

Q1 Previous to this survey, were you aware that Boulder County provides mosquito control in your area?

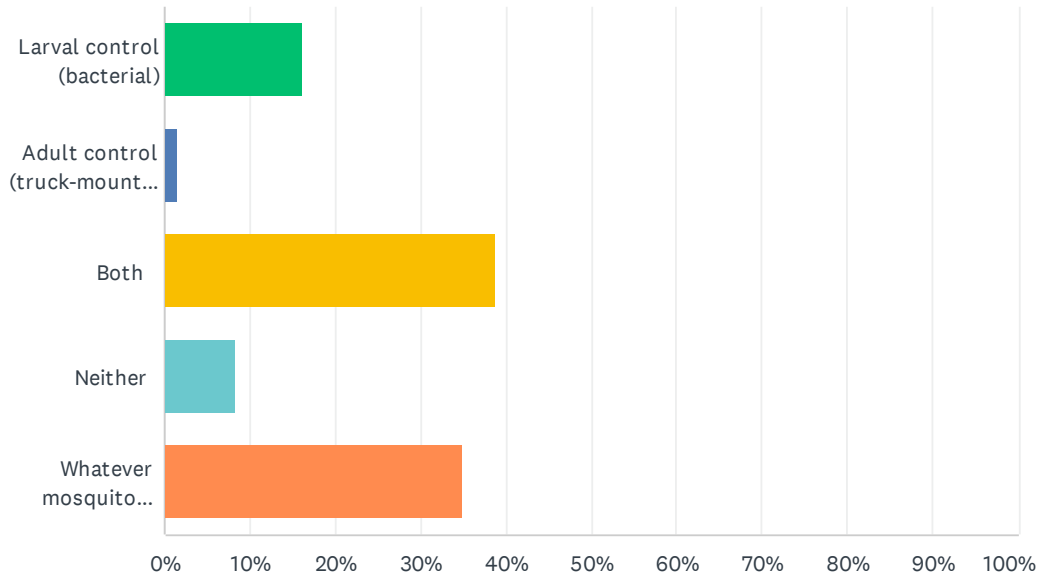

Answered: 831 Skipped: 1

ANSWER CHOICES	RESPONSES	
Yes	70.76%	588
No	22.38%	186
Not sure	6.86%	57
TOTAL		831

Q2 Of the methods described above, which would you prefer be used in your neighborhood?

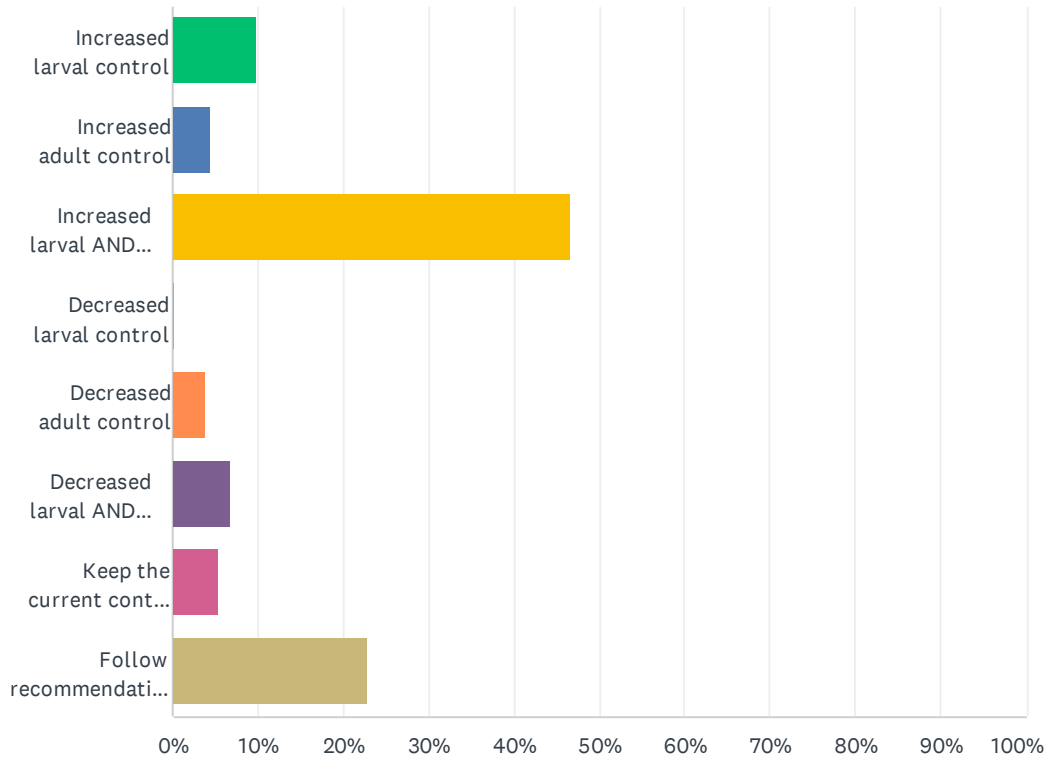

Answered: 828 Skipped: 4

ANSWER CHOICES	RESPONSES	
Larval control (bacterial)	16.30%	135
Adult control (truck-mounted spraying of pesticides)	1.45%	12
Both	38.89%	322
Neither	8.33%	69
Whatever mosquito control professionals recommend	35.02%	290
TOTAL		828

Q3 Based on your experience with mosquitoes in your neighborhood, what kind of mosquito control would you like in your area?

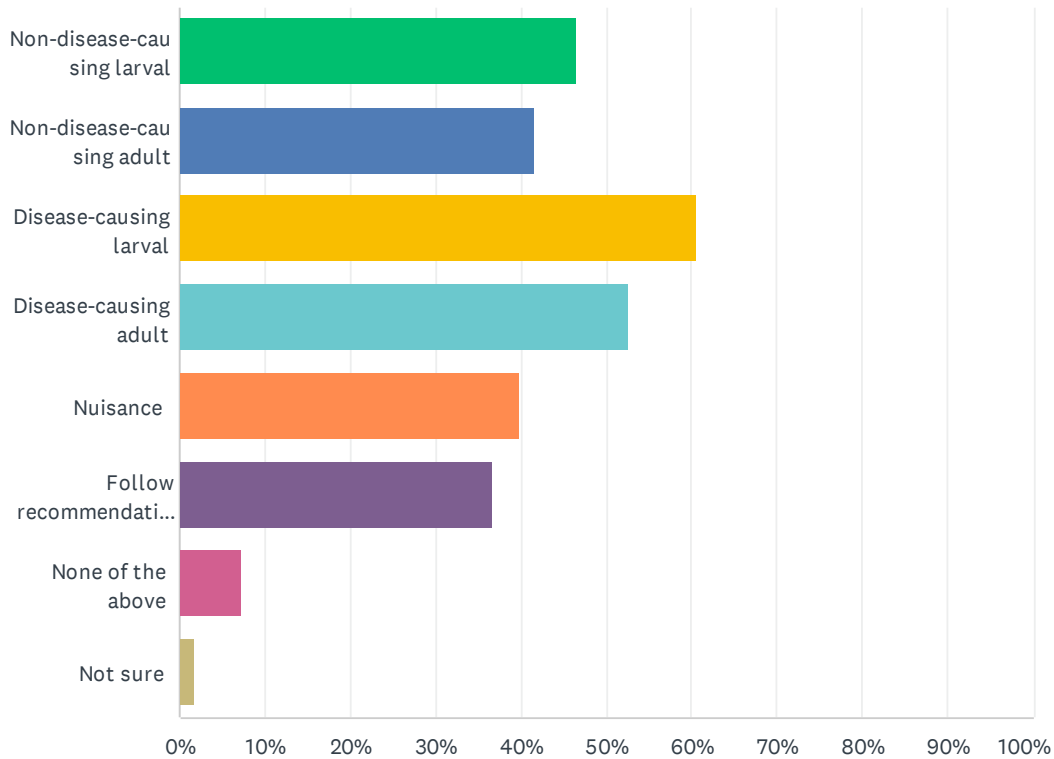

Answered: 814 Skipped: 18

ANSWER CHOICES	RESPONSES	
Increased larval control	9.83%	80
Increased adult control	4.42%	36
Increased larval AND adult control	46.68%	380
Decreased larval control	0.25%	2
Decreased adult control	3.93%	32
Decreased larval AND adult control	6.76%	55
Keep the current control levels	5.28%	43
Follow recommendations of mosquito control professionals	22.85%	186
TOTAL		814

Q4 Currently, services aim to control both disease causing and non-disease causing (nuisance) mosquitoes. What type of mosquito control would you like in your area? (Select all that apply)

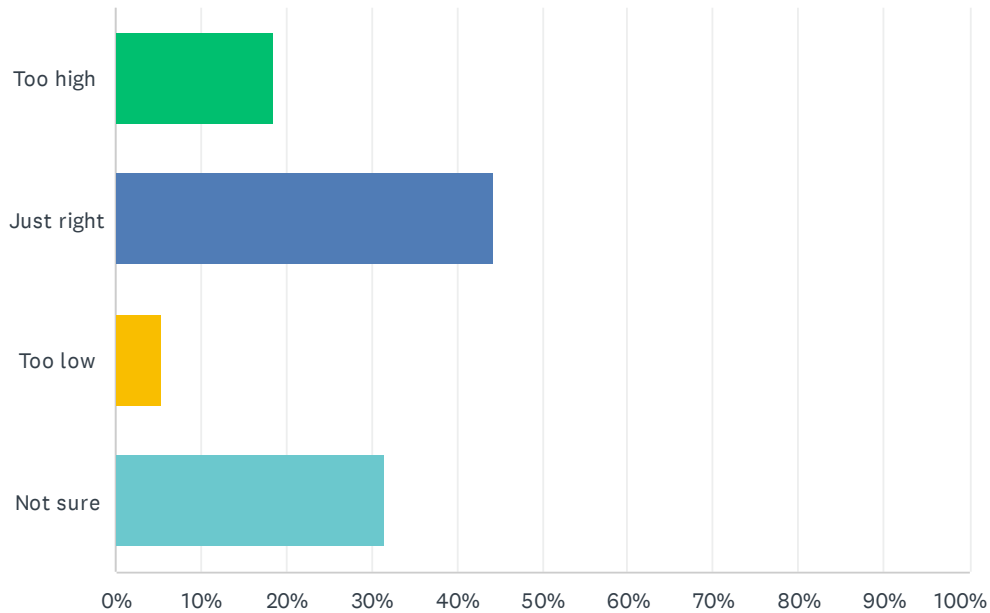

Answered: 827 Skipped: 5

ANSWER CHOICES	RESPONSES	
Non-disease-causing larval	46.55%	385
Non-disease-causing adult	41.60%	344
Disease-causing larval	60.58%	501
Disease-causing adult	52.72%	436
Nuisance	39.90%	330
Follow recommendations of mosquito control professionals	36.76%	304
None of the above	7.26%	60
Not sure	1.69%	14
Total Respondents: 827		

Q5 Boulder County property assessments for residential properties in the BCMCD currently include an annual fee of \$33 for mosquito control. Is this amount:

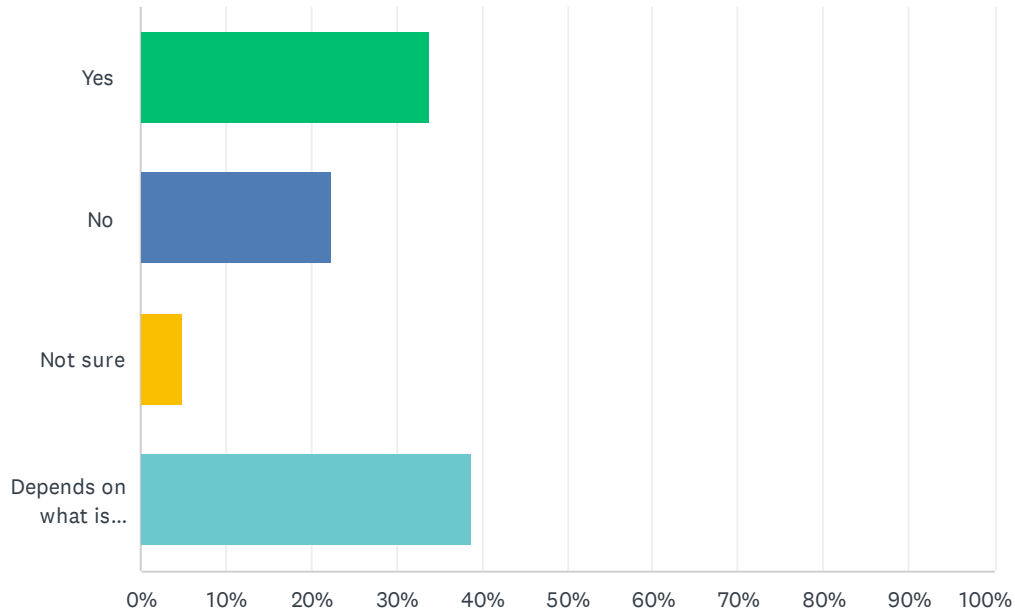

Answered: 816 Skipped: 16

ANSWER CHOICES	RESPONSES	
Too high	18.63%	152
Just right	44.36%	362
Too low	5.39%	44
Not sure	31.62%	258
TOTAL		816

Q6 If additional mosquito control services (larval or adult) were provided, would you support increasing the assessment amount?

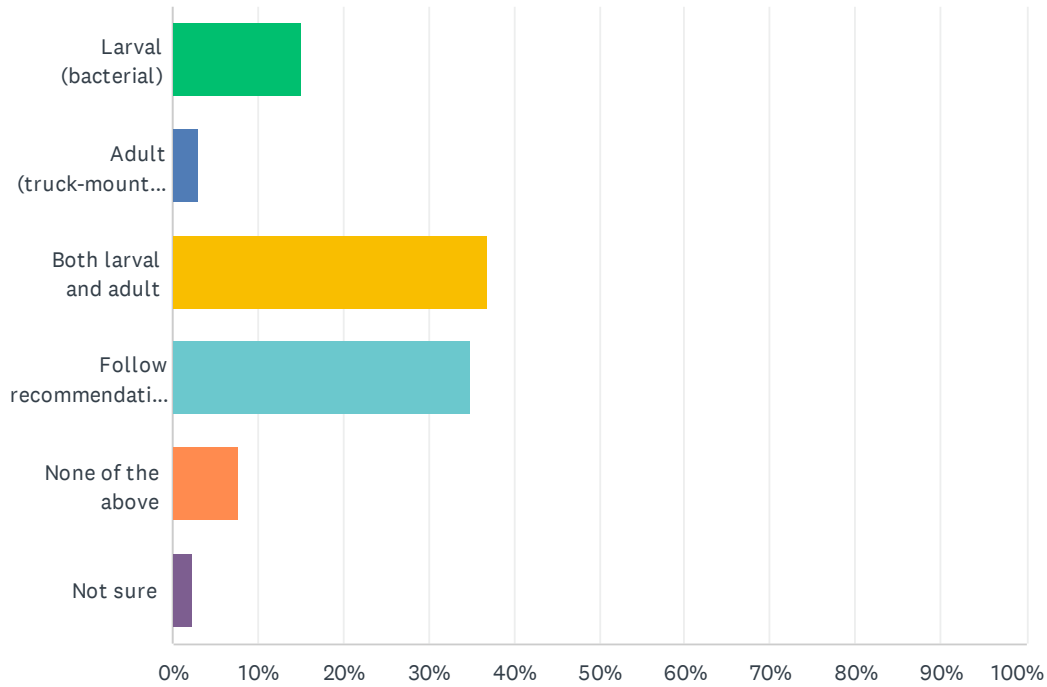

Answered: 824 Skipped: 8

ANSWER CHOICES	RESPONSES	
Yes	33.98%	280
No	22.33%	184
Not sure	4.85%	40
Depends on what is provided	38.83%	320
TOTAL		824

Q7 If additional mosquito control were provided, what method would you prefer?

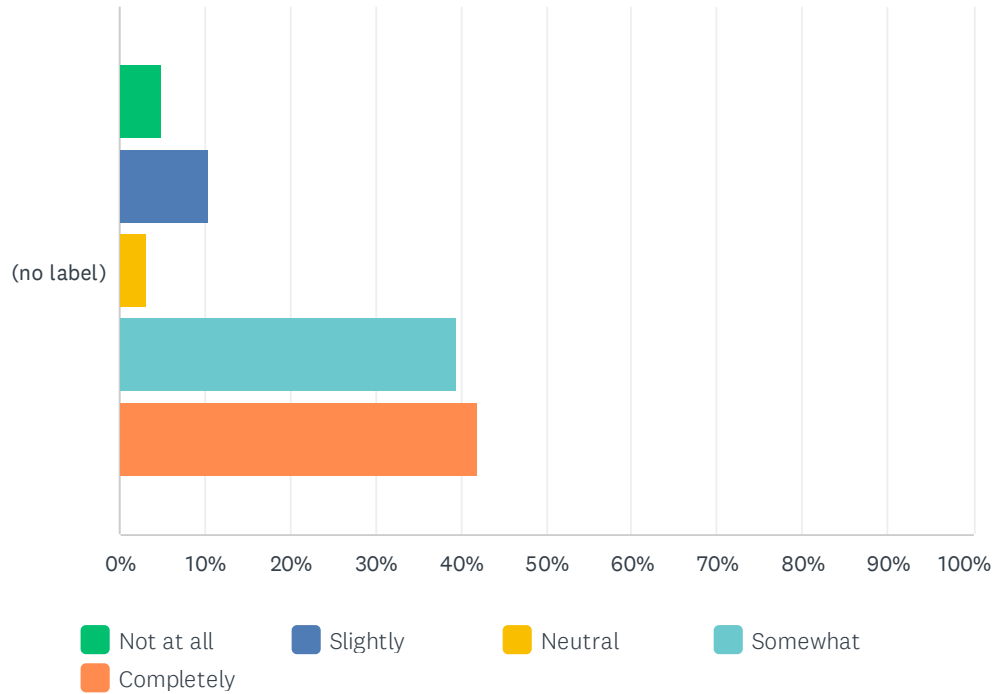

Answered: 827 Skipped: 5

ANSWER CHOICES	RESPONSES	
Larval (bacterial)	15.11%	125
Adult (truck-mounted spraying of pesticides)	3.02%	25
Both larval and adult	36.88%	305
Follow recommendations of mosquito control professionals	34.95%	289
None of the above	7.74%	64
Not sure	2.30%	19
TOTAL		827

Q8 How much do mosquitoes impact your ability to enjoy the outdoors in your neighborhood?

