Glenwood Springs, Colorado

COLORADO

Department of Local Affairs
State Demography Office

Key Population Trends

- Lower fertility rates = Fewer births
- Aging = More deaths
 - Slower population growth
- Net migration a key population growth driver
- Increasingly more diverse

Global Trends

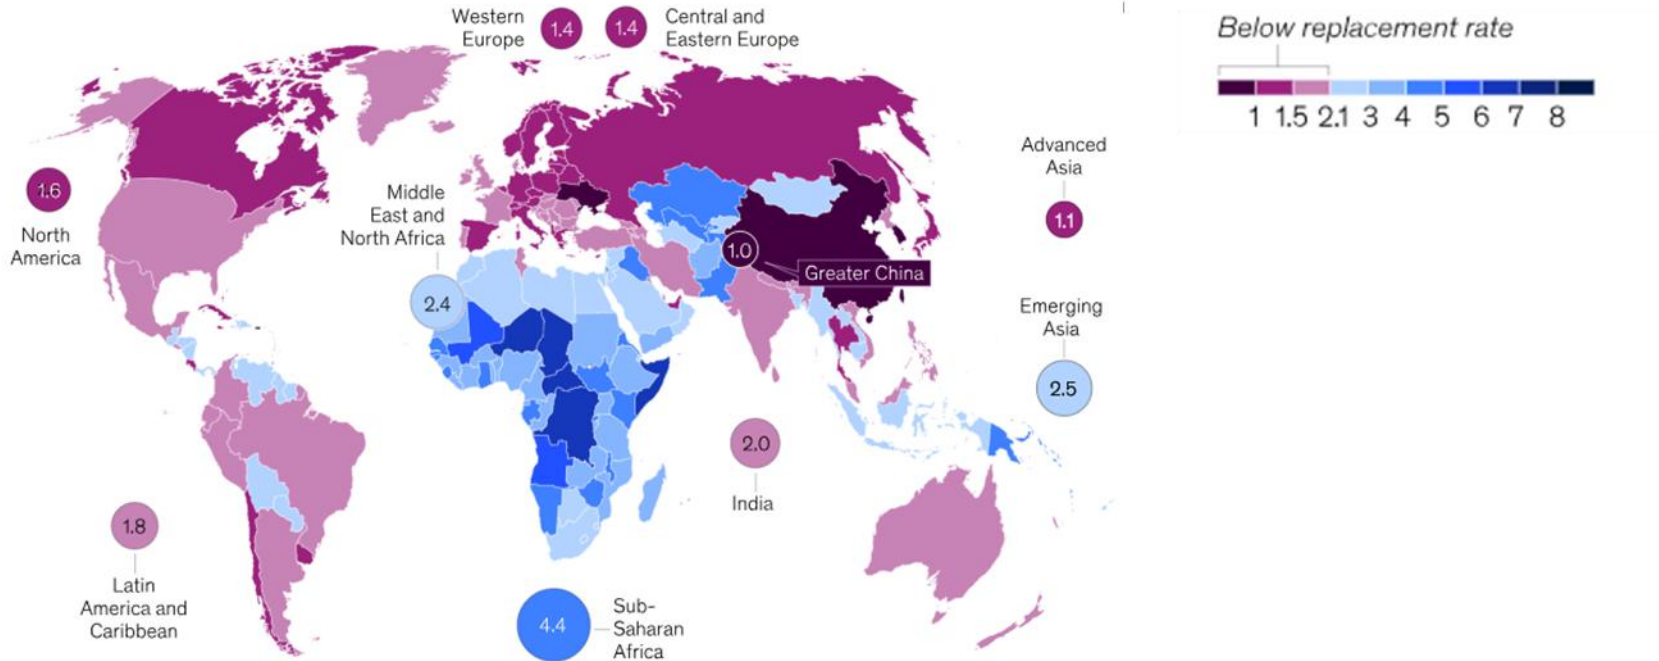

Fertility rates are declining everywhere

Total fertility rate by country,
live births per woman

2023

Global Population Slowing and Aging

World Population

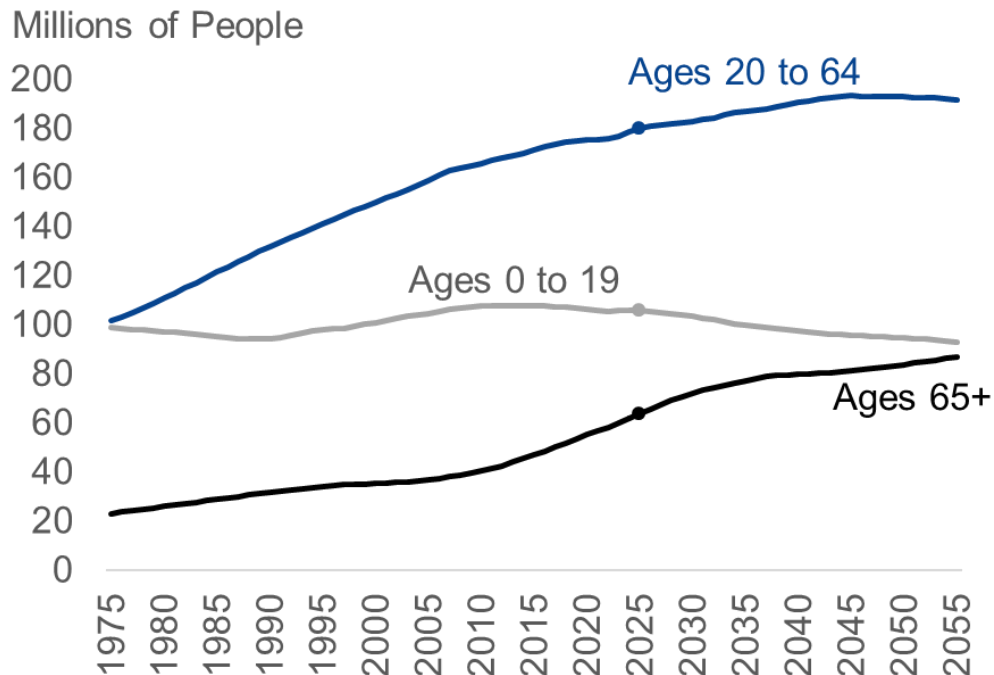

- Strongest growth in the 65+ population
- School-age population in decline
- Near-term rise in the working-age population

Source: United Nations *World Population Prospects 2024*.

https://population.un.org/wpp/assets/Files/WPP2024_Summary-of-Results.pdf

U.S. Population Slowing and Aging

- Strongest growth in the 65+ population
- School-age population in decline
- Near-term rise in the working-age population

Source: U.S. Congressional Budget Office, *An Update to the Demographic Outlook, 2025 to 2055*.

Colorado Trends

Population growth rates are slowing

Annual Population Percent Change

Slowing U.S. Population Growth

- Some states are already shrinking
- Slower U.S. growth will impact Colorado's growth

