitat for non-raptor migratory birds.</p> <p>Noxious weeds typical of disturbed areas and roadsides likely present.</p>	<p>Habitat assessment for federally listed species.</p> <p>Potential ESA coordination/consultation with USFWS.</p> <p>Migratory bird survey.</p> <p>Noxious weed survey.</p> <p>Documentation of biological resources in BTM.</p>	Medium
<b>Cultural Resources</b>	<p>No ROW acquisition or easement is anticipated, and the potential to impact historical resources is low.</p> <p>The corridor is in a highly developed area. If archaeological resources were present, they may have been disturbed by previous ground disturbing activities.</p>	If the Project has a federal nexus (i.e., Section 404 Permitting), then compliance with Section 106 of the NHPA would be required; minimal documentation anticipated.	Low
<b>Parks and Recreational Resources</b>	No parks, trails, open space areas, or recreational facilities were identified at this location.	None	Low

Resource	Existing Conditions and Constraints	Recommended Next Steps	Level of Effort
<b>Arapahoe Road to Baseline Road Improvements</b>			
<b>Hazardous Materials</b>	No facilities were identified with a high potential to impact the Project area at this location. Bridge structures are likely present; however, they are not anticipated to be impacted as part of the improvements.	Documentation of hazardous materials in ISA.	Low
<b>WOTUS/Wetlands</b>	Potential WOTUS are present at the southwest corner of US 287 and Arapahoe Road and nearby South Boulder Canyon; however, proposed improvements do not extend beyond existing roadway.	Formal delineation of potential WOTUS/wetlands according to USACE protocols; anticipates no WOTUS or wetlands impacted by improvements and no permitting required. Documentation of potential WOTUS/wetlands in BTM.	Low
<b>Wildlife/Sensitive Species</b>	There is a medium potential for monarch butterflies to occur; there is a low potential for other federally listed species to occur at this location.  A potentially active prairie dog colony is present to the west of US 287, south of South Boulder Canyon; however, proposed improvements do not extend beyond existing roadway. Given the minimal disturbance and work within the ROW, there is a low potential for federally or state listed species to be impacted.  There is also the potential for MBTA constraints. Large trees in and within 0.5-mile of the Project area may provide nesting habitat for raptors. Small shrubs and grasses in the Project area could provide habitat for non-raptor migratory birds. Burrowing Owls may nest in prairie dog colony.  Noxious weeds typical of disturbed areas and roadsides likely present.	Habitat assessment for federally listed species. Migratory bird survey, including surveys for Burrowing Owls. Noxious weed survey. Documentation of biological resources in BTM.	Low
<b>Cultural Resources</b>	No ROW acquisition or easement is anticipated, and the potential to impact historical resources is low. One site is located within the roadway ROW (5BL.432 – Road to Remembrance Gateway – Officially Eligible) which may require evaluation for direct and indirect impacts because of improvements to Arapahoe Road.  The corridor is in a highly developed area. If archaeological resources were present, they may have been disturbed by previous ground disturbing activities.	If the project has a federal nexus (i.e., federal permits or monies), then compliance with Section 106 of the NHPA would be required.  Coordination with local jurisdictions and consultation of the SRHP may be required, including coordination to avoid impacts (e.g., direct and indirect, such as visual) resulting from design elements at the 5BL.432 – Road to Remembrance Gateway site.	Medium
<b>Parks and Recreational Resources</b>	Prince Lake Open Space is located on the southwest corner of US 287 and Arapahoe Road; however, proposed improvements do not extend beyond existing roadway. Several existing and proposed trail alignments are present within this segment.	It is anticipated that improvements would result in an enhancement to existing facilities. If parks and recreational facilities will be impacted, coordination with the official with jurisdiction should be completed and the potential need for detours should be assessed.	Low

Resource	Existing Conditions and Constraints	Recommended Next Steps	Level of Effort
<b>Dillon Road Intersection Improvement</b>			
<b>Hazardous Materials</b>	No facilities were identified with a high potential to impact the Project area at this location. Bridge structures are likely present; however, they are not anticipated to be impacted as part of the improvements.	Documentation of hazardous materials in ISA.	Low
<b>WOTUS/ Wetlands</b>	Potential WOTUS and wetlands are not likely present at this location.	Formal delineation of potential WOTUS/wetlands according to USACE protocols; anticipates no potential WOTUS or wetlands impacted by improvements and no permitting required. Findings documented in BTM.	Low
<b>Wildlife/ Sensitive Species</b>	There is a medium potential for monarch butterflies to occur; there is a low potential for other federally or state-listed species to occur at this location.  There is a potential for MBTA constraints. Large trees in and within 0.5-mile of the Project area may provide nesting habitat for raptors, and there is mapped Bald Eagle summer forage in the southwest corner of Dillon Road and US 287 (CPW, 2023a). Small shrubs and grasses in the Project area could provide habitat for non-raptor migratory birds.  Noxious weeds typical of disturbed areas and roadsides likely present.	Habitat assessment for federally listed species. Migratory bird survey. Noxious weed survey. Documentation of biological resources in BTM.	Low
<b>Cultural Resources</b>	No ROW acquisition or easement is anticipated, and the potential to impact historical resources is low.  The corridor is in a highly developed area. If archaeological resources were present, they may have been disturbed by previous ground disturbing activities.	If the project has a federal nexus (i.e., federal permits or monies), then compliance with Section 106 of the NHPA would be required.  The potential to impact historical resources is low.	Low
<b>Parks and Recreational Resources</b>	Carolyn Holmberg Preserve and an Unnamed Open Space is located to the southwest corner and southeast of US 287 and Dillon Road, respectively; however, proposed improvements do not extend beyond existing roadway. Several existing and proposed trail alignments are present within this segment.	It is anticipated that improvements would result in an enhancement to existing facilities. If parks and recreational facilities will be impacted, coordination with the official with jurisdiction should be completed and the potential need for detours should be assessed.	Low

Resource	Existing Conditions and Constraints	Recommended Next Steps	Level of Effort
<b>Miramonte Boulevard Intersection Improvement</b>			
<b>Hazardous Materials</b>	One high potential facility is located on the northeast corner of Miramonte Boulevard. This is a downgradient facility with impacted soil and groundwater and a potential for Regulated Asbestos Contaminated Soils. Impacts are primarily on the southwestern portion of the property. The facility includes use restrictions for allowable improvements and groundwater use.	Documentation of hazardous materials in ISA. Development of a Materials Management Plan. Improvements greater than 8 feet below ground surface (bgs) may encounter impacted soil and/or groundwater. Special handling and/or disposal may be required (i.e., Materials Management Plan, remediation dewatering permit).	Medium
<b>WOTUS/ Wetlands</b>	The 287 Detention Pond is located west of US 287, north of Miramonte Boulevard. Potential fringe wetlands and riparian areas may be associated with this feature, located near the bus stop improvements.	Formal delineation of potential WOTUS/wetlands according to USACE protocols. Documentation of potential WOTUS/wetlands in BTM. Impacts to potential WOTUS not anticipated. A CDOT Wetland Finding report required if permanent wetland impacts exceed 500 square feet, or if temporary impacts exceed 1,000 square feet, regardless jurisdictional status. CDOT requires mitigation for all wetland impacts, at a 1:1 ratio, regardless of jurisdictional status.	Medium
<b>Wildlife/ Sensitive Species</b>	There is a medium potential for monarch butterflies to occur. There is a low potential for other federally or state-listed species to occur at this location.  There is also the potential for MBTA constraints. Large trees in and within 0.5-mile of the Project area may provide nesting habitat for raptors. Small shrubs and grasses in the Project area could provide habitat for non-raptor migratory birds.  Noxious weeds typical of disturbed areas and roadsides likely present.	Habitat assessment for federally listed species. Migratory bird survey. Noxious weed survey. Documentation of biological resources in BTM.	Low
<b>Cultural Resources</b>	No ROW acquisition or easement is anticipated, and the potential to impact historical resources is low.  The corridor is in a highly developed area. If archaeological resources were present, they may have been disturbed by previous ground disturbing activities.	If the project has a federal nexus (i.e., federal permits or monies), then compliance with Section 106 of the NHPA would be required.  The potential to impact historical resources is low.	Low
<b>Parks and Recreational Resources</b>	Ridgeview Open Space is located to the northeast of US 287 and Miramonte Boulevard and 287 Detention Pond is located to the northwest; however, proposed improvements do not extend beyond existing roadway. Several existing and proposed trail alignments are present within this segment.	It is anticipated that improvements would result in an enhancement to existing facilities. If parks and recreational facilities will be impacted, coordination with the official with jurisdiction should be completed and the potential need for detours should be assessed.	Low

Resource	Existing Conditions and Constraints	Recommended Next Steps	Level of Effort
<b>Midway Intersection Improvement</b>			
<b>Hazardous Materials</b>	One high potential site is located on the southwest corner of US 287 and West Midway Boulevard, consisting of the upgradient facility Circle K Store #2709873, 425 US Highway 287 ERIS ID #371. USTs are located on the northern extent of parcel (adjacent to improvements). ROW impacts are anticipated.	Documentation of hazardous materials in ISA Development of a Materials Management Plan. Improvements greater than 8 feet bgs may encounter impacted soil and/or groundwater. Special handling and/or disposal may be required (i.e., Materials Management Plan, remediation dewatering permit).	Medium
<b>WOTUS/ Wetlands</b>	Potential WOTUS and wetlands are not likely present at this location.	Formal delineation of potential WOTUS/wetlands according to USACE protocols; anticipates no potential WOTUS or wetlands impacted by improvements and no permitting required. Findings documented in BTM.	Low
<b>Wildlife/ Sensitive Species</b>	There is a low potential for federally listed species to occur at this location. A potentially active prairie dog colony is present to the west of US 287, south of Midway Boulevard; however, proposed improvements do not extend into this area. Given the minimal disturbance and work within the ROW, there is a low potential for federally or state listed species to be impacted.  There is also the potential for MBTA constraints. Large trees in and within 0.5-mile of the Project area may provide nesting habitat for raptors. Burrowing Owls may nest in prairie dog colony. Small shrubs and grasses in the Project area could provide habitat for non-raptor migratory birds.  Noxious weeds typical of disturbed areas and roadsides likely present.	Habitat assessment for federally listed species. Migratory bird survey, including surveys for Burrowing Owls. Noxious weed survey. Documentation of biological resources in BTM.	Low
<b>Cultural Resources</b>	ROW acquisition and/or easements are anticipated; however, no known or potential historic resources were identified.  The corridor is in a highly developed area. If archaeological resources were present, they may have been disturbed by previous ground disturbing activities.	If the project has a federal nexus (i.e., federal permits or monies), then compliance with Section 106 of the NHPA would be required.  The potential to impact historical resources is low.	Low
<b>Parks and Recreational Resources</b>	No parks, trails, or recreational facilities were identified at this location.	None anticipated.	Low

Resources within the four MUP concepts on the Pike Road to Arapahoe Road and Dillon Road to Miramonte Boulevard Segments are provided in Tables 10 and 11, respectively. Where applicable, designation of low (green), medium (orange), or high (red) level of effort for clearance is indicated.

**Table 11. Summary of Findings and Recommendations – MUP Pike to Arapahoe**

Resource	West		East	
	MUP Clear Zone	MUP Barrier	MUP Clear Zone	MUP Barrier
<b>Hazardous Materials</b>	<p><u>Existing Conditions:</u> No high potential sites are located within this segment. Bridge structures are present throughout the corridor which may contain LBP and potential ACMs.</p> <p><u>Next Steps:</u> Documentation of hazardous materials in ISA, including LBP and ACM inspection for potential hazardous materials on bridges that may be impacted by the Project.</p>			
<b>WOTUS/ Wetlands</b>	<p><u>Existing Conditions:</u> Up to 8 named drainage features and several unnamed features extend throughout this segment. Based on the WOTUS dataset compiled by Pinyon, Consor evaluated the percentage of the total WOTUS acreage that would be impacted for that concept, as shown below. In summary, the East MUP Clear Zone results in a higher impact to potential to total WOTUS acreage; therefore, would likely require a higher level of effort and resources for Section 404 permitting and mitigation, including compliance with ESA and Section 106 of the NRHP.</p>			
	Wetlands 7.5% Open Waters 0.2% 	Wetlands 0.8% Open Waters 0.1 % 	Wetlands: 19.9% Open Waters: 0.9% 	Wetlands: 2.2% Open Waters: 0.3% 
	<p><u>Next Steps:</u> Formal delineation of WOTUS according to USACE protocols. Impact analysis and Section 404 Permitting likely required for impacts to WOTUS. It is anticipated that a separate NWP would apply to each crossing location; however, if impacts are substantial (i.e., permanent impacts greater than 0.5 acre), an Individual Permit may be required.</p> <p>A CDOT Wetland Finding report(s) required if permanent wetland impacts exceed 500 square feet, or if temporary impacts exceed 1,000 square feet, regardless jurisdictional status. CDOT requires mitigation for all wetland impacts, at a 1:1 ratio, regardless of jurisdictional status.</p>			
<b>Wildlife/ Sensitive Species</b>	<p><u>Existing Conditions:</u> There is a medium potential for monarch butterflies to occur. Due to the potential for wetlands and riparian habitats at the various drainage features, minimal suitable habitat for PMJM and ULTO may be present. Impacts to these habitats may result in the need for consultation with the USFWS, as such, the MUP Clear Zone (west or east) would likely require a higher level of effort for habitat evaluation, species-specific surveys and USFWS consultation. In addition, there is potential for MBTA constraints. Two locations have Bald Eagle nests within 0.5 mile of the Project area. Large trees are located in and within 0.5-mile of the Project area. The Project area may provide nesting habitat for raptors. Small shrubs and grasses could provide habitat for non-raptor migratory birds. Noxious weeds typical of disturbed areas and roadsides likely present.</p>			
	<p><u>Next Steps:</u> Given the potential for sensitive species to occur, habitat assessment for federally listed species would be required. Impacts to these habitats may result in the need for consultation with the USFWS, as such, the MUP Clear Zone (west or east) would likely require a higher level of effort for habitat evaluation, species-specific surveys and USFWS consultation. Bald Eagle nests occurring to the west of US 287 (within 0.5 mile of the Project area) may require further coordination with CPW or USFWS; the West MUP Clear Zone may require a higher level of effort given proximity to the nest locations. In addition, surveys for migratory birds and other biological resources (e.g., noxious weeds) may be warranted, with conditions documented in a BRR.</p>			
<b>Cultural Resources</b>	<p><u>Existing Conditions:</u> The COMPASS file search identified 24 previously evaluated resources and approximately 40 newly identified or potentially eligible (i.e., age-eligible) resources occur within this segment. Based on the historic resource dataset compiled by Pinyon, Consor evaluated the total number of properties that would be impacted for that concept, as shown below. In addition, an evaluation of ROW conditions was performed by Consor to identify the percentage of sufficient ROW to accommodate the proposed concept. In summary, the West MUP Clear Zone results in a higher impact to potentially historic properties (and ROW impacts); therefore, would likely require a higher level of effort and resources for Section 106 compliance.</p>			

Resource	West		East	
	MUP Clear Zone	MUP Barrier	MUP Clear Zone	MUP Barrier
	40 properties Sufficient ROW: 36% 	14 properties Sufficient ROW: 96% 	24 properties Sufficient ROW: 61% 	14 properties Sufficient ROW: 90% 
	<p><u>Next Steps:</u> If the Project has a federal nexus (i.e., Section 404 Permitting or Federal funding), then compliance with Section 106 of the NHPA would be required. Coordination with local jurisdictions and the SHPO is likely required. Field survey will be required, as well as site evaluations for potentially impacted resources. The following considerations can be included during design to minimize clearance requirements: Avoid impacts to resources determined Eligible; those without official determinations; and linear resources such as ditches and railroads with determinations of Officially Eligible or Officially Supporting. If impacts are unavoidable, target easements that do not alter the context or modify contributing features (i.e., access, structures, or property features such as rock walls and large farm trees).</p> <p>Avoid ROW impacts to resources that contain features more than 50 years in age which have not been evaluated for NRHP Eligibility.</p>			
<b>Parks and Recreational Resources</b>	<p><u>Existing Conditions:</u> Several existing and proposal trail alignments are present within this segment. In addition, Erie Lake Open Space is located east of US 287, north of Arapahoe Road. ROW impacts may be required to accommodate the East MUP Clear Zone and East MUP Barrier; however, would likely result in an enhancement to existing facilities.</p>			
	<p><u>Next Steps:</u> If parks and recreational facilities will be temporarily impacted, coordination with the owner should be completed and the potential need for detours should be assessed.</p>			
<b>General NEPA Considerations</b>	<p>It is anticipated that the MUP Barrier Path concepts would not individually or cumulatively result in a significant impact and could advance into NEPA with a Categorical Exclusion level of study. An Environmental Assessment (EA) could be triggered for resources in which a significant impact could be incurred, for example, with the MUP Clear Zone concepts (i.e., determination of adverse effect on historic properties pursuant to Section 106; formal consultation under Section 7 of the Endangered Species Act). However, the level of NEPA analysis would ultimately fall to the lead federal agency.</p>			