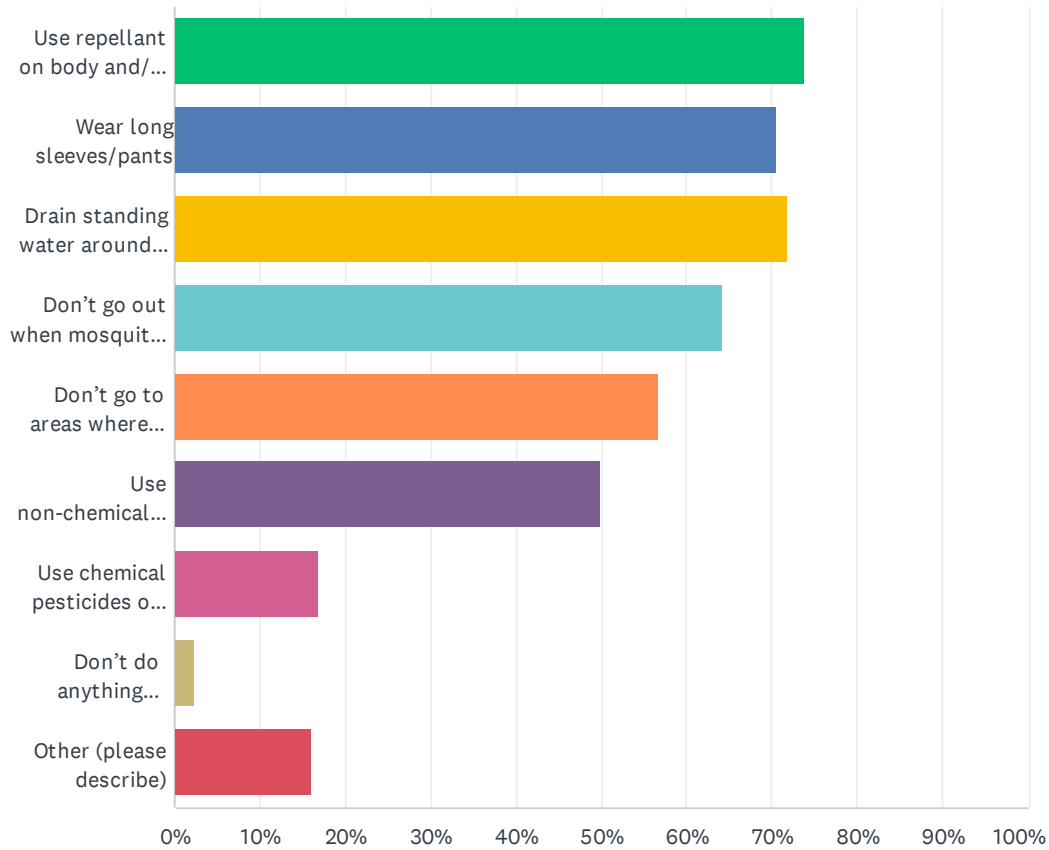

Answered: 827 Skipped: 5

	NOT AT ALL	SLIGHTLY	NEUTRAL	SOMEWHAT	COMPLETELY	TOTAL	WEIGHTED AVERAGE
(no label)	4.84%	10.40%	3.26%	39.54%	41.96%	827	4.03
	40	86	27	327	347		

Q9 How do you protect yourself from mosquitoes? (Select all that apply)

Answered: 828 Skipped: 4

ANSWER CHOICES	RESPONSES	
Use repellent on body and/or clothes	73.67%	610
Wear long sleeves/pants	70.53%	584
Drain standing water around the home	71.86%	595
Don't go out when mosquitoes are out	64.13%	531
Don't go to areas where there are a lot of mosquitoes	56.64%	469
Use non-chemical products like citronella, lemon grass, fans, etc. near the home/on property	49.88%	413
Use chemical pesticides on the property	16.91%	140
Don't do anything different	2.29%	19
Other (please describe)	16.06%	133
Total Respondents: 828		

#	OTHER (PLEASE DESCRIBE)	DATE
1	Cannot use chemical repellents due to allergies Easy enough to wear clothing or a head net	8/11/2023 7:28 AM

2023 Boulder County Mosquito Control District Survey

Accept night-time adult spraying		
2	We avoid going out when they are bad, but that has meant being unable to spend any time in our yard when the temps are no longer hot - so less grilling, fewer sunsets, less time with the animals in the yard. Also we have to walk the dog and often get bitten then even though it is not near dawn or dusk. They are very bad in our neighborhood! The VDCI website says our bneighborhood wasnt sprayd for the first time until the end of June and had a 2 week gap in July as well. They were very bad from mid-June on. I am not sure if this contributes, but many of the people who have access to creek water here water A LOT for very long times and create wet grass for many hours of the day - so increase mosquitos. The agricultural land across from us often ends up with standing water in low areas or depressions in dirt driveways, and there is a pond there too, so that may contribute as well.	8/10/2023 7:07 PM
3	We have hired a company, Mosquito Squad, to use a natural spray in our yard.	8/10/2023 8:40 AM
4	There are methods which are not harmful to people or the environment which the city could use. I would support the city/county spending the money on distributing natural, non-harmful mosquito control. See #10	8/9/2023 8:33 PM
5	One in the household uses natural repellent, the other doesn't use any. The latter mostly does... mosquito slappin'.	8/9/2023 2:02 PM
6	Planted 300 garlic bulbs that have multiplied to thousands in the ditch next to my house. I do not have mosquitoes.	8/9/2023 12:49 AM
7	Bug suit	8/8/2023 7:04 PM
8	I feed the birds. Birds eat bugs. Natural order of things.	8/8/2023 1:51 PM
9	I have four Dynatrap traps around my house. I also use a fan	8/8/2023 10:21 AM
10	Use bacillus thuringiensis in home garden ponds.	8/7/2023 8:16 AM
11	Bug/mosquito spraying of property	8/5/2023 4:59 PM
12	Subsequent to contracting West Nile Virus, we use commercial mitigation. WE ARE AWARE OF ONLY 2 (TWO) Sprays of mosquito control in our area this entire summer by Boulder County. WHERE ARE YOU? We have called numerous times! Extremely unhappy with Boukder County performance!! Please contact us if you have questions from us. Richard Myers 720-841-8609	8/4/2023 9:35 AM
13	Dynatrap traps to collect flying mosquitos. Netting over my umbrella to keep mosquitos from biting.	8/3/2023 11:03 AM
14	Drain standing water, so so should BOCO DOT clean out ditches. Juhls Drive, for instance!	8/2/2023 5:26 PM
15	Not sure the taxes I pay ever gets us sprayed here, or any kind of mosquito mitigation in unincorporated Boulder County	8/2/2023 3:30 PM
16	We've been using natural repellents / pet-safe treatment sprays and also hired Mosquito Joe to do the same.	8/2/2023 10:41 AM
17	Use Thermacell on a belt clip. Works great but costs a lot to use.	8/2/2023 10:25 AM
18	Please do not use pesticide for mosquito/larva control. The pesticide is known (research) to cause birth defects, poison bees, mosquitos, cats and dogs.	8/1/2023 7:56 PM
19	Burn natural repellent incense.	8/1/2023 1:14 PM
20	This is BOULDER! No chemicals needed. If you let nature be in balance the pests take care of themselves. Further, this sort of service if needed should be from INDEPENDENT small business. I do not this BOULDER COUNTY needed to be in the lawn mowing, mosquito spraying etc...businesses. This takes JOBS away from citizens!	7/31/2023 4:54 PM
21	They are in greater numbers this year (as I'm sure you are aware) AND HUGE!	7/31/2023 4:35 PM
22	We use mosquito dunks in our ponds, which as you know is bacterial larvae control.	7/31/2023 10:06 AM
23	We use Mosquito Squad and even then we have mosquitoes but not as many. I would love MORE control.	7/30/2023 10:57 AM
24	It does not appear to us that Boulder County provides ANY mosquito control. (Hence our conclusion that the current county charge is too much). We pay a private company for	7/29/2023 3:03 PM

2023 Boulder County Mosquito Control District Survey

mosquito control every two weeks, using a rosemary oil-peppermint oil-geraniol and surfactant. If we do not do that, we cannot be outside at our property without getting bitten by mosquitos.

25	We hire a company to spray our yard.	7/29/2023 2:57 PM
26	use pesticide spray like "Cutter" when having guests over outside, only 1-3 times per summer.	7/29/2023 10:10 AM
27	My wife finds that taking B1 prevents mosquitos from biting her. I'm not sure it works.	7/28/2023 9:07 PM
28	Have dynatraps front and back	7/28/2023 2:39 PM
29	Mosquito Squad treats the condo property where I live	7/28/2023 12:15 PM
30	Also use Mosquito Joe service. Used to be the botanical but switched to barrier spray. Even so, often need a "touch up" respray in between.	7/27/2023 3:52 PM
31	My wife died of a mosquito bite that gave her West Nile Virus. The major reason for this was Niwot High School putting in a huge holding pond for its athletic fields. So not only did Niwot High School causes my taxes to go up plus added an additional mosquito control fee that I never see being applied to the pond but they also killed my wife!	7/27/2023 3:13 PM
32	I rarely even spot a mosquito, telling me that the control methods are overkill. A few mosquitos are ok.	7/27/2023 1:46 PM
33	Installed a screened gazebo	7/27/2023 9:52 AM
34	We also make a DIY mouthwash spray mixture	7/26/2023 6:24 PM
35	We have had to hire The Mosquito Squad out of Fort Collins because Boulder hasn't sprayed for about 2 or more years. Yet we are charged for it on our tax statements. We are in the Gunbarrel area. The reason mosquitoes dont bother us much is because we have hired the company you see above,	7/26/2023 4:14 PM
36	I am a total attraction for mosquitoes, always have been. My husband and I can sit on patio and no matter what I do, what I use, I get bit up and he gets nothing! I have tried everything! I do understand they like some of us better than others, I am very special! We are thankful for all you do and this season seems a bit better. WE know how hard everyone works and no complaints from this house. Thank you and keep up the good work!	7/26/2023 2:34 PM
37	We have installed a fan on our deck to see if that will help.	7/26/2023 1:58 PM
38	We have installed a fan on our deck to see if that will help.	7/26/2023 1:58 PM
39	repellant lights	7/26/2023 1:38 PM
40	We put out a Dynatrap this year, which does capture mosquitos. I am still determining how effective it is.	7/26/2023 11:58 AM
41	bat houses	7/26/2023 9:24 AM
42	concentrated garlic in sprayer (idea is from Florida Disney resort)	7/26/2023 8:12 AM
43	I foster bat families	7/26/2023 8:08 AM
44	Basically I don't go outside at all once mosquitoes are outside. I almost died from dengue hemmorrhagic fever in Costa Rica in 2003, so I have to be very careful not to get another mosquito disease here.	7/25/2023 2:25 PM
45	encourage predator species in area: bats, dragonflies	7/25/2023 1:52 PM
46	We live in Northwest Acres (an unincorporated enclave) in Longmont. We haven't seen any mosquito control vehicles in our area this spring or summer. (They may have come by while we were away from home.)	7/25/2023 1:26 PM
47	about to install 2 bat houses since outdoors are not fun anymore. we can not enjoy our yard	7/25/2023 12:04 PM
48	Professional spraying with essential oils after some initial pesticide spraying.	7/25/2023 11:59 AM
49	Small diffuser for mosquito repellant when out on front porch.	7/25/2023 10:03 AM
50	2 mosquito magnets running full time.	7/25/2023 9:55 AM
51	We hired a company to spray	7/25/2023 9:22 AM

2023 Boulder County Mosquito Control District Survey

52	Bat box repellent incenses	7/24/2023 9:55 PM
53	thermacell	7/24/2023 6:43 PM
54	We use Sunday mosquito spray in our lawn but it's doing nothing that we can tell. We are getting eaten alive	7/24/2023 6:20 PM
55	don't go out early morning or dusk, when mosquitos are out. keep the grass mowed.	7/24/2023 5:12 PM
56	It's so bad at our house (we live on a lake and surrounded by Boulder Creek and open space) that we have had to hire our own Mosquito control company to spray every 3 weeks or we could never go outdoors. In the 18 years I've lived on 61st Street, I have seen the mosquito fogger truck go by twice...and one of those times they did NOT spray our side of the street.	7/24/2023 4:09 PM
57	hire Mosquito Authority to treat our property	7/24/2023 1:56 PM
58	Have Mosquito Joe spray our property every 3 weeks	7/24/2023 1:24 PM
59	They raised the price to \$33 from \$25. I call to report mosquito activity. Liz takes the call but I never see anyone treating mosquito larvae. They say they come out once a week or as needed. Have not seen a single person this season! I call back no one is available. Paying for mosquito control is not working we could spend the \$33 on products to spray and maybe have better results!	7/24/2023 11:58 AM
60	Pay Mosquito Squad to treat my yard for the season	7/24/2023 11:42 AM
61	BAC in puddles	7/24/2023 11:15 AM
62	lit mosquito punk.	7/24/2023 9:33 AM
63	Hope our two little bats return each summer.	7/24/2023 8:32 AM
64	Electric mosquito killer that only helps a little	7/23/2023 10:01 PM
65	I live in Lake Valley, about 4 miles north of Boulder and 1 mile east of route 36. I take my dog out all times of the day and am attacked at all times of the day. I came inside yesterday afternoon and had a black "spot" on my hand which turned out to be a female mosquito. When I mashed her, there was quite a bit of blood on my hand. She got my blood but i think I got her before she made me itch. We are inundated by them!	7/23/2023 5:06 PM
66	We treat all standing water with mosquito dunk. When you spray it merely knocks back the very local population and mosquitoes from the surrounding area move back in immediately. We do NOT want other chemical controls in the neighborhood -- we need our mosquito-eating predators (like dragonflies and swallows) and other natural controls. Chemical controls are harmful to these.	7/23/2023 4:25 PM
67	Use a thermacell in the backyard	7/23/2023 3:38 PM
68	110 acre farm surrounded by ditches and open space. they has not been any effective control this year at all. It has been a tough weather year so far, so you should be out in droves getting some type of control.	7/23/2023 3:23 PM
69	Pay for a company to spray my property. Boulder county has not been out to Pony Estates at all!	7/23/2023 1:53 PM
70	Bought a mosquito plug in Dynotrap from Costco to help with the control for outdoors	7/23/2023 1:01 PM
71	Can't enjoy our yard or the outdoors when there are a lot of mosquitos or if they haven't sprayed for awhile. It is so important that you keep spraying!	7/23/2023 12:12 PM
72	I built a screened in porch so that I could go outside in the summer. That is how bad the mosquitos are in my area.	7/23/2023 10:15 AM
73	Big problem in our area due to standing water on golf course and ditch in front plus standing water on speed dips. We cannot enjoy our patio to entertain and I get multiple swarms when I garden.	7/23/2023 10:03 AM
74	I simply swat them. I am very very well aware that they are worse early in the summer and not bad after the heat of the summer. If it were an issue for us to be outside during the times they are bad we would simply wear long pants, use localized/non-chemical repellents or build a screened in porch.	7/23/2023 8:42 AM

2023 Boulder County Mosquito Control District Survey

75	bacterial control in potential standing water with Mosquito Dunks	7/23/2023 7:27 AM
76	mosquitoes are actually very sparce. I garden, run, hike - all hours, and they are nothing more than an occasional issue. I wish that spraying for adults would stop.	7/22/2023 9:58 PM
77	I use a Dynatrap machine to try to keep them off my property	7/22/2023 9:16 PM
78	Falken Pest Control N2Care buckets and Tom's buckets.	7/22/2023 5:09 PM
79	Fogget	7/22/2023 3:28 PM
80	Mosquito Magnet devices	7/22/2023 3:18 PM
81	Electronic Bug Zapper	7/22/2023 1:59 PM
82	Bug zapper on property	7/22/2023 1:47 PM
83	I swat or vacuum any mosquitoes that get into the house.	7/22/2023 1:33 PM
84	We have 17.2 acres on the Boulder/Larimer county line in unincorporated Boulder county. Open space, 140 acres, surround us on the south and west. For many years now we've seen the Mosquito man and his truck many times. However, this year, we have not seen him once ... not once. Of all times to not show up, West Nile was found in mosquitos in Boulder and Larimer counties. As you pointed out, we pay \$33 for mosquito protection and have not received our monies worth this year. I'm NOT happy. We are out working on our property from May-November and can't stay inside just because there are mosquitos out. We do stay inside in the evenings.	7/22/2023 12:41 PM
85	have to hire outside vendor to rid property of mosquitoes . can be pricey but can better protect from west nile virus and other mosquito related diseases.	7/22/2023 12:31 PM
86	Pay Mosquito Squad to keep mosquitoes away from my house. They use a garlic oil spray of some sort.	7/22/2023 12:31 PM
87	N	7/22/2023 11:53 AM
88	Mosquitoes have never been a big problem here. Only time we want more mosquito control is when diseases such as WNV, Western Equine and other mosquito vectored diseases are detected as being prevalent.	7/22/2023 11:35 AM
89	cintrenella candles	7/22/2023 10:58 AM
90	Davey Tree sprays all our trees and scrubs with Cross Check Plus (279-3206-20404)	7/22/2023 9:55 AM
91	Mosquito dunks around property	7/22/2023 9:40 AM
92	Utilize Mosquito Squad to spray every 3 weeks during season	7/22/2023 9:00 AM
93	Haven't needed to do anything this year even though we've had so much moisture.	7/22/2023 8:59 AM
94	We pay for Mosquito Authority to spray every 3 weeks. Otherwise we have been unable to sit or work outside, especially early morning/evening. I have not seen the county do anything in our neighborhood. If they have, it would be nice to get a text/email/flier to let us know when they may spray so we can close windows.	7/22/2023 8:23 AM
95	Use private mosquitoes spraying company every 2-3 weeks. Us (and our neighbors) have had to have extra visits from the private company to deal with mosquitoes this year with so much rain	7/22/2023 8:14 AM
96	We have bats around our property.	7/22/2023 7:34 AM
97	One of your ditches runs along the front of our property. That ditch has been poorly maintained since the city of Boulder took over the maintenance. The growth of noxious weeds and olive trees and the like causes water to pool in places which leads to the proliferation of mosquitoes on our property. We do not have water rights or take water from this ditch. We are elderly and can't maintain it. It is also a fire hazard.	7/21/2023 9:25 PM
98	I wear a net over my head and a hooded jacket.	7/21/2023 7:51 PM
99	Please help us! We have been getting eaten alive outside! Now mosquitos are carring malaria, as well as other viruses!	7/21/2023 6:30 PM

2023 Boulder County Mosquito Control District Survey

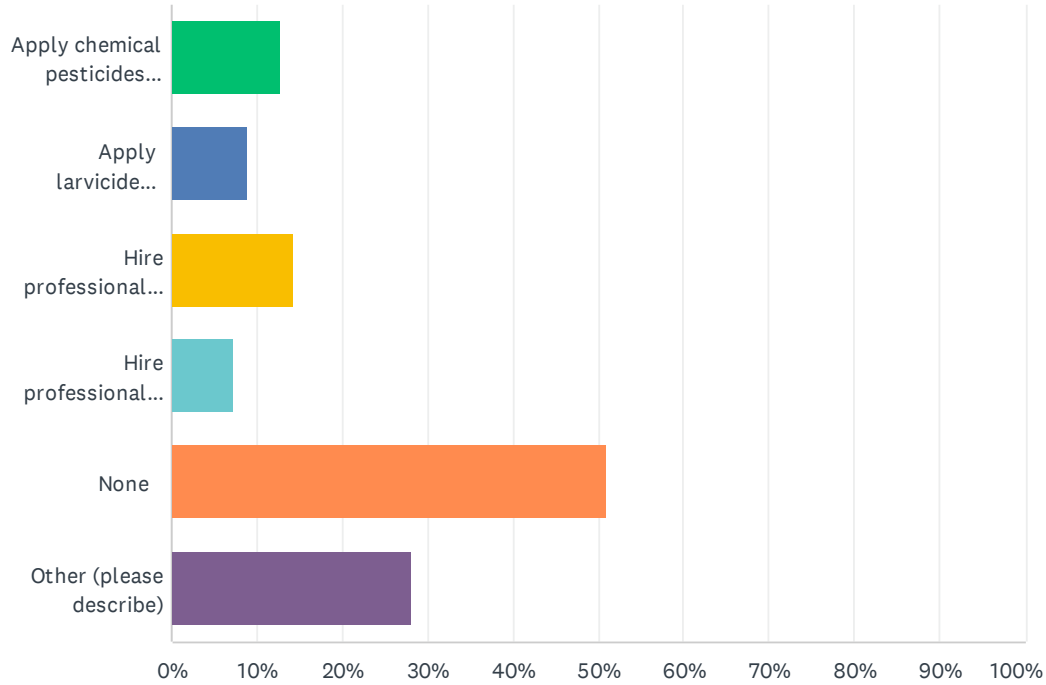

100	I did not know we pay for any mosquito control. They are so bad, that I am led to believe whatever we are doing on Owl Lane in Boulder County is not working. My guess is that the breeding ground are all the ponds at 95th and boulder creek. I would like a truck to spray the trees but not sure if that would help. I would not want to pay more since I am not getting any benefit from what is the current application as noted above. In other words, if I am paying for something and not noticing a benefit, then why would I want to pay more.	7/21/2023 5:14 PM
101	We currently use Mosquito Joe to control mosquitos at our home/business.	7/21/2023 4:44 PM
102	We have appreciated that mosquito activity has decreased thanks to mosquito control you provided.	7/21/2023 3:56 PM
103	These mosquitoes have bitten me ALL over, despite taking all the measures listed. I even tried eating more onions!	7/21/2023 3:41 PM
104	If I know I'll be outside for more than a few minutes where mosquitoes tend to congregate, I'll wear repellent; otherwise I rush my exposure to limit bites as much as possible.	7/21/2023 2:28 PM
105	Swat them as they bite the s**t out of me.	7/21/2023 2:25 PM
106	The Open Space has not been mowed in over a year so infestation is high.	7/21/2023 2:15 PM
107	cost of mosquito control has gone up from \$20 and every year that we call and a trap is placed, we get sprayed. Why do we have to call for a trap when we are near ditches and lakes	7/21/2023 12:58 PM
108	have the bt rings in a soak around my container plants	7/21/2023 12:35 PM
109	We are using bacterial control on our property. This year is so bad that we are also having to put lemongrass oil on our dogs prior to going outside. It is ridiculous to literally watch them fly in from the adjacent BoCo open space on 119th street	7/21/2023 11:47 AM
110	We keep our ditch cut back	7/21/2023 11:03 AM
111	Net around our umbrella over our patio table	7/21/2023 10:26 AM
112	We have tried almost all available products, including (in addition to those you mention) zappers, ultrasonic devices, and more) but none of them work.	7/21/2023 10:01 AM
113	I do go outside, but try to limit the dawn and dusk times as much as possible. I do need to be out in my garden and doing lawn work at those times when it's so hot during the day.	7/21/2023 9:35 AM
114	i pay additional \$80per month for spraying every 21 days	7/21/2023 9:26 AM
115	Recently bought two Thermocell units since the problem has been very bad this year	7/21/2023 7:58 AM
116	Swatting	7/21/2023 6:43 AM
117	Thermacell from Home Depot, releases repellent containing allethrin and proprietary chemical, not the best idea.	7/20/2023 9:07 PM
118	We used to use a fan on occasion.	7/20/2023 8:38 PM
119	I do all the recommendations and still find mosquitos to be a problem.	7/20/2023 7:35 PM
120	I am one of those type of bodies that mosquito's aren't attracted to.	7/20/2023 6:57 PM
121	Pay mosquito control service to spray my property every 3 weeks April - Oct. Supposedly they use human/pet safe products.	7/20/2023 6:49 PM
122	I signed up for a Mosquito company for my immediate backyard, However there is a marsh and irrigation ditches on conservation easement properties that surround my house. I need those treated and the best way appears to be the larval method. This spring was so wet that the mosquitos are out of control	7/20/2023 6:16 PM
123	I had West Nile and still have sequela . I get sick annually when the west Nile mosquitoes are back I almost never go outside in my yard any more	7/20/2023 5:25 PM
124	When we have to be on the deck/patio areas during peak mosquito activity hours, we use rechargeable Thermacell mosquito repeller .	7/20/2023 5:21 PM
125	I am held hostage in my home during mosquito season here. They even come in my house and bite me. Mosquito management used to be better than it is now.	7/20/2023 5:21 PM