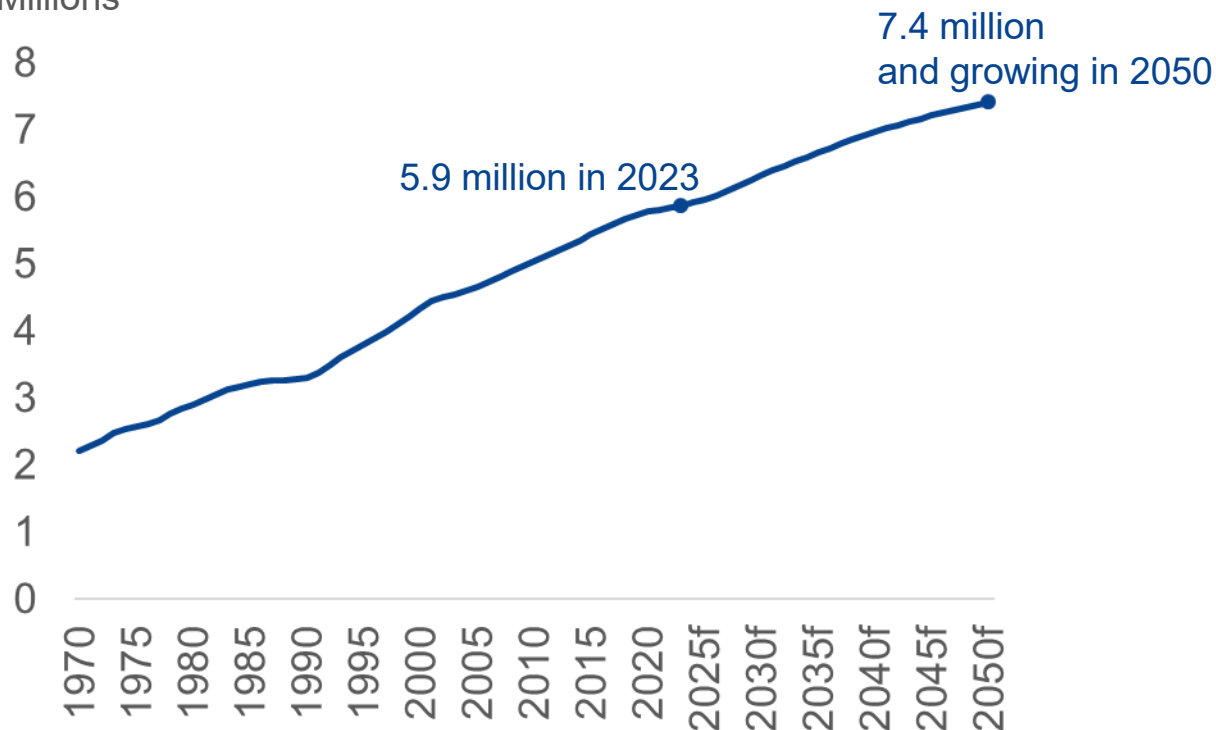

Source: State Demography Office, vintage 2023 estimates and projections; U.S. Census Bureau population projections, main series 2022-2100.