**Table 12. Summary of Findings and Recommendations – MUP Dillon to Miramonte**

Resource	West		East	
	MUP Clear Zone	MUP Barrier	MUP Clear Zone	MUP Barrier
<b>Hazardous Materials</b>	<p><u>Existing Conditions:</u> One high potential site, a former landfill facility, is located on the northeast quadrant of US 287 and Miramonte Boulevard. This is a downgradient facility with impacted soil and groundwater and a potential for Regulated Asbestos Contaminated Soils on the southwestern portion of the property. The facility includes use restrictions for allowable improvements and groundwater use. The East MUP Clear Zone and East MUP Barrier concepts have the potential to encounter contaminated materials. In addition, bridge structures are present throughout the corridor which may contain LBP and potential ACMs.</p>			
	<p><u>Next Steps:</u> Documentation of hazardous materials in ISA and development of Materials Management Plan. Improvements greater than 8 feet bgs may encounter impacted soil and/or groundwater. Special handling and/or disposal may be required (i.e., Materials Management Plan, remediation dewatering permit)</p>			
<b>Waters of the US/ Wetlands</b>	<p><u>Existing Conditions:</u> One named drainage feature (Rock Creek) and several unnamed features are in this segment. Based on the WOTUS dataset compiled by Pinyon, Consor evaluated the percentage of the total WOTUS acreage that would be impacted for that concept, as shown below. In summary, the West MUP Clear Zone results in a higher impact to potential to total WOTUS acreage; therefore, would likely require a higher level of effort and resources for Section 404 permitting and mitigation, including compliance with ESA and Section 106.</p>

	<p><u>Next Steps:</u> Formal delineation of WOTUS according to USACE protocols. Impact analysis and Section 404 Permitting likely required for impacts to WOTUS. It is anticipated that a separate NWP would apply to each crossing location; however, if impacts are substantial (i.e., permanent impacts greater than 0.5 acre), an Individual Permit may be required.</p> <p>A CDOT Wetland Finding report(s) required if permanent wetland impacts exceed 500 square feet, or if temporary impacts exceed 1,000 square feet, regardless jurisdictional status. CDOT requires mitigation for all wetland impacts, at a 1:1 ratio, regardless of jurisdictional status.</p>			
<b>Wildlife/ Sensitive Species</b>	<p><u>Existing Conditions:</u> There is a medium potential for monarch butterflies to occur. Due to the potential for wetlands and riparian habitats at the various drainage features, minimal suitable habitat for PMJM and ULTO may be present, particularly at Rock Creek. Impacts to these habitats may result in the need for consultation with the USFWS, as such, the MUP Clear Zone (west or east) would likely require a higher level of effort for habitat evaluation, species-specific surveys and USFWS consultation. In addition, there is potential for MBTA constraints. Large trees in and within 0.5-mile of the Project area may provide nesting habitat for raptors. Small shrubs and grasses could provide habitat for non-raptor migratory birds. Noxious weeds typical of disturbed areas and roadsides likely present</p>			
	<p><u>Next Steps:</u> Given the potential for sensitive species to occur, habitat assessment for federally listed species would be required. Impacts to these habitats may result in the need for consultation with the USFWS, as such, the MUP Clear Zone (west or east) would likely require a higher level of effort for habitat evaluation, species-specific surveys and USFWS consultation. In addition, surveys for migratory birds and other biological resources (e.g., noxious weeds) may be warranted, with conditions documented in a BRR.</p>			
<b>Cultural Resources</b>	<p><u>Existing Conditions:</u> The COMPASS file search identified 8 previously evaluated resources and 5 newly identified or potentially eligible (i.e., age-eligible) resources occur within this segment. Based on the historic resource dataset compiled by Pinyon, Consor evaluated the total number of properties that would be impacted for that concept, as shown below. In addition, an evaluation of ROW conditions was performed by Consor to identify the percentage of sufficient ROW to accommodate the proposed concept. In summary, the West MUP Clear Zone results in a higher impact to potentially historic properties (and ROW impacts); therefore, would likely require a higher level of effort and resources for Section 106 compliance.</p>			
	6 properties Sufficient ROW: 70% 	4 properties Sufficient ROW: 84% 	6 properties Sufficient ROW: 62% 	3 properties Sufficient ROW: 89% 
	<p><u>Next Steps:</u> If the Project has a federal nexus (i.e., Section 404 Permitting or Federal funding), then compliance with Section 106 of the NHPA would be required. Coordination with local jurisdictions and the SHPO is likely required. Field survey will be required, as well as site evaluations for potentially impacted resources. The following considerations can be included during design to minimize clearance requirements:</p> <p>Avoid impacts to resources determined Eligible; those without official determinations; and linear resources such as ditches and railroads with determinations of Officially Eligible or Officially Supporting. If impacts are unavoidable, target easements that do not alter the context or modify contributing features (i.e., access, structures, or property features such as rock walls and large farm trees).</p> <p>Avoid ROW impacts to resources that contain features more than 50 years in age which have not been evaluated for NRHP Eligibility.</p>			
<b>Parks and Recreational Resources</b>	<p><u>Existing Conditions:</u> Several existing and proposal trail alignments are present within this segment. In addition, Carolyn Holmberg Preserve, Ridgeview Open Space and other Unnamed Open Space properties are located south of Dillon Road. ROW impacts may be required to accommodate the MUP alignments; however, would likely result in an enhancement to existing facilities.</p>			

Resource	West		East	
	MUP Clear Zone	MUP Barrier	MUP Clear Zone	MUP Barrier
	<u>Next Steps:</u> If parks and recreational facilities will be temporarily impacted, coordination with the Official with Jurisdiction should be completed and the potential need for detours should be assessed.			
<b>General Clearance Considerations</b>	It is anticipated that the MUP Barrier Path concepts would not individually or cumulatively result in a significant impact and could be advance into NEPA with a Categorical Exclusion level of study. An EA could be triggered for resources in which a significant impact could be incurred, for example, with the MUP Clear Zone concepts (i.e., determination of adverse effect on historic properties pursuant to Section 106; formal consultation under Section 7 of the Endangered Species Act). However, the level of NEPA analysis would ultimately fall to the lead federal agency.			

In addition to the resources discussed within this report, consideration should be made for future evaluation of visual resources, air quality and noise once design concepts are refined and traffic data becomes available.

- Visual analysis may be required to evaluate visual compatibility with landscape character, viewers (travelers and neighbors), and visual quality. For CDOT-sponsored projects, a Visual Impact Assessment (VIA) questionnaire may be required to evaluate the level of assessment required in compliance with FHWA guidelines.
- Air quality analysis, including greenhouse gas analysis, may be required by CDOT to ensure the Project would not cause or contribute to poor air quality on a regional or local level.
- Noise analysis may be required by CDOT to determine if the Project is anticipated to cause noise impacts and if noise abatement will be built as part of the Project. Projects can be defined as Type I or Type III, indicating a detailed noise analysis and technical report, or brief document, respectively.

It is recommended that Project scoping be conducted to identify the appropriate level of analysis required for all resources, including air quality and noise, in support of completing the appropriate NEPA document.

## I. Introduction

### I.1 Project Overview

Boulder County, in partnership with the Colorado Department of Transportation (CDOT), Denver Regional Council of Governments, and local municipalities, has retained Consor to provide design services for the US Route 287 (US 287) Vision Zero Safety and Mobility Study (Project) located along the US 287 corridor, between approximately State Highway (SH) 66 and US 36, in Boulder County, County of Broomfield, Town of Erie, City of Lafayette, and City of Longmont, Colorado. The purpose of the Project is to provide conceptual design for safety and mobility improvements with the following objectives: identifying opportunities to eliminate fatal and serious injury crashes in alignment with Boulder County's Vision Zero safety policy and Transportation Master Plan; assessing opportunities to improve safety and connectivity for people walking and bicycling along the corridor; and improve safety and mobility the transit station areas identified in prior studies.

Pinyon Environmental, Inc. (Pinyon) has been retained to prepare this Environmental Conditions Report (Report) in support of the conceptual design development and implementation. The Project area for this analysis generally extends from SH 66 to US 36 (Figure I), with analysis occurring within approximately 100ft from the roadway in rural segments and 30 feet from the roadway in urban segments. The Project area which is inclusive of all proposed concept limits. Resource Project areas may vary due to available data and analysis required, as further discussed in Section 3.0.

**Figure I. Project Area**

## I.2 Recommended Improvements

Based on a review of safety data and input provided by public and stakeholder feedback, the Team identified a five priority safety and mobility improvements at discrete locations in the corridor:

- **Dawson Drive Intersection Improvement:** Improvements of US 287, including striping and widening to accommodate U-turn bulbout at the intersection for agricultural, commercial, and emergency response vehicles. The proposed design is located entirely with the right of way (ROW).
- **Arapahoe Road to Baseline Road Improvements:** General improvements at the Diamond Circle and West Baseline Road intersections, such as left turn upgrades, median reconstruction, signage, striping, relocation of bus shelters, and pedestrian crossing upgrades. In addition, improvements to various access ways throughout the corridor, including the installation of raised pedestrian crossing to connect existing sidewalks. The proposed design is located entirely with the ROW.
- **Dillon Road Intersection Improvement:** General improvements at the four-leg signalized intersection, including traffic signal improvements, signage, reconstruction of channelized right-turn movements, and pedestrian crossing upgrades. The proposed design is located entirely with the ROW.
- **Miramonte Boulevard Intersection Improvement:** Improvements will include updating intersection geometry to accommodate dual southbound left-turn lanes and updates to cycle timing to reduce delay; installation of directional ramps; pedestrian crossing updates; median improvements; and relocation of bus shelters. The proposed design is located entirely with the ROW.
- **Midway Boulevard Intersection Improvement:** General improvements at the four-leg signalized intersection, including updates to intersection geometry to accommodate dual southbound left-turn lanes; updates to cycle timing to reduce delay; reconstruction of channelized right-turn islands; upgrades to pedestrian crossings; and property access improvements. Minor ROW impacts are anticipated at this location.

In addition, two multi-use path (MUP) concepts to improve connections for existing and planned bicycle facilities were developed:

- **MUP Clear Zone Path:** Approximately 12-foot-wide multi-use path separated from the roadway alignment by a “clear zone”, which is an unobstructed area that allows a driver to stop safely or regain control of a vehicle that (Figure 2).

**Figure 2. MUP Clear Zone Path**

- **MUP Barrier Path:** Approximately 12-foot-wide multi-use path separated from the roadway alignment by a barrier and up to a 5-foot median (Figure 3).

**Figure 3. MUP Barrier Path**

Alignment of these two MUP concepts (located to the east or west of the vehicular travel lanes) are still under evaluation, as they will be utilized based on feasibility at each improvement location (i.e., ROW or environmental constraints). However, the alignments were identified to occur in two segments of US 287 corridor: Pike Road to Arapahoe Road (approximately 9.5-miles), and Dillon Road to Miramonte Boulevard (approximately 1.75 miles).

### **1.3 Purpose and Content**

The objective of this Report is to provide an understanding of the environmental context and potential constraints related to the recommended improvements. Pinyon conducted desktop evaluation of the following resources, as further described in Sections 2 and 3.

- Hazardous Materials
- Wetlands and Other Waters of the United States (WOTUS)
- Wildlife/Threatened and Endangered Species
- Historic Resources
- Parks and Recreational Resources
- Environmental Justice
- Land Use, including Farmlands in prime and unique soils.

Based on qualitative assessment of the location, sensitivity, and potential magnitude of impact of the design provided, Pinyon identified the anticipated types of environmental clearance(s), permitting, next steps and/or permitting requirements associated with each recommended improvement, as discussed in Sections 4 and 5 of this Report.

The level of future analyses that will be needed for environmental clearance and permitting is dependent on numerous factors, such as the use of state and/or federal funding, and/or need for state and/or federal approvals. It is assumed that at the very least, a state nexus would apply as US 287 is a state-owned transportation facility maintained by CDOT; therefore, CDOT coordination and clearance processes would apply. A federal nexus may also apply; commonly triggered by Federal Highway Administration (FHWA) funding or permitting required by agencies such as the US Army Corps of Engineers (USACE), US Fish and Wildlife Service (USFWS), or State Historic Preservation Office (SHPO).

## 2. Regulatory Review and Background of Environmental Resources

### 2.1 Hazardous Materials

#### 2.1.1 Federal Regulations

##### 2.1.1.1 *Comprehensive Environmental Response, Compensation, and Liability Act (42 United States Code [USC] Part 103, Sec. 9601 et seq.)*

The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) was enacted in 1980 (42 USC §9601 et seq.) and subsequently amended by the Superfund Amendments and Reauthorization Act (42 USC §9601 et seq.). CERCLA (also known as “Superfund”) is designed to clean up closed and abandoned sites contaminated with hazardous substances. The law authorizes the United States Environmental Protection Agency (EPA) to identify parties responsible for contamination of sites and compel the parties to clean up the sites. Sites potentially impacted by hazardous substances are reported to the EPA, and additional investigation is conducted. Based on the results of the investigation, the EPA either determines that no further action is necessary at the federal level (but may refer the site to the state for additional activities) or places the site on the National Priorities List (NPL). Sites remain on the NPL until clean-up activities have been completed and the site is delisted.

##### 2.1.1.2 *EPA Standards and Practices for All Appropriate Inquiries/American Society of Testing and Materials (40 Code of Federal Regulations [CFR] Part 312)*

The EPA has established federal standards and practices for conducting all appropriate inquiries related to the previous ownership and uses of a property to qualify for landowner liability protections under CERCLA.

##### 2.1.1.3 *National Emission Standards for Hazardous Air Pollutants (NESHAP) (40 CFR Part 61, Subpart M)*

The EPA air toxics regulation for asbestos is intended to minimize the release of asbestos fibers during activities involving asbestos handling. The air toxics provision of the Clean Air Act (CAA) requires the EPA to develop and enforce regulations to protect the public from exposure to airborne contaminants. In accordance with Section 112 of the CAA, the EPA establishes NESHAP. The asbestos-specific NESHAP regulation, promulgated in 1973, provides a method for identifying asbestos-containing materials (ACMs) and defines a process to categorize, abate, transport, and dispose of these materials.

##### 2.1.1.4 *Occupational Safety and Health Administration Asbestos Standards (General Industry 29 CFR 1910, Subpart Z; Construction 29 CFR 1926)*

Occupational Safety and Health Administration (OSHA) has standards to protect workers from the hazards of asbestos depending on the type of workplace. The General Industry Standard provided by OSHA covers exposures occurring from activities such as brake and clutch repair, maintenance work, and manufacture of asbestos-containing products. The Construction Standard provided by OSHA covers construction, alteration, repair, maintenance, renovation, and/or demolition of structures containing asbestos.

##### 2.1.1.5 *OSHA Lead Standard for the Construction Industry (Title 29 CFR 1929.62)*

OSHA has standards to protect workers from the hazards of lead in a variety of forms, including metallic lead, all inorganic lead compounds, and organic lead soaps. The standard establishes maximum limits of exposure to lead for all workers covered, including permissible exposure limits and action levels. This standard applies to construction where a worker may be exposed to lead due to alteration, repair, demolition, salvage, or other disturbance of materials covered with lead-based paint (LBP).

#### **2.1.1.6 Resource Conservation and Recovery Act (40 CFR Parts 260-299)**

The Resource Conservation and Recovery Act (RCRA) (42 USC §321 et seq.), enacted in 1976, establishes a framework for the management of both solid waste and hazardous waste. RCRA Subtitle C authorizes the EPA to develop regulations for cradle-to-grave management of these wastes. In Colorado, the Colorado Department of Public Health and Environment (CDPHE) has promulgated regulations for management of both solid waste (6 Code of Colorado Regulations [CCR] 1007-2) and hazardous waste (6 CCR 1007-3).