2023 Boulder County Mosquito Control District Survey

126	Have not this year, but in past have successfully used UV light (at times including pheromone attractant) mosquito bug lights - some have worked better than others, attracting more or fewer non-mosquitos in addition to the eliminated mosquitos (as observed and measured in accumulated remains).	7/20/2023 5:05 PM
127	DO NOT Spray - totally ineffective! Waste of resources!	7/20/2023 4:52 PM
128	I take precautions...but NEVER condone what you are doing. When you spray to eliminate mosquitoes you also destroy many pollinators such as bees. It's a disgrace....I wonder what these chemicals are doing our health long term!!!!	7/20/2023 4:43 PM
129	Mosquito Joe	7/20/2023 3:34 PM
130	Most neighbors are paying pest control companies, and we still have a ton of adult, biting mosquitoes	7/20/2023 3:06 PM
131	we are trying mosquito dunks mosquitos are the most hated part of living in niwot	7/20/2023 3:04 PM
132	I have a service I pay to control the mosquitos	7/20/2023 2:32 PM
133	Reduce my attractiveness to mosquitoes by limiting sugar intake, eating whole foods, keeping blood sugar in a healthy range, etc.	7/20/2023 2:31 PM

Q10 What steps do you take to control mosquitoes on your property? (Select all that apply)

Answered: 813 Skipped: 19

ANSWER CHOICES	RESPONSES
Apply chemical pesticides myself	12.79% 104
Apply larvicide myself	8.86% 72
Hire professionals to apply pesticides	14.39% 117
Hire professionals to apply larvicide	7.26% 59
None	51.05% 415
Other (please describe)	28.17% 229
Total Respondents: 813	

#	OTHER (PLEASE DESCRIBE)	DATE
1	bug zapper	8/25/2023 12:01 AM
2	Remove standing water sources.	8/24/2023 2:54 PM
3	Drain standing water	8/15/2023 11:40 AM
4	Eliminate water collectors like pot saucers, reduce frequency of watering schedule, plant mosquito repellent plants near sitting areas, use mosquito traps and repellents	8/14/2023 5:40 PM
5	Use mosquito traps around the property.	8/10/2023 9:54 PM
6	No standing water, no dense vegetation, mowing. We worry about the pets lying on the grass if	8/10/2023 7:07 PM

2023 Boulder County Mosquito Control District Survey

	we spray pesticides.	
7	apply bug spray before going outside. Use citronella and lemongrass.	8/10/2023 1:59 PM
8	Make sure there is no standing water + use natural products that don't have chemicals or pesticides	8/10/2023 11:15 AM
9	See #9. I'm not sure which mosquito stage it targets, but the company we use applies essential oils.	8/10/2023 8:40 AM
10	We use the Spartan Mosquito Eradicators. They are extremely effective and don't harm pollinators, bats, birds, people, or vegetation. The mosquitoes die, and anything eating those mosquitoes will not be harmed. The County could easily and affordably distribute such containers---they only contain yeast, sugar, and salt. Residents can fill with water and set out at their property lines. Easy, affordable, effective, and safe.	8/9/2023 8:33 PM
11	Avoid having standing water on the property; put in plants that attract mosquitoes' natural predators.	8/9/2023 8:00 PM
12	Allow wasps to make their homes around our home without spraying them with insecticide. Encourage bats to "hang" out, even though they are not the mosquito eaters they have been rumored to be. Mosquito slappin'.	8/9/2023 2:02 PM
13	catnip plants in flower garden	8/9/2023 10:53 AM
14	We dont have stagnant water - but tall weeds seem to harbor mosquitoes and we try to remove them to reduce mosquitoes.	8/9/2023 7:21 AM
15	Garlic planted in ditch	8/9/2023 12:49 AM
16	Remove any areas of standing water to reduce breeding	8/8/2023 9:25 PM
17	Birds eat mosquitoes. By poisoning bugs, we poison the birds. This is an ecological disaster. Stop using pesticides completely. Aren't we trying to be green? Save the money for something that doesn't harm our environment.	8/8/2023 1:51 PM
18	I keep bees and so I cannot spray pesticides on my property. I am trying to create an environment to encourage residence of bats and other predators to mosquitoes	8/8/2023 1:40 PM
19	Redubdant question. see above	8/8/2023 10:21 AM
20	Mow tall grass Use dunks in standing water	8/8/2023 6:06 AM
21	I have a townhome with very little property and no need to control mosquitoes.	8/8/2023 3:14 AM
22	Eliminate standing water	8/7/2023 10:22 PM
23	Avoid allowing standing water	8/7/2023 9:51 PM
24	remove standing water	8/7/2023 9:12 PM
25	We make sure to drain any standing water, so that mosquitos cannot breed on our property.	8/7/2023 8:14 PM
26	- Mow tall grasses and minimize standing water and wet areas - Encourage natural predator habitats	8/7/2023 6:03 PM
27	Mosquito magnet machine close to house	8/7/2023 10:05 AM
28	Use bacillus thuringiensis in home garden ponds.	8/7/2023 8:16 AM
29	Allow no standing water.	8/6/2023 7:42 AM
30	Don't allow standing water around home and I grow plants organically that repel nuisance insects.	8/5/2023 11:50 AM
31	We eliminate standing water on our property but the proximity of pools of water in drainage / golf course areas cause serious mosquito issues. Without pesticide use (we have an electronic trap) we can't go outside during evening hours. The effectiveness of mosquito repellent is limited.	8/5/2023 10:06 AM
32	Thermacell repellent	8/4/2023 12:22 PM
33	Allow NO standing water.	8/4/2023 9:35 AM

2023 Boulder County Mosquito Control District Survey

34	drain standing water around the home	8/3/2023 5:02 PM
35	I use Mosquito Authority to spray	8/3/2023 2:37 PM
36	I use Mosquito Authority to spray	8/3/2023 2:37 PM
37	Make sure there's no standing water they can use to breed.	8/3/2023 11:10 AM
38	Chemicals are not very effective. The most effective treatment is to identify breeding pools and treat weekly with larvicide. Cutting the weeds on Boulder County property denies shade and moisture refuge for mosquitos. Weed control is very poor. No regular maintenance is provided.	8/3/2023 11:03 AM
39	Make sure we have no areas of standing stagnant water.	8/3/2023 10:06 AM
40	Drain standing water, so so should BOCO DOT clean out ditches. Juhls Drive, for instance!	8/2/2023 5:26 PM
41	Professional company (Mosquito Joe) sprays monthly, not exactly sure what they use	8/2/2023 11:41 AM
42	Using Mosquito Joe / natural pet-safe repellents.	8/2/2023 10:41 AM
43	Not enough mosquitoes for this to be an issue	8/2/2023 9:08 AM
44	I do no control for mozzies since the current spraying is effective.	8/2/2023 7:55 AM
45	I hesitate to use chemical pesticides. And my neighbors use larvicide. But this summer and last it has been difficult to even be outside, so I am really trying to figure out what to do.	8/1/2023 8:13 PM
46	Drain standing water around the house. Use DEET free, non-pesticide mosquito repellent, citronella, lemon grass.	8/1/2023 7:56 PM
47	I find the county spraying inadequate. I pay extra to Mosquito Squad. It is now tolerable. I only received two bites this week, in doors.	8/1/2023 6:21 PM
48	Use Proof Pest Control to spray a peppermint-based product. Put up bat houses.	8/1/2023 2:04 PM
49	Drain standing water.	8/1/2023 1:14 PM
50	I am considering hiring professionals	8/1/2023 9:31 AM
51	Everything I checked in question #9, including ensuring that there is no standing water on the property. My neighbors across the street don't mow, and I think that's contributing to the problem. I have no grass on my property.	7/31/2023 6:47 PM
52	Tried calling professionals and they did not return my call.	7/31/2023 6:44 PM
53	Natural repellents	7/31/2023 6:18 PM
54	I encourage nature to work by keeping my land healthy.	7/31/2023 4:54 PM
55	Rely on public control services	7/31/2023 1:58 PM
56	bug zapper	7/31/2023 11:36 AM
57	Apply non-pesticide cedaricide spray	7/31/2023 10:58 AM
58	encourage natural predators	7/31/2023 10:34 AM
59	Eliminate breeding areas.	7/31/2023 10:07 AM
60	Avoid standing water; Mosquito dunks in ponds; other process working with nature intelligence (www.perelandra-ltd.org)	7/31/2023 10:06 AM
61	My property has many bats at night however this is not sufficient enough.	7/31/2023 9:04 AM
62	Prevent standing water on property	7/31/2023 8:00 AM
63	Empty standing water	7/30/2023 9:28 PM
64	I call you guys and HOPE you come out when my adjoining neighbor has standing water for 30 days afterirrigating.	7/30/2023 6:22 PM
65	Chemical pesticides with sticky traps	7/30/2023 9:06 AM

2023 Boulder County Mosquito Control District Survey

66	The mosquitoes seem to be coming from ponds on our neighbor's property, so treating our property isn't really helpful. We have bees and so prefer no chemical pesticides to be used.	7/30/2023 7:38 AM
67	"pesticide" is a rosemary oil-peppermint oil- geraniol with a surfactant. It does not kill all of the mosquitos but does a decent job	7/29/2023 3:03 PM
68	I use mosquito traps in my yard (blue light with fan).	7/29/2023 11:53 AM
69	Add oil to horse water troughs. Add soap to buckets of water	7/28/2023 8:21 PM
70	Natural methods: plants, fans, etc.	7/28/2023 5:18 PM
71	Havs dynaptraps	7/28/2023 2:39 PM
72	Mosquito Squad treats the condo property where I live	7/28/2023 12:15 PM
73	I have tried pesticide but the neighbors have lots of standing water	7/28/2023 11:36 AM
74	Drain water	7/27/2023 2:12 PM
75	Drain standing water after storms	7/27/2023 2:04 PM
76	See answer to #9	7/27/2023 1:46 PM
77	Attempted larval control (dunks) used in multiple "buckets of doom" around my property.	7/27/2023 9:52 AM
78	Use procedures marked in Question 9 above	7/27/2023 9:49 AM
79	mosquito control must be enacted on the whole area by treating the breeding areas	7/27/2023 8:29 AM
80	We use dissolving tabs in our pond	7/27/2023 7:35 AM
81	.	7/26/2023 4:24 PM
82	In years past the county has provided mosquito assessment and control (larval) for our conservation easement area (residence is surrounded by easement), and we usually meet the person doing the monitoring/application. But this year no one showed up, so is the program still in effect?	7/26/2023 3:09 PM
83	Put mosquito tablets in bird baths and in rainwater storage barrels.	7/26/2023 2:53 PM
84	We have a DynaTrap in the yard.	7/26/2023 2:40 PM
85	No standing water if possible but we do have a dog who needs water.	7/26/2023 2:34 PM
86	We will contact a professional if it continues to be so bad.	7/26/2023 1:58 PM
87	We will contact a professional if it continues to be so bad.	7/26/2023 1:58 PM
88	try to eliminate standing water; our neighbors do not.	7/26/2023 1:38 PM
89	I plant citronella, lemon grass and lavender, and utilize non-chemically based candles / torches / etc.	7/26/2023 11:59 AM
90	Built bat houses to put up. Could the county consider going that near creeks and canals?	7/26/2023 11:25 AM
91	encouraging our neighbors to mount a bat house on their property (our ranch style does not fit the criteria)	7/26/2023 9:24 AM
92	Apply non-chemical products	7/26/2023 8:59 AM
93	Let my bats exist and flourish	7/26/2023 8:08 AM
94	Control standing water	7/26/2023 6:55 AM
95	Thermecell	7/25/2023 10:36 PM
96	Drain standing water	7/25/2023 6:16 PM
97	I use a zapper powered by electricity and has a pellet and blue light that attracts the mosquitoes.	7/25/2023 3:19 PM
98	We have been using Mosquito Joe for several years. They do an application every 3 weeks. However, I'm skeptical that it is very effective unless all the homes on our street participate	7/25/2023 1:23 PM

2023 Boulder County Mosquito Control District Survey

(which of course they do not). Currently there are few times during the day when we can enjoy our outdoor deck. They are out in the middle of the day - not just dawn or dusk. It is not too bad when they are just an itchy nuisance but the threat of West Nile requires more preventative measures.

99	We use fans on our decks. We use herbal repellents such as Badger Balm repellent when we go out into yard. If we need something stronger, we'll use OFF, but only when needed. We've also had good luck spraying Dr. Earth brand products, made of essential oils, on our plants when they appear to be damaged by insects. When we do this, we notice a decrease in mosquito activity as well.	7/25/2023 12:35 PM
100	use ceiling fan, a zipper, and table unit that releases an odor that repels mosquitoes	7/25/2023 12:07 PM
101	I spend over \$300 a month during the summer season having a professional company spray for me. Otherwise I would be eaten alive. I have strong reactions to mosquitos and each bite swells up for about 2 weeks causing uncontrollable itching. I am very much concerned about West Nile.	7/25/2023 11:59 AM
102	Drain standing water	7/25/2023 11:29 AM
103	This year I've given up on going outside on my property. Next year I plan to hire professionals to treat my property in addition to the County treatments. Something I haven't felt was necessary in many years.	7/25/2023 10:10 AM
104	Very small area diffuser.	7/25/2023 10:03 AM
105	Chickens	7/25/2023 9:55 AM
106	I dump standing water, mow the lawn, trim weeds, and kill every mosquito I come in contact with.	7/25/2023 9:06 AM
107	Drain standing water or accumulated water whenever we see it	7/25/2023 8:45 AM
108	Bat box in incensee	7/24/2023 9:55 PM
109	Dyna trap	7/24/2023 9:20 PM
110	I hire professionals when I am having an outside event at my house	7/24/2023 7:44 PM
111	Drain any containers that could collect water.	7/24/2023 6:59 PM
112	Thermacell repellent system	7/24/2023 6:43 PM
113	keep the grass mowed.	7/24/2023 5:12 PM
114	drain standing water	7/24/2023 4:35 PM
115	Eliminate standing pools of water Kill mosquitoes landing on my body	7/24/2023 4:25 PM
116	Kill them when I can.	7/24/2023 3:56 PM
117	Bars and swallows	7/24/2023 3:52 PM
118	Cutters spray for yard	7/24/2023 1:58 PM
119	We used to have a young man spray for mosquitoes once a month, but he is no longer in business.	7/24/2023 1:58 PM
120	hire Mosquito Authority to treat our property	7/24/2023 1:56 PM
121	Drain standing water around the property.	7/24/2023 1:24 PM
122	manage standing water	7/24/2023 12:49 PM
123	Deal with pests by wearing long sleeves and limit time outdoors during peak periods of activity.	7/24/2023 11:58 AM
124	use Seven bug granules in the yard twice a summer	7/24/2023 11:42 AM
125	Call the county to treat pasture with Larvicide	7/24/2023 11:15 AM
126	Natural products, control grasses and standing water	7/24/2023 10:49 AM
127	I would like to apply product to my property if I knew what was recommended and how to	7/24/2023 10:43 AM

2023 Boulder County Mosquito Control District Survey

	safely apply it.	
128	Minimal lawn irrigation	7/24/2023 10:42 AM
129	Make sure no water accumulates on my property	7/24/2023 10:27 AM
130	not sure	7/24/2023 9:31 AM
131	We are starting to look into hiring a service to regularly spray for mosquito's but don't know how effective that is and are still researching the problem. We also have honey bee hives nearby and we have to be "Bee Safe" in anything that we spray on the property.	7/24/2023 8:37 AM
132	Drain standing water, if any. I have not used pesticides of any kind in my yard for 20 years and I have no problem with mosquitos.	7/24/2023 7:20 AM
133	Electric mosquito killer that only helps a little	7/23/2023 10:01 PM
134	Empty water containers, have plants that deter mosquitos	7/23/2023 8:36 PM
135	-	7/23/2023 8:11 PM
136	If you are making decisions about spraying using mosquito traps, your tests are inaccurate. I have a son who worked for the CDC when West Nile came out and was assigned to test DNA of mosquitoes locally, in Fort Collins, and a number of areas in Florida, and islands nearby. When "you" found no reason to spray, he found plenty of West Nile mosquitoes. We have a lake and this year RAIN. We need more help please	7/23/2023 5:06 PM
137	We raise honeybees and invite native insects into our space as well.	7/23/2023 4:25 PM
138	Boulder County charges me this fee every year. Every year I write them to ask why they have not serviced this area, which Myself and all of our neighbors agree, has not happened in years. If you are to charge me, please come do your job. Address 12995 N 66th Street, 80503	7/23/2023 2:49 PM
139	Bought a mosquito plug in Dynotrap from Costco to help with the control for outdoors	7/23/2023 1:01 PM
140	Use bug killer on the lawn.	7/23/2023 12:12 PM
141	Garlic spray	7/23/2023 12:10 PM
142	Aside from draining standing water, we grow naturally repellent plant like lemon balm and catnip.	7/23/2023 10:44 AM
143	Please kill them all	7/23/2023 10:19 AM
144	As written above, I built a screened in porch. Otherwise sitting outside would be impossible.	7/23/2023 10:15 AM
145	I rely on county since I pay \$33 per year which has doubled in plast ten years and I do not feel this is worth it.	7/23/2023 10:03 AM
146	Ensure no standing water	7/23/2023 9:34 AM
147	I actually value the presence of mosquitos because they attract dragonflies and bats, which we love and want to protect. We have seen these, though more in years past than this year. By the way, you have been tricky for #3 above, My answer is "No abatement program. Zero"	7/23/2023 8:42 AM
148	They are not a problem.	7/22/2023 9:58 PM
149	I use a Dynatrap machine to try to keep them off my property	7/22/2023 9:16 PM
150	Grow citronella; put up a bat house	7/22/2023 8:40 PM
151	Electric control	7/22/2023 7:32 PM
152	None	7/22/2023 7:02 PM
153	Falken Pest Control N2Care buckets and Tom's buckets.	7/22/2023 5:09 PM
154	Drain standing water. Eliminate potential places that may hold standing water. Keep all window and door screens in excellent condition. Use bug lights at entryways.	7/22/2023 3:55 PM
155	Fogger	7/22/2023 3:28 PM
156	Mosquito Magnet devices	7/22/2023 3:18 PM

2023 Boulder County Mosquito Control District Survey

157	spray foggers offer short term results, but if your neighbors do nothing, its all very temporary.	7/22/2023 1:59 PM
158	We breathe in the poison you spray in our neighborhood without our consent. Our health suffers as a result. I consider your spraying poison CRIMINAL ACTIVITY. Please stop spraying poison into our environment!	7/22/2023 1:59 PM
159	Have had to engage Mosquito Joe since our outside is 100% not usable	7/22/2023 1:58 PM
160	Apply non - chemical pesticides d/t children & pets	7/22/2023 1:36 PM
161	blue-light mosquito trap inside the house, door/window screens	7/22/2023 1:33 PM
162	The Boulder County Mosquito man did a great job. We did not have mosquitos up here when he did his thing. We live on N. County Line Rd (Boulder Cty) and the other side of the street is W CR 2 (Larimer Cty).	7/22/2023 12:41 PM
163	I dont know if what Mosquito Squad uses is a pesticide. Ive been told it is organic using garlic oil. It is VERY effective.	7/22/2023 12:31 PM
164	We use mosquito kits that hang from trees	7/22/2023 11:51 AM
165	HOA in a condo, so I don't have the authority to do many of these.	7/22/2023 11:22 AM
166	I am relying on the mosquito spraying company you have contracted and have been very pleased with the job that Vector is doing so far	7/22/2023 11:18 AM
167	The whole area has a problem, doing anything on our property seems useless.	7/22/2023 11:15 AM
168	See above notes	7/22/2023 9:55 AM
169	I spray the yard with peppermint oil right before we plan to have an outdoor party.	7/22/2023 9:39 AM
170	I drain standing water and encourage natural mosquito predators	7/22/2023 9:32 AM
171	I believe Mosquito Squad uses nontoxic product	7/22/2023 9:00 AM
172	Plant mosquito repelling plants.	7/22/2023 8:47 AM
173	Mosquito magnet and zappers	7/22/2023 7:35 AM
174	No standing water on property. We think the county should not be spraying.	7/22/2023 7:34 AM
175	Get rid of standing water areas. We live on Left Hand Creek so it is hard to find all standing water along the shorelines.	7/21/2023 7:31 PM
176	See last questions answers	7/21/2023 6:30 PM
177	Uv light trap.	7/21/2023 6:24 PM
178	We can't to outdoors without being attack by mosquitos. We hired a professional firm to treat our property last week. We noticed some improvement, but the mosquitos quickly moved in from surrounding properties.	7/21/2023 5:35 PM
179	I ensure that there is no standing water anywhere on my property	7/21/2023 5:14 PM
180	I have used professionals to spray in the past, but the cost is very high.	7/21/2023 5:09 PM
181	natural repellents: Cedar oil spray, Mosquito TNT traps (just started and only help a little. Terrible mosquito problem this year.	7/21/2023 4:16 PM
182	put mosquito dunks in standing water	7/21/2023 3:56 PM
183	Remove standing water.	7/21/2023 3:44 PM
184	Diametaceous earth Murphys insect sticks Dynatraps outside/inside Larva pouches Essential oils Candles	7/21/2023 3:41 PM
185	Empty standing water	7/21/2023 3:14 PM
186	Remove habitat (bushes, trees, shrubbery, long grass) that provides mosquitoes breeding place.	7/21/2023 2:35 PM
187	eliminate standing water	7/21/2023 2:33 PM