Colorado's Population

CO

Millions

Average Annual Growth by Decade

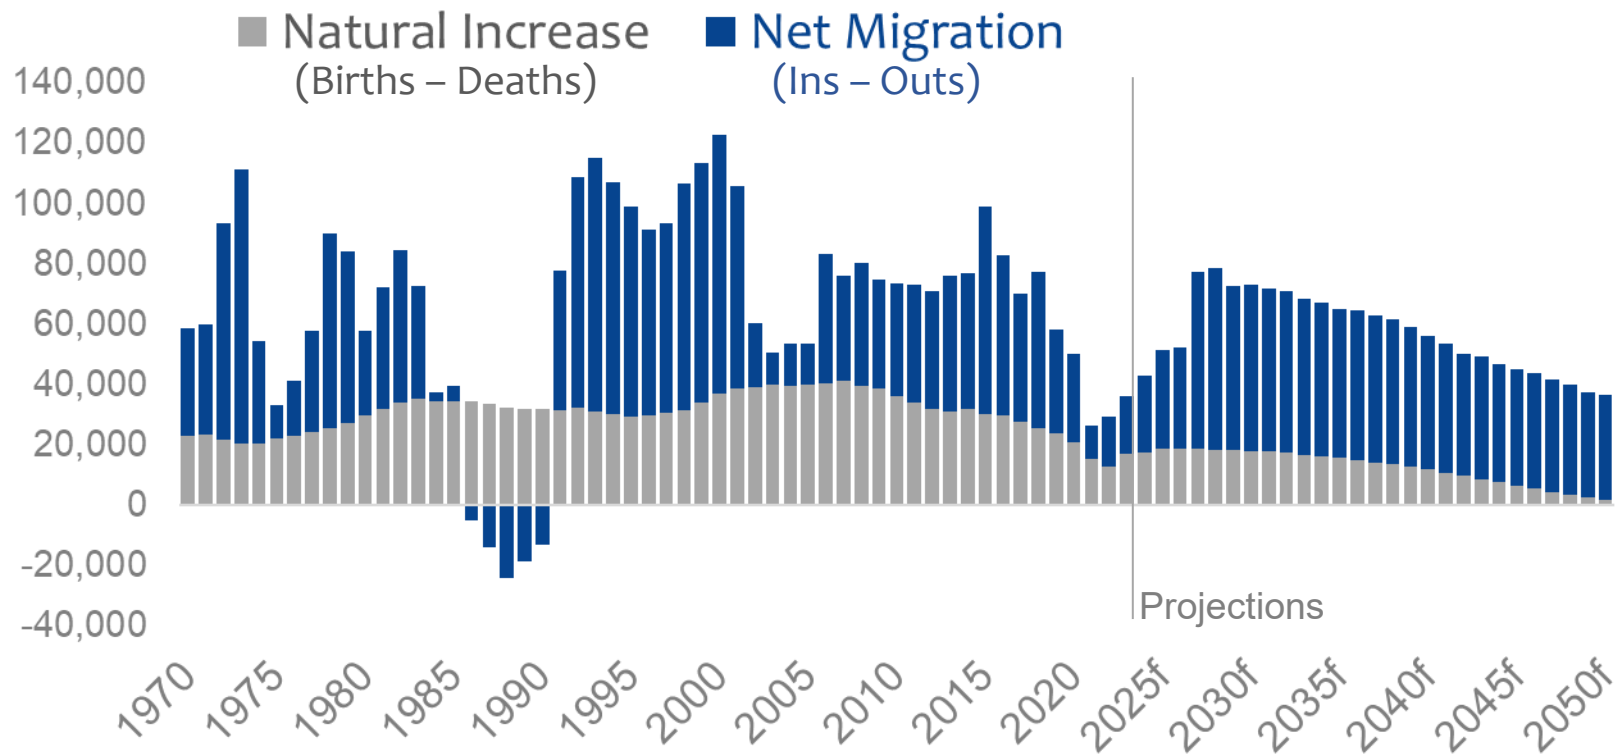

1970s	68,000	2.7%
1980s	40,000	1.3%
1990s	104,000	2.8%
2000s	71,000	1.5%
2010s	73,000	1.4%
2020s	54,000	0.9%
2030s	65,000	1.0%
2040s	45,000	0.6%