#### **2.1.1.7 Toxicity Substances Control Act (40 CFR Parts 700-760, 762, 765-766)**

The Toxicity Substances Control Act, enacted in 1976, provides guidance to the EPA and authorized states with administering compliance of this Act, particularly related to polychlorinated biphenyls (PCBs). PCBs were banned from manufacture in the US in 1979, however some products and equipment may still contain these substances. Of particular concern is electric transformers, such as those that are pole-mounted or pad-mounted.

### **2.1.2 State and Local Regulations**

#### **2.1.2.1 Underground Storage Tank Remediation, Colorado Department of Labor and Employment—Division of Oil and Public Safety (7 CCR 1101-14)**

Under the auspices of the Colorado Department of Labor and Employment—Division of Oil and Public Safety, this remediation section administers laws and regulations surrounding damage to the environment and risk to the public from leaking underground storage tanks (USTs), identifies responsibilities of the owner/operators of USTs, and provides technical guidance for response to releases from USTs.

#### **2.1.2.2 CDPHE Solid and Hazardous Waste Regulations (6 CCR 1007-2 Part 1, Section 5) and Air Quality Control Commission Regulation 8 (Part B)**

The CDPHE Hazardous Materials and Waste Management Division Regulations Pertaining to Solid Waste Sites and Facilities govern the disposal of asbestos waste and management of asbestos contaminated soil in Colorado. Air Quality Control Commission governs asbestos abatement in Colorado.

### **2.1.3 Transportation Policy**

The US Department of Transportation (DOT) and the Colorado Department of Public Safety, State Patrol Hazardous Materials Section, are responsible for regulating hazardous materials transportation. The Colorado State Patrol is responsible for reporting spills associated with highway transportation incidents to the CDPHE.

## **2.2 Wetlands and Waters of the United States**

### **2.2.1 Federal Regulations**

#### **2.2.1.1 Clean Water Act, Section 404**

The USACE regulates WOTUS under the authority of the Clean Water Act (CWA), enacted in 1972. The USACE's jurisdiction of WOTUS includes traditional navigable waters (TNWs) and their relatively permanent tributaries as well as associated wetlands (EPA, 2023a). Wetlands are “those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions” (Environmental Laboratory, 1987).

The protection of these areas is critical for maintaining the physical, chemical, and biological integrity of WOTUS. Impacts to WOTUS require permitting through the USACE. Only the USACE has the authority to make jurisdictional determinations. EPA also has authority under Section 404 of the CWA to prohibit, deny,

or restrict the use of any defined area as a disposal site (Section 404(c)), can elevate specific cases (Section 404(q)), and enforce Section 404 provisions. Section 404 of the CWA is jointly implemented by the USACE and the EPA. (EPA, 1989; EPA, 2021). The EPA's roles and responsibilities for the CWA include:

- Developing and interpreting policy, guidance, and environmental criteria used in evaluating permit applications.
- Determining scope of geographic jurisdiction and applicability of exemptions.
- Reviewing and commenting on individual permit applications.

#### **2.2.1.2**      *Executive Order 11990 Protection of Wetlands*

Non-jurisdictional wetlands are not subject to permitting by the USACE under Section 404; however, all Federal agencies are required to avoid and minimize wetland impacts to the greatest extent possible per Executive Order (EO) 11990, "Protection of Wetlands" (Federal Register, 1977). The FHWA is responsible for compliance with EO 11990 and provides guidance to avoid and minimize impacts to wetlands in FHWA Technical Advisory T6640.8A (FHWA, 1987).

#### **2.2.2**      **State Policy**

CDOT has wetland-specific requirements in addition to what is required by the USACE for compliance with EO 11990. A CDOT Wetland Finding report is required if permanent wetland impacts exceed 500 square feet, or if temporary impacts exceed 1,000 square feet, regardless of whether the USACE has jurisdiction. This does not include impacts to open water areas. Further, CDOT requires mitigation for all wetland impacts, regardless of whether they are jurisdictional, at a 1:1 ratio.

### **2.3**      **Wildlife/Threatened and Endangered Species**

Several federal and state regulations are in place to protect plant and animal species and their habitats. Biological resources discussed in this report are protected by the following federal and state regulations and policies.

#### **2.3.1**      **Federal Regulations**

##### **2.3.1.1**      *The US Endangered Species Act*

The US Endangered Species Act (ESA), passed in 1973, protects plant and animal species that are federally endangered (FE), federally threatened (FT), federally proposed endangered (PE), federally proposed threatened (PT), and federal candidate species (FC) with the goal of ensuring their long-term survival and recovery. Section 7 of the ESA charges federal agencies to aid in the conservation of listed species and requires the agencies ensure that their activities are not likely to jeopardize the continued existence of listed species or adversely modify designated critical habitats. The ESA is administered by the USFWS (USFWS, 1973).

##### **2.3.1.2**      *The Migratory Bird Treaty Act and the Bald and Golden Eagle Protection Act*

Vegetation clearing, earth-moving, bridge demolition, and other construction activities have the potential to disrupt nesting activity or destroy nests of migratory bird species. As such, migratory birds are protected under the Migratory Bird Treaty Act (MBTA). Bald Eagles (*Haliaeetus leucocephalus*) and Golden Eagles (*Aquila chrysaetos*) are given extra protection under the Bald and Golden Eagle Protection Act in addition to the MBTA (CFR, 2021b). The USFWS administers both these requirements.

#### **2.3.2**      **State Regulations**

##### **2.3.2.1**      *The Colorado Non-game, Endangered, and Threatened Species Conservation Act*

This act provides some protection within the state for listed species and establishes the state's intent to protect state endangered (SE), state threaten (ST), and state special concern (SC) species. Under the Act, Colorado

law provides for the acquisition of habitat for species listed, as well as other protective measures of the Act (CPW, 1985). Colorado Parks and Wildlife (CPW) is responsible for listing species.

#### 2.3.2.2 CDOT's 2009 Impacted Black-tailed Prairie Dog (*Cynomys ludovicianus*) Policy

CDOT's policy is based on municipal and agency policies, and the most stringent policy for a given area must be followed. For activities in the CDOT ROW, the applicable policies that must be followed are the 2009 CDOT Impacted Black-tailed Prairie Dog Policy and the Black-tailed Prairie Dog Relocation Guidelines (CDOT, 2009; CDOT, 2002).

## 2.4 Cultural Resources

### 2.4.1 Federal Regulations

#### 2.4.1.1 National Historic Preservation Act

The National Historic Preservation Act (NHPA) was passed in 1966; it contains a set of regulations commonly referred to as "Section 106". Section 106 [36 CFR Part 800] is a procedural law that requires federal agencies to consider effects of undertakings on historic properties, including archaeological resources. Historic properties are defined as prehistoric or historic districts, sites, buildings, structures, or objects that are eligible for or listed in the National Register of Historic Places (NRHP). Also included are artifacts, records, and remains (surface or subsurface) that are related to and located within historic properties and any properties of traditional religious and cultural importance to Native American Tribes (Tribes). Historic properties are evaluated for NRHP eligibility based on criteria identified by the National Park Service (NPS) and must retain sufficient integrity to convey historic significance.

Cultural resource evaluations typically use an age threshold of 50 years when identifying potentially historic resources. Infrastructure projects often use 45 years as the year-built threshold to account for planning studies that are often completed several years before construction. Additionally, the 45-year build threshold accommodates extended reviews, as necessary, while minimizing the need to reevaluate project effects to individual resources. In some instances, resources determined to have exceptional importance that are less than 45 years old may be considered eligible to the NRHP.

Federal agencies must involve interested Tribes in the planning process for federal undertakings. Consultation with a Tribe recognizes the government-to-government relationship between the US government and sovereign tribal groups. Federal agencies must be sensitive to the fact that cultural properties of religious and cultural significance to one or more Tribe may be located on ancestral, aboriginal, or ceded lands beyond modern reservation boundaries. Consulting Tribes are offered the opportunity to identify concerns about cultural resources and comment on how a project might affect them. If it is found that a project would affect cultural resources that are eligible for inclusion on the NRHP and are of religious or cultural significance to one or more consulting Tribes, their role in the consultation process may also include participation in resolving how best to avoid, minimize, or mitigate those effects. By describing the proposed undertaking and the nature of known cultural sites, and consulting with the interested Native American community, federal agencies strive to effectively protect areas important to Native American people.

#### 2.4.1.2 Section 4(f) of the DOT Act

This act, passed in 1966, contains a regulation referred to as Section 4(f) [23 CFR Part 774]. Section 4(f) requires agencies under the authority of the DOT to avoid the use of Section 4(f) resources, including historic sites listed on or eligible for the NRHP as well as certain designated land uses. Section 4(f) is a substantive law, and the use of a Section 4(f) resource is only permitted if no feasible and prudent alternative to the use can be identified. Please refer to the Parks and Recreational Resources section of this report for more discussion on Section 4(f) as it relates to non-historic resources.

## **2.4.2 State Regulations**

### **2.4.2.1 Colorado Register of Historic Places Act [24 Colorado Revised Statute 80.1]**

This act was passed in 1975 with the intent to preserve the cultural and historic places in the state for the “education and enjoyment of the residents of this state, present and future.” The Colorado Register of Historic Places Act primarily creates the State Register of Historic Places (SRHP), like the NRHP, and a framework for nominating sites to the State Register. All properties listed in the NRHP are automatically included in the Colorado State Register. The Register of Historic Places Act also includes a stipulation for review of proposed actions by state agencies. This stipulation is generally satisfied within the context of Section 106 review for projects requiring compliance under Section 106; however, a separate state-level compliance process is required when no federal process is applicable to a state action. CDOT and SHPO have established a process for State Register review, which is outlined in the CDOT National Environmental Policy Act (NEPA) Manual (CDOT, 2020).

## **2.5 Parks and Recreational Resources**

### **2.5.1 Federal Regulations**

#### **2.5.1.1 Section 4(f) of the DOT Act**

This regulation, passed in 1966, affords special protection to publicly owned parks; recreational resources; wildlife and waterfowl refuges; and publicly or privately owned historic sites. Before approving a project that uses Section 4(f) property, FHWA must determine there is no feasible and prudent alternative that avoids the Section 4(f) properties and that the project includes all possible planning to minimize harm to the Section 4(f) properties; or FHWA makes a finding that the project has a de minimis impact on the Section 4(f) property. For publicly owned public parks, recreation areas, and wildlife and waterfowl refuges, a de minimis impact is one that will not adversely affect the activities, features, or attributes of the Section 4(f) property. A de minimis impact determination does not require analysis of feasible and prudent avoidance alternatives. This document discusses both Section 4(f)/non-historic resources (wildlife refuges and recreation facilities) and Section 4(f)/historic resources. Use of a Section 4(f) property occurs when:

- land is permanently incorporated into a transportation facility;
- there is a temporary occupancy of land that is adverse in terms of the statute’s preservation purpose; or
- there is a constructive use (The project’s impacts are so severe that the protected activities, features, or attributes of an adjacent property are substantially impaired).

#### **2.5.1.2 Section 6(f) of the Land and Water Conservation Fund (LWCF) Act**

Section 6(f) of the LWCF Act (Section 6(f)), passed in 1965, prohibits the conversion of property acquired or developed with grants from this fund to a non-recreational purpose without the approval of the NPS.

## **2.6 Environmental Justice**

Federal Environmental Justice (EJ) legislation was created out of concerns that land uses and facilities were being placed in minority and low-income populations without regard to the consequences of these actions. The term “EJ” refers to the social equity in sharing the benefits and the burdens of specific projects and/or programs.

### **2.6.1 EO 12898**

This EO applies to federal actions to address EJ in minority populations and low-income populations. It was drafted in response to Title VI of the Civil Rights Act of 1964, which states, “No person in the United States

shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance.”

Guidance on how to implement EO 12898 and conduct EJ analyses was issued by the Council on Environmental Quality (CEQ, 1997). The CEQ guidance states that minority and low-income populations occur where either:

- the minority or low-income population of the affected area exceeds 50%; or
- the population percentage of the affected area is meaningfully greater than the minority population percentage in the general population or other appropriate unit of geographical analysis.

Minorities constitute races and ethnic groups and include the following (as identified by the United States Census Bureau): Black/African Americans, American Indian/Alaskan Natives, Asians, Native Hawaiian/Pacific Islanders, and Hispanics.

Low-income is defined as persons/families with incomes at or below the poverty level as determined by the Department of Health and Human Services or the Census Bureau. CDOT has further refined the definition of low-income to be specific to the area in which the project is located. Instead of using the national poverty level, CDOT assesses low-income status based on the median income for the state and local municipality.

The EO requires projects that involve federal agencies or federal funds be analyzed to determine whether there is a potential for disproportionately high and/or adverse impacts from the project on minority or low-income populations in comparison to populations that are not minority or low-income in the Project area. Disproportionately high and/or adverse effects are defined as being:

- predominately borne by a minority population and/or a low-income population; or
- suffered by the minority population and/or low-income population in an appreciably more severe or greater magnitude than the adverse effect that would be suffered by the non-minority population and/or non-low-income population.

## 2.6.2 **Colorado Senate Bill 21-260**

Section 28 of Colorado Senate Bill 21-260 (SB-260) was signed in 2021 and establishes the Environmental Justice and Equity Branch within CDOT and requires direct work with Disproportionally Impacted (DI) Communities in the project planning, environmental study, and project delivery phases of Regionally Significant Transportation Capacity Projects. The Environmental Justice and Equity Branch must identify and address technological, language, and information barriers that may prevent DI communities from fully participating in transportation decisions that affect health, quality of life, and access for disadvantaged and minority businesses.

DI Communities include communities with high proportions (greater than 40%) of low income, minority, and/or housing cost-burdened communities. “Cost-burdened” is defined in SB-260 24-38.5-302 (I) as a household that spends more than 30% of its income on housing. “Low income” is defined in SB-260 24-38.5-302 (II) as meaning the median household income is less than or equal to 200% of the federal poverty guideline.

## 2.6.3 **FHWA Order 6640.23.**

This order was published in 1998, and it was updated in June 2012; it is titled 6640.23A FHWA Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, and it serves as the agency’s policy regarding EJ. There are three basic tenants at the core of the EO, which are also in FHWA’s policy:

- I. Avoid, minimize, or mitigate disproportionality high and adverse human health and the environmental effects, including social and economic effects on tribal governments, minority, and low-income populations.

2. Ensure the full and fair participation by all potentially affected communities in the transportation decision-making process.
3. Prevent the denial of, reduction in, or significant delay in the receipt of benefits by minority and low-income populations.

Order 6640.23A also states: “When determining whether a particular program, policy, or activity will have disproportionately high and adverse effects on minority populations and/or low-income populations, FHWA managers and staff should take into account mitigation enhancement measures and potential offsetting benefits to affected minority and/or low-income populations” (FHWA, 2012).

## **2.7 Land Use**

Land uses are typically regulated by management plans, policies, ordinances, and regulations that determine the types of activities that are allowed or that protect specially designated or environmentally sensitive uses.

### **2.7.1 Local Land Use Zoning Regulations**

The Project area is along US 287 from Longmont in the north to Broomfield in the south. Several cities in the Project area including Longmont, Lafayette, and Broomfield have land use regulations in place that promote coordinated development. This includes zoning regulations and design standards.

### **2.7.2 Local Comprehensive Plans**

Longmont, Lafayette, and Broomfield have comprehensive plans in place. A primary goal of the Longmont Multimodal and Comprehensive Plan is to create a complete, balanced, and connected transportation system, while also creating livable centers, corridors, and neighborhoods (Longmont, 2016). The City of Lafayette’s Legacy Lafayette Comprehensive Plan provides a planning framework and includes policies that guide development; it was developed to reflect community values related to growth and changes in land use including density (Lafayette, 2021). The City and County of Broomfield’s Comprehensive Plan’s overall vision includes preparing for growth and allowing for adaptability, increasing multimodal transportation, and providing a mix of land use to meet the needs of its citizens (Broomfield, 2016).

### **2.7.3 Farmland Protection Policy Act**

The Farmland Protection Policy Act was established in 1994 with the goal to minimize the conversion of farmland to non-agricultural use. The Natural Resources Conservation Service (NRCS) defines farmland classifications as follows:

- “Prime Farmland” which has the best combination of physical and chemical characteristics for producing food, feed, fiber, forage, oilseed, and other crops with minimum inputs of fuel, fertilizer, pesticides, and labor;
- “Farmland of Statewide or Local Importance” which is used to produce food, feed, fiber, forage, or other crops;
- “Farmland of Unique Importance” which is land currently used to make high-valued food and fiber such as citrus or tree nuts; and
- “Not Prime Farmland” which includes farmland that is none of the above.