2023 Boulder County Mosquito Control District Survey

188	Empty standing water	7/21/2023 2:28 PM
189	Make sure there are no standing pools of water on the property.	7/21/2023 2:28 PM
190	Use mosquito repelling devices (Thermacell etc)	7/21/2023 2:10 PM
191	Use mosquito dunks.	7/21/2023 2:06 PM
192	Watch for standing water.	7/21/2023 1:09 PM
193	drain water, keep weeds and grass cut	7/21/2023 12:58 PM
194	Empty standing water	7/21/2023 11:17 AM
195	We try to keep the plants cut back	7/21/2023 11:03 AM
196	We have tried various mosquito control devices in the past but have not found them to be effective.	7/21/2023 10:08 AM
197	We have occasionally tried to spray near the house but I'm not convinced it was successful. It's annoying and stinky to have to keep applying repellants when we venture outside.	7/21/2023 10:01 AM
198	I put up bat houses and make sure there is never standing water anywhere.	7/21/2023 9:54 AM
199	Battery dispenser (Country Vet) -- Pyrethrins, Piperonyl Butoxide	7/21/2023 9:47 AM
200	Besides fogging the yard, When we do have company and sit outside, we run fans to try to help with mosquitoes	7/21/2023 9:35 AM
201	eliminated standing water. irrigate no more than necessary.	7/21/2023 8:41 AM
202	Remove standing water	7/21/2023 8:25 AM
203	zappers and repellants	7/21/2023 7:18 AM
204	Drain standing water where we can	7/21/2023 6:43 AM
205	Remove standing water.	7/20/2023 8:38 PM
206	Apply Mosquito Beater and use a "bug zapper" when it gets really bad. Neither helps much.	7/20/2023 8:18 PM
207	As far as I can tell from the maps provided we receive absolutely mosquito control. I have seen in previous years them collecting sample water from the ditches around here but on non of the published maps showing where spraying is to occur have I seen our area listed. It is maddening that unless there is wind you cannot be outside at any time during the day without being bitten.If we are paying \$33 for mosquito control then come spray our area. We are surrounded by irrigation ditches plus have a Longmont Homeowners Association one house away that has had a broken sprinkler pipe, I kid you not for at least three weeks, that is causing large non draining areas of water to collect. We are near the Longmont extended area and seem to be forgotten when it comes to spraying.	7/20/2023 6:59 PM
208	it is organic, peppermint oil and geranium oils	7/20/2023 6:16 PM
209	I'm concerned about other good insects/animals that I might be affecting/killing (dragonflies, toads, frogs, small fish, turtles, etc)	7/20/2023 6:13 PM
210	natural traps and deterrents	7/20/2023 5:56 PM
211	Just use bug spray.	7/20/2023 5:14 PM
212	I just use citronella torches and mosquito repellent.	7/20/2023 5:06 PM
213	Have not this year, but in past have successfully used UV light (at times including pheromone attractant) mosquito bug lights - some have worked betterthan others, attracting more or fewer non-mosquitos in addition to the eliminated mosquitos (as observed and masured in accumulated remains).	7/20/2023 5:05 PM
214	I do what ever I can WITHOUT using harmful chemicals	7/20/2023 4:43 PM
215	drain standing water around my home	7/20/2023 4:38 PM
216	bug zapper	7/20/2023 4:20 PM

2023 Boulder County Mosquito Control District Survey

217	keep standing water out of gutters ...	7/20/2023 3:53 PM
218	In the past we had pesticide sprays applied by a private company but the sprays were harmful to other insect populations, including bees, although the company claimed otherwise. We do not want chemical pesticides used unless they are environmentally and ecologically friendly. We have never had any Boulder County Mosquito Control performed in our neighborhood, whether pesticide or larval, and so we wonder what we have been paying for, if (as you claim above) we are assessed in our property tax an annual fee of \$33 for this service.	7/20/2023 3:33 PM
219	Remove standing water.	7/20/2023 3:32 PM
220	am currently trying mosquito dunks still can't go out at peak times	7/20/2023 3:21 PM
221	same as question 9	7/20/2023 3:06 PM
222	Citronella candles, and wear mosquito dots on clothing	7/20/2023 3:06 PM
223	Buckets of doom around our property (moquito dunk in standing water)	7/20/2023 2:41 PM
224	Non chemical products, repellent plants, and bats! Bats eat mosquitoes!	7/20/2023 2:31 PM
225	i drain standing water	7/20/2023 2:06 PM
226	Drain standing water	7/20/2023 2:01 PM
227	We thought BC was addressing this problem and therefore we did not perform more steps than those listed in question number 9. To date, there has been no decrease in mosquitoes in our neighborhood. Have you done anything yet?	7/20/2023 1:46 PM
228	Mosquito Zapper and citronella.	7/20/2023 1:45 PM
229	Drain standing water around the home. Homemade yeast-based traps.	7/20/2023 11:54 AM

Q11 Please provide any comments or suggestions about the mosquito control program in the BCMCD.

Answered: 542 Skipped: 290

#	RESPONSES	DATE
1	I'd like to know where the mosquitoes on my property are coming from. We do not have standing water, so I don't know where they are breeding or how far they can migrate.	8/27/2023 6:37 PM
2	We live near a lake which means we need more mosquito control. It is unsafe to be outside. We need more regular sprays	8/26/2023 9:24 AM
3	While they are bothersome,& I am concerned about disease transmission, truck mounted foggers seem archaic. I am perplexed they are still used, & quite disgusted my whole area gets blasted. I cant go outside every wednesday night, & I have to stay shut up inside sweating because I cant open the windows & I have no AC. Pyrethrine is NOT harmless.	8/25/2023 12:01 AM
4	Doing a good job. Seems it has gotten better over time.(i.e. fewer mosquitoes each year)	8/24/2023 6:59 PM
5	I have a concern that your methods may be killing all insects/larva. Do your bacterial and chemical do that or are they specific to the mosquito species? Many animals depend on insects for food. You could be eliminating many other animal species food sources. Please be more specific about your methods. Your information is very vague. Is this on purpose? I don't like it. Give more information! I don't like mosquitos but.....	8/24/2023 2:54 PM
6	The mosquitos are year over year thick and heavy in my neighborhood. I don't notice routine spraying in my neighborhood.	8/23/2023 1:43 PM
7	Please do the St. Vrain Greenway and Walton Park more they are really bad there!	8/22/2023 12:34 PM
8	Please spray down Rogers Road this is Boulder County 1-2 acre house lots and the mosquitos are thick after 7pm	8/21/2023 11:09 AM
9	Stop using chemicals that are highly toxic to bees and fish that are long lasting like permethrin	8/14/2023 5:40 PM
10	Mosquitoes are under control in my neighborhood, so control procedures are working.	8/11/2023 1:52 PM
11	The day after spraying my yard is silent--no birds or bugs. We can't be killing bugs in this time of insect decrease.	8/11/2023 12:08 PM
12	I would like have a text letting us know when a truck would be in our area. I heard them in our area but never saw them.	8/11/2023 8:31 AM
13	Easy to just close windows when spray truck applying. Neighborhoods should be advised to use mosquito dunks instead of complaining about mosquitoes. Too much myth and rumor circulates about pesticide products - "save the bees" and the bees are not even out at night -- so more education to the public needed about how the pesticides work (we have 30 bee hives and have never seen issues) More public outreach needed to better inform people of how mosquito control works.	8/11/2023 7:28 AM
14	We didn't see any truck mounted spraying this year. I'm not sure that our road was covered. How do I find out? Additionally, mosquitos were worse this year than we've ever experienced. We are pretty far from the local gravel ponds. Can you suggest things that homeowners can do to treat outside drains for mosquito larvae?	8/10/2023 10:19 PM
15	I signed up to be notified before spraying is done in my area. I've never been notified. My windows are often open at night when the truck drives by - not good.	8/10/2023 10:14 PM
16	Please target larvae instead of broadcast spraying adulticide.	8/10/2023 9:54 PM
17	Glad its there but please start spraying earlier and more often!	8/10/2023 7:07 PM
18	My late wife's law career was ended due to west nile when it first swept through the county 20 years ago. I always appreciate seeing the county technicians wading through the slough	8/10/2023 5:02 PM

2023 Boulder County Mosquito Control District Survey

behind my house at Quiet Retreat, but also wish you would spray the adults. Thanks.

19	I didn't know you controlled mosquitos in Pony Estates which has a Broomfield zip code, but is in unincorporated Boulder County.	8/10/2023 4:43 PM
20	We are not necessarily against the County spraying for mosquitoes in our area, we would just REALLY like to know exactly when it will be done so we can turn off our swamp cooler. Otherwise, we'll be breathing in the mosquito poison--not good!!	8/10/2023 4:03 PM
21	I support all efforts to reduce mosquitoes on our neighborhood. We live on Nebraska Way facing west, which is open space leased to farmers. Irrigation adds to standing water in this area which may attract mosquitoes, which I would like controlled as much as possible.	8/10/2023 1:59 PM
22	You should not be spraying residential neighborhoods with pesticides.	8/10/2023 1:56 PM
23	You should alert homeowners before spraying their neighborhood. Some people have sensitivities and health issues. It is not right to spray these products without first altering the homeowners.	8/10/2023 11:15 AM
24	The truck mounted pesticides are harmful to more than just mosquitoes, such as monarch butterflies that are endangered. It makes sense for our local environment to have stronger approach to larva control.	8/10/2023 9:43 AM
25	Applying pesticides without our knowledge is simply unethical. There should be more education on ridding properties of standing water and the funds should be used to re-grade public areas that have stagnant puddles after a rain. Enough poison already. The best larval control is lack of standing water. Start there!	8/10/2023 9:00 AM
26	Your efforts seem to have reduced mosquito activity, but I'm concerned about the use of Permethrin, which can affect bees and is potentially toxic to humans and other animals. I would prefer more natural sprays or more targeting of larval stages with bacterial approaches.	8/10/2023 8:40 AM
27	The County could distribute a version of the Spartan Mosquito Eradicators. They are extremely effective and don't harm pollinators, bats, birds, people, or vegetation. The mosquitoes die, and anything eating those mosquitoes will not be harmed. The County could easily and affordably distribute such containers---they only contain yeast, sugar, and salt. Residents can fill with water and set out at their property lines. Easy, affordable, effective, and safe. I would expect Boulder County to be a leader on distributing and utilizing safe control measures.	8/9/2023 8:33 PM
28	We design our garden to attract pollinators, and having wide-ranging pesticides sprayed on the garden might have a negative effect on that.	8/9/2023 8:00 PM
29	Our experience is that control is needed much earlier than provided.	8/9/2023 6:39 PM
30	For the past several years, when you are spraying, you do NOT pass in front of our home, nor do you seem to drive down N. 55th St between Prospect and Nelson, where we live. Instead, we see you driving up Prospect then turning south on N. 55th St toward Ouray Dr. Thus, you seem to miss our property. There is running and sometimes stagnant water on part of our property in the Table Mountain Ditch. And neighbors to our east apply spray irrigation on their hay fields. So it seems as if we should see more control activity. We did notice spraying on N 55th St about two weeks ago, but not since then. If we are going to pay for the service, we ought to see it. Thank you.	8/9/2023 2:50 PM
31	please control the mosquitos. Thanks for your efforts. More control, better :)	8/9/2023 2:42 PM
32	It seems like the the adult spray trucks used to put out a bigger cloud, but it seems much narrower spray and mostly directed to the road. It seems like it would be less effective. If that is correct AND if a bigger cloud is more effective enough that it is likely we'd need fewer sprayings, we would be fine with that.	8/9/2023 2:02 PM
33	Stop using any methods that kill pollenators, please.	8/9/2023 8:39 AM
34	It would be helpful to understand a bit more on mosquito presence in my backyard - especially since there is no known water sources stagnating. Typically around sunset they show up and it is time to retire indoors. Luckily we do not see them indoors - though we have not implemented any safeguards. Appreciate any information on understanding this please.	8/9/2023 7:21 AM
35	Garlic works very well and is sustainable	8/9/2023 12:49 AM
36	I don't like mosquitoes, but I don't like spraying these synthetic chemicals even more. The	8/8/2023 9:25 PM

2023 Boulder County Mosquito Control District Survey

spraying does not just kill the pests, it kills other valuable insects also. Why poison our environment and decimate our pollinators? What is the urgent need?

37	I had asked that the truck not spray when passing my house. We have fruit trees and vegetables.	8/8/2023 8:48 PM
38	tried using mosquito dunks as a larvicide, but hard to identify all the areas of standing water with all of the rain in Boulder recently. My husband is opposed to chemical pesticides, however mosquitos do not target him like they do me. I cannot even get from my car to the house door without being bitten.	8/8/2023 7:04 PM
39	It seemed better this year than previous years.	8/8/2023 6:45 PM
40	Without providing details of the side effects of spraying, it's hard to provide any feedback regarding this program. Is the larvicide bacterial application harmful to other species? We are experience huge declines in songbird populations, is mosquito treatment harming insect populations? I would like to see the county address this and then we can find a balanced approach to move forward. It can't always be humans first no matter what.	8/8/2023 3:19 PM
41	I worry that spraying doesn't discriminate among insects, etc. So beneficial pollinators and other creatures will be killed by spraying pesticides.	8/8/2023 2:50 PM
42	Does mosquito control affect pollinators? Please explain.	8/8/2023 2:26 PM
43	Stop doing it. Bring in bird feeders and let the birds eat the bugs. Natural pest control. Green and eco-friendly. Stop knocking down nests, particularly swallow nests. Isn't this an enlightened, liberal area?	8/8/2023 1:51 PM
44	Spraying chemicals that are toxic killing non-target insects makes no sense. Other creature rely on insects for food sources.	8/8/2023 1:48 PM
45	I keep bees and the pesticides currently being sprayed (esp Permethrin) have long term negative repercussions on honey bees and cause immediate harm to native pollinators such as bumble bees. I would strongly advocate for switching to methods which don't risk the health of local pollinators.	8/8/2023 1:40 PM
46	The adult mosquito spraying that occurs weekly has non-target effects on many beneficial insects, including bees. I am a beekeeper and the weekly mosquito spraying has sublethal effects on my honey bees. The active ingredients in the spray are permethrin and piperonyl butoxide. The later makes permethrin more toxic. Permethrin is not compatible with bumble bees. Please stop spraying weekly for adult mosquitoes and only use larval control. Reference: https://catalog.extension.oregonstate.edu/sites/catalog/files/project/pdf/pnw591.pdf	8/8/2023 1:24 PM
47	Get more bats in the area. Information on how to attract bats	8/8/2023 10:21 AM
48	Every time I go out, I get bitten. Please significantly increase the mosquito control program especially for area that has lake/marsh/reservoir/large body of water.	8/8/2023 9:42 AM
49	While we live close to the Boulder Reservoir I dont feel like we have a mosquito problem at our house. Except for maybe just after sundown when we just go inside or use a natural repellent. I have been following a discussion on Nature Net after one of the members had a dying dragonfly on her deck after spraying. I prefer to let natural predators - birds, bats and other insects and animals take care of the mosquitos and am not a fan of spraying no matter how mild or safe it is supposed to be as it can disrupt the ecosystem and potentially kill creatures other than mosquitos. Thanks for requesting feedback on this topic.	8/8/2023 9:17 AM
50	When possible, please use pet-safe and ground water safe chemicals or natural chemicals that will not cause health problems.	8/8/2023 8:45 AM
51	I think this is completely unnecessary. I have lived in three other states besides Colorado, and comparatively, Colorado barely has mosquitos or other biting insects. This is so detrimental to our ecosystems, and can harm natural predators of mosquitos. I hope Boulder opts out of this program.	8/8/2023 7:16 AM
52	I usually wish you would start spraying sooner. It makes my backyard usable.	8/8/2023 6:53 AM
53	Please recognize that insect populations of all types have been significantly affected by pesticides and subsequently bird populations have declined to low levels. Only 1 case of west Nike virus in BoikdermVointyndies not give justification to killing all insects. 80% of people	8/8/2023 6:06 AM

2023 Boulder County Mosquito Control District Survey

contracting WNV do not develop symptoms. If we were worried about malaria or Zika virus here, perhaps, you'd have cause to spray. Please consider the entire ecosystem.

54	I am not convinced that the adult control is needed if appropriate amounts and locations of larval control are done. I am concerned about the adult control killing other valuable native insects, spiders etc.	8/8/2023 3:14 AM
55	Just use more when it's needed, like this year, and use less when it isn't. Shouldn't have to raise prices too much.	8/7/2023 10:22 PM
56	Being such a wet year, activity was high. The county should apply pesticides and larvicide as needed. More in bad years and less in better years. They seem to do a pretty good job of monitoring it. Just need to do more acting on it.	8/7/2023 10:10 PM
57	I don't like the mosquitoes, but I do enjoy seeing the dragonflies, swallows, and bats (more of which could soon be added as endangered species). I do have to alter activities based on time of day and have considered an electronic mosquito trap, but don't like the idea of large scale broadcast spraying.	8/7/2023 9:51 PM
58	The spraying appears to kill night-flying pollinators. Just after spraying there is a plethora of dead or dying insects and bees. This is not good.	8/7/2023 9:12 PM
59	I wish that there was no insecticides sprayed I feel that it totally harms wildlife. Mosquitoes are important food for alot of animals like birds bats etc.	8/7/2023 9:10 PM
60	I am opposed to broadcast spraying of insecticides. I would like that to cease. I do not think the cost benefit of this approach weighs in favor of continued spraying. Please stop.	8/7/2023 8:41 PM
61	We work hard to create a pollinator-friendly yard and garden, as do many of our neighbors. It seems to me that pesticide spraying for adult mosquitos is antithetical to those efforts. I strongly encourage BCMCD to consider alternative measures, such as CO2 traps in areas where disease-bearing adult mosquitos are a problem. Nuisance mosquitos should not be harmed.	8/7/2023 8:14 PM
62	2023 has been so rainy that mosquitos are far worse than I've ever seen here in Boulder.	8/7/2023 3:48 PM
63	need to have mosquito professionals hired by county interact better with property owners to understand hot spots on property	8/7/2023 2:20 PM
64	I know we are charged for mosquito control services in our property taxes, but in all honesty I don't think we have had any mitigation performed in our neighborhood in a few years.	8/6/2023 9:36 PM
65	Mosquitoes have been absolutely terrible this year. I would be happy to pay more for more control. It has made being outside in the yard very uncomfortable.	8/6/2023 4:56 PM
66	I wish it did not exist. I hate it that our properties/ourselves are sprayed with mosquito poisons without individual permission.	8/6/2023 7:42 AM
67	As much as possible prefer NON TOXIC and environmentally friendly options. We have a large organic garden we do not want pesticides on our food.	8/6/2023 6:17 AM
68	I live in a 7 household subdivision Lykins Gulch HOA on 118 acres which includes Melissa Stuart's agricultural outlot at 3743 Nelson Road, Longmont. When my neighbor called Mosquito Control in June to ask when they would be out to monitor as usual she was told we were no longer on the list to be tested and treated. We have participated in the program for years and rely on it to help control mosquitoes in the larval and hatched phases. We have been paying \$33 times 7 households per year. This year she had to call 3-4 times to get them here but never got return calls. She even had to call the county directly. Mosquito Control finally showed up mid-July after the mosquitoes were in full bloom. So far they came only that once. Furthermore, the person who came said he only had the big pond on his list to treat. My neighbor told him about the other likely breeding areas. He said he would ask his boss about coming back the next day, but he didn't. During the West Nile Virus outbreak in the early 2000s one of my neighbors got it and could not work for months. He had permanent swallowing and other problems. So we are well aware of the need for mosquito control and you can see by my other responses that we take many precautions. We consider it a major loss to our quality of life not to be able to spend time outside enjoying meals and other activities in the summer.	8/5/2023 3:58 PM
69	It is a huge bummer to have to keep windows closed SO often because of the trucks spraying poisons. Our family has allergies and no A/C, so I wish you would stop all together.	8/5/2023 11:50 AM

2023 Boulder County Mosquito Control District Survey

70	I am very appreciative of the mosquito control efforts. We notice significant relief after the mosquito truck comes through.	8/5/2023 10:06 AM
71	Overwatering lawns seems to be a contributing factor for mosquitoes in my neighborhood. Education and higher water costs would help with water waste and associated mosquitos	8/5/2023 9:13 AM
72	The current level of mosquito's are VERY high. Any way to increase control measures would be appreciated.	8/4/2023 2:16 PM
73	We have a seasonal pond and in past years, I saw the mosquito control folks frequently. This year I have not seen them nearly as often - not sure if the schedule has changed or if I just haven't been around to see them--but I feel it has been more sporadic. The pond is not always full so that may be a factor - but weekly checks to see if it has water in it are great and necessary. Thanks!	8/4/2023 12:26 PM
74	Start earlier in the year, since the mosquitos are a big problem before control is provided.	8/4/2023 12:22 PM
75	I'm very happy Boulder does something to control the mosquitos. In Gunbarrel, near Twin Lakes, the mosquitos get so bad in the Spring and early Summer that we are unable to enjoy our backyard.	8/4/2023 12:13 PM
76	We live on a property that does not abut the street. Only aerial spraying will be of use to us.	8/4/2023 12:04 PM
77	If there is service, it is not apparent	8/4/2023 11:23 AM
78	We live on Gaynor Lake. We have had heavy rain. We have received little to no mosquito mitigation from Boulder County. What is your planned response to this feedback? Will Boulder County be contacting us?	8/4/2023 9:35 AM
79	Please use your truck and drive down the driveway along my 8.5 acres 6717 Valmont road	8/3/2023 9:00 PM
80	this is the worst bug year in a long time	8/3/2023 5:02 PM
81	I have noticed that the truck dispensing the mosquito control mist drives much too fast for the mist to be widely dispersed and actually make a difference. It doesn't seem to be properly dispersed.	8/3/2023 4:43 PM
82	I have lived here long enough to recall spraying being done by BCMCD. However I have not been aware of any measures being taken in many years in our neighborhood so I now use a service. Frankly I'm surprised that you are claiming to do anything.	8/3/2023 2:37 PM
83	I have lived here long enough to recall spraying being done by BCMCD. However I have not been aware of any measures being taken in many years in our neighborhood so I now use a service. Frankly I'm surprised that you are claiming to do anything.	8/3/2023 2:37 PM
84	Thanks for your work!!!!!! We live right next to the Marsh and have not had many mosquitoes for years. this make a HUGE difference in our quality of life.	8/3/2023 1:25 PM
85	I'm not familiar with the program. But I'm surprised at how few mosquitoes I've seen on my property this year (in Niwot), given what a wet year it's been.	8/3/2023 11:10 AM
86	Niwot pays \$50,000 / year for mosquito abatement. VDCI is the service provider. Trap density is minimal at 1 trap for 4 sq. miles. Best in class is one trap per 1 sq. mile. When was the stagnant water map last updated? How is responsible for the map update, Boulder County or VDCI?	8/3/2023 11:03 AM
87	Please find NATURAL ways to control mosquitos! Our neighbor uses Mosquito Squad's non-toxic solutions. check into that. We have gardens, pets, food growing in the yard and chemicals are a hazard to humans and living beings. I'd rather take precautions and breathe in chemicals that I DIDN'T ask for. You make things airborne and it is encroaching on my/our space. I remember we used to be able to OPT OUT of the spraying in Boulder/Niwot. What happened to that?	8/3/2023 10:29 AM
88	We provide habitat for native pollinators on our property and it is so disappointing to see that Boulder County chooses to use the blunt force tool of bulk spraying. Shifting mosquito control to the larval level, encouraging homeowners to install bat boxes when possible, and educating people about the dangers of standing water in neighborhoods would provide larger benefits to the environment while still reducing incidence of disease in humans.	8/3/2023 10:06 AM
89	Thank you for what you do for our neighborhood!	8/2/2023 9:25 PM

