Detail 1:	From an old CDPHE list of locations where tank leaks were suspected and LUST Trust funds were used in an effort to identify the source. Often, the source was found nearby and was entered in the LUST database (now COSTIS).					
Detail 2:	This listing not entered into COSTIS back when CDPHE transferred responsibility for tank leaks to OPS. Few people at OPS know of this old CDPHE list, and any associated files are thought to have been disposed of or misplaced.

Comments:						
Cause Info:		Electric contractor bored throu the bottom of a 10 " sewer main with their casson.				
Action:		City jetted line, found plug at boring location, then everything drained down to normal flow - fenced off area and used camera to verify where the line was broken. Then yesterday the contractor excavated and repaired the pipe. They also did clean up and hauled away the contaminated material.