### 3. Methodology

An inventory of environmental resources within the Project area was conducted through desktop evaluation of readily available information to identify site conditions and the general proximity resources. No formal field surveys and/or resource verification (e.g., wetland delineation) were performed. Existing environmental conditions are documented herein; as design progresses during future phases of project implementation, additional research, or field verification, may be required to accurately define the location of resources and potential impacts or mitigation opportunities.

#### 3.1 Hazardous Materials

Pinyon completed a desktop review for compliance history of facilities within and near the Project area, as identified through review of aerial imagery and publicly available local, state, and federal records (CDPHE, 2023; EPA, 2023b); a regulatory database was obtained as part of this desktop review (ERIS, 2023). Facilities that may pose a potential risk of impacting the Project as a result of the use, storage, and/or disposal of petroleum and/or hazardous materials were identified (Appendix A-1).

The magnitude of the Project impact from a regulated material is dependent on several factors including: the distance between a potential source of a regulated material and the Project; status of regulated facilities (e.g., active or inactive); known or suspected releases into soil, surface water or groundwater; the hydrogeologic relationship of the source of a regulated material to the Project; and the depth and/or duration of construction. These factors have been considered as part of the evaluation of whether a regulated material has the potential to impact the Project. Facilities were categorized as either having a low or high potential to impact the Project:

- **Low Potential:** Facilities that fit this category include:
  - Facilities with minimal indications of an existing release, past release, or material threat of a release of regulated materials into the ground (soil), groundwater, or surface water that could impact the Project.
  - Facilities located hydraulically down-gradient of the Project.
  - Those facilities where regulated materials are known or suspected in the Project; however, there is a low potential for those materials to be exposed during construction.
- **High Potential:** Facilities that fit this category include:
  - Facilities with indications of an existing release, past release, or material threat of a release of any regulated materials into the ground (soil), groundwater, or surface water, and the possibility of migration from the contaminant source into the Project.
  - Those same facilities that have caused a migration of the contaminants into the Project, and where construction would likely result in exposure of media impacted by those contaminants (e.g., soil, soil vapor, groundwater).

Pinyon has utilized these criteria in evaluating impact potential from regulated materials to the Project.

#### 3.2 Wetlands and Waters of the United States

Pinyon completed a desktop review of the following publicly available information sources to identify potential WOTUS that may occur within the Project:

- Aerial imagery and ground-based photography (Google Earth Pro, 2023)
- United States Geological Service (USGS) topographic maps and National Hydrography Dataset (NHD) (USGS, 2022a; USGS, 2022b; USGS, 2022c; USGS, 2023)
- USFWS National Wetlands Inventory (NWI) maps (USFWS, 2023a)

Available data were reviewed and compiled into a desktop dataset for potential wetlands and WOTUS within the Project area (Appendix A-2); a site visit or a formal USACE delineation was not completed.

### 3.3 Wildlife/Threatened and Endangered Species

Pinyon used the following publicly available desktop information to identify if threatened, endangered, or sensitive species may occur in the Project area:

- Aerial imagery and ground-based photography (Google Earth Pro, 2023)
- USFWS Information for Planning and Consultation (IPaC) system (USFWS, 2023b)
- CPW and Colorado Natural Heritage Program (CNHP) species data (CPW, 2023a; CNHP, 2023)
- CPW species profiles for federally listed threatened and endangered species (CPW, 2023b)
- USFWS NWI maps (USFWS, 2023a)

Available data were reviewed and compiled into a desktop dataset for potential habitat for sensitive species; however, species-specific surveys were not completed.

### 3.4 Cultural Resources

A resource-specific Project area, Cultural Resources Project area (CRPA) was developed to identify cultural resources that may be impacted by the Project (Appendix A-3). The CRPA generally consists of US 287 plus a 150-foot buffered area around the roadway ROW. Previously surveyed cultural resources were identified through a file search of COMPASS database maintained by the Colorado Office of Archaeology and Historic Preservation (OAHP), History Colorado. The COMPASS file search requested through OAHP was submitted on March 29, 2023, and results were received on April 13, 2023.

In addition, Pinyon conducted a desktop analysis to assess the CRPA for previously recorded cultural resources and newly identified, potentially historic resources utilizing the following resources:

- Aerial imagery and ground-based photography (Google Earth Pro, 2023; NETR, 2023)
- CDOT's State Highway Inventory and Online Transportation Information System (OTIS) database (CDOT, 2023)
- Boulder and Broomfield County Assessor's Office records (Boulder County, 2022)
- USGS historic topographic maps (USGS 1904; USGS, 1950; USGS, 1961; USGS, 1984; USGS, 2022)

Historic resource evaluations typically use an age threshold of 50 years when identifying potentially eligible historic resources. Infrastructure projects often use 45 years as the year-built threshold to account for planning studies, which are often completed several years before construction. Therefore, resources constructed in 1978 or before are considered in this report. In some instances, resources determined to have exceptional importance that are less than 45 years old may be considered eligible to the NRHP.

### 3.5 Parks and Recreational Resources

Pinyon completed a desktop review of the following sources to determine if any Section 6(f) or potential Section 4(f) resources occur in or near the Project area:

- Aerial and ground-based photography (Google Earth Pro, 2023)
- CPW Colorado Trail Explorer (COTrex) online mapper (CPW, 2023c)
- CDOT OTIS database (CDOT, 2023)

- Boulder Area Trails data (Boulder County, 2023a)
- Boulder County Regional Trail Plan and On-Street Bikeways Plan (Boulder County, 2001)
- City and County of Broomfield Open Space, Trails, Parks, and Recreation Master Plan (Broomfield, 2003)
- Broomfield Open Space Parks and Trails data (Broomfield, 2023)
- City of Lafayette Parks, Recreation, and Open Space Master Plan Update (Lafayette, 2019)
- City of Lafayette Parks and Open Space data (Lafayette, 2023)
- Longmont Parks, Open Space, and Trails data (Longmont, 2023)
- Longmont Parks, Recreation, & Trails Master Plan (Longmont, 2014)
- Town of Erie Parks and Trails data (Erie, 2023)

Available data were reviewed and compiled into a desktop dataset for known and potential recreational facilities (Appendix A-4). No resource-specific visits or coordination with municipalities was conducted. Recreation connections depicted are conceptual in nature; final alignments and type of connection requires coordination with partner departments, agencies, and stakeholders.

### 3.6 Environmental Justice

To assess EJ populations in the Project area, the 39 US Census Block Groups that are within or adjacent to the Project area were evaluated using American Community Survey (ACS) 5-year summary data (US Census Bureau, 2021). The Block Groups were selected based on their proximity to the Project area and the likelihood that residents within these boundaries use US 287 and would be impacted by the Project (Appendix A-5). A project must be considered a regionally significant transportation capacity project for DI communities to be analyzed under SB-260.

This evaluation compared the percentage of minority, low-income, and Limited English Proficiency (LEP) populations within these 39 Block Groups with the corresponding County percentages (Boulder or Broomfield) to determine if there are higher levels of each EJ populations in them than are present in the County.

### 3.7 Land Use

Pinyon reviewed the following data sources to evaluate existing and planned land uses, and the presence of farmlands, for parcels within 300-feet of the Project area:

- Aerial imagery and ground-based photography (Google Earth Pro, 2023)
- Longmont Multimodal and Comprehensive Plan (Longmont, 2016)
- City of Lafayette Comprehensive Plan (Lafayette, 2021)
- City and County of Broomfield Comprehensive Plan (Broomfield, 2016)
- Boulder County Comprehensive Plan (Boulder County, 2020)
- NRCS Web Soil Survey (NRCS, 2023)

Available data were reviewed and compiled into a desktop dataset for known and future land uses within the Project area (Appendix A-6).

## 4. Existing Environmental Conditions

Environmental conditions within the corridor are summarized below. Where applicable, specific resources and/or features are included within the Environmental Resource Mapbook (Appendix A). Potential impacts and next steps listed for specific Project improvements are provided in Section 5.

### 4.1 Hazardous Materials

Land use in the Project area consists of commercial, residential, and agricultural properties (Google Earth Pro, 2023). The northern (Longmont) and southern (Broomfield) portions are generally more developed with commercial and residential properties, whereas the central segment consists of agricultural land. In general, groundwater flow mimics topography, and the groundwater-flow direction is expected to be to the east. The depth to groundwater is anticipated to vary by location across the Project corridor.

A review of agency records indicates a total of 95 facilities identified within the Project area (Appendix A-1); the following four facilities were identified as having a high potential to impact the Project.

- Former Voluntary Cleanup and Redevelopment Program (VCUP) site (University of Colorado Foundation ERIS ID #300) at 1600 & 1610 Main Street. This facility has impacted groundwater migrating from an upgradient source.
- Former VCUP site at US 287 and Quail Road (Ken Pratt Blvd Extension ERIS #93). Impacted soil was identified; however, records indicate an informal Corrective Action Plan (CAP) was prepared for the facility. No other readily available information is available regarding the status of the remediation.
- Former landfill facility located on the northeast quadrant of US 287 and Miramonte Blvd (Broomfield Landfill ERIS ID #315). This is a downgradient facility with impacted soil and groundwater and a potential for Regulated Asbestos Contaminated Soils. Impacts are primarily on the southwestern portion of the property. The facility includes use restrictions for allowable improvements and groundwater use.
- There are several open Leaking UST facilities (i.e., a release that has not yet been remediated and/or closed). One upgradient facility was identified as having a high potential to impact the Project area: the Circle K Store #2709873, 425 US 287 ERIS ID #371.

Materials management may be required during ground disturbing activities and/or activities that encounter groundwater (i.e., signal poles, deep caissons) in the vicinity of these high potential facilities. In addition, bridge structures exist in the Project area; these structures may contain LBP and potential ACMs. The regulatory database with detailed listings of hazardous materials facilities is provided as Appendix B.

### 4.2 Wetlands and Waters of the United States

Desktop evaluation identified numerous potential WOTUS within the Project area (Appendix A-2). The following is an overview of features located within the corridor from north to south.

**Table 1. Potential Wetlands and Waters of the United States in the Project Area**

Feature	Description
Oligarchy Ditch	Flows to the east/southeast under US 287, through the Project area. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). Oligarchy Ditch has a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present.
St. Vrain Creek	Flows to the east/southeast under US 287, through the Project area. This feature is represented as a perennial river on the USGS topo maps (USGS, 2022). St. Vrain Creek

Feature	Description
	has a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present. Herbaceous Riparian and Forested/Shrub Riparian wetlands are mapped on the NWI within and surrounding St. Vrain Creek (USFWS, 2023a).
Left Hand Creek	Flows to the northeast under US 287, through the Project area. This feature is represented as a perennial stream on the USGS topo maps (USGS, 2022). Left Hand Creek has a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present. Herbaceous Riparian and Forested/Shrub Riparian wetlands are mapped on the NWI within and surrounding St. Vrain Creek (USFWS, 2023a).
Unnamed Roadside Swale	Roadside swale with a defined channel located on the east side of US 287 located between approximately Quail Road and St. Vrain Creek; appears to flow north toward St. Vrain Creek. Open waters and wetlands may be associated with this feature.
Unnamed Roadside Swale	Roadside swale with a defined channel located on the east side of US 287 located between approximately Pike Road and Plateau Road. Open waters and wetlands may be associated with this feature.
Dry Creek	Flows to the east/northeast under US 287, through the Project area. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). Dry Creek has a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present. There is a potential for roadside swales containing wetlands on the east and west of US 287, which ultimately flow toward this feature.
Unnamed Roadside Swales	Roadside swales lacking a defined channel are located on the east and west of US 287 from Plateau Road to Niwot Road, lining properties with apparent agricultural uses. At Oxford Road, an unnamed ditch feature is depicted as an intermittent stream on the USGS topo map, flowing east and then southeast under US 287. Open waters and/or wetlands may be associated with these features.
Unnamed Ditch	An unnamed ditch feature with potential wetlands is located west of US 287, south of Niwot Road. The feature is depicted as an Aqueduct on USGS topo maps (USGS, 2022) and freshwater emergent wetland habitat is mapped on the NWI (USFWS, 2023a).
Boulder and Whiterock Ditch	Flows to the east under US 287, through the Project area. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). Boulder and Whiterock Ditch has a well-defined channel and riparian corridor with a potential for fringe wetlands and wetlands on alluvial bars. Forested/Shrub Riparian wetlands are mapped on the NWI within and surrounding the ditch (USFWS, 2023a).
Unnamed Pond	An unnamed pond is located east of US 287, south of Boulder and Whiterock Ditch. The feature is not depicted on USGS topo maps and appears to be a man-made reservoir or water quality pond. Open waters and/or wetlands may be associated with this feature.
Unnamed Roadside Swales	Roadside swales lacking a defined channel are located on the east and west of US 287 from SH 52 to Lookout Road, lining properties with apparent agricultural uses. Open waters and/or wetlands may be associated with these features.
Unnamed Ditch	An unnamed ditch feature extends southwest/northeast under US 287, south of Lookout Road. The feature is not depicted on USGS topo maps; open waters and/or wetlands may be associated with this feature.
Legget Ditch	Flows to the northeast under US 287, through the Project area. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). Legget Ditch has a well-defined channel, consisting of either concrete or clay-lined to the west of US 287. Fringe wetlands and riparian areas may be associated with this feature.

Feature	Description
Boulder Creek	Flows to the northeast under US 287, through the Project area. This feature is represented as a perennial river on the USGS topo maps (USGS, 2022). Boulder Creek has a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present. Forested/Shrub Riparian wetlands are mapped adjacent to Boulder Creek; large areas depicted freshwater emergent wetland habitat is mapped on the NWI to the north (USFWS, 2023a).
Boulder and Weld County Ditch	Flows to the east under US 287 through the Project area, north of Jasper Road. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). Boulder and Weld County Ditch has a well-defined channel and riparian corridor with a potential for fringe wetlands and wetlands on alluvial bars.
Unnamed Roadside Swales	Roadside swales lacking a defined channel are located on the east and west of US 287 from Jasper Road to Isabelle Road, lining properties with apparent agricultural uses. Open waters and/or wetlands may be associated with these features.
Lower Boulder Ditch	Flows to the east under US 287, through the Project area. This feature is represented as a perennial stream on the USGS topo maps (USGS, 2022). Lower Boulder Ditch has a well-defined channel and may consist of clay-lined substrate. Fringe wetlands and riparian areas may be associated with this feature.
Unnamed Pond	An unnamed pond is located east of US 287, south of Boulder and Whiterock Ditch. The feature is not depicted on USGS topo maps and appears to be a man-made reservoir or water quality pond. Open waters and/or wetlands may be associated with this feature.
Leyner Cottonwood No 1 Ditch	Flows to the northeast under US 287, through the Project area. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). Leyner Cottonwood No 1 Ditch has a well-defined channel; fringe wetlands and riparian areas may be associated with this feature.
Unnamed Roadside Swales	Roadside swales lacking a defined channel are located on the east of US 287 from Isabelle Road to Arapahoe Road, lining properties with apparent agricultural uses. Open waters and/or wetlands may be associated with these features.
Erie Lake	Erie Lake is located to the east of US 287. Fringe wetlands and riparian areas may be associated with this feature.
South Boulder Canyon Ditch	Flows to the southeast under US 287, through the Project area. This feature is represented as an intermittent stream on the USGS topo maps (USGS, 2022). South Boulder Canyon Ditch has a well-defined channel; fringe wetlands and riparian areas may be associated with this feature west of US 287; a small outlet with a concrete lined channel is present on the east of US 287 (along with recent development and infill activities).
Unnamed Roadside Swale	A roadside swale lacking a defined channel is located west of US 287, south of East South Boulder Road. Wetlands may be associated with this feature.
Coal Creek	Flows to the east under US 287, through the Project area. This feature is represented as a perennial river on the USGS topo maps (USGS, 2022). Coal Creek has a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present. Forested/Shrub Riparian wetlands are mapped adjacent to Coal Creek on the NWI (USFWS, 2023a).
Unnamed Roadside Swales	Roadside swales lacking a defined channel are located to the east of US 287, south of Coal Creek to Exempla Circle. Wetlands may be associated with these features.
Unnamed Channel	An unnamed channel extends under US 287 in an east/west orientation. The feature has a defined channel, potentially constructed for stormwater conveyance. Freshwater emergent wetlands are mapped on the NWI (USGS, 2022).
Rock Creek	Flows to the northeast under US 287, through the Project area. This feature is represented as a perennial river on the USGS topo maps (USGS, 2022). Rock Creek has

Feature	Description
	a well-defined channel and riparian corridor. Within the riparian corridor, it is likely that fringe wetlands and wetlands on alluvial bars are present. Freshwater emergent wetlands are mapped on the NWI surrounding Rock Creek and extending to the northeast adjacent to US 287 (USFWS, 2023a). A small roadside swale also extends to the south, west of US 287; wetlands may be associated with this feature.
Unknown Wetland	An isolated wetland located to the west of US 287, south of Northwest Parkway. Freshwater emergent wetlands are mapped on the NWI (USFWS, 2023a).
Unknown Stream	A small stream flows to the northwest under US 287. This feature is represented as a disappearing stream on the USGS topo maps (USGS, 2022). Freshwater emergent wetlands are mapped adjacent to the east and west of US 287 on the NWI (USFWS, 2023a).
US 287 Detention Pond	An isolated water feature, named 287 Detention Pond, is located west of US 187 at Miramonte Boulevard. This feature is represented as a perennial lake/pond on the USGS topo maps (USGS, 2022). Fringe wetlands and riparian areas may be associated with this feature.
Community Ditch	Flows to the east under US 287, through the Project area. This feature is represented as a perennial stream on the USGS topo maps (USGS, 2022). Community Ditch has a well-defined channel. Fringe wetlands and riparian areas may be associated with this feature.
Unnamed Ditch	An unnamed ditch feature with potential wetlands extends under US 287, south of West 6 <sup>th</sup> Avenue. The feature is depicted as perennial stream on USGS topo maps (USGS, 2022). It has a well-defined channel; fringe wetlands and riparian areas may be associated with this feature extending south along the east of US 287 toward Midway Boulevard.