2023 Boulder County Mosquito Control District Survey

90	We have beehives and do not want anything sprayed near our property. I would love to know exactly when something will be sprayed by text or email so I can cover the hives.	8/2/2023 7:14 PM
91	Drain standing water, so so should BOCO DOT clean out ditches. Juhls Drive, for instance!	8/2/2023 5:26 PM
92	Generally not done here	8/2/2023 3:30 PM
93	The mosquitos in our area (Brownsville) have been awful this year, and have kept us from non-essential activities outside.	8/2/2023 2:42 PM
94	We don't like truck mounted spraying in our neighborhood because we have beehives.	8/2/2023 1:07 PM
95	Do not want heavy chemical use	8/2/2023 12:51 PM
96	Happy to pay more for increased service, thank you!	8/2/2023 11:41 AM
97	I am concerned about the health and wellbeing of beneficial pollinators. The wild bees took a huge hit last winter because of the extreme cold weather and I hate the thought of further compromising populations thru broad use of pesticide spraying. However, I have noticed a reduction of pesky mosquitos since you recently sprayed in our neighborhood and I have to admit, it is a huge relief. I value the effort to reduce mosquito numbers but I'd like to see more of targeting the larvae (even if it is more costly) because this approach seems less harmful to pollinators.	8/2/2023 11:14 AM
98	I have heard of the County-provided services but would not have known they were provided in our area at all — the mosquitos in our neighborhood are pretty awful, by the ditch and otherwise. If the local ditch was running and cleaned out to avoid pooling water, would likely be better, but it's pretty stagnant.	8/2/2023 10:41 AM
99	The more mosquito control the better. I would support total eradication of mosquitos.	8/2/2023 10:25 AM
100	Please stop spraying that thing on our properties, it doesn't work and it's toxic for humans, birds and beneficial insects. They said is harmless but that's not true.	8/2/2023 10:18 AM
101	Spraying is too frequent. No spray requests and pedestrians are not respected!	8/2/2023 9:20 AM
102	Mosquitoes are primary food source for a lot of animals and insects, also worried about what else these chemicals applied in soil and water are affecting	8/2/2023 9:08 AM
103	Mosquitos on Woodbourne Hollow Road are a real problem!	8/2/2023 6:37 AM
104	I would be willing to pay for mosquito control by the county, if it was actually done and effective. This doesn't seem to be the case. As far as I can tell, there has been nothing provided in my area this year - and it's been a bad year. I spray my own property, which prior to doing so, our property was not usable due to the excessive mosquitoes.	8/1/2023 8:17 PM
105	The mosquitos are really bad in the Twin Lakes area of Gunbarrel.	8/1/2023 8:14 PM
106	I called once and got a call back, and a commitment to come spray. By the time that happened I had left town for a bit, so am not sure if it made a dent. I am grateful for the response and openness to work on this problem.	8/1/2023 8:13 PM
107	Reasearch supporting evidence that the pesticide cause birth defects in human babies: Prenatal exposure to pesticides and risk for holoprosencephaly: a case-control study. Yonit A. Addissie, Paul Kruszka, Angela Troia, Zoë C. Wong, Joshua L. Everson, Beth A. Kozel, Robert J. Lipinski, Kristen M. C. Malecki & Maximilian Muenke , Environmental Health https://ehjournal.biomedcentral.com/articles/10.1186/s12940-020-00611-z	8/1/2023 7:56 PM
108	County spraying inadequate in Brigadoon Glen.	8/1/2023 6:21 PM
109	Would appreciate more regular spraying of the neighborhood. We're in a hollow with lots of water (Woodbourne Hollow) and the mosquitos are particularly bad this year.	8/1/2023 2:04 PM
110	Spray adult mosquitoes more frequently	8/1/2023 1:45 PM
111	Spray adult mosquitoes more frequently	8/1/2023 1:45 PM
112	I 100% disagree with adult control using pesticides being sprayed in neighborhoods. It is a crime against Bees and nature and the many people who are unwillingly having to live with their neighborhood sprayed with poison. It's like we live in the 1950's before people knew	8/1/2023 1:14 PM

2023 Boulder County Mosquito Control District Survey

better. Encourage covering up and educate people about mosquito prevention and protection instead of spraying, PLEASE!

113	Thank you for doing this	8/1/2023 12:46 PM
114	While I see the fee on my property taxes, I have rarely seen any activity except once saw a vector monitoring truck and mosquitos are present and very annoying to the point that neighbors employ professional services to control them. I consider what we get extremely poor value for money	8/1/2023 12:12 PM
115	We have bee hives on our property and have requested that Boulder County Mosquito do not spray when passing our property on 6796 Nelson Road to maintain the safety of our pollinators.	8/1/2023 9:44 AM
116	I would like to see an organic way of dealing with the mosquitos. There are a few companies make that claim.	8/1/2023 9:31 AM
117	I prefer all natural products. Please do not use chemical pesticides.	8/1/2023 7:49 AM
118	I don't think the current control methods are working. We are bitten by mosquitos on daily basis when we take our dogs out for a walk. This year has been particularly bad.	8/1/2023 7:15 AM
119	Monitor irrigation for water pooling, guard against the practice of flooding fields to irrigate	7/31/2023 8:03 PM
120	I have been getting eaten alive this year by mosquitos and the bug repellants, citronella, etc., don't work. It seems much worse than previous years to the point that I can't be outside on my property (remember, no grass on property) most of the time since they are active all the time. I live in the Heatherwood housing edition, for reference.	7/31/2023 6:47 PM
121	Needs to be done around irrigation ditches and reservoirs.	7/31/2023 6:44 PM
122	Appreciate the program. In favor of all options that do the best they can to avoid the use of pesticides.	7/31/2023 6:18 PM
123	It's just not moving the needle at all at this point	7/31/2023 4:56 PM
124	I live in Gunbarrel	7/31/2023 4:35 PM
125	This year, the mosquito-control services seem to be more effective than in the past. We live near a creek in Niwot, yet have seen almost no mosquitoes. Thank you	7/31/2023 1:58 PM
126	Good program although not as effective as I wish...but noy sure they can do more. Not always notified when spraying occurs even though I am signed up for the email notification.	7/31/2023 1:46 PM
127	In previous years, we had frequent communication with mosquito control and saw our property being treated. Have had no communication this season, or visual on our property being treated.	7/31/2023 10:58 AM
128	Bees are very important to our ranch/farm - we do not want any pesticides applied on or near our property. When I contacted the county a while back to ask for no application and to be informed when spraying was happening nearby I was told I wasnt near any spraying. Your survey sent to me implies this has changed and that now we are receiving some type of 'control' but I was never informed of this change nor informed of any applications near my property - this isnt great - Im disappointed if this is true since I specifically requested being informed and also requested to not have applications. It doesn't make sense to me that Boulder county would be spraying since this is counter to our agg and natural mindset in general - why spray poisons all over the place killing other insects and endangering our people? In a city I can see where they might want this trade off- but in the more natural setting of the county? It seems unfair that I am forced to pay a mosquito fee when I dont want that to happen at all anywhere let alone on my property - in addition Ive been told it hasnt been happening near me - so I feel like I shouldn't pay both because I am against that service at all and because we dont even receive that service - how do I opt out of this unfair fee? I do not grant permission for any type of spraying/pesticides on my property. I request being informed if any spraying is planned or occurs near me in advance to ensure children are not exposed, and to request it not happen.	7/31/2023 10:34 AM
129	This year was dreadful for a while there! We could hardly go outside except in full sun without being totally swarmed. I think it was all the rain and cool temps must have led to much standing water in the county! It's been much better the past 3 weeks since the temps got really hot. I would recommend some way to respond to increased mosquito populations more quickly (using mostly bacterial, larvae control). This season the mosquitoes were epic! Like I said, it's better now. Thanks for asking us!	7/31/2023 10:06 AM

2023 Boulder County Mosquito Control District Survey

130	The past several years I have received notice with a paper on my front door, that someone had been to the pods at my home. This year I have seen no-one and have received no notice of anyone being here. Please inform me why no one has been here if this is so?	7/31/2023 9:04 AM
131	This year has (still active) a significant increase in mosquitoes. This year they almost act territorial, biting both people that normally are attacked by them as well as those that in the past were rarely bitten!	7/31/2023 8:00 AM
132	We like the mosquito control. Just seems that it hasn't been sprayed out here for awhile.	7/31/2023 7:30 AM
133	It would be beneficial if there was a product that did not kill bees. Mosquito control is essential to the wellbeing of people and animals alike.	7/30/2023 9:28 PM
134	It is uncertain that the current adult spray control is properly covering all district properties near us. For the last 3 weeks the truck has sprayed along Fairview Dr. and 69th St., but on returning to the intersection of Fairview Dr. and Lakeview Dr. the fogger has not been reactivated from there to Baseline Rd. and then on to the Dry Creek Trailhead on Baseline. This has been done properly in the past.	7/30/2023 8:47 PM
135	Thank you for what you are doing. The mosquitoes are biting throughout the day, with more in the evenings, of course. I'm hoping the weekly sprayings are helping to reduce those numbers (or at least the disease-carrying ones).	7/30/2023 7:23 PM
136	I've been living in the Gunbarrel neighborhood of Boulder County for 20+ years, and don't recall of any mosquito problem.	7/30/2023 6:27 PM
137	Do you guys come out when called or let me know you've gotten my request? It doesn't seem like it.	7/30/2023 6:22 PM
138	Do not have air-conditioning at our house. We use a window fan at night. It is terrible. Wendy truck comes by spraying on our street. I have to run to close all the windows. I can taste it. I have put our address into the website, asking them to not spray right at our house. But they still do it. I wish they would stop spraying all together. Our address is 6165 Simmons Dr., if someone can stop them from Spring us that would be helpful.	7/30/2023 6:20 PM
139	I would vote to stop spraying. I believe there are better ways of managing mosquitos than spraying toxins into our environment, which impacts other pollinators as well as our water sources. I find it disturbing that we have to close our windows every week, without choice of this happening. I have been out walking with my family when the trucks go by and we can't escape getting hit. Furthermore, I don't see much difference in mosquito population, but I have seen a reduction in other useful pollinators. West Nile is a relatively low risk compared to the environmental impact of spraying.	7/30/2023 5:57 PM
140	Wish you would just text or email me when you come...I am constantly surprised when s truck is parked in my private property.	7/30/2023 4:07 PM
141	We were not made aware spraying in our area before it had already happened. We want to know so we can keep windows closed when there is spraying. We also do not want a patch of raspberries sprayed.	7/30/2023 2:01 PM
142	We are right next to the creek on county property and I dont feel that nearly enough is done to control mosquitos. It is a horrible problem	7/30/2023 10:57 AM
143	What about aerial spraying? It was incredibly effective in the county where I used to live. We have a large acreage property with farm animals and welcome improved insect control. Our house is a quarter mile from one driveway and a third of a mile from the other so I'm not sure how effective the truck spraying is for us. Given the prevalence of local aircraft, aerial spraying seems highly possible. And that, for sure, I would be willing to pay for.	7/30/2023 10:44 AM
144	The current protocol is ineffective. Mosquitoes are very active in my area and if I do not wear repellent, long sleeves, and a hoodie, I cannot go outside without being bitten several times within a very short period!	7/30/2023 9:06 AM
145	As stated above, we are unaware of any county-provided mosquito control in our area, and could not be outdoors if we did not hire a private company for control.	7/29/2023 3:03 PM
146	We just need more spraying	7/29/2023 2:57 PM
147	I appreciate the mosquito control that Boulder County does, and I am happy to pay for this.	7/29/2023 11:53 AM

2023 Boulder County Mosquito Control District Survey

148	Mosquitos have been the worst in my 34 years on my Boulder County enclave property in north Boulder by a factor of 4 times. I don't think anything was done this year to control them in my area. Difficult to sit outside at any time of day or night without swarms of mosquitos attacking. I have not seen the same number of mosquito control agents out in Boulder County this year. Much, much fewer in number! I can't figure out how my annual fee has been spent this year, because of the substantial increase in numbers of mosquitos!	7/29/2023 11:17 AM
149	Hi, there are significantly less mosquitoes at my address on Carter Trail, Boulder, this summer. I am noticing more frequent truck-mounted spraying trucks. It is ok with us, thanks.	7/29/2023 10:10 AM
150	It's great, we need all the help we can get!	7/29/2023 12:09 AM
151	I really don't trust the spraying of chemicals, nor the "experts" who claim that it "isn't harmful to humans". We list our house to prevent spraying right in front, but I don't trust that it really protects us. Mosquitos are a danger and a nuisance, but I don't know that spraying toxic chemicals is any better, and may well be worse.	7/28/2023 9:07 PM
152	I have not seen mosquito control in my area	7/28/2023 8:21 PM
153	I'm grateful altho I would like to ensure that bees are not affected.	7/28/2023 6:06 PM
154	Spraying does not work. Drivers are unaware of speed limits and are carelessly spraying even when people are out walking.	7/28/2023 5:18 PM
155	I am sincerely hoping the mosquito control measures are non-toxic to humans and animals	7/28/2023 4:54 PM
156	I am since	7/28/2023 4:53 PM
157	Let people know when you are spraying and treating the area.	7/28/2023 3:03 PM
158	Need nosquito control to let us enjoy our yards more	7/28/2023 2:39 PM
159	We believe it is critically important and encourage its continuation for as long as determined appropriate by staff or other professionals.	7/28/2023 1:50 PM
160	Our neighborhood is overtaken, I feel like our area is not prioritized. Waterstone neighborhood.	7/28/2023 12:20 PM
161	Boulder County could better control mosquitos if mowing was completed, especially along the Twin Lakes Trail area from Spine to Twin Lakes Road.	7/28/2023 12:15 PM
162	Thank you! It could've been a horrific year with all the rain, but so far, it's been tolerable with the spraying that has been done in our neighborhood.	7/28/2023 11:51 AM
163	Mosquitos have been extremely bad since we moved here seven years ago. This year has been worse, significantly, than average. Shannon Estate	7/28/2023 11:36 AM
164	I think mosquito control could be more aggressive. Mosquitos are nasty, spread disease and have no benefits.	7/28/2023 11:13 AM
165	Can we encourage farmers to stop flood irrigating? This inefficient process contributes to standing water. Are there federal grant BoCo could apply for and help farmers implement irrigation that doesn't over water/contribute to standing water?	7/28/2023 11:08 AM
166	We need more mosquito control in rural areas! Neighbors have hired local professionals to spray their individual properties with very little luck in changing the situation of mosquito nuisance.	7/28/2023 9:08 AM
167	Lots of precipitation this year that has resulted in lots more mosquitoes.	7/28/2023 8:54 AM
168	Boulder County used to come to our property to spray but that ended several years ago. Someone did show up at the beginning of last season (2022) to say they were going to start up - but then no one ever returned. If I am paying a tax for this I should be getting coverage. Right now, we receive -0- mosquito control from the county and have to hire it to be done by a private firm. I do not feel that Boulder County is living up to their promises.	7/28/2023 8:28 AM
169	This year has been terrible. I can't go outside any time of day to enjoy my yard.	7/27/2023 6:00 PM
170	Worst year ever; finally improving.	7/27/2023 4:23 PM
171	It helps, as we definitely see a drop in the otherwise unbearable numbers of mosquitoes. I've had West Nile Fever 5 times - starts a few days after a bite in July. It's very distinctive, no	7/27/2023 3:52 PM

2023 Boulder County Mosquito Control District Survey

mistaking it for something else. Two weeks of dizzying fever, then next day: stabbing pain in my eyes when light enters them, next day: aches specifically in my neck and spine and fatigue such that I've fallen asleep on the carpet in my hallway. For three months, I have severe fatigue and can work maybe half time with a 2 hour nap at midday. Slight difference in variants year to year - some more like spinal meningitis, some more encephalitis (head feels swollen, floaters in vision, headaches), one year brought paralysis. This is serious yet public info downplays how one bite can steal 6 months from your life, or end it. (I am not old or frail.)

172	Please take care of my area as soon as possible. The mosquitoes are relentless.	7/27/2023 3:52 PM
173	YOU NEED TO CONSISTENTLY NOTIFY RESIDENTS WHEN YOU ARE SPRAYING IN THE NEIGHBORHOOD!! Last night there was not notification and you sprayed! And then there was the evening we were outside walking BEFORE SUNSET and we were sprayed!!!!	7/27/2023 3:23 PM
174	Earlier spraying in the year	7/27/2023 3:07 PM
175	Would like more info on what is being provided and when it is being provided. We do not know when you have been in our neighborhood, if at all. Many neighbors are using private companies to spray.	7/27/2023 2:48 PM
176	This year with all the rains mosquito levels are very high, more spraying is critical. Last year I would see the trucks spraying in my neighborhood, have not seen a single truck this year.	7/27/2023 2:24 PM
177	The mosquito truck does spray in the adjacent neighborhood of Boulder Hills, but they do not spray on Ouray Drive. There is an irrigation ditch which runs along Ouray, which is a massive breeding ground of mosquitos, it would be very effective to spray along this road.	7/27/2023 2:04 PM
178	VDCI with the support of Boulder County Public Health dumps tons of bti into our ponds; I would be ok treating barrow ditches and detention ponds, but some of the ponds approved to be treated would support many more natural predators of mosquito larvae if they were not treated--just look at how the City of Boulder's program has evolved and their results the last few years--the results are clear; We have to close our windows every wednesday during the summer because of the spraying. This is super annoying since we must waste money and energy to put on the A/C even when our house would have naturally cooled with the night-time temps. What a waste of energy for a supposed forward thinking county. Further, there is little evidence that broadcast spraying reduces adult mosquito numbers; as you know the spray droplet actually has to come into contact with the mosquito. The spray impacts many more non-target species like butterflies and other insects than the numbers of adult mosquitoes...really, it's quite disappointing to live in a county that touts itself as being progressive and still believes in such antiquated methods of insect control. VDCI's customer service is horrible. Each year I must re-sign as a no spray customer and "call before" spray. I did that this year and haven't been called once before the weekly wednesday sprays in Gunbarrel / Heatherwood. How do I even know that the truck is turning off it's spray gun across from my house. I don't want that stuff on my car or my garden, and I really don't want to pay \$33 / yr for a service that I dont want, let alone the possibility of more spraying. I find it interesting that this survey comes out during one of the wettest springs and thus worst mosquito seasons in the 15 years that I've lived here. A bit of a coincidence to garner support for increased spraying? Come one BCDPHE, the spray is ineffective, its a waste of money as most folks have to close their windows the night of the spray and suffer the consequences of their homes not cooling off, and VDCI customer service is terrible. One idea would be to put GPS units in the spray trucks so people like me know when they actually need to close their windows, instead of this sundown to sunrise window currently provided. Of course, if VDCI can't even effectively put me on the list to call before spray, the chance of getting real-time location on the trucks so we can save some money in A/C bills and save a bit of energy (BoCo climate initiatives?) is probably too much to ask. Thanks for the opportunity to provide feedback on this ineffective program. I hope that you will adapt and look a bit more closely at the program in general. Again, just look at the results from the past couple years of Boulder City's program after they moved away from VDCI and looked a bit more holistically at managing mosquito with more ecological attention instead of broadcast spraying chemicals and dumping a bunch of larvaecide in all of our waters.	7/27/2023 2:04 PM
179	It's too much. In my neighborhood and on hikes there is rarely a mosquito. That's not natural.	7/27/2023 1:46 PM
180	We notice a clear reduction in mosquitos soon after application. We still need local repellants, but the density of mosquitos is much less. We had almost a month in early summer where we could not enjoy the outside even in mid-day. Perhaps spraying could start a bit sooner in the season. Thank you for the service.	7/27/2023 1:21 PM