Colorado deaths expected to overtake births in 2053

CO

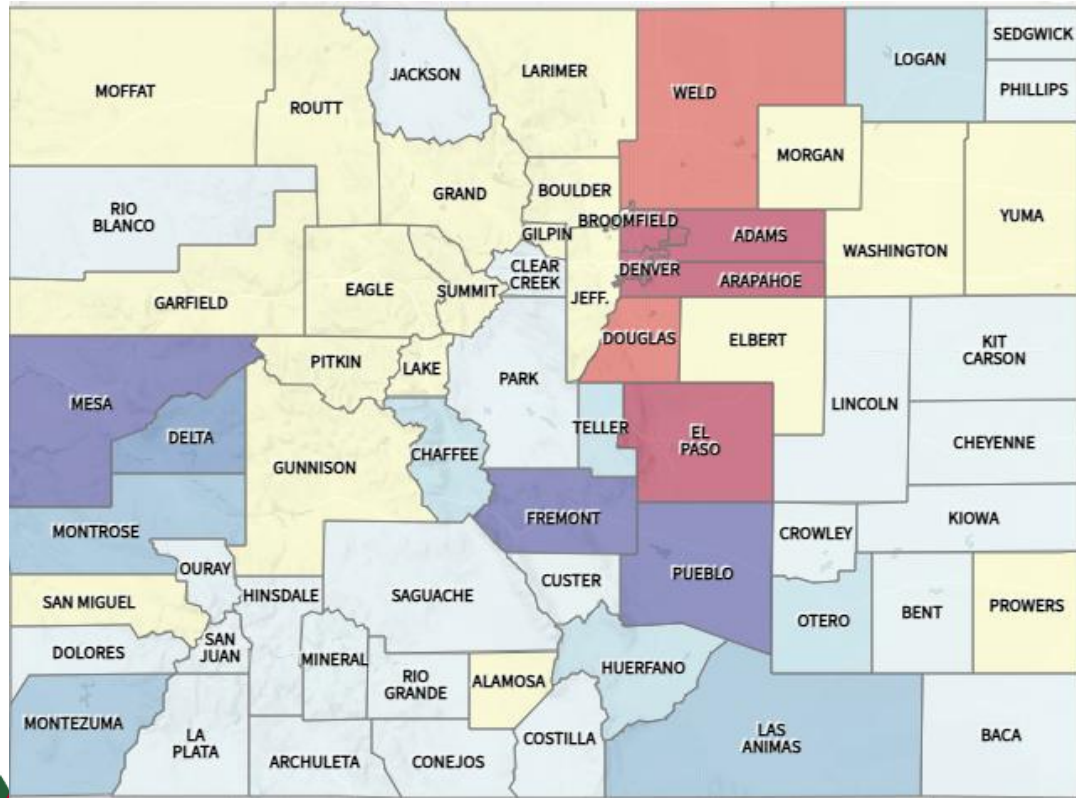

Colorado Births and Deaths

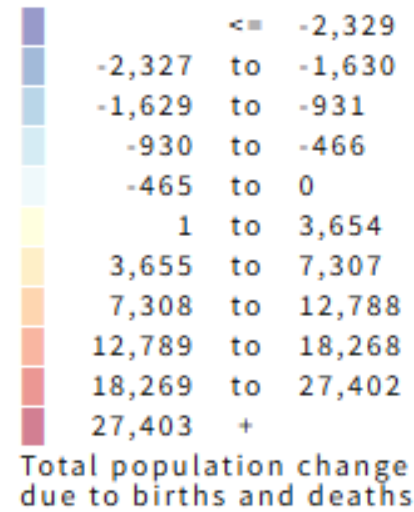

- Births expected to increase as Millennials reach peak fertility age
- More deaths due to population aging
- Colorado enters natural decline in 2053 vs. the U.S. in 2031

Source: Colorado Demography Office vintage 2023 estimates and projections.

People and the Economy

“Jobs are people”

“Houses are where those jobs go to sleep”

Colorado Population Forecast Methodology

Differences between supply and demand
resolved by net migration

U.S. growth is important

Jobs are people

Age matters

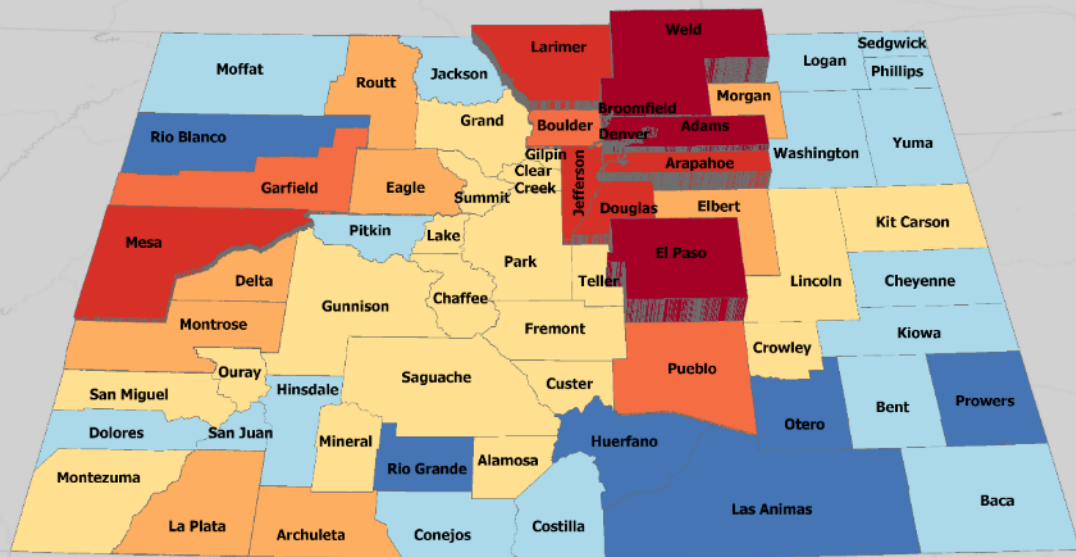

Job demand and
expected retirements
drive migration

Colorado's long-term forecast

CO

Projected Population Change 2020 - 2050

Statewide of increase 1.5 million people between 2023 and 2050

1.4 million along the Front Range (90%)

- 768,800 Denver-Boulder (50%)
- 339,177 North Front Range (22%)
- 260,500 South Front Range (27%)

Net migration to the state is needed to support this growth

Source: State Demography Office, vintage 2023 estimates and projections.