### 4.3 Wildlife/Threatened and Endangered Species

#### 4.3.1 Federally Listed Species

Pinyon completed a review of the USFWS online IPaC system; based on that review, there are federally listed as FE, FT, PE, and FC species with the potential to occur in the vicinity of the Project area (USFWS, 2023b).

The pallid sturgeon (*Scaphirhynchus albus*; FE) and Piping Plover (*Charadrius melodious*; FT) are included because they occur downstream of the Project area and could be impacted by projects that result in water depletions to the South Platte River or its tributaries. To address the effects depletions may have on federally listed species that depend on the river for their survival, agencies and organizations in Colorado, including public water suppliers, participate in the South Platte Water Related Activities Program (SPWRAP). If water for this project is sourced from a public water source within the South Platte River basin, potential effects to downstream species would presumably be addressed through SPWRAP via the water provider; therefore, these two species are not discussed further. Additionally, the western prairie fringed orchid (*Panthera praeclara*; FT), and Whooping Crane (*Grus americana*; FE) are included. These species have traditionally been included as downstream species like the pallid sturgeon and Piping Plover but are currently included as “wherever found.” As these species could occur downstream of the Project area, they have been addressed under the SPWRAP and are not discussed further.

The remaining federally listed species include the gray wolf (*Canis lupus*), Preble's meadow jumping mouse (*Zapus hudsonius preblei*; PMJM), tricolored bat (*Peri myotis subfauvus*), greenback cutthroat trout (*Oncorhynchus larkia stomias*), monarch butterfly (*Danaus plexippus*), and Ute ladies'-tresses orchid (*Spiranthes diluvialis*; ULTO) (Table 2).

**Table 2. Federally Listed Species with the Potential to Occur in the Project Area**

Common Name	Species	Federal Status	Habitat	Potential to Occur <sup>1</sup>
<b>Mammals</b>				
Gray Wolf	<i>Canis lupus</i>	FE	Lone, dispersing gray wolves may be present throughout the state of Colorado, but is only known to occur in northwest Colorado in areas of low human occupancy.	<b>None.</b> Suitable habitat does not occur within the Project area. Additionally, the gray wolf only needs to be considered if the activity includes a predator management program. This activity is unlikely to include a predator management program.
PMJM	<i>Zapus hudsonius preblei</i>	FT	Riparian areas of permanent or intermittent streams with herbaceous cover and adequate cover of shrubs and trees.	<b>Low.</b> Suitable habitat may be present within the Project area along the drainages.
Tricolored bat	<i>Perimyotis subflavus</i>	PE	During the winter, tricolored bats are found in caves and mines, although in the southern United States, where caves are sparse, tricolored bats are often found roosting in road-associated culverts. During the spring, summer and fall, tricolored bats are found in forested habitats where they roost in trees, primarily among leaves.	<b>None.</b> Suitable habitat does not occur within the Project area.
<b>Fish</b>				
Greenback cutthroat trout	<i>Oncorhynchus clarkii stomias</i>	FT	Formerly extirpated from its native range, the greenback cutthroat trout is known as a self-sustaining population from a single location in Colorado: a four-mile stretch of Bear Creek south of Pike's Peak. Adapted to cold, clear, oxygenated streams of moderate gradient.	<b>None.</b> Although creeks in the Project area contain the habitat requirements for this species; the greenback cutthroat trout is not known to occur in these drainages.
<b>Insects</b>				
Monarch butterfly	<i>Danaus plexippus</i>	FC	Found within a variety of habitats that feature their obligate larval host plant, milkweed ( <i>Asclepias</i> spp.).	<b>Medium.</b> Suitable habitat may occur within the Project area. Milkweed is likely to occur within the Project area.

Common Name	Species	Federal Status	Habitat	Potential to Occur <sup>1</sup>
<b>Plants</b>				
Ute ladies'-tresses orchid	<i>Spiranthes diluvialis</i>	FT	Sub-irrigated alluvial soils along streams; open meadows on floodplains including riparian areas. The species generally occurs at elevations below 6,500 feet.	<b>Medium.</b> Suitable habitat may occur within the Project area along the drainages.

FT = federally listed as threatened; FE = federally listed as endangered; FC = candidate for federal listing; PT = proposed federally listing as endangered

<sup>1</sup>Based on a review of distribution maps from NatureServe Explorer online (NatureServe, 2023) and Colorado Parks and Wildlife Species Activity Mapping (CPW, 2023a).

#### 4.3.1.1 Preble's Meadow Jumping Mouse

There is a low potential for the PMJM to occur with the Project area. The PMJM lives and reproduces in and near riparian areas located within grassland, shrubland, forest, and mixed vegetation types where dense herbaceous or woody vegetation occurs near the ground level, where available open water exists during their active season, and where there are adjacent upland habitats of sufficient width and quality for foraging, hibernation, and refuge from catastrophic flooding events (USFWS, 2010; USFWS, 2016a). Riparian vegetation typically is varied with a mixed overstory composed of willows (*Salix* spp.) and cottonwoods (*Populus* spp.) and an understory of scattered shrubs, including snowberry (*Symphoricarpos* spp.). Two major habitat components appear necessary: open water and dense vegetative cover.

In December 2010, USFWS designated revised critical habitat for the PMJM in Colorado. The revised critical habitat included a total of approximately 411 miles of rivers and streams and 34,935 acres within Boulder, Broomfield, Douglas, El Paso, Jefferson, Larimer, and Teller counties (USFWS, 2010). USFWS critical habitat is not located in the Project area. However, the closest critical habitat is approximately 21 miles northwest in an unconnected waterway (USFWS, 2010). The southern extent of the Project area (generally south of Dillon Road) is within the block clearance zone (USFWS, 2016b).

Suitable habitat may occur at several water features that cross the Project area (e.g., St. Vrain Creek, Left Hand Creek, Boulder Creek, Coal Creek, and Rock Creek), and a positive capture (defined as domestic cat mortality) was recorded in Coal Creek less than 1 mile upstream of the Project area (USFWS, 2021).

#### 4.3.1.2 Monarch Butterfly

There is a medium potential for monarch butterflies to occur in the Project area. Milkweed is an herbaceous perennial that provides significant habitat and dietary resources for monarch butterflies. Milkweed may be present within the Project area, and furthermore monarch butterflies could use the Project area to migrate. The monarch butterfly is an FC species and is not yet listed or proposed for listing under the Endangered Species Act. There are generally no consultation requirements for candidate species.

#### 4.3.1.3 Ute ladies'-tresses orchid

There is a medium potential for Ute ladies'-tresses orchid (ULTO) to occur in the Project area. The ULTO occurs at elevations below 6,500 feet in wetland and riparian habitat, including moist to wet alluvial meadows, floodplains of perennial streams, and around springs and lakes (USFWS, 1992). Generally, the preferred vegetative cover for the ULTO is relatively open; dense overgrown sites are not conducive to establishment of the species. Where the ULTO is found, soils are typically alluvial deposits of sandy, gravelly material that are saturated to within 18 inches of the surface for at least part of the growing season. The ULTO is found in

association with a number of plant species including slenderleaf false foxglove (*Agalinis tenuifolia*), creeping bentgrass, swamp milkweed (*Asclepias incarnata*), reed grass (*Calamagrostis* spp.), Canada thistle (*Cirsium arvense*), horsetail (*Equisetum* spp.), great blue lobelia (*Lobelia siphilitica*), blue-eyed grass (*Sisyrinchium* spp.), goldenrod (*Solidago* spp.), arrowgrass (*Triglochin* spp.), and swamp verbenas (*Verbena hastata*) (USFWS, 1992). Some drainages within the Project area have the potential for ULTO habitat.

#### 4.3.2 State-Listed Species

Based on a review of the CPW Threatened and Endangered List, CPW Species Activity Mapping data, and the CNHP Tracking List, there are state-listed endangered (SE), state-listed threatened (ST), and state species of concern (SC) with the potential to be impacted by work occurring in the USGS Longmont, Erie, and Lafayette, Colorado 7.5-Minute Quadrangle Maps (CPW, 2023a; CPW, 2023b; CNHP, 2023; USGS, 2022a; USGS, 2022b; USGS 2022c) (Table 3). Pinyon evaluated the potential for these species to occur in the Project area based on an assessment of habitat and species distributions. Note that state sensitive species that are also federally listed are not discussed in this section, as they were previously discussed in Section 4.3.1.

**Table 3. State Listed Species with the Potential to Occur in the Project Area**

Common Name	Species	State Status	Habitat	Potential for Occurrence in the Project area <sup>1</sup>
<b>Birds</b>				
Bald Eagle	<i>Haliaeetus leucocephalus</i>	SC	Open canopies with large, mature trees for perching and nesting. Prefer areas near open waters.	<b>High.</b> Two active Bald Eagle nests are mapped within 0.5 of the Project area between Lookout Road and Arapahoe Road (CPW, 2023a). The entire Project area is within mapped Bald Eagle winter range, and portions of the Project area occur within Bald Eagle winter forage, winter concentration, and summer forage (CPW, 2023a).
Burrowing Owl	<i>Athene cunicularia</i>	ST	Burrows in prairie dog colonies in open grasslands, especially prairie, plains, and savanna.	<b>Medium.</b> Potential Burrowing Owl habitat (black-tailed prairie dog colonies) occur within and surrounding the Project area.

Common Name	Species	State Status	Habitat	Potential for Occurrence in the Project area <sup>1</sup>
<b>Fish</b>				
Brassy minnow	<i>Hybognathus hankinsoni</i>	ST	Small, clear, sluggish weedy creeks or small rivers with sand, gravel, or mud bottom overlain with organic sediment. In Colorado, this species is known to occur in the Lower South Platte River Basin and in the backwaters of the Colorado River.	<b>Medium.</b> Suitable habitat occurs in the Project area.
Common shiner	<i>Luxilus cornutus</i>	ST	Cool, clear water; often over sand, organic matter, or vegetated substrate. In Colorado, this species is known to occur in the South Platte and Colorado river basins.	<b>Medium.</b> Suitable habitat occurs in the Project area.
Northern redbelly dace	<i>Chrosomus eos</i>	SE	Cool, clear, and shaded shallow stream channels and off-channel wetlands. Submerged vegetation needed.	<b>Medium.</b> Suitable habitat occurs in the Project area.
Stonecat	<i>Noturus flavus</i>	SC	Large creeks to small rivers. Cool and warm, slow- and fast-moving reaches with rocky substrates. Commonly inhabit shallow areas.	<b>Medium.</b> Suitable habitat occurs in the Project area.
<b>Mammals</b>				
Black-tailed prairie dog	<i>Cynomys ludovicianus</i>	SC	Shortgrass or mixed-grass prairie. Common in most of the counties of the eastern plains, especially those immediately along the Front Range.	<b>High.</b> Black-tailed prairie dog colonies were noted throughout the Project area.

Common Name	Species	State Status	Habitat	Potential for Occurrence in the Project area <sup>1</sup>
<b>Amphibians</b>				
Northern leopard frog	<i>Lithobates pipiens</i>	SC	Within or near permanent water with rooted aquatic vegetation. Commonly inhabit wet meadows and fields during the summer.	<b>Medium.</b> The Project area has preferred habitat type (i.e., permanent water with rooted aquatic vegetation).
<b>Mollusks</b>				
Cylindrical papershell	<i>Anodontoides ferussacianus</i>	SC	Shallow water near the shore in silt; can also inhabit small streams, creeks, and lakes in sand or fine gravel.	<b>Medium.</b> Suitable habitat occurs in the Project area.

ST = state listed as threatened, SE = state listed as endangered, SC = State Special Concern species (not a statutory category).

<sup>1</sup>Based on a review of distribution maps from NatureServe Explorer online (NatureServe, 2023), CPW Species Activity Mapping (CPW, 2023a), and tracking information from the CNHP Tracking Lists of threatened and endangered species (CNHP, 2023).

#### 4.3.2.1 Bald Eagle

Two locations along the Project area have Bald Eagle nests within 0.5 mile of the Project area. If construction activities are to occur during the Bald Eagle nesting season (December 1 – July 31), a qualified biologist should perform a survey to determine if the Bald Eagle nests are active or if any new/unmapped Bald Eagle nests occur within 0.5-mile of the Project area. If Bald Eagle nests are active before construction or become active during construction activities, further coordination with the CPW and/or USFWS would be required.

#### 4.3.2.2 Burrowing Owl

Black-tailed prairie dog burrows were noted at various locations throughout the Project area (Appendix A-2); therefore, there is potential that Burrowing Owls occur within the CPW-recommended buffer of the Project area (660 feet; CPW, 2020). If construction occurs within 660 feet of a prairie dog colony during the Burrowing Owl nesting season (March 15 – August 31), Pinyon recommends a Burrowing Owl survey be conducted following the guidelines outlined in *Recommended Survey Protocol and Actions to Protect Nesting Burrowing Owls* (CPW, 2021).

#### 4.3.2.3 Black-tailed Prairie Dog

Potentially active black-tailed prairie dog colonies are present at various locations throughout the Project area (Appendix A-2). Project activities should avoid impacts to the colonies when feasible. Where avoiding impacts is not feasible, Pinyon recommends the project follow guidelines outlined in Boulder County's Prairie Dog Management Policy (Boulder County, 2022). Additional information for minimizing potential impacts to the species can be found in CDOT's 2009 Impacted Black-tailed Prairie Dog Policy (CDOT, 2009).

#### 4.3.2.4 Northern Leopard Frog

There is a medium potential for the northern leopard frogs to occur in the Project area. The northern leopard frog is a SC species, which is not a statutory category; therefore, no protection or mitigation is required.

However, it is recommended that potential impacts be minimized by limiting vehicle operation designated work zones and staging areas.

#### 4.3.2.5 *Brassy Minnow, Common Shiner, Northern Redbelly Dace, Stonecat, and Cylindrical Papershell*

There is potentially suitable habitat within the lakes and/or creeks noted within the Project area for brassy minnow, common shiner, northern redbelly dace, stonecat, and the cylindrical papershell. Impacts to these species' habitats are anticipated to be minor and would be minimized by limiting vehicle and equipment operations within aquatic resources and following best management practices relating to water quality.

## 4.4 Cultural Resources

The COMPASS search returned 214 previously identified cultural resources and the desktop revealed 217 newly identified, potentially historic resources within the overall CRPA (Appendix A-3). A majority of the previously recorded resources are located along the northern half of the Project area, primarily through downtown Longmont. Newly identified, potentially historic resources were identified throughout the corridor. This desktop analysis should not be considered comprehensive, as most of the Project area has not been formally surveyed for cultural resources. Due to the number of known and potential cultural resources located within the CRPA, information for specific Project improvements is provided in Sections 4.4.1 through 4.4.3. Detailed information for the entire corridor is provided in the COMPASS Database Results and Potentially Historic Resources Tables (Appendix C).