2023 Boulder County Mosquito Control District Survey

181	BCMCD could seek toward balance and harmony with nature. Mosquitos are natural. Humans will have to live with that. If populations get unnaturally high, lets look at changing what is causing that.	7/27/2023 11:46 AM
182	I have land and the spraying in neighborhoods don't help me. Seems I pay for something I don't see the benefits from	7/27/2023 11:41 AM
183	I prefer no mosquito control	7/27/2023 10:01 AM
184	The properties are large in my neighborhood and we are surrounded by farms that use flood irrigation along with having multiple creeks and irrigation ditches. The spray truck drives very fast through our streets and I do not notice any change in mosquitoes after the treatments. I know of several neighbors that hire privately to control mosquitoes on their property. Those additional treatments help their properties tremendously so I do not believe the county program is effective. I would prefer efforts to enhance natural control through bringing back bat populations, dragonfly populations and enhancements of habitats to increase insect eating native birds. It would be helpfu to have good information available for the community that could be used to develop these natural controls ourselves.	7/27/2023 9:52 AM
185	Program procedures and chemicals used has caused allergic reactions on my family when a treated mosquito bites	7/27/2023 9:49 AM
186	We really, really need someone to spray our area. It's really bad.	7/27/2023 9:13 AM
187	Do more to show effectiveness and safety to humans and pets	7/27/2023 9:01 AM
188	eliminate the truck sprayers... it's an ineffective (at best short term) method and I find them insensitive to people who happen to be outside at time of spraying. I was on the sidewalk last night and observed the truck way over the speed limit and spraying over my head.	7/27/2023 8:29 AM
189	Lots of mosquitos in Heatherwood this year!	7/27/2023 8:12 AM
190	it is much needed	7/27/2023 7:49 AM
191	The mosquitoes are a huge problem and highly impact our lives and the lives of our animals	7/27/2023 7:35 AM
192	Please do more. The mosquitos are unbearable at times.	7/27/2023 7:18 AM
193	BCMCD used to spray both sides of our street but now they only spray the other side of the street and our yard has tons of mosquitoes. Also there is standing water in a ditch behind our property that is infested with mosquitoes, neither BCMCD nor the ditch owner treat or care for. Very disappointed.	7/26/2023 10:10 PM
194	I would like a notification when you spray our street. Since properties are bigger it would be helpful to go down our driveway. Other companies use to do it.	7/26/2023 6:24 PM
195	This summers' fogging in the neighborhood have really helped with the mosquitos and let us enjoy the outdoors! Thank you!	7/26/2023 6:18 PM
196	Mosquitoes this year are out of control in this area which is Gunbarrel	7/26/2023 4:24 PM
197	They should test in the water areas more often. They used to do that.	7/26/2023 4:14 PM
198	Appreciate the service--thank you. Mosquitos are not terrible this year, but control could be better.	7/26/2023 3:18 PM
199	My home valuation and projected property taxes went up 45%. I expect the County to have more than enough money to provide the necessary services,.	7/26/2023 3:14 PM
200	It may be helpful to share information and access to purchase mosquito control products to use in between any services provided by the county	7/26/2023 3:09 PM
201	With all the rain this year I thought they would be a lot worse. Your actions seem to be better than in the past as they are less plentiful and annoying. Thanks.	7/26/2023 2:53 PM
202	I really needed more detailed information on the types of biological mosquito controls used before completing this survey. I couldn't find that infomation. I don't like the environmental impact of the adult control methods.	7/26/2023 2:44 PM
203	I think when the trucks are spraying maybe some typ of notice that they will be coming and they drive too fast to let the spraying work.	7/26/2023 2:40 PM

2023 Boulder County Mosquito Control District Survey

204	Thank you and whatever you can do is appreciated.	7/26/2023 2:34 PM
205	There is no spraying occurring at my residence 8430 Ouray Dr, Longmont 80503. I have reached out to Vector Disease Control and they told me they have no idea why they aren't spraying here but confessed that they aren't.	7/26/2023 2:03 PM
206	As expected, the mosquitos have been vicious this summer and I experience a severe reaction their bites. Anything that can be done, please do it.	7/26/2023 1:58 PM
207	As expected, the mosquitos have been vicious this summer and I experience a severe reaction their bites. Anything that can be done, please do it.	7/26/2023 1:58 PM
208	We have never had the control on mosquitoes that is needed. In fact, for their dad's birthday, my daughters unbeknownst to each other gave their dad units to kill mosquitoes. We are known for our mosquitoes!	7/26/2023 1:38 PM
209	I live on a cul de sac in Niwot. I don't think any control is provided close to my property.	7/26/2023 12:28 PM
210	I was unaware that there was a mosquito control program in the BCMCD, and was informed by my HOA that we were not allowed to use chemical treatments ourselves. However, there has been a significant increase in mosquito activity over the last few summers, so I'm in support of whatever additional measures should be taken so that I can use less chemically based bug spray in order to enjoy my outdoor space.	7/26/2023 11:59 AM
211	I only just realized this week what the purpose is of that loud truck driving through the neighborhood seasonally!	7/26/2023 11:43 AM
212	I appreciate your asking. The mosquitoes are so difficult this year. We're tight near a creep on Jay Rd, I've never seen so many.	7/26/2023 11:25 AM
213	I haven't been bothered by mosquitos this summer, and I'm very grateful for the program. Very worth the price.	7/26/2023 11:05 AM
214	We really oppose the trucks spraying pesticides! Stop doing that!	7/26/2023 9:32 AM
215	PLEASE stop applying poison! There is a serious decline of bees and other vital pollinators in our county. Residential use of Roundup and other poisons should be outlawed. There are sustainable options for example encouraging residents to mount bat houses where appropriate - the county could spend the funds providing bat houses and even mounting for taxpayers; Mosquito Dunks are made out of a natural bacterium found in soil called Bacillus thuringiensis subspecies israelensis. (B.t.i.). And while it's lethal for mosquito larvae, it's safe for other living things. These discs can be placed in water sources to kill larvae. Is this what the county is already using?	7/26/2023 9:24 AM
216	The only reason I knew this was ongoing is due to the noisy trucks that drive by late at night, spraying. They're loud enough to wake anyone with their windows open. I haven't noticed a decrease in mosquito activity this year. It's been wet enough that the mosquitos actually seem worse.	7/26/2023 9:06 AM
217	Twin Lakes neighborhood has horrible mosquitos! Increase treatment here - especially in the streets near the swamp by the Inn.	7/26/2023 9:01 AM
218	I wish they would be finally controlled - nothing seems to work...	7/26/2023 8:59 AM
219	After the truck mounted sprayer comes through, we really do notice a reduction of the critters	7/26/2023 8:12 AM
220	Your poison is killing me- literally. With chronic health issues I've been hospitalized 5x in last year alone. "Abstaining" from spraying at my property so they can spray for miles upwind is an insult to my intelligence. Chemtrails and other "noxious weed" spraying with poison is also killing me. Literally. I cannot escape poison in Boulder, CO. Not why I moved here in 1992. Save our organic farms!	7/26/2023 8:08 AM
221	I'm always concerned what the effect of mosquito control programs have on the viability of both dragon flies and bees.	7/26/2023 2:40 AM
222	I would appreciate knowing when my area is going to be sprayed so I can keep the windows closed. Please email or text alerts.	7/25/2023 10:54 PM
223	We have had no relief this season from mosquitoes! They have been worse than ever! You can't step outside without getting swarmed. Our entire neighborhood is staying indoors as a	7/25/2023 10:36 PM

2023 Boulder County Mosquito Control District Survey

result. It has completely ruined any outdoor pleasure this summer! Have we had any service? If we are paying an annual fee, I am disappointed we have had no relief!

224	Where and how have you applied this year!	7/25/2023 6:56 PM
225	We've had to supplement the conty control each year with commercial and/ or retail controls to make our Gunbarrel habitable. Neighbors report similarly. Thanks	7/25/2023 6:17 PM
226	I honestly have had no idea that this program exists, despite living in Boulder County for ~25 years.	7/25/2023 6:16 PM
227	The mosquito control has been working good.	7/25/2023 4:53 PM
228	The program does not seem to be working well in our neighborhood (Spanish Hills)	7/25/2023 4:34 PM
229	offer homeowners a variety of mosquito traps, etc. that they can purchase from you. Because of the volume you sell, pass on the cost saving to the homeowner.	7/25/2023 3:19 PM
230	Although we pay for the service thru property taxes, we have never seen any effort to spray for mosquitos from the county, city, or anyone else.	7/25/2023 3:09 PM
231	Spraying chemicals from the road doesn't seem to be very effective. I'm not sure there is a better way for the county to treat other than going into people's yard, which I know is not possible. But treating yard by yard (especially properties adjacent to water sources) would be preferred.	7/25/2023 2:25 PM
232	I am a mosquito attractor and am in favor of any mosquito control that the county provides. Without mosquito control techniques, I simply would not go outside in the summertime. As it is, my personal bug spray and long clothing is not always successful at preventing numerous mosquito bites. Please do not succumb to the loud/raucous minority that wants the spraying to go away!! I suspect there is probably a way to do this that I have not looked into, but a "12-24 hours before" notification/reminder that the spraying was to occur in my neighborhood would be nice. In early summer before we have the AC on regularly, I normally hear the truck about two houses away and don't have time to shut my windows (which I would prefer to do).	7/25/2023 1:50 PM
233	Do you service Niwot? We've never seen anyone from the county providing mosquito control.	7/25/2023 1:30 PM
234	Thank you for trying to make our neighborhoods safe.	7/25/2023 1:23 PM
235	Start control actions sooner. Mosquitos abound before controls are applied-can't enjoy our patio or gardens outside until mosquitos are gone.	7/25/2023 1:00 PM
236	More information as to when and where they are spraying	7/25/2023 12:43 PM
237	We think we've heard the mosquito truck go down our street 3 times this summer, and it's given us tremendous relief from mosquitoes.	7/25/2023 12:35 PM
238	I am grateful. It makes a difference!	7/25/2023 12:31 PM
239	Current levels of mosquito control are inadequate in Niwot!	7/25/2023 12:12 PM
240	Current levels of mosquito control are inadequate in Niwot!	7/25/2023 12:12 PM
241	I'D LIKE TO SEE THE LEAST TOXIC METHOD POSSIBLE.	7/25/2023 12:07 PM
242	Please resume larval testing in the wetlands in the conservation easement right below our property on Sage Valley Road, Longmont.	7/25/2023 11:59 AM
243	Current control methods are not having any effect	7/25/2023 11:29 AM
244	Sump pumps along Baxter Farm Road provide a constant supply of standing water.	7/25/2023 11:24 AM
245	You aren't doing enough to control the mosquitos in my neighborhood. We back up to Flatiron's golf course, and we can hardly use our property, even though we pay \$120 every 3 weeks for mosquito control!!!!!!!	7/25/2023 10:51 AM
246	In this day and age with everything we know about nature, pollinators, and our environment I would hope that Boulder County would choose NOT to control mosquitos with poisons or other measures that work against nature.	7/25/2023 10:43 AM
247	This year Vector waited too long to treat larva and adults. Given the rain, it was predictable there would be more mosquitos. Unfortunately, I've seen far less mitigation than in previous	7/25/2023 10:10 AM

2023 Boulder County Mosquito Control District Survey

	years.	
248	I wasn't aware the Shannon Estates was receiving any mitigation at all. Years ago, we used to hear the truck. Now we feel pretty much stuck indoors.	7/25/2023 10:03 AM
249	Increase as necessary	7/25/2023 9:55 AM
250	It was apparently completely ineffective; as we never saw any spraying or any other attempt to control mosquitoes in our area	7/25/2023 9:43 AM
251	We really appreciate the mosquito control program, but sometimes it's hard to see an impact.	7/25/2023 9:24 AM
252	Mosquito control is terrible. They set traps in the location that is guaranteed to show the lowest number of mosquitos thereby cheating us of spraying. Spraying helps for a couple of nights only.	7/25/2023 9:10 AM
253	On the golf course in Louisville between ponds. Mosquitos are very bad this year. Investing private remediation	7/25/2023 8:03 AM
254	Whatever is being done, and has been done in the past, it doesn't work. Can't even go outside. Can't open exterior doors, and even by going through garage, still have mosquitoes in the house occasionally that have bitten us. Also, despite what the Vector Disease company has told me (or maybe this is because of Boulder County), mosquitoes DO exist around here after August. Couldn't get any help after the flood in 9/2013 and they were horrendous. We always have a problem with them in September. The current fee is too high because it hasn't and doesn't work. I can't say that paying more money will work either as we have no confidence in the program.	7/25/2023 8:02 AM
255	The pond at snug Harbor Apartments in twin Lakes should be filled in.	7/24/2023 9:55 PM
256	I would like warnings when the truck comes around so I can close all the doors and windows.	7/24/2023 9:20 PM
257	I am happy that the county is controlling / reducing mosquitos.	7/24/2023 8:27 PM
258	We do NOT like the adult control (truck mounted spraying of pesticides) in our neighborhood. This seems toxic and dangerous for humans. It concerns me that the truck had to turn off the pesticides when it drove by our house when our kids were playing outside. Please let me know how I can get them to stop. You can reach me at 720-810-3546 or erin.allen317@gmail.com.	7/24/2023 7:53 PM
259	I am not sure I have noticed a reduction in the number of mosquitoes on my property after county spraying. I live in a country subdivision	7/24/2023 7:44 PM
260	There are a lot of mosquitoes this year. I'm allergic so I really avoid going outside when there are plenty of mosquitoes. Thank you for performing abatement to improve my quality of life	7/24/2023 7:06 PM
261	Whatever you are doing is working well. Thank you!!!	7/24/2023 6:59 PM
262	-	7/24/2023 6:43 PM
263	This is a nightmare, we can't go outside anymore! Please help	7/24/2023 6:20 PM
264	I do not want pesticides sprayed and was upset to hear this is being done.	7/24/2023 6:05 PM
265	I am grateful for the mosquito control.	7/24/2023 6:05 PM
266	Although getting bitten is irritating and poses a short-term health risk, and there truly are a lot of mosquitoes at my homestead, I have much deeper concerns about the long-term health risk to humans and environment from controlling mosquitoes. Although I am not overly familiar with the methods of control, and am sure they are considered low impact to the best of our knowledge, the unintended ripple effects we cause by tampering with natural processes are rampant. I'm sure you all have done your research to the extent that is possible, but want to chime in that my greater concern is for the environment than for the nuisance.	7/24/2023 4:33 PM
267	Would like to know of any changes in current mosquito control methods in my neighborhood in Gunbarrel	7/24/2023 4:25 PM
268	I'm in Brownsville. Mosquitos are (and have been for 20 years) terrible. May-Sept I only go out when absolutely necessary, lots of DEET and clothes. I wish you could do something about it.	7/24/2023 4:24 PM
269	Mosquito activity was fairly high about six weeks ago at East Palo Park and along the Four Mile Creek path. Has drastically subsided since then. What you do must be working. Thanks!	7/24/2023 4:20 PM

2023 Boulder County Mosquito Control District Survey

270	How do you let residents know that you're doing control activities? I don't see anything from the BCMCD.	7/24/2023 4:09 PM
271	I did not know there was mosquito control happening. They have been terrible this year.	7/24/2023 3:56 PM
272	I feel it needs to be stronger, especially for elderly people who are allergic to mosquitoes.	7/24/2023 3:56 PM
273	Thank you	7/24/2023 3:53 PM
274	I have a pond a several Ditches on my land. They have not been treated in over 5 years. Not doing their job	7/24/2023 3:52 PM
275	I honestly did not know that Boulder County was doing anything anymore. I certainly couldn't tell by my mosquito population. We are greatly impacted by the mosquitos on our block because of the open pipes the county installed to drain the excess water from our street - the two pipes are open at both ends and they breed mosquitos.	7/24/2023 2:46 PM
276	The mosquitos population this year is overwhelming!	7/24/2023 1:58 PM
277	This year, whatever you're doing seems to working great.	7/24/2023 1:58 PM
278	Don't think a truck spraying from the street would do anything for the mosquitoes in our backyard.	7/24/2023 1:24 PM
279	I was on the notification list but have received NO notifications this year. Please put me back on!	7/24/2023 12:42 PM
280	None of the control measures seem to be working. We pay a lot of money to spray on our own too and still we are all getting tons of bites when we are outdoors.	7/24/2023 12:33 PM
281	Not doing enough to reduce them.	7/24/2023 11:59 AM
282	get out early season and treat larvae to prevent increase numbers as season progresses.	7/24/2023 11:58 AM
283	Bringing for he's	7/24/2023 11:54 AM
284	Two COMPLETE downfalls of this program: I have to call as do my neighbors to have anyone monitor standing water in our yards that are along a leeching ditch, EVERY year as if what they have found isn't already recorded from previous years. Furthermore, the truck mounted sprayer does not come down our street and spray the 3 homes behind us, along the backside of the ditch and they CLEARLY are paying for this service. For reference, we are Niwot, Hillcrest Heights/Wildview subdivision	7/24/2023 11:42 AM
285	where is this done? I've never seen city mosquito control trucks in our neighborhood	7/24/2023 11:34 AM
286	The mosquitos are as bad any other year this year.	7/24/2023 11:27 AM
287	Please be sure to protect bees and other pollinators.	7/24/2023 11:20 AM
288	Treat standing water in field after heavy rains	7/24/2023 11:15 AM
289	Mosquitos have been brutal this year - hard to go out in the garden and have the kids play	7/24/2023 11:04 AM
290	This should be an opt-in rather than opt-out option. If anything at all.	7/24/2023 10:49 AM
291	I am very much against spraying chemicals into the air that I breathe and that my children breathe. I am not convinced that those chemicals are benign to humans. At some threshold of exposure (whether acute or chronic), there will be harm, no matter the chemical being considered.	7/24/2023 10:42 AM
292	Pesticide spraying has a negative effect on birds, other insects, bats, and other animals. There are so many toxic chemicals in the environment now, it's ludicrous to keep adding more.	7/24/2023 10:27 AM
293	PLEASE NOTIFY ME WHEN THE TRUCK WILL BE COMING!!! We use an attic fan for cooling and would prefer to shut the windows when they go past spraying!	7/24/2023 9:33 AM
294	it helps to control the mosquitos.	7/24/2023 9:31 AM
295	I haven't seen any evidence of mosquito control in my area, and we desperately need it. They're worse than Alaska at times. In the evenings on our property it's unbearable at night. You can walk through the grass and there is literally a cloud of mosquitos around your ankles.	7/24/2023 9:00 AM

2023 Boulder County Mosquito Control District Survey

If you stop moving, within seconds you're covered. Something really needs to be done here, it's awful.

296	If Boulder County has been doing this for years (?) it's not effective in our area by Six Mile Reservoir and needs to be increased by a lot. The products need to be "Bee Safe" and if so, please let people know about that, since it's a big topic in the Melody Catalpa neighborhood and awareness is spreading rapidly.	7/24/2023 8:37 AM
297	I don't care for the fogging/spraying along the side of the street--especially without any warning so I can close the windows.	7/24/2023 8:32 AM
298	We live in Gunbarrel near a creek and it has been horrible. We aren't able to go outside at night.	7/24/2023 7:26 AM
299	I do not regularly see many mosquitos in my neighborhood before spraying started. You pretty much spray pesticides weekly and it kills a lot of pollinators, and other insects not just mosquitos. It has killed most of our neighborhood bees several years in a row.	7/24/2023 7:20 AM
300	Thank you and appreciate anything you can do to mitigate mosquitos, especially around flagg drive in Lafayette.	7/23/2023 10:01 PM
301	It is too harmful. It is not necessary. Did we ask for it? I don't want to pay for it. Let me use my money to buy some bug repellent. Save the bees please!	7/23/2023 8:36 PM
302	As far as I can tell based on conversations with neighbors and my own observations, there is NO mosquito control by the county in my neighborhood, Orange Orchard.	7/23/2023 8:11 PM
303	Our source of mosquitos come from standing water in the irrigation ditch which needs better drainage and larval control.	7/23/2023 7:05 PM
304	West nile virus is a serious health threat which is why I go ahead and hire professional mosquito control. The mosquitoes are so numerous bc my neighbor won't cut his 4 foot weeds as well. i would not be able to go outside at all if I didn't hire a professional	7/23/2023 5:50 PM
305	There has been NO mosquito control from Boulder County in our area this summer or last.	7/23/2023 5:23 PM
306	I realize folks in Boulder are opposed to killing anything, but some things need to be controlled. We have bats to help, but they come into our house! Spray one good heavy dose!	7/23/2023 5:06 PM
307	Need to increase the County program	7/23/2023 4:51 PM
308	We need more!	7/23/2023 4:49 PM
309	I know folks complain about mosquitoes. I fear W Nile too, but I protect myself assiduously; others can learn this behavior.	7/23/2023 4:25 PM
310	Please stop spraying	7/23/2023 4:22 PM
311	I completely support eradicating mosquitoes	7/23/2023 4:01 PM
312	not effective.	7/23/2023 3:23 PM
313	I didn't know where to find the links for spraying days until I received the survey card a few days ago and found this website. Last Wed, my area was sprayed (Niwot) and we had just opened all the windows and turned on whole house fan at 10 PM. We had to run around and close all the windows so the spray would not come inside. So please make sure all residents are informed on how to access spraying days (note in Boulder and Longmont papers; post to Niwot Comm Association, etc).	7/23/2023 3:07 PM
314	See above	7/23/2023 2:49 PM
315	In Paul Noor Estates the driveway culverts need to be sprayed every month. Most are blocked and don't drain after a rain	7/23/2023 2:33 PM
316	You have not sprayed in Pony Estates and it's horrible	7/23/2023 1:53 PM
317	There is standing water in the drainage ditch on the east side of N 89th street most of the year. I believe the ditch belongs to boulder county. Can someone please fix the drainage of the ditch so we don't have a few inches of standing water in it all summer long.	7/23/2023 1:09 PM
318	What program? we are over run, with 3 full retention ponds on Boulder county land we are over run with Mosquitoes. Horrible, especially with the heavy rain plus ticks which we havent seen	7/23/2023 1:01 PM

2023 Boulder County Mosquito Control District Survey

	in 23 years	
319	We really appreciate that you spray! It really!!!! matters for our quality of life! Thank-you.	7/23/2023 12:12 PM
320	please increase the control of the mosquitoes in the wetland area just west of the houses on Carter Trail	7/23/2023 12:10 PM
321	Our neighborhood has an HOA. They inform the residents when spraying is scheduled. It is nice that one can subscribe to be notified. Not only is it helpful so windows can be closed, but it also informs me that there a number of mosquitos in the area.	7/23/2023 11:40 AM
322	Postcard regarding survey implies theres been some control in my immediate neighborhodd. I am not aware of any, has there been any? How do I verify that? Looking at schedules which are hard to figure out I see "Chance Acres" down the road from me but a mile away. Was I included (65th St between Nelson road and St Vrain Road)? No notifications of such (schedules show "Chance Acres" but no other 65th St areas (e.g. Trevarton Rd).	7/23/2023 11:21 AM
323	very wet year lots of water in roadside and	7/23/2023 11:14 AM
324	Any chance of more larval control in Walden Ponds marshy areas? Mosquitos abundant in west-side trails of both Walden Ponds and City of Boulder's Sawhill Ponds.	7/23/2023 10:50 AM
325	Thank you for being proactive about this!! While I don't feel we have a large amount of west Nile virus or other problems with mosquitos here, I'd like to keep it that way. Especially now that I hear about Malaria being back	7/23/2023 10:31 AM
326	Please kill them all	7/23/2023 10:19 AM
327	Vector Control sprays every Wednesday night. It has rained every Wednesday night for the past 5 weeks. Do they forgo the spraying, or spray another night?	7/23/2023 10:15 AM
328	I would like to be notified by email or text when spraying for mosquitos.	7/23/2023 9:42 AM
329	It gets really bad in the Gunbarrel neighborhood. I know that we have a lot of ponds, lakes, irrigation ditches, etc. I would just be nice if more could be done.	7/23/2023 9:23 AM
330	It is infuriating to me that we had to 'opt out' of the County spraying chemical toxins in and around our yard. I do not want any mosquito abatement near my property. If I did I would do it myself. It is infuriating to me that I am paying via BCMDC with my tax dollars for the killing of bees and other pollinating insects and bats and dragonflies because there are, hypothetically, fewer mosquitos. Let the summer heat kill the mosquitos and let nature be. What is your rationale for using public dollars to spray chemicals around? Let home owners make their own choices and use their own dollars if they want to try to control mosquitos on THEIR property.	7/23/2023 8:42 AM
331	Living in "rural" area, mosquitos are so bad this year that they definitely impact my quality of life and ability to work in yard and/or garden.	7/23/2023 7:38 AM
332	Truck seemed last week to be non-operational in front of my property, even though I did not ask for shut off. This is a change from years past.	7/23/2023 7:27 AM
333	Truck spray does not appear to be very affective. Mosquitoes are most abundant around streams and ponds in the area.	7/23/2023 7:23 AM
334	I really would like spraying to stop. I have lived in places where mosquitoes are actually bad, and Boulder county is nowhere near that. Spraying insecticides is unacceptable. I see the before and after, and my yard is full of Ladybugs, bees, etc. The day after a spray, they are nowhere. Please stop spraying.	7/22/2023 9:58 PM
335	No matter how low the levels of pesticides are sprayed in our neighborhood, we are still affected by it. We didn't know about the spraying program until a couple years ago when we heard the truck and saw the fogger. We had to figure out what it was on our own without county notice. We all had respiratory issues at the time and continue to seasonally. I'm not a fan of the spraying because it does have a cumulative impact. It might be helpful to provide education to homeowners about how to mitigate these issues like draining water, cleaning gutters, etc. in order to keep the mosquito levels down without needing to poison our air. Also, please notify residents of spraying schedules because many don't know about this program and we are told to stay indoors during spraying (clearly there is some level of toxicity here).	7/22/2023 9:53 PM
336	We have had SO MANY mosquitoes for YEARS. Honestly, I don't think your efforts are doing anything at all to control the mosquito population.	7/22/2023 9:16 PM

2023 Boulder County Mosquito Control District Survey

337	Risky	7/22/2023 9:04 PM
338	Wish you would come in and drive to the back of my property , I have 8.5 acres, they are very bad!	7/22/2023 9:03 PM
339	We strongly desire the adult mosquito pesticide trucks to stop spraying altogether. Right after they come, the bee populations in our gardens (several species) are all visibly decimated. And monarch butterfly eggs which we say adults lay in our milkweed never hatch. They all get killed by that spray. This "collateral damage" is unacceptable. We need pollinators to survive, and the wasps, who don't seem to be bothered, are a poor substitute for bees and butterflies! Further, these spray trucks come around 11 pm without residents being given any prior warning. Two of us living here have lung issues. Hearing that truck causes panic, sending us frantically scurrying around when we hear them coming to close all of the house windows so we don't breathe that pesticide. We urge you to please at least issue a public schedule for now so residents have some warning of the truck's arrival, and for the sake of our planet's health, please stop the practice of spraying altogether very soon. Thank you for asking us for input, and thank you for listening.	7/22/2023 8:40 PM
340	Because I garden most days, I really notice the effect of the spraying trucks on the counts of adult mosquitos. Definitely less mosquitos. Years where we have wet weather followed by heat, the counts are high. This year the spraying has helped and we need to keep up the control. I hope this survey is not a harbinger of reducing mosquito control.	7/22/2023 7:43 PM
341	Your methods are NOT WORKING!	7/22/2023 7:32 PM
342	None	7/22/2023 7:02 PM
343	Do more often in Lake Valley. Lots of water areas.	7/22/2023 6:46 PM
344	I suspect spraying mosquitos has decimated the population of butterflies and other insect populations. This year there are many more dragonflies and bats eating mosquitos. So, I have not seen a lot more mosquitos.	7/22/2023 5:48 PM
345	Thank you for this service!	7/22/2023 5:17 PM
346	More please.	7/22/2023 5:09 PM
347	I live across the park from the wetlands. I have not seen any mosquito control this year or last year. What am I paying for? I'm getting bitten a lot! I have to wait until Sunset to walk my dog when it's hot out. That's the time the most mosquitoes are out. It does not seem like any mosquito control has been done here in the East Palo Park and Pleasant View Soccer Field area. Why would I pay you anything more when you're not doing anything here with the money I've been paying every year?	7/22/2023 3:55 PM
348	The west side of sawhill ponds has an extremely large number of mosquitos. It would be nice if their numbers could be reduced somehow.	7/22/2023 3:47 PM
349	At first I thought this was a joke. Whatever you're doing is not working.	7/22/2023 3:28 PM
350	It's been a bad year for mosquitos. Nothing seems to be working. If there is an effective treatment, we would pay more for it but would not pay more for more of the same ineffective treatments currently being used.	7/22/2023 3:18 PM
351	We've lost too many pollinators from the County program; we've planted a pollinator garden, and numbers of pollinators (including bumble bees) have plummeted. Larvicide is more targeted and its application might help native insects. Mass spraying of pesticides is no longer an option, given the "insect apocalypse."	7/22/2023 3:18 PM
352	This has been the worst mosquito summer in memory in the Valhalla neighborhood near the Boulder res. We've only gotten to eat outside once-July 4- and that was because it was windy. I get bombarded when I go outside to water the garden.	7/22/2023 3:14 PM
353	FYI-last August I contracted WNV sitting in my backyard. I was in the hospital five weeks. It devastated my body and I am still partially paralyzed because of it. It is a very serious disease and should be taken seriously.	7/22/2023 2:04 PM
354	I live near openspace in heatherwood boulder county. There are 2 levels of drainage in the open space, & the top collection area is clogged so it does not drain to the bottom area to be drained away so it's a stagnate breeding pond this year with all the rain (I have called) love my	7/22/2023 1:59 PM

2023 Boulder County Mosquito Control District Survey

Wednesday spraying but after rains the population goes up and we have never had so many mosquitoes before.

355	I think spraying poison indiscriminately in my neighborhood is a terrible policy. Making me pay for it in the form of property tax is disgraceful. Horrible policy.	7/22/2023 1:59 PM
356	We back onto open space - I know vector control scatters pallets to control larvae in the open space, but its so overgrown with all the rain this year, I am not confident they can actually access all the areas they need to.	7/22/2023 1:58 PM
357	Boulder should do things for residents without charging more money for everything	7/22/2023 1:52 PM
358	We live next to a ditch/creek that drains to the water treatment plant, and the area near the creek seems to be the worst reservoir. It was much worse this summer due to moisture than it was last summer, but I have seen the mosquito control company regularly coming to trap and treat.	7/22/2023 1:47 PM
359	Would support increased cost if it was more effective.	7/22/2023 1:36 PM
360	I got the survey, but I don't think you spray directly in the Majestic retreat neighborhood so I'm not sure how to gauge it..	7/22/2023 1:36 PM
361	Stop poisoning the planet, dammit! The number of butterflies and pollinators that I have seen this year (in many places in Boulder county, not just in my yard) has gone WAY, WAY DOWN from past years... Swallowtails and monarchs seem to be nearing extinction...	7/22/2023 1:33 PM
362	Use technology more to keep citizens informed ... my neighbors say things like "finding a map of where they're spraying on their website is really difficult - it's like they're hiding it". Be transparent - tell people what you're doing, when, and where. We wear big boy pants - don't let the climate nuts cause you to hide. Mosquitos need to be controlled in heavily populated areas.	7/22/2023 1:12 PM
363	I praised it for years but not this year.	7/22/2023 12:41 PM
364	Knew you were charging \$33 for mosquito control but didn't know if it was being applied for not since we had a lot of mosquitoes before I started hiring an outside company. If I am going to be charged would like if the application would be effective against mosquitoes.	7/22/2023 12:31 PM
365	I dont care if BCMCD uses a pesticide or ? But the people of Boulder County tend to get weired out over products that are labeled pesticide.	7/22/2023 12:31 PM
366	I love summer, but I am not able to enjoy the outdoors except in the heat of the day which I am at work during due to mosquitoes as I am a magnet for them and swell up when bitten. Please do whatever you can to increase control of them.	7/22/2023 12:20 PM
367	The mosquitos in our area are almost intolerable we can't go outside after 5 pm without getting 10+ mosquito bites. We would greatly appreciate any help you can provide.	7/22/2023 11:51 AM
368	We live in Gunbarrel Estates. The mosquitoes are AWFUL most of the time except for a few days after the infrequent sprayings. It is not possible to walk in our neighborhood or on the adjacent LoBo trail in the evenings when it is cools down enough to walk. We often drive to Niwot to walk where the mosquitoes seem to be more controlled. PLEASE increase mosquito control in Gunbarrel Estates.	7/22/2023 11:42 AM
369	More often would be great	7/22/2023 11:39 AM
370	BC mosquito control has been exemplary for many years in our area. We feel confident in the ways and methods that have been used in past and feel comfortable in allowing current practices to continue.	7/22/2023 11:35 AM
371	Near the gunbarrel community park and celestial seasonings it can get pretty bad.	7/22/2023 11:22 AM
372	years ago we use to have a truck come around in the evening to spray, why don't we have that any more?	7/22/2023 11:15 AM
373	If you are currently doing something this its not working.	7/22/2023 10:58 AM
374	Mosquito control personnel used to come to our property every year; however, we have not seen anyone in our area for 2+ years	7/22/2023 10:46 AM
375	i am rural east county and eldora. farm animals on plains. cant control standing water as its	7/22/2023 10:38 AM

2023 Boulder County Mosquito Control District Survey

	needed for livestock. have not witnessed any control in our area just east of lafayette or eldora	
376	The BCMCD program, as currently implemented, is completely ineffective. As a result, I have to buy commercial control services to be able to enjoy my property. Infrequently driving down the middle of the street, spraying sparcely, just doesn't provide the necessary control, especially when done just before a rainstorm! Trying to segregate disease causing adults from non-disease causing adults is futile, as the back of your neck can't tell the difference! Finally the anti-larval effort (if there really is one, beyond urging residents to drain standing water) is invisible to the community, and judging by the number of adults in the air, ineffective.	7/22/2023 10:13 AM
377	Truckmounted mosquito control is ineffective for the area that we in. The environmental harm that it does does not provide or outweigh the benefit possibilities. Please stop truckmounted spraying.	7/22/2023 10:08 AM
378	I have a wetland and pond on my property - so lots of mosquitos. A few years back a Boulder County employee used to come to spray on my property. But that isn't happening now and it needs to happen - there are so many mosquitos that it is almost impossible to go outside in the evening.	7/22/2023 9:58 AM
379	Please help out in our area, it is really affecting our quality of life, and my kids are constantly covered in both bites and repellent chemicals.	7/22/2023 9:49 AM
380	I am glad to know the BCMCD is actively working on the issue.	7/22/2023 9:48 AM
381	I really don't know enough to have an informed opinion, so take my responses with a grain of salt. But I worry that the spray methods will impact other insects. We also don't have central airconditioning, so our windows are usually open. When the truck comes around to spray I wonder how toxic the spray is for humans and try to close the windows.	7/22/2023 9:40 AM
382	We are just now (midJuly) seeing a reduction in mosquitoes on our property. This has been the worst year for mosquitoes on our property that we've experienced since moving in in 2009. The control came much too late for us, and significantly impacted the use of yard and patio this year.	7/22/2023 9:39 AM
383	We are surrounded by CITY owned open space properties in our County neighborhood. This area is much much larger than our neighborhood. How effective is the County's program given this situation???	7/22/2023 9:34 AM
384	My household is firmly against spraying for adults, for the impacts on both human and native bee populations.	7/22/2023 9:32 AM
385	We are not aware that our area has ever been treated by Boulder County	7/22/2023 9:00 AM
386	Keep it up.	7/22/2023 8:59 AM
387	Insecticide spraying should be opt-in only. There was insufficient notification of the spraying and you are putting people and their families at risk.	7/22/2023 8:47 AM
388	Try to send out warnings before spraying. Thanks	7/22/2023 8:38 AM
389	please see question #9.	7/22/2023 8:23 AM
390	With all the rain, this year is BAD!!! Please increase your efforts! Also, would like up-to-date info about West Nile in our area- email, or post on Nextdoor, or other public notification.	7/22/2023 8:14 AM
391	Keep us informed so we understand the value.	7/22/2023 7:50 AM
392	Provide larvae killing products for those with irrigation ponds and ditches	7/22/2023 7:35 AM
393	We have bee hives and always request that they DON'T spray around our property. I know that you'll say spraying is harmless to bees, pets and humans, but we don't believe this.	7/22/2023 7:34 AM
394	Please be proactive in letting us know when you will be spraying in the area. Also, please be proactive in giving us information on how toxic the spray is to humans and animals and for how long.	7/21/2023 11:46 PM
395	It is not happening in my neighborhood, never seen a truck or any application and I have a TON of mosquitos. My property tax dollars are NOT being used for mosquitoes	7/21/2023 9:01 PM
396	mosquitos really annoying this year	7/21/2023 8:29 PM

2023 Boulder County Mosquito Control District Survey

397	It has been ineffective this year. Too many mosquitoes to be outside without spraying myself.	7/21/2023 8:24 PM
398	Sometimes the mosquito truck comes through the neighborhood when it is raining or really windy so it seems like it is not ideal conditions for mosquito control.	7/21/2023 8:13 PM
399	Sometimes the mosquito truck comes through the neighborhood when it is raining or really windy so it seems like it is not ideal conditions for mosquito control.	7/21/2023 8:12 PM
400	I have never seen the mosquitoes this bad.	7/21/2023 7:51 PM
401	I know everyone is short staffed but with all this rain, Boulder County and the farming areas and tree growers are dying this year. We need someone to actually help us at least lessen the amount of mosquitoes we're seeing. Not only are the mosquitoes at their highest, we've had the least "control" or "help" from the county this year.	7/21/2023 7:36 PM
402	I am grateful for the work that you do. It helps.	7/21/2023 7:31 PM
403	afraid to do any treatments myself since neighbors have bees and I don't want to disrupt that at all.	7/21/2023 7:08 PM
404	It's currently not working; there are more mosquitos than ever.	7/21/2023 6:52 PM
405	Do we even have a mosquito control program? My yard is full of mosquitos! We need desperately need more mosquito control!	7/21/2023 6:30 PM
406	Increase number of springs throughout the summer. The mosquitoes and miserable and you don't do enough to rid them.	7/21/2023 6:24 PM
407	The spray would be more effective if: 1) the didn't spray just before heavy rain 2) actually sprayed for more than 10 seconds. The truck came thru and did NOT do the cul de sac	7/21/2023 6:22 PM
408	We are in The Reserve, next to Sombrero Marsh, the mosquitos are awful 🤢🐛	7/21/2023 5:57 PM
409	We need help. Massive, weekly spraying or whatever it takes.	7/21/2023 5:35 PM
410	We would appreciate anything further you can do to help mitigate the mosquito problem in our neighborhood!	7/21/2023 5:34 PM
411	I am not sure what to suggest. I trust the scientists' recommendations, but I think we are experiencing the results of climate change and the mosquitos will continue to get worse as Boulder gets hotter and more humid.	7/21/2023 5:14 PM
412	Trucks come by every week spraying pesticides (and they spray our property even though asked not to). This has not reduced the number of mosquitos this summer. There has to be a better solution than poison.	7/21/2023 5:13 PM
413	I'm concerned about the impacts on beneficial insects. Recommend a mosquito control strategy that minimizes those impacts on beneficial insects	7/21/2023 5:13 PM
414	I live in the Heatherwood neighborhood in Gunbarrel, and the mosquitos have been terrible in recent years. It really affects my ability to get outside to work in my yard or walk in the neighborhood	7/21/2023 5:09 PM
415	I was completely unaware there was a program and have never seen any abatement in my Gunbarrel neighborhood	7/21/2023 4:53 PM
416	I've never seen any mosquito control in my neighborhood. I live in Orange Orchard	7/21/2023 4:36 PM
417	I don't want mosquito control to be so much that it negatively impacts birds and bats.	7/21/2023 4:33 PM
418	Whatever is being done in the area around Boulder Country Club, it is insufficient and ineffective. We are being bitten by mosquitoes in a large area around our home, including walking paths around area ponds and greenspace, and at all times of the day and evening.	7/21/2023 4:13 PM
419	I would deeply recommend more services this summer. The mosquitos are beyond terrible.	7/21/2023 4:07 PM
420	It's very difficult to use your scheduling software-needs a search function. I found that the Heatherwood neighborhood was done July 19. Can you post/email/text when when spraying and mid July seems late to deal with mosquitos. I would support a tax increase if the program helped deal with mosquitos in my neighborhood. But it does not, unfortunately.	7/21/2023 4:03 PM
421	It has worked and is greatly appreciated. homeowner controls still necessary but quite an	7/21/2023 3:56 PM

2023 Boulder County Mosquito Control District Survey

	improvement has been noted.	
422	I've lived here for over 20 years, and we never had many mosquitoes until you started spraying. By using adult pesticides, you've eliminated all the natural predators of mosquitoes and have thrown the whole ecosystem out of balance. It's made the problem much worse than it ever used to be. Please stop spraying adult insecticides and use larvicides instead, at least until our native insect population recovers. Also, fixing the ditches along the roadways in my neighborhood so water doesn't stand there for weeks at a time would help a lot. Or apply larvicides to them. Stop poisoning the whole neighborhood.	7/21/2023 3:47 PM
423	Please keep or increase the control you are doing.	7/21/2023 3:44 PM
424	It is NOT working - whatever you are doing. I'm about to get a bat house	7/21/2023 3:41 PM
425	I am VERY grateful for what you do!	7/21/2023 3:14 PM
426	We have large retention ponds within the development; ducks don't seem to contain all the larvae themselves, so we need more help, but only if it can be done without harm to water fowl.	7/21/2023 2:28 PM
427	What was done in the mosquito control program in the BCMCD?	7/21/2023 2:28 PM
428	This is a dumb-ass survey. You act like people are schooled in the world of mosquitos. I have not clue about 3/4's of the questions. Only in Boulder would something like this be done. Hahahaahaha	7/21/2023 2:25 PM
429	Get weedy areas cut often so chemical solutions are less intrusive	7/21/2023 2:15 PM
430	Mosquitos are a tremendous detriment to outdoor recreation in my area (Flagg Dr), but, unless I am misreading, no mitigation has been applied in my area for the last few years even though we pay into the program. We're a forgotten area in many ways and it feels as though this extends to the mosquito control program too. Additionally, more maps would be helpful as well; both the reports and the VDCI Google Calendar based list of applications use confusing/unclear neighborhood names instead of just showing a map of where applications occur.	7/21/2023 2:10 PM
431	Mosquito control appears to be non-existent in my area, even though I pay for it with a fee in property taxes.	7/21/2023 2:06 PM
432	would like more information about what causes mosquitos to bite some people and not others. Or at least not have a reactions to the bite.	7/21/2023 1:54 PM
433	I am very opposed to adult spraying due to the collateral damage to other beneficial insects. The current operations don't even follow best practices of spraying in the evenings when the mosquitoes are most active and the pollinators are less active. Larval control using bti is far less damaging, so I'm okay with that. In the last ~5 years, the insect population (including bees, beetles, butterflies, and others) has dropped significantly on my property, and I am really afraid of the consequences of continuing to destroy the natural balance of the ecosystem in this way. I am far more concerned about the spraying than I am about getting West Nile Virus. I put on deet if I'm gardening in the evening, and it is very effective.	7/21/2023 1:17 PM
434	When we first moved in in 2007, we saw Boulder County mosquito control trucks in our neighborhood annually. I am of the opinion that Boulder County does not perform mosquito control in our neighborhood at all. Since this is part of our property taxes, we should be getting the service multiple times per season.	7/21/2023 1:16 PM
435	I may see 1 mosquito in the house and I do not go out after dusk. The spraying seems to keep the mosquitos at a minimum.	7/21/2023 1:09 PM
436	Our area hasn't been treated this entire season for mosquitos by the county. Very disappointing!	7/21/2023 1:07 PM
437	Seems we are assessed for mosquito control but there has been none in our neighborhood	7/21/2023 1:05 PM
438	Tost of mosquito control has gone up from \$20 and every year that we call and a trap is placed, we get sprayed. Why do we have to call for a trap when we are near ditches and lakesand there is a history in our neighborhood? i AM WILLING TO PAY MORE IF THERE IS CONSISTENT CONTROL	7/21/2023 12:58 PM
439	would be nice to know schedule when the trucks come not sure if they cover the whole block	7/21/2023 12:35 PM