**PLEASE NOTE:** Disclosure of the precise locations of archaeological resources to the public may be in violation of both federal and state laws. Applicable United States laws include but may not be limited to Section 304 of the NHPA (16 USC § 70w-3) and the Archaeological Resources Protection Act (16 USC § 470hh).

### 4.4.1 *Priority Safety and Mobility Improvements*

- **Dawson Drive Intersection Improvement:** Desktop review did not identify any previously recorded or newly identified, potentially historic resources intersecting the CRPA at the Dawson Drive intersection.
- **Arapahoe Road to Baseline Road Improvements:** The COMPASS file search identified three previously evaluated resources within the CRPA between Arapahoe Road and Baseline Road. Previously recorded resources within the CRPA include: the Road to Remembrance Gateway (5BL.432) located on the west side of the intersection of US 287 and Arapahoe Road; the Erie Water Supply, Boulder Canyon Ditch (5BL.5041.2) intersecting the CRPA at the intersection of US 287 and Arapahoe Road; and the Goodhue #1 Ditch (5BL.2731) intersecting the CRPA between Diamond Circle and Baseline Road. A review of readily available records revealed one newly identified potentially historic resource, 1290 North 107<sup>th</sup> Street, within the CRPA. For more information on the location of cultural resources within the CRPA, see Appendix C-3.
- **Dillon Road Intersection Improvement:** Desktop review did not identify any previously recorded or newly identified, potentially historic resources intersecting the CRPA at the Dillon Road intersection.
- **Miramonte Boulevard Intersection Improvement:** The COMPASS file search did not identify any previously evaluated resources within the CRPA at the Miramonte Boulevard intersection. A review of readily available records revealed one newly identified, potentially historic resource, 2151 Ridge Drive, within the CRPA but ultimately outside the Project area at the southwest corner of the intersection. For more information on the location of cultural resources within the CRPA, see Appendix C-3.
- **Midway Boulevard Intersection Improvement:** Desktop review did not identify any previously recorded or newly identified, potentially historic resources intersecting the CRPA at the Midway Boulevard intersection.

#### 4.4.2 Multi-Use Path: US 287 between Pike Road and Arapahoe Road

The COMPASS file search identified 24 previously evaluated resources within the CRPA between Pike Road and Arapahoe Road (Table 4). A review of readily available records revealed 43 newly identified potentially historic resources within the CRPA between Pike Road and Arapahoe Road (Table 5). For more information on the location of cultural resources within the CRPA, see Appendix C-3.

**Table 4. Summary of Previously Recorded Historic Resources**

Resource Number	Resource Name	Last Determination of Eligibility (Date)
5BL.432	Road to Remembrance Gateway	Officially Eligible for the SRHP (2021)
5BL.469	Union Pacific Railroad	Officially Eligible (2015)
5BL.488.3	Lower Boulder Ditch Segment	Field Eligible (1994) Contributing to Officially Eligible District (1994)
5BL.825	Van Thuyne Farm	Officially Not Eligible (1983)
5BL.826	Grant House – Grant Property	Officially Not Eligible (1983)
5BL.827*	Wadsworth House – Hurley Residence	Officially Not Eligible (1983)
5BL.828	Carlson Farm – Wallace Property	Field Eligible (1996)
5BL.860	Liggett Ditch	Officially Needs Data (2015)
5BL.861	Boulder-Weld County Ditch	Officially Not Eligible (1983)
5BL.862	Leyner Cottonwood No. 1 Ditch	106 Officially Eligible (2015)
5BL.1992	Leyner Farm	Field Not Eligible (1998)
5BL.3443	Hycrest Farm – Johnson-Yeager Farm	Officially Eligible (2020)
5BL.3444	Laughlin-Walker Farm – John Aken Laughlin Farm	Field Eligible (1998)
5BL.5041.2	Erie Water Supply, Boulder Canyon Ditch	Officially Not Eligible (1990)
5BL.5535	Kaestner-Schlagel Farm	Field Not Eligible (2005)
5BL.5537	Richart Property	Field Not Eligible (1995)
5BL.5736	Anderson Property	Field Not Eligible (1994)
5BL.7355	South Platte Supply Canal – Lower Boulder Ditch – Coalridge Ditch – Sullivan Ditch	Field Eligible for SRHP (2019) Contributing to Officially Eligible District (2019)
5BL.7882	Hoyt to Terry Street Transmission Line	Field Not Eligible (1998)
5BL.8718	Zaltin House – Gomez Residence	Field Not Eligible (2002)
5BL.9265	Nils Baler Farm – Joe Smith Sr. Farm	Field Not Eligible (2003)
5BL.9602	Frank Tyler Farm	Field Not Eligible (2005)
5BL.9604	Johnson-Vallat Farm – Haley Open Space	Field Not Eligible (2006)
5BL.9610	Frank Tyler Farm – Tyler Land & Livestock Company – Macy Open Space	Field Not Eligible (2005)

\* Resource not included in Appendix C-3 as these resources are protected under Section 304 of the NHPA (16 USC § 70w-3) and the Archaeological Resources Protection Act (16 USC § 470hh).

**Table 5. Summary of Newly Identified, Potentially Historic Resources**

Address	Date of Construction	Address	Date of Construction
5 Burlington Drive	1973	7963 Gaynor Way	1973-1989
606 Pike Road	1975	7931 Spinnaker Way	1973-1985

#### 4.4.3 Multi-Use Path Segment: US 287 between Dillon Road and Miramonte Boulevard

The COMPASS file search identified eight previously evaluated resources within the CRPA between Dillon Road and Miramonte Boulevard (Table 6). A review of readily available records revealed five newly identified potentially historic resources within the CRPA between Dillon Road and Miramonte Boulevard (Table 7). For more information on the location of cultural resources within the CRPA, see Appendix C-3.

**Table 6. Summary of Previously Recorded Historic Resources**

Resource Number	Resource Name	Last Determination of Eligibility (Date)
5BL374	Burlington Northern Railroad	Officially Eligible (2015)
5BL2712	Rock Creek Site	Officially Eligible (1991); SRHP Listed (1993)
5BL2721	No Resource Name	Officially Not Eligible (1991)
5BL3117	No Resource Name	Officially Not Eligible (2000)
5BL3118	Joe Sabatini Place	Officially Not Eligible (1991)
5BL3121	Sanford's Convenience Plus Store	Officially Not Eligible (1990)
5BL3424	No Resource Name	Officially Not Eligible (1992)
5BL7956	No Resource Name	Field Not Eligible (1999)

**Table 7. Summary of Newly Identified, Potentially Historic Resources**

Address	Date of Construction
2205 South 112 <sup>th</sup> Street	Circa 1978
11250 Dillon Road	1965-1966
1690 South 112 <sup>th</sup> Street	1975
1756 Highway 287	1965-1971
Unnamed Concrete Ditch	Circa 1978

## 4.5 Parks and Recreational Resources

A total of 22 potential non-historic Section 4(f) resources occur within or near the Project (Table 8; Appendix A-4). In addition, one Section 6(f) resource is located in the southern portion of the Project area in the southeast corner of 6<sup>th</sup> Avenue and US 287: North Midway Park (Appendix A-4). Due to the number of potential non-historic resources mapped, only named resources (excluding bike lanes and sidewalks which are classified as transportation not recreational resources) are included in the section below; a comprehensive list of potential non-historic Section 4(f) resources, including unnamed resources, bike lanes, and sidewalks, is provided in Appendix A-4.

**Table 8. Potential Non-Historic Section 4(f) Resources**

Resource Name	Type of Resource	Managing Jurisdiction	Approximate Location
Dickens Farm Natural Area and Trails Within	Open space and trails	City of Longmont	Northeast corner of Ken Pratt Boulevard. and US 287
Saint Vrain Greenway Trail	Paved trail	City of Longmont	Northeast corner of Ken Pratt Boulevard. and US 287
Left Hand Greenway Trail	Paved trail	City of Longmont	West and east of US 287 between Missouri Ave./Quail Road and Emery Street
Erie Lake	Open space	Town of Erie	Northeast corner of Arapahoe Road and US 287
Prince Lake	Open space	Town of Erie	Southwest corner of Arapahoe Road and US 287
John Breaux Park and Trails Within	Community park and trails	City of Lafayette	East of US 287 between Emma Street and South Boulder Road
Adler-Fingru Coal Creek Open Space and Trail Within	Open space and trail	Boulder County-Lafayette-Louisville (Jointly Owned)	West of US 287 between Stage Station Way and Minotaur Drive
Coal Creek Corridor Open Space and Trail Within	Open space and trail	City of Lafayette	East of US 287 between Old Laramie Trail E and Public Road
Warembourg Open Space	Open space	Boulder County – Lafayette (Jointly Owned)	East of US 287 between Old Laramie Trail E. and 112 <sup>th</sup> Street
Sola Park and Trail Within	Community park and trail	City of Lafayette	East of US 287 between Old Laramie Trail E. and 112 <sup>th</sup> Street
Carolyn Holmberg Preserve and Trail Within	Nature preserve and trail	Boulder County	Southwest corner of Northwest Parkway. And US 287
Ruth Roberts Trail	Soft surface trail	Boulder County Parks and Open Space	US 287 between Miramonte Boulevard and Northwest Parkway
Ridgeview Open Space	Open space	City and County of Broomfield	Northeast corner of Miramonte Boulevard and US 287
Lake Link Trail	Soft surface trail	City and County of Broomfield	Northwest corner of Miramonte Boulevard and US 287

Resource Name	Type of Resource	Managing Jurisdiction	Approximate Location
287 Detention Pond and Trail Within	Other open lands and trail	City and County of Broomfield	Northwest corner of Miramonte Boulevard and US 287
Zang Spur Park and Trails Within	Community park and trails	City and County of Broomfield	Northwest corner of 10 <sup>th</sup> Ave. and US 287
Jefferson Town Center and Trail Within	Community park and trail	City and County of Broomfield	East of US 287 between Miramonte Boulevard and W. 10 <sup>th</sup> Avenue
Broomfield Trail	Paved trail	City and County of Broomfield	West and east of US 287 between Miramonte Blvd. and W. 10 <sup>th</sup> Ave.
Community Ditch Open Space and Trail Within	Open space and trail	City and County of Broomfield	West of US 287 south between 10 <sup>th</sup> Avenue and 6 <sup>th</sup> Avenue
Broomfield Professional Park Open Lands	Open space	City and County of Broomfield	Southwest corner of 6 <sup>th</sup> Avenue and US 287
North Midway Park and Trails Within	Community park and trails	City and County of Broomfield	Southeast corner of 6 <sup>th</sup> Avenue and US 287
Blue Star Memorial Park and Trails Within	Community park and trails	City and County of Broomfield	Southeast corner of 6 <sup>th</sup> Avenue and US 287

## 4.6 Environmental Justice

A total of 40 Census Block Groups were assessed; 33 are located in Boulder County, and 7 are located in Broomfield County.

Boulder County has a minority population of 24 percent; 16 of the 33 Block Groups evaluated have a higher than 24 percent minority population (Table 9). The majority of these Block Groups are located between SH 66 and CO 119 (Appendix A-5). Broomfield County has a minority population of 26 percent; 3 of the 7 Block Groups in Broomfield County have a minority population higher than 26 percent (Table 9). These Block Groups are scattered in the southern portion of the Project area (Appendix A-5).

Boulder County has a low-income population of almost 19 percent. Of the 33 Block Groups in Boulder County, 11 have a low-income percentage higher than 19 percent. These Block Groups are located mainly between SH 66 and CO 119 (Appendix A-5). Broomfield County has a low-income percentage of almost nine 9 percent, 4 of the 7 Block Groups in Broomfield County have a higher percentage of low-income populations. These Block Groups are all located south of Northwest Parkway (Appendix A-5).

Boulder County has a linguistically isolated (i.e., LEP) population of almost 2 percent. Of the 33 Block Groups, 8 have an LEP population higher than 2 percent. Broomfield County has an LEP population of 1.5 percent; of the 7 Block Groups, 2 have an LEP population higher than 1.5 percent. These LEP populations are scattered throughout the Project area (Appendix A-5).

**Table 9. Environmental Justice Populations in the Project Area.**

Census Tract Block Group	Minority Percentage	Low-Income Percentage	LEP Percentage
<b>Boulder County</b>			
Block Group 1, Census Tract 128.01	9%	0.00%	0.00%

*\*Highlighted percentages are higher than their respective counties.*

## 4.7 Land Use

Existing land uses in the vicinity of the Project area include mixed-use commercial, residential, and agricultural properties (Appendix A-6). The northern extent of the Project area within the City of Longmont is primarily zoned for development, either commercial or residential. The entirety of this area is designated as prime farmland if irrigated (Appendix A-7)

The central extent of the Project area, located in Lafayette from approximately CO 52 to CO 7, is comprised of agricultural land uses; soils are a mix of prime farmland if irrigated and farmland of statewide importance.

From CO 7 down to the southern extent of the Project area in Broomfield, land use is comprised of a mix of planned urban development, residential and commercial. This extent is almost entirely prime farmland if irrigation, with patches of farmland of statewide importance.

## 5. Potential Impacts and Next Steps

In support of the conceptual design phase, Pinyon has identified environmental impacts or constraints related the proposed improvements, providing recommendations on field surveys, agency consultation, and documentation that are expected to be required in the future for the construction of the Project, including the anticipated level of clearance and permitting. The jurisdictional agencies whose clearance processes were considered in this report are CDOT and FHWA, along with permitting and/or clearance requirements for the USACE, USFWS, and SHPO.

Impacts and recommendations for next steps vary by location and proposed design elements; however, the following resource recommendations and next steps are generally consistent throughout the corridor and summarized below:

- **Cultural Resources:** The level of documentation is dependent on applicable local, state, and federal regulations including but not limited to Section 106 of the NHPA, as amended (per 36 CFR § 800) and the SRHP consistent with CRS § 24-80.1 and 8 CCR § 1504-5. The following provides a guideline for potential documentation needs in future phases of the Project.
  - Resources determined Officially Eligible or those which are contributing to an NRHP District may require re-evaluation using OAHP Form 1405: Cultural Resource Re-Visitation Form.
  - Resources with field determinations of eligibility have not received official concurrence from the Colorado SHPO and may require evaluation using OAHP Form 1403: Architectural Inventory Form or OAHP Form 1400/1418: Management Data/Linear Component Form.
  - Resources determined Officially Not Eligible may require re-evaluation for NRHP or SRHP eligibility due to changing historical context or if more than 10 years have passed since the previous determination of eligibility.
  - Newly identified, potentially historic resources may require evaluation for NRHP eligibility using OAHP Form 1403: Architectural Inventory Form or OAHP Form 1400/1418: Management Data Form/Linear Component Form.
- **Environmental Justice:** There are several EJ populations located in the Project area; all Block Groups are expected to incur the same direct and indirect effects meaning that EJ populations are not anticipated to bear high or adverse impacts disproportionately. Similarly, improved safety and multi-modal connectivity will benefit all Block Groups. Should ROW impacts be required for acquisition and/or easements, parcels immediately adjacent to US 287 could be directly affected. The level of documentation anticipated will be dependent on where capacity is added, and the length of that new capacity. Improvements which are exempt as defined by CDOT will likely require completion of CDOT Template A. For improvements that do not add capacity, a CDOT EJ Template B will likely need to be completed. For improvements that do add capacity, a CDOT EJ Template C will likely need to be completed.
- **Land Use, including Farmlands:** The implementation of the proposed improvements is compatible with the vision of the City of Longmont; City of Lafayette; City and County of Broomfield; and Boulder County Comprehensive Plans. Direct impacts on land uses, including those to farmland, are expected to be minor. Should ROW impacts be required for acquisition and/or easements, it is anticipated the impacts would be minor and not expected to change land uses for the entire parcel.

For the remaining resources, existing conditions and recommendations are provided by location. If a resource is not present at the location of the proposal improvement, or it is not expected to be impacted at the location of the proposed improvement, next steps are not included for it in the tables below. The five priority safety and mobility improvements are summarized in Table 10; the MUP alignments are summarized in Table 11.