2023 Boulder County Mosquito Control District Survey

where i live - seem not to cover Corinth they have come only once this year i think the web site for mosquito control has NO current information on Boulder county we have two year round shallow ponds and a running ditch the ground supports several kinds of rushes and sedges

440	I am strongly opposed to treating adults with spray insecticides, because they are non-specific and kill all insects. Most insects are beneficial, and killing them with sprays is unacceptable. Control must be very targeted to the species , ie mosquitoes.	7/21/2023 12:14 PM
441	We need more mosquito control	7/21/2023 12:05 PM
442	I support any and all efforts to control the mosquito population – I was very happy to see the trucks, which resulted in a noticeable decline in mosquitos in my neighborhood.	7/21/2023 11:56 AM
443	My neighbor complained about mosquitos and hired a professional. I have not been bothered at all	7/21/2023 11:52 AM
444	I live and work on this farm and haven't seen a single mosquito control truck on our street or at our gate. Going forward, coordination with OSMP is a must. There are pools of standing water in the open space adjacent to us that are so thick with mosquito larvae that I can see it from 20' away	7/21/2023 11:47 AM
445	I do not want the neighborhood spraying for adult mosquitos. It is not good for our pollinators. There are other less harmful mosquito traps that could be deployed in neighborhoods. And increase the support for natural methods - if the county provided bat houses, traps, etc I would happily put them in my yard. I know that many of my neighbors feel the same way and do NOT like the spraying!	7/21/2023 11:32 AM
446	The mosquitoes are really bad in the evenings. It's hard to go outside at night ans not be covered in bites.	7/21/2023 11:29 AM
447	This has been a very wet year but mosquitos are out of control	7/21/2023 11:28 AM
448	Please do every county road every week.	7/21/2023 11:15 AM
449	Please do more. Also do you even go down Rogers Rd between airport rd and Hover this is Boulder county and I have never see you guys there.	7/21/2023 11:11 AM
450	We see mosquito control trucks visit various ponds near the sewage plant, but have never witnessed control measures. Homes in this area along Jay Rd are surrounded by irrigated fields.	7/21/2023 11:07 AM
451	It's not clear to me what is done in my area specifically today, so it's difficult to assess is the current methods are affective or not.	7/21/2023 11:03 AM
452	I have been begging BC to come to our subdivision for years. We are treated like Boulder 's red-headed step children. I don't mind paying in, but, I want our area to get some attention! The mosquito problem is horrendous!	7/21/2023 11:03 AM
453	It would be great to get emails about spraying schedule, success of control programs, etc. in a newsletter or email	7/21/2023 10:38 AM
454	The mosquitos seem especially bad this year. Please step up the spraying!	7/21/2023 10:08 AM
455	Need MORE mosquito control!!! They are making our lives miserable. We often chat with the Mosquito Man (or Woman) who comes out with a dipper to check on larvae in our wetlands, and the people almost always say there are none -- but we are overwhelmed with mosquitoes every year, not just in rainy ones, so I don't understand the discrepancy.	7/21/2023 10:01 AM
456	This has been a bad year for mosquitoes. I believe more frequent applications are needed.	7/21/2023 9:59 AM
457	This should be stopped. There are many things we have the power to do to take care of our own health and well-being without having to resort to harmful chemicals. The crap that is being sprayed is killing bees and other beneficial insects (and most likely other wildlife as well), and it's got to stop. Now. But, because we are so short-sighted, we will wait to effect change when we have to learn how to pollinate our own food.	7/21/2023 9:54 AM
458	The county used to inform us when the night time spraying was going to happen. We then could close our windows and stay inside. It's been years since any notifications have been issued. Does the county even spray anymore? What is being done in my neighborhood to control the mosquitoes?	7/21/2023 9:47 AM

2023 Boulder County Mosquito Control District Survey

459	It is good that the truck goes up and down our long driveway when spraying.	7/21/2023 9:47 AM
460	It seems that the program was started too late this year! The mosquitoes have been horrific since the start of June. The past 2 weeks is when I've seen the trucks in our area. We do appreciate the trucks spraying in the late evening / early night times. It was about 11:30pm when the truck came around this week.	7/21/2023 9:35 AM
461	With all of the moisture we have had, it is almost impossible to go outside without getting bit up. We also have a pond in the backyard. However my 2 year old was covered in mosquito bites almost from head to toe for the first month of summer. Now we just don't go outside when the mosquitoes are more active (usually around 7ish at our house). But are concerned because of the diseases they can carry. I also wonder if there is a better alternative to pesticides that the Boulder county can use.	7/21/2023 9:20 AM
462	I firmly believe the spraying is effective in the front of my property. Not sure how effective it is in the back. I live on 1.5 acres and border an irrigation ditch and 100 yards to Burch lake. Lots of nearby water. I support the control program you are utilizing.	7/21/2023 8:41 AM
463	Haven't seen any mosquito control trucks in our area this year.	7/21/2023 8:25 AM
464	Of course there needs to be a flexible plan to match the conditions each year. In the 11 years we have lived in Boulder County this year has been the worst for mosquitos. It nearly rivals our experience at our place in FL.	7/21/2023 7:58 AM
465	There are lots of private services that offer mosquito control, but from what I can tell they seem to use pesticides with a residual which seems likely to harm other bugs. The ultra low volume sprays used by mosquito control districts for adult mosquitoes would be better. I can't find anyone offering that for my property, I am guessing because it isn't very effective at a small scale. Mosquitoes are a big problem at my house, and I don't really notice any benefits from the mosquito control district, but I'm happy to pay for it and pay slightly more if it was expanded. An education/advertising campaign to get neighbors to drain standing water would also be helpful.	7/21/2023 7:40 AM
466	doesn't seem to be effective	7/21/2023 7:18 AM
467	This year, Vector Disease Control has been terrible on our property. Previous years, they started early in the season but this year, we had to call 3-4 times to get them to come. They finally came in July. Then they said they would come only every 2 weeks a couple more times this summer. So far, we have only seen them once all summer. // We have one large pond, a seasonal stock pond, and a stream with marshy areas, and several other wetland areas on our property. In the past, they assessed and treated most of these areas. However, this year the VDC technician who came here said they only had the large pond on their list. They said they would check with the office and come out to treat with larvacide a few of the other areas, but they did not. // VDC really let us down this year as we got virtually no treatment. (By the way, we also keep bees, so we can't have them spraying pesticides. In the past, Ottertail and VDC used Mosquito Bits and it helped.)	7/21/2023 6:43 AM
468	I'm glad to learn about mosquito control where I live (unincorporated Boulder County). Mosquitoes seem to have become more prevalent lately, and my family is pretty allergic.	7/20/2023 11:18 PM
469	I see the mosquito control levy every year on our property taxes but have NEVER seen any mosquito control application trucks in the neighborhood.	7/20/2023 8:59 PM
470	My husband nearly died from West Nile Last year. We are in Gunbarrel Estates. We would like a more proactive approach (earlier in the season) to mosquito control if possible	7/20/2023 8:55 PM
471	never see or hear from mosquito control	7/20/2023 8:53 PM
472	We pay for mosquito control on our lane but it never hspems.	7/20/2023 8:49 PM
473	We live right next to an irrigation ditch owned and managed by Boulder County. We have so many mosquitos and it really affects our quality of life in the evening. Please do more to control the mosquitoes in our area.	7/20/2023 8:39 PM
474	We have not seen any control program in effect recently, and we used to. I have wondered if it is still occurring. Also, I would much appreciate some attempt at a schedule, so that we know when spring occurs.	7/20/2023 8:38 PM
475	We have lived in our home for over 30 yrs and the mosquitoes have always been bad but	7/20/2023 8:29 PM

2023 Boulder County Mosquito Control District Survey

	never this bad. Whatever you have been doing has never helped.	
476	Is there any mosquito control in Willis Heights? Doesn't seem like it.	7/20/2023 8:10 PM
477	Use truck mounted sprayer	7/20/2023 8:02 PM
478	Given how wet it is this year, mosquito problems are less than I would expect. I think you are doing a good job.	7/20/2023 8:01 PM
479	Spraying needs to happen more often when mosquito season is so bad, like this year due to the all the rain	7/20/2023 7:35 PM
480	I'm prone to mosquito bites, so I fully support any measure BCMD takes regarding mosquito control.	7/20/2023 7:31 PM
481	Since the use of pesticides affects more insects and wildlife than just mosquitoes, I am not in favor of the use of ANY pesticides for mosquito control. Before advocating for either, I would also like to be better informed about what species in addition to mosquitoes are affected by both bacterial and pesticide control.	7/20/2023 7:05 PM
482	See above Its not on our streets.	7/20/2023 6:59 PM
483	I am allergic to mosquitos. They are a real problem for me.	7/20/2023 6:59 PM
484	Mosquitoes on Bobolink Trail have always been especially aggressive. Now I even get mosquito bites at dusk while at Pearl Street Mall Bands on the Bricks events.	7/20/2023 6:49 PM
485	PLEASE increase control in the area around our home. The mosquitos are HORRIBLE this year! 6033 Jay Rd., Boulder 80301	7/20/2023 6:40 PM
486	I have been here (near Rodeo Drive on 115th) for 23 years and we have never had any Boulder County Mosquito Control even though I have to pay the fee every year.	7/20/2023 6:21 PM
487	If there is a wet spring it would be better to start early with the larval bacteria. Also contacting residents with a gentle reminder to empty out standing water would be helpful.	7/20/2023 6:16 PM
488	I live next to a swamp/wet land and, considering that, I don't feel as if my mosquito population is a real problem -- maybe I'm naive, but I feel that the ecosystem is taking care of the mosquitos; and, if I'm clothed properly and use body sprays, I can avoid bites	7/20/2023 6:13 PM
489	our neighborhood is near 3 ditches (Gunbarrel Estates - unincorporated). Mosquitos are terrible here. I'm not aware of any truck-mounted spraying this summer yet.	7/20/2023 6:02 PM
490	If I am already paying for Mosquito control as part of our property taxes, the service certainly hasn't been provided in our neighborhood at all. I pay for professional service and also fog our property several times each summer. I didn't know I was also already paying for the county to do this. We are on Prairie Knoll Drive, Longmont, CO 80503	7/20/2023 5:48 PM
491	Appreciate that the county is starting to address the mosquito challenges.	7/20/2023 5:41 PM
492	The county is no longer coming to my house and spraying the larvae with corn cob or whatever it did in the past. I need help here now	7/20/2023 5:25 PM
493	i understand we've had a wet year this year, but seems like there's been no control measures - mosquitos have been VERY active this year.	7/20/2023 5:23 PM
494	It would be very helpful if we had a little notice prior to our area being sprayed so we could close the windows on our home. E-mail, text, Twitter, etc.	7/20/2023 5:21 PM
495	Come twice a week instead of once. Slow the spray truck down. They used to drive slower, now it is a speed race through the neighborhood.	7/20/2023 5:21 PM
496	I have not seen or heard a truck spraying this year	7/20/2023 5:19 PM
497	Please do more for Boulder county residents who pay the mosquito tax on property taxes.	7/20/2023 5:14 PM
498	I am concerned about protecting Bees and other beneficial insects, as well as , of course the safety of people and dogs and other animals. .	7/20/2023 5:06 PM
499	We are somewhat surprised that with this year's very high Spring and early Summer rain, and having smelled anti-mosquito treatment applications - particularly in the Boulder Creek area -	7/20/2023 5:05 PM

2023 Boulder County Mosquito Control District Survey

mush less than in past years, mosquitos are not nearly as numerous and problematic as we expected - although they are definitely a problem.

500	Mosquitoes are always an issue in Gunbarrel as there is a lot of standing water and ripe for larvae harvest. Boulder County waits too long every year before they spray. When someone dies from West Nile or other issue related to these pests then everyone jumps into action. There are a significant amount of older people who enjoy the outdoors and these pests hamper those activities.	7/20/2023 5:03 PM
501	I have NEVER observed any Boulder County mosquito control in my neighborhood	7/20/2023 5:00 PM
502	please provide the landowners with more information and potentially products that we can use to control larval in our standing waters...	7/20/2023 4:55 PM
503	Spraying is a wasted resource. Go after the larvae and standing water.	7/20/2023 4:52 PM
504	STOP SPRAYING...try to find other less harmful alternatives...our environment is hanging by a thread.....	7/20/2023 4:43 PM
505	I saw a spray truck one morning and it seemed like the mosquitos	7/20/2023 4:43 PM
506	Wow, I learned so much from your website. Thank you for the opportunity to answer these questions and for directing us to your website, and thank you for all of your expertise in protecting our community from mosquitos.	7/20/2023 4:38 PM
507	Increase education and information on non pesticide natural repellants and controls. Plants 🌿, naturally occurring mosquito odors and organic treatments. Literature on more planet, honey bee and organic farm friendly treatment.	7/20/2023 4:18 PM
508	its a joke. a truck speeds down the street around 9-10 pm. sometime times you can hear a pump running sometimes not.	7/20/2023 4:18 PM
509	The control measures (truck mounted) are a big help. However the count vs react algorithm has to large a time constant... ie by the time the counters reach a clip level, it takes too long for the controls to occur.. so the populations go from adequate to wicked before the trucks are out again.	7/20/2023 4:11 PM
510	Quit wasting tax payer money on stupid surveys!!!!	7/20/2023 4:01 PM
511	We do not get any mosquito control at all!!! Have not for a couple of years now, so all \$33 is total waste.	7/20/2023 3:39 PM
512	I didn't know there was one in my area. It doesn't seem to work. I have LOTS of mosquitos.	7/20/2023 3:37 PM
513	We do not want insecticides on or near our property. I have tried to opt out, but the truck continues to spray poisons on our property. I see that your survey does even have an answer box for people that do not agree with this program.	7/20/2023 3:32 PM
514	The mosquitoes have been ghastly this year. They have negatively impacted the enjoyment of our yard. We don't go outside, period.	7/20/2023 3:29 PM
515	If you are supplying mosquito control to my neighborhood, it is definitely not working.	7/20/2023 3:22 PM
516	have never been notified of spraying nor seen a truck enter my street. Don't mind taxes, but do not believe my area is treated at all Since my property is at the end of a cul de sac in a rural area, any control that is done seems to be ineffective.	7/20/2023 3:21 PM
517	Can you spray Pony Estates 12752 polo PI	7/20/2023 3:11 PM
518	I live adjacent open-space in Gunbarrel, near or between numerous lakes, water bodies, and/or irrigation ditches....yet have not observed any mosquito control efforts to-date. This is troubling to me, because it seems to be one of the worse mosquito seasons on record due to the very wet spring and early summer; yet there has been very little outreach from Boulder County to various communities in particular with exigent risks of West Nile across 95% of it. In fact, I believe I contracted a mild case of it a month ago and are still experiencing symptoms. So it troubles me when other communities like Fort Collins report their trap findings in the newspaper, yet Boulder County does not seem very forthwith with such information/results to the media nor promote much awareness surround their efforts. Since my tax dollars and assessment fees support likely also such monitoring, I expect such data to be openly and transparently shared; as otherwise feel this survey is more an afterthought PR campaign than	7/20/2023 3:08 PM

2023 Boulder County Mosquito Control District Survey

anything else. There should have first been a card mailed out with useful information/local measurements/etc on it along with a website to periodically visit for updates. I also believe when nuance and noxious weeds allowed to overgrown and are not maintained in a timely fashion, which largely appears to be the case on the nearby open-spaces and trail adjacent that I frequent; this offers appealing mosquito habitat and thus hampers any effective mitigative efforts in terms of exposure control (another adult strategy beyond just pesticides). There should absolutely be some coordination between weed and mosquito control, whereas I currently think the two services oddly operate without such co-considerations.

519	Keep us informed about when spraying is taking place and overcall "capture" rate of adults to show the program is working.	7/20/2023 3:07 PM
520	THANK YOU...	7/20/2023 3:06 PM
521	Dont think our area has been sprayed in years by the county, due to other neighbor complaints	7/20/2023 3:06 PM
522	The county used to send a truck around periodically for mosquito control. I haven't seen one on Phillips Road for years. No spraying is why I think \$33 tax is too high...we get nothing for our money.	7/20/2023 3:02 PM
523	I would like an option to turn off the mosquito spray as it sprays right next to my organic vegetable garden	7/20/2023 2:56 PM
524	We live next to the Lefthand ditch. The truck comes through and does our neighborhood(Boulder Hills) but always skips our cul-du-sac! We need the ditch sprayed and our area sprayed. The mosquitoes are terrible this year!	7/20/2023 2:53 PM
525	Money used to control disease related mosquitoes is relatively inefficient relative to education and other sustainable control methods. There is no need to control nuisance mosquitoes in my neighborhood.	7/20/2023 2:51 PM
526	Living near the creek, on 63rd street, several of us have contracted west nile virus. They need to spray regardless of a farm that calls itself "organic" when it's on a meth clean-up site.	7/20/2023 2:46 PM
527	If your spraying of adult mosquitos also kills bees and beneficial insects, shame! We need the bees, and need to find a way to control moquitos without killing other insects.	7/20/2023 2:41 PM
528	No more spraying. Leverage your creative problem solving skills to look at this issue holistically. Focus on natural mosquito predators such as bats. I'm a health professional and am seeing increased health issues as a result of irresponsible shortsighted environmental control tactics in Boulder county.	7/20/2023 2:31 PM
529	Seems that spraying on evenings when it is lightly raining is not really the best idea but don't know that for sure.	7/20/2023 2:31 PM
530	Does not work	7/20/2023 2:13 PM
531	i see many more applications of pesticide by VDCI this season than any time in the past that i've been here. not sure how healthy this is but the mosquitoes can be horrific here.	7/20/2023 2:06 PM
532	I live on Saint Vrain road near 65th, and I have never seen ANY mosquito control here despite being taxed \$33 annually. How about sending some spray trucks out to these neighborhoods ?	7/20/2023 2:01 PM
533	With the extra rain this year it has multiplied the mosquitos in quantity and extended their season. I have already had West Nile and don't know if I can get it again. I feel like I have since the welts are bigger than usual (approximately the size of a 50-cent piece) that something could be done.	7/20/2023 1:46 PM
534	Frankly we have never seen Boulder county out here doing anything about mosquitos. This year has been horrible.	7/20/2023 1:45 PM
535	We are so thankful that we're finally being included with Longmont spraying. In the past we were told that the trap defining our area was more than 3 miles away, when we're located right across the highway from Longmont.	7/20/2023 1:34 PM
536	If there is mosquito control in my area it is NOT WORKING! I am upset that I am being charged for control and I can not go outside the house without being bit even with mosquito repellent applied to the body and by purchasing sprays for the lawn.	7/20/2023 1:31 PM
537	Using pesticides to control adults will affect other insects, many of which are beneficial. The	7/20/2023 1:22 PM

2023 Boulder County Mosquito Control District Survey

emphasis for disease control should be at the larval stage and on education so residents understand what they can do to reduce mosquito activity.

538	Not mosquitoes exactly, but we have a pretty bad Japanese beetle problem in our neighborhood, and would definitely appreciate county help in mitigating it	7/20/2023 12:59 PM
539	To my knowledge there is no control measures being taken in my Boulder/Larimer County line area. There is only monitoring/trapping mosquitoes around Ish lake for testing.	7/20/2023 12:55 PM
540	The mosquitoes in our area are completely out of control, so much so that we are unable to go outside in the evenings or mornings to enjoy our deck/yard/porch. I am not sure if any larval control is done in our neighborhood, but a truck does come by every Wednesday to spray for adult mosquitoes and it does not do enough to mitigate the mosquito problem. I don't particularly like the spraying because I'm concerned about its affects on pets and pollinators, and it prevents us from using our whole house fan to cool off the house in the evenings, forcing us to increase our energy usage on AC those days. I personally would be in support of placing mosquito traps around the area (in open space?) that would draw mosquitos away from homes, and/or building bat houses for more natural mosquito mitigation. We are really in desperate need of a better solution than the pesticide trucks.	7/20/2023 12:32 PM
541	Would like to understand if regularly-placed and continuously-running CO2/heat based traps can help reduce adults without impacting other species.	7/20/2023 11:54 AM
542	Mosquitos were horrendous in 2005 and for several years thereafter. Then good control for many years. Now mosquitos are much worse again this year curtailing use of our yard and deck.	7/20/2023 11:22 AM

Q12 To help us better understand mosquito activity issues within the BCMCD, please provide the zip code of your property.

160	They consistently miss our house by turning on fog at the house after ours. I know our two neighbors to the east don't want to be sprayed (that's fine), but our house and our neighbor across the street do want to be sprayed. 6431 Redwing place. Also, and most importantly, two things, I signed up for notices via text or call and have not received any so far this year! And it would be nice to see data on what chemicals are used and how they impact bees (a little a lot or not at all). Everyone I know is frustrated that this II do is not available easily.	8/1/2023 12:05 PM