**Table 10. Summary of Findings and Recommendations – Priority Safety and Mobility Improvements**

Resource	Existing Conditions and Constraints	Recommended Next Steps	Level of Effort
<b>Dawson Drive Intersection Improvement</b>			
<b>Hazardous Materials</b>	No facilities were identified with a high potential to impact the Project area at this location.	Documentation of hazardous materials in Initial Site Assessment (ISA).	Low
<b>WOTUS/ Wetlands</b>	Roadside swales lacking a defined channel are located on the east and west of US 287 at Dawson Drive in the location of the proposed U-turn bulbout; these features are depicted as mapped freshwater emergent wetland habitat associated with Boulder Creek on the NWI (USFWS, 2023s).	<p>Formal delineation of potential WOTUS/wetlands according to USACE protocols.</p> <p>Documentation of potential WOTUS/wetlands in Biological Technical Memorandum (BTM).</p> <p>Impact analysis and Section 404 Permitting likely required for impacts to WOTUS. Likely will result in Nationwide Permit (NWP); however, if impacts are substantial (i.e., permanent impacts greater than 0.5 acre), an Individual Permit may be required. Section 404 permitting would trigger the need to comply with the ESA and Section 106 of the NHPA.</p> <p>A CDOT Wetland Finding report required if permanent wetland impacts exceed 500 square feet, or if temporary impacts exceed 1,000 square feet, regardless jurisdictional status. CDOT requires mitigation for all wetland impacts, at a 1:1 ratio, regardless of jurisdictional status.</p>	Medium
<b>Wildlife/ Sensitive Species</b>	<p>There is a medium potential for monarch butterflies to occur. Due to the potential for wetlands, minimal suitable habitat for ULTO may be present. There is a low potential for other federally or state-listed species to occur at this location.</p> <p>There is also the potential for MBTA constraints. Large trees in and within 0.5-mile of the Project area may provide nesting habitat for raptors. Small shrubs and grasses in the Project area could provide habitat for non-raptor migratory birds.</p> <p>Noxious weeds typical of disturbed areas and roadsides likely present.</p>	<p>Habitat assessment for federally listed species.</p> <p>Potential ESA coordination/consultation with USFWS.</p> <p>Migratory bird survey.</p> <p>Noxious weed survey.</p> <p>Documentation of biological resources in BTM.</p>	Medium
<b>Cultural Resources</b>	<p>No ROW acquisition or easement is anticipated, and the potential to impact historical resources is low.</p> <p>The corridor is in a highly developed area. If archaeological resources were present, they may have been disturbed by previous ground disturbing activities.</p>	If the Project has a federal nexus (i.e., Section 404 Permitting), then compliance with Section 106 of the NHPA would be required; minimal documentation anticipated.	Low
<b>Parks and Recreational Resources</b>	No parks, trails, open space areas, or recreational facilities were identified at this location.	None	Low

Resource	Existing Conditions and Constraints	Recommended Next Steps	Level of Effort
<b>Arapahoe Road to Baseline Road Improvements</b>			
<b>Hazardous Materials</b>	No facilities were identified with a high potential to impact the Project area at this location. Bridge structures are likely present; however, they are not anticipated to be impacted as part of the improvements.	Documentation of hazardous materials in ISA.	Low
<b>WOTUS/Wetlands</b>	Potential WOTUS are present at the southwest corner of US 287 and Arapahoe Road and nearby South Boulder Canyon; however, proposed improvements do not extend beyond existing roadway.	Formal delineation of potential WOTUS/wetlands according to USACE protocols; anticipates no WOTUS or wetlands impacted by improvements and no permitting required. Documentation of potential WOTUS/wetlands in BTM.	Low
<b>Wildlife/Sensitive Species</b>	There is a medium potential for monarch butterflies to occur; there is a low potential for other federally listed species to occur at this location.  A potentially active prairie dog colony is present to the west of US 287, south of South Boulder Canyon; however, proposed improvements do not extend beyond existing roadway. Given the minimal disturbance and work within the ROW, there is a low potential for federally or state listed species to be impacted.  There is also the potential for MBTA constraints. Large trees in and within 0.5-mile of the Project area may provide nesting habitat for raptors. Small shrubs and grasses in the Project area could provide habitat for non-raptor migratory birds. Burrowing Owls may nest in prairie dog colony.  Noxious weeds typical of disturbed areas and roadsides likely present.	Habitat assessment for federally listed species. Migratory bird survey, including surveys for Burrowing Owls. Noxious weed survey. Documentation of biological resources in BTM.	Low
<b>Cultural Resources</b>	No ROW acquisition or easement is anticipated, and the potential to impact historical resources is low. One site is located within the roadway ROW (5BL.432 – Road to Remembrance Gateway – Officially Eligible) which may require evaluation for direct and indirect impacts because of improvements to Arapahoe Road.  The corridor is in a highly developed area. If archaeological resources were present, they may have been disturbed by previous ground disturbing activities.	If the project has a federal nexus (i.e., federal permits or monies), then compliance with Section 106 of the NHPA would be required.  Coordination with local jurisdictions and consultation of the SRHP may be required, including coordination to avoid impacts (e.g., direct and indirect, such as visual) resulting from design elements at the 5BL.432 – Road to Remembrance Gateway site.	Medium
<b>Parks and Recreational Resources</b>	Prince Lake Open Space is located on the southwest corner of US 287 and Arapahoe Road; however, proposed improvements do not extend beyond existing roadway. Several existing and proposed trail alignments are present within this segment.	It is anticipated that improvements would result in an enhancement to existing facilities. If parks and recreational facilities will be impacted, coordination with the official with jurisdiction should be completed and the potential need for detours should be assessed.	Low

Resource	Existing Conditions and Constraints	Recommended Next Steps	Level of Effort
<b>Dillon Road Intersection Improvement</b>			
<b>Hazardous Materials</b>	No facilities were identified with a high potential to impact the Project area at this location. Bridge structures are likely present; however, they are not anticipated to be impacted as part of the improvements.	Documentation of hazardous materials in ISA.	Low
<b>WOTUS/ Wetlands</b>	Potential WOTUS and wetlands are not likely present at this location.	Formal delineation of potential WOTUS/wetlands according to USACE protocols; anticipates no potential WOTUS or wetlands impacted by improvements and no permitting required. Findings documented in BTM.	Low
<b>Wildlife/ Sensitive Species</b>	There is a medium potential for monarch butterflies to occur; there is a low potential for other federally or state-listed species to occur at this location.  There is a potential for MBTA constraints. Large trees in and within 0.5-mile of the Project area may provide nesting habitat for raptors, and there is mapped Bald Eagle summer forage in the southwest corner of Dillon Road and US 287 (CPW, 2023a). Small shrubs and grasses in the Project area could provide habitat for non-raptor migratory birds.  Noxious weeds typical of disturbed areas and roadsides likely present.	Habitat assessment for federally listed species.  Migratory bird survey.  Noxious weed survey.  Documentation of biological resources in BTM.	Low
<b>Cultural Resources</b>	No ROW acquisition or easement is anticipated, and the potential to impact historical resources is low.  The corridor is in a highly developed area. If archaeological resources were present, they may have been disturbed by previous ground disturbing activities.	If the project has a federal nexus (i.e., federal permits or monies), then compliance with Section 106 of the NHPA would be required.  The potential to impact historical resources is low.	Low
<b>Parks and Recreational Resources</b>	Carolyn Holmberg Preserve and an Unnamed Open Space is located to the southwest corner and southeast of US 287 and Dillon Road, respectively; however, proposed improvements do not extend beyond existing roadway. Several existing and proposed trail alignments are present within this segment.	It is anticipated that improvements would result in an enhancement to existing facilities. If parks and recreational facilities will be impacted, coordination with the official with jurisdiction should be completed and the potential need for detours should be assessed.	Low

Resource	Existing Conditions and Constraints	Recommended Next Steps	Level of Effort
<b>Miramonte Boulevard Intersection Improvement</b>			
<b>Hazardous Materials</b>	One high potential facility is located on the northeast corner of Miramonte Boulevard. This is a downgradient facility with impacted soil and groundwater and a potential for Regulated Asbestos Contaminated Soils. Impacts are primarily on the southwestern portion of the property. The facility includes use restrictions for allowable improvements and groundwater use.	Documentation of hazardous materials in ISA. Development of a Materials Management Plan. Improvements greater than 8 feet below ground surface (bgs) may encounter impacted soil and/or groundwater. Special handling and/or disposal may be required (i.e., Materials Management Plan, remediation dewatering permit).	Medium
<b>WOTUS/ Wetlands</b>	The 287 Detention Pond is located west of US 287, north of Miramonte Boulevard. Potential fringe wetlands and riparian areas may be associated with this feature, located near the bus stop improvements.	Formal delineation of potential WOTUS/wetlands according to USACE protocols. Documentation of potential WOTUS/wetlands in BTM. Impacts to potential WOTUS not anticipated. A CDOT Wetland Finding report required if permanent wetland impacts exceed 500 square feet, or if temporary impacts exceed 1,000 square feet, regardless jurisdictional status. CDOT requires mitigation for all wetland impacts, at a 1:1 ratio, regardless of jurisdictional status.	Medium
<b>Wildlife/ Sensitive Species</b>	There is a medium potential for monarch butterflies to occur. There is a low potential for other federally or state-listed species to occur at this location.  There is also the potential for MBTA constraints. Large trees in and within 0.5-mile of the Project area may provide nesting habitat for raptors. Small shrubs and grasses in the Project area could provide habitat for non-raptor migratory birds.  Noxious weeds typical of disturbed areas and roadsides likely present.	Habitat assessment for federally listed species. Migratory bird survey. Noxious weed survey. Documentation of biological resources in BTM.	Low
<b>Cultural Resources</b>	No ROW acquisition or easement is anticipated, and the potential to impact historical resources is low.  The corridor is in a highly developed area. If archaeological resources were present, they may have been disturbed by previous ground disturbing activities.	If the project has a federal nexus (i.e., federal permits or monies), then compliance with Section 106 of the NHPA would be required.  The potential to impact historical resources is low.	Low
<b>Parks and Recreational Resources</b>	Ridgeview Open Space is located to the northeast of US 287 and Miramonte Boulevard and 287 Detention Pond is located to the northwest; however, proposed improvements do not extend beyond existing roadway. Several existing and proposed trail alignments are present within this segment.	It is anticipated that improvements would result in an enhancement to existing facilities. If parks and recreational facilities will be impacted, coordination with the official with jurisdiction should be completed and the potential need for detours should be assessed.	Low

Resource	Existing Conditions and Constraints	Recommended Next Steps	Level of Effort
<b>Midway Intersection Improvement</b>			
<b>Hazardous Materials</b>	One high potential site is located on the southwest corner of US 287 and West Midway Boulevard, consisting of the upgradient facility Circle K Store #2709873, 425 US Highway 287 ERIS ID #371. USTs are located on the northern extent of parcel (adjacent to improvements). ROW impacts are anticipated.	Documentation of hazardous materials in ISA Development of a Materials Management Plan. Improvements greater than 8 feet bgs may encounter impacted soil and/or groundwater. Special handling and/or disposal may be required (i.e., Materials Management Plan, remediation dewatering permit).	Medium
<b>WOTUS/ Wetlands</b>	Potential WOTUS and wetlands are not likely present at this location.	Formal delineation of potential WOTUS/wetlands according to USACE protocols; anticipates no potential WOTUS or wetlands impacted by improvements and no permitting required. Findings documented in BTM.	Low
<b>Wildlife/ Sensitive Species</b>	There is a low potential for federally listed species to occur at this location. A potentially active prairie dog colony is present to the west of US 287, south of Midway Boulevard; however, proposed improvements do not extend into this area. Given the minimal disturbance and work within the ROW, there is a low potential for federally or state listed species to be impacted.  There is also the potential for MBTA constraints. Large trees in and within 0.5-mile of the Project area may provide nesting habitat for raptors. Burrowing Owls may nest in prairie dog colony. Small shrubs and grasses in the Project area could provide habitat for non-raptor migratory birds.  Noxious weeds typical of disturbed areas and roadsides likely present.	Habitat assessment for federally listed species. Migratory bird survey, including surveys for Burrowing Owls. Noxious weed survey. Documentation of biological resources in BTM.	Low
<b>Cultural Resources</b>	ROW acquisition and/or easements are anticipated; however, no known or potential historic resources were identified.  The corridor is in a highly developed area. If archaeological resources were present, they may have been disturbed by previous ground disturbing activities.	If the project has a federal nexus (i.e., federal permits or monies), then compliance with Section 106 of the NHPA would be required.  The potential to impact historical resources is low.	Low
<b>Parks and Recreational Resources</b>	No parks, trails, or recreational facilities were identified at this location.	None anticipated.	Low

Resources within the four MUP concepts on the Pike Road to Arapahoe Road and Dillon Road to Miramonte Boulevard Segments are provided in Tables 10 and 11, respectively. Where applicable, designation of low (green), medium (orange), or high (red) level of effort for clearance is indicated.

**Table 11. Summary of Findings and Recommendations – MUP Pike to Arapahoe**

Resource	West		East	
	MUP Clear Zone	MUP Barrier	MUP Clear Zone	MUP Barrier
<b>Hazardous Materials</b>	<p><u>Existing Conditions:</u> No high potential sites are located within this segment. Bridge structures are present throughout the corridor which may contain LBP and potential ACMs.</p> <p><u>Next Steps:</u> Documentation of hazardous materials in ISA, including LBP and ACM inspection for potential hazardous materials on bridges that may be impacted by the Project.</p>			
<b>WOTUS/ Wetlands</b>	<p><u>Existing Conditions:</u> Up to 8 named drainage features and several unnamed features extend throughout this segment. Based on the WOTUS dataset compiled by Pinyon, Consor evaluated the percentage of the total WOTUS acreage that would be impacted for that concept, as shown below. In summary, the East MUP Clear Zone results in a higher impact to potential to total WOTUS acreage; therefore, would likely require a higher level of effort and resources for Section 404 permitting and mitigation, including compliance with ESA and Section 106 of the NRHP.</p>			
	Wetlands 7.5% Open Waters 0.2% 	Wetlands 0.8% Open Waters 0.1 % 	Wetlands: 19.9% Open Waters: 0.9% 	Wetlands: 2.2% Open Waters: 0.3% 
	<p><u>Next Steps:</u> Formal delineation of WOTUS according to USACE protocols. Impact analysis and Section 404 Permitting likely required for impacts to WOTUS. It is anticipated that a separate NWP would apply to each crossing location; however, if impacts are substantial (i.e., permanent impacts greater than 0.5 acre), an Individual Permit may be required.</p> <p>A CDOT Wetland Finding report(s) required if permanent wetland impacts exceed 500 square feet, or if temporary impacts exceed 1,000 square feet, regardless jurisdictional status. CDOT requires mitigation for all wetland impacts, at a 1:1 ratio, regardless of jurisdictional status.</p>			
<b>Wildlife/ Sensitive Species</b>	<p><u>Existing Conditions:</u> There is a medium potential for monarch butterflies to occur. Due to the potential for wetlands and riparian habitats at the various drainage features, minimal suitable habitat for PMJM and ULTO may be present. Impacts to these habitats may result in the need for consultation with the USFWS, as such, the MUP Clear Zone (west or east) would likely require a higher level of effort for habitat evaluation, species-specific surveys and USFWS consultation. In addition, there is potential for MBTA constraints. Two locations have Bald Eagle nests within 0.5 mile of the Project area. Large trees are located in and within 0.5-mile of the Project area. The Project area may provide nesting habitat for raptors. Small shrubs and grasses could provide habitat for non-raptor migratory birds. Noxious weeds typical of disturbed areas and roadsides likely present.</p>			
	<p><u>Next Steps:</u> Given the potential for sensitive species to occur, habitat assessment for federally listed species would be required. Impacts to these habitats may result in the need for consultation with the USFWS, as such, the MUP Clear Zone (west or east) would likely require a higher level of effort for habitat evaluation, species-specific surveys and USFWS consultation. Bald Eagle nests occurring to the west of US 287 (within 0.5 mile of the Project area) may require further coordination with CPW or USFWS; the West MUP Clear Zone may require a higher level of effort given proximity to the nest locations. In addition, surveys for migratory birds and other biological resources (e.g., noxious weeds) may be warranted, with conditions documented in a BRR.</p>			
<b>Cultural Resources</b>	<p><u>Existing Conditions:</u> The COMPASS file search identified 24 previously evaluated resources and approximately 40 newly identified or potentially eligible (i.e., age-eligible) resources occur within this segment. Based on the historic resource dataset compiled by Pinyon, Consor evaluated the total number of properties that would be impacted for that concept, as shown below. In addition, an evaluation of ROW conditions was performed by Consor to identify the percentage of sufficient ROW to accommodate the proposed concept. In summary, the West MUP Clear Zone results in a higher impact to potentially historic properties (and ROW impacts); therefore, would likely require a higher level of effort and resources for Section 106 compliance.</p>			

Resource	West		East	
	MUP Clear Zone	MUP Barrier	MUP Clear Zone	MUP Barrier
	40 properties Sufficient ROW: 36% 	14 properties Sufficient ROW: 96% 	24 properties Sufficient ROW: 61% 	14 properties Sufficient ROW: 90% 
	<p><u>Next Steps:</u> If the Project has a federal nexus (i.e., Section 404 Permitting or Federal funding), then compliance with Section 106 of the NHPA would be required. Coordination with local jurisdictions and the SHPO is likely required. Field survey will be required, as well as site evaluations for potentially impacted resources. The following considerations can be included during design to minimize clearance requirements: Avoid impacts to resources determined Eligible; those without official determinations; and linear resources such as ditches and railroads with determinations of Officially Eligible or Officially Supporting. If impacts are unavoidable, target easements that do not alter the context or modify contributing features (i.e., access, structures, or property features such as rock walls and large farm trees).</p> <p>Avoid ROW impacts to resources that contain features more than 50 years in age which have not been evaluated for NRHP Eligibility.</p>			
<b>Parks and Recreational Resources</b>	<p><u>Existing Conditions:</u> Several existing and proposal trail alignments are present within this segment. In addition, Erie Lake Open Space is located east of US 287, north of Arapahoe Road. ROW impacts may be required to accommodate the East MUP Clear Zone and East MUP Barrier; however, would likely result in an enhancement to existing facilities.</p>			
	<p><u>Next Steps:</u> If parks and recreational facilities will be temporarily impacted, coordination with the owner should be completed and the potential need for detours should be assessed.</p>			
<b>General NEPA Considerations</b>	<p>It is anticipated that the MUP Barrier Path concepts would not individually or cumulatively result in a significant impact and could advance into NEPA with a Categorical Exclusion level of study. An Environmental Assessment (EA) could be triggered for resources in which a significant impact could be incurred, for example, with the MUP Clear Zone concepts (i.e., determination of adverse effect on historic properties pursuant to Section 106; formal consultation under Section 7 of the Endangered Species Act). However, the level of NEPA analysis would ultimately fall to the lead federal agency.</p>			

**Table 12. Summary of Findings and Recommendations – MUP Dillon to Miramonte**

Resource	West		East	
	MUP Clear Zone	MUP Barrier	MUP Clear Zone	MUP Barrier
<b>Hazardous Materials</b>	<p><u>Existing Conditions:</u> One high potential site, a former landfill facility, is located on the northeast quadrant of US 287 and Miramonte Boulevard. This is a downgradient facility with impacted soil and groundwater and a potential for Regulated Asbestos Contaminated Soils on the southwestern portion of the property. The facility includes use restrictions for allowable improvements and groundwater use. The East MUP Clear Zone and East MUP Barrier concepts have the potential to encounter contaminated materials. In addition, bridge structures are present throughout the corridor which may contain LBP and potential ACMs.</p>			
	<p><u>Next Steps:</u> Documentation of hazardous materials in ISA and development of Materials Management Plan. Improvements greater than 8 feet bgs may encounter impacted soil and/or groundwater. Special handling and/or disposal may be required (i.e., Materials Management Plan, remediation dewatering permit)</p>			
<b>Waters of the US/ Wetlands</b>	<p><u>Existing Conditions:</u> One named drainage feature (Rock Creek) and several unnamed features are in this segment. Based on the WOTUS dataset compiled by Pinyon, Consor evaluated the percentage of the total WOTUS acreage that would be impacted for that concept, as shown below. In summary, the West MUP Clear Zone results in a higher impact to potential to total WOTUS acreage; therefore, would likely require a higher level of effort and resources for Section 404 permitting and mitigation, including compliance with ESA and Section 106.</p>

	Wetlands 1.3% Open Waters 0.1% 	Wetlands 0.3% Open Waters 0.1 % 	Wetlands: 0.4% Open Waters: 0.1% 	Wetlands: 0.5% Open Waters: 0.1% 
	<p><b>Next Steps:</b> Formal delineation of WOTUS according to USACE protocols. Impact analysis and Section 404 Permitting likely required for impacts to WOTUS. It is anticipated that a separate NWP would apply to each crossing location; however, if impacts are substantial (i.e., permanent impacts greater than 0.5 acre), an Individual Permit may be required.</p> <p>A CDOT Wetland Finding report(s) required if permanent wetland impacts exceed 500 square feet, or if temporary impacts exceed 1,000 square feet, regardless jurisdictional status. CDOT requires mitigation for all wetland impacts, at a 1:1 ratio, regardless of jurisdictional status.</p>			
<b>Wildlife/ Sensitive Species</b>	<p><b>Existing Conditions:</b> There is a medium potential for monarch butterflies to occur. Due to the potential for wetlands and riparian habitats at the various drainage features, minimal suitable habitat for PMJM and ULTO may be present, particularly at Rock Creek. Impacts to these habitats may result in the need for consultation with the USFWS, as such, the MUP Clear Zone (west or east) would likely require a higher level of effort for habitat evaluation, species-specific surveys and USFWS consultation. In addition, there is potential for MBTA constraints. Large trees in and within 0.5-mile of the Project area may provide nesting habitat for raptors. Small shrubs and grasses could provide habitat for non-raptor migratory birds. Noxious weeds typical of disturbed areas and roadsides likely present</p>			
	<p><b>Next Steps:</b> Given the potential for sensitive species to occur, habitat assessment for federally listed species would be required. Impacts to these habitats may result in the need for consultation with the USFWS, as such, the MUP Clear Zone (west or east) would likely require a higher level of effort for habitat evaluation, species-specific surveys and USFWS consultation. In addition, surveys for migratory birds and other biological resources (e.g., noxious weeds) may be warranted, with conditions documented in a BRR.</p>			
<b>Cultural Resources</b>	<p><b>Existing Conditions:</b> The COMPASS file search identified 8 previously evaluated resources and 5 newly identified or potentially eligible (i.e., age-eligible) resources occur within this segment. Based on the historic resource dataset compiled by Pinyon, Consor evaluated the total number of properties that would be impacted for that concept, as shown below. In addition, an evaluation of ROW conditions was performed by Consor to identify the percentage of sufficient ROW to accommodate the proposed concept. In summary, the West MUP Clear Zone results in a higher impact to potentially historic properties (and ROW impacts); therefore, would likely require a higher level of effort and resources for Section 106 compliance.</p>			
	6 properties Sufficient ROW: 70% 	4 properties Sufficient ROW: 84% 	6 properties Sufficient ROW: 62% 	3 properties Sufficient ROW: 89% 
	<p><b>Next Steps:</b> If the Project has a federal nexus (i.e., Section 404 Permitting or Federal funding), then compliance with Section 106 of the NHPA would be required. Coordination with local jurisdictions and the SHPO is likely required. Field survey will be required, as well as site evaluations for potentially impacted resources. The following considerations can be included during design to minimize clearance requirements:</p> <p>Avoid impacts to resources determined Eligible; those without official determinations; and linear resources such as ditches and railroads with determinations of Officially Eligible or Officially Supporting. If impacts are unavoidable, target easements that do not alter the context or modify contributing features (i.e., access, structures, or property features such as rock walls and large farm trees).</p> <p>Avoid ROW impacts to resources that contain features more than 50 years in age which have not been evaluated for NRHP Eligibility.</p>			
<b>Parks and Recreational Resources</b>	<p><b>Existing Conditions:</b> Several existing and proposal trail alignments are present within this segment. In addition, Carolyn Holmberg Preserve, Ridgeview Open Space and other Unnamed Open Space properties are located south of Dillon Road. ROW impacts may be required to accommodate the MUP alignments; however, would likely result in an enhancement to existing facilities.</p>			

Resource	West		East	
	MUP Clear Zone	MUP Barrier	MUP Clear Zone	MUP Barrier
	<u>Next Steps:</u> If parks and recreational facilities will be temporarily impacted, coordination with the Official with Jurisdiction should be completed and the potential need for detours should be assessed.			
<b>General Clearance Considerations</b>	It is anticipated that the MUP Barrier Path concepts would not individually or cumulatively result in a significant impact and could be advance into NEPA with a Categorical Exclusion level of study. An EA could be triggered for resources in which a significant impact could be incurred, for example, with the MUP Clear Zone concepts (i.e., determination of adverse effect on historic properties pursuant to Section 106; formal consultation under Section 7 of the Endangered Species Act). However, the level of NEPA analysis would ultimately fall to the lead federal agency.			

In addition to the resources discussed within this report, consideration should be made for future evaluation of visual resources, air quality and noise once design concepts are refined and traffic data becomes available.

- Visual analysis may be required to evaluate visual compatibility with landscape character, viewers (travelers and neighbors), and visual quality. For CDOT-sponsored projects, a Visual Impact Assessment (VIA) questionnaire may be required to evaluate the level of assessment required in compliance with FHWA guidelines.
- Air quality analysis, including greenhouse gas analysis, may be required by CDOT to ensure the Project would not cause or contribute to poor air quality on a regional or local level.
- Noise analysis may be required by CDOT to determine if the Project is anticipated to cause noise impacts and if noise abatement will be built as part of the Project. Projects can be defined as Type I or Type III, indicating a detailed noise analysis and technical report, or brief document, respectively.

It is recommended that Project scoping be conducted to identify the appropriate level of analysis required for all resources, including air quality and noise, in support of completing the appropriate NEPA document.

## **Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY**

**Reliance on information in Report:** This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

**License for use of information in Report:** No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

**Your Liability for misuse:** Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

**No warranty of Accuracy or Liability for ERIS:** The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

**Trademark and Copyright:** You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

<b>Additional Comments:</b> <b>Comments:</b> <b>Cause Info:</b> During the flood in September 2013, a joint on a 15-inch sewer line directly over the St. Vrain River separated - directly over the St. Vrain.. During the flood, since the flow of water was so heavy, they expect that the sewer line was taking in water. However, after the water level receded, the line would have released wastewater. This was discovered the morning on 10/17/13. <b>Action:</b> The line was bypassed, they worked on the line, and had it sealed by the afternoon of 10/17/13.

Spill Description:	During pressure testing a dump line leak was discovered at the Leyner 61N69W15NWSE location. Excavation and repair activities commenced and hydrocarbon impacted soil was encountered in the excavation. Groundwater was not encountered in the excavation. Soil samples were collected from the excavation area and submitted for laboratory analysis of benzene, toluene, ethylbenzene and total xylenes (BTEX) by USEPA Method 8260 and total petroleum hydrocarbons (TPH) by USEPA Method 8015. Site assessment activities are ongoing at this location.

Area Depth Determined:	During pressure testing two dump line leaks were discovered at the Leyner 61N69W15NWSE location. Excavation and repair activities commenced and hydrocarbon impacts were discovered. Excavation activities were guided in the field by screening for volatile organic compound (VOC) concentrations using a photoionization detector (PID). Nine soil samples were collected from the sidewalls and base of the final extent of the excavation between 4 and 8 feet below ground surface (bgs). Soil samples were submitted to Summit Scientific Laboratory, in Golden, Colorado for analysis of benzene, toluene, ethylbenzene, total xylenes (BTEX), total petroleum hydrocarbons (TPH) - gasoline range organics (GRO) by United States Environmental Protection Agency (USEPA) Method 8260B, and TPH - diesel range organics (DRO) by USEPA Method 8015. Analytical results indicate that constituent concentrations in the soil samples collected from the final extent of the excavation area were below the applicable COGCC Table 910-1 soil standards. Groundwater was not encountered in the excavation. Soil analytical results		

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
<b>Geology Description:</b>		are summarized in Table 1 and sample locations are illustrated on Figure 2. Laboratory analytical reports are included as Attachment A.				
<b>Additional Spill Details:</b>		Sandy Clay				
<b>Root Cause:</b>		Pressure testing indicated a potential leak in the oil dumpline. The dumpline was excavated and found to be corroded, creating a release.				
<b>Preventative Measures:</b>		The both the corroded oil dumpline and the water dumpline were removed and replaced. The new replacement dumplines were pressure tested to ensure line integrity. The pressure test results are included as Attachment B.

#### Area Depth Determined:

During pressure testing two dump line leaks were discovered at the Leyner 61N69W15NWSE location. Excavation and repair activities commenced and hydrocarbon impacts were discovered. Excavation activities were guided in the field by screening for volatile organic compound (VOC) concentrations using a photoionization detector (PID). Nine soil samples were collected from the sidewalls and base of the final extent of the excavation between 4 and 8 feet below ground surface (bgs). Soil samples were submitted to Summit Scientific Laboratory, in Golden, Colorado for analysis of benzene, toluene, ethylbenzene, total xylenes (BTEX), total petroleum hydrocarbons (TPH) - gasoline range organics (GRO) by United States Environmental Protection Agency (USEPA) Method 8260B, and TPH - diesel range organics (DRO) by USEPA Method 8015. Analytical results indicate that constituent concentrations in the soil samples collected from the final extent of the excavation area were below the applicable COGCC Table 910-1 soil standards. Groundwater was not encountered in the excavation. Soil analytical results are summarized in Table 1 and sample locations are illustrated on Figure 2. Laboratory analytical reports are included as Attachment A.

#### Geology Description:

#### Additional Spill Details:

#### Root Cause:

Pressure testing indicated a potential leak in the oil dumpline. The dumpline was excavated and found to be corroded, creating a release.

#### Preventative Measures:

The corroded line was removed and replaced. The new line was pressure tested to ensure line integrity. The pressure test results will be included in a separate submittal.

**Other Waste:**
**Spill Description:**

During a routine site visit the lease operator discovered water bubbling to the surface on the edge of the production facility pad. All the wells were immediately shut-in so that personnel could determine the source. The cause and the quantity of the release are still under investigation.

#### Hazardous Waste Handler Details

**Sequence No:** 11  
**Receive Date:** 20200730  
**Handler Name:** WALMART SUPERCENTER #1045  
**Federal Waste Generator Code:** 3  
**Generator Code Description:** Very Small Quantity Generator  
**Source Type:** Notification

#### Waste Code Details

**Hazardous Waste Code:** U210  
**Waste Code Description:** ETHENE, TETRACHLORO- (OR) TETRACHLOROETHYLENE

**Hazardous Waste Code:** U205  
**Waste Code Description:** SELENIUM SULFIDE (OR) SELENIUM SULFIDE SES2 (R,T)

**Hazardous Waste Code:** D006  
**Waste Code Description:** CADMIUM

**Hazardous Waste Code:** D018  
**Waste Code Description:** BENZENE

**Hazardous Waste Code:** D040  
**Waste Code Description:** TRICHLOROETHYLENE

**Hazardous Waste Code:** U034  
**Waste Code Description:** ACETALDEHYDE, TRICHLORO- (OR) CHLORAL

**Hazardous Waste Code:** U035  
**Waste Code Description:** BENZENE BUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

**Hazardous Waste Code:** U089  
**Waste Code Description:** DIETHYLSTILBESTEROL (OR) PHENOL, 4,4'-(1,2-DIETHYL-1,2-ETHENEDIYL)BIS, (E)-

**Hazardous Waste Code:** U132  
**Waste Code Description:** HEXACHLOROPHENE (OR) PHENOL, 2,2'-METHYLENEBIS[3,4,6-TRICHLORO-

**Hazardous Waste Code:** U165  
**Waste Code Description:** NAPHTHALENE

**Hazardous Waste Code:** U411

Description of Events:						

WHILE UNLOADING A TRAILER, ONE CARTON WAS FOUND CRUSHED BY HEAVY FREIGHT. THE SPILLAGE WAS NEUTRALIZED AND CLEANED UP. THE CRUSHED CARTON WAS RECOOPERED AND OVERPACKED INTO A NEW D.O.T. APPROVED DRUM WITH APPROPRIATE LABELS AND MARKINGS. THE SHIPPER WAS NOTIFIED OF THE INCIDENT. THE SALVAGE DRUM WAS FORWARDED TO YELLOW

FREIGHT RECOVERY SERVICE WHSE FOR PROPER DISPOSITION.

<b>Additional Comments:</b>						
<b>Comments:</b>	WELD COUNTY EH					
<b>Cause Info:</b>	A truck owned by Plains All American & Plains Marketing was overfilled by the operator on an Encana well pad. The 5.5 barrels of crude oil overflowed the truck and went onto the soil. Berms were created in the soil to contain the spill.					
<b>Action:</b>	Fremont Environmental Services is doing clean up.