Aging Matters

Why Aging Matters

- Lower labor force participation means **more competition for talent**
- **Shifts in demand** for goods and services
- Supply and demand for **housing** (near-term pressure)
- **Income** sources and amounts evolve as we age
- Downward pressure on federal, state, and local **government tax** revenue; upward pressure on **government expenditures**

Colorado's population by age and generation, 2023

CO

2023

Future Generations
(2030 -)
Generation Alpha
(2015 - 2029)

Generation Z
(1997 - 2014)
Millennials
(1981 - 1996)

Generation X
(1965 - 1980)
Baby Boomers
(1946 - 1964)

Silent Generation
(1928 - 1945)
Greatest Generation
(- 1927)

Income and spending rises and then falls with age

Average U.S. Income

Average U.S. Income Tax

Aging will...

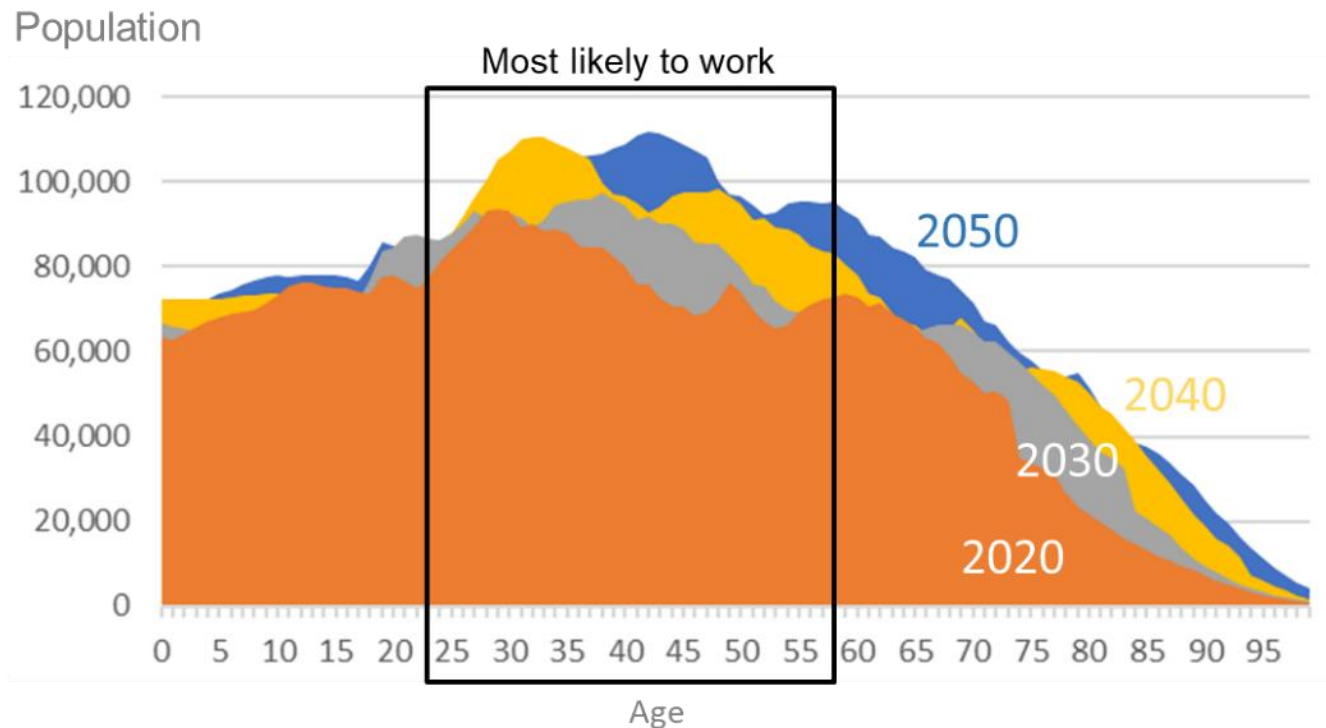

- Impact our labor markets
- Impact our tax base
- Shift consumer spending

Source: U.S. Bureau of Labor Statistics, 2023 Consumer Expenditure Survey.

Colorado's population by age over time

CO

- Populations aged 25 to 54 projected to grow through 2050
- However, we need positive net migration averaging 40,000 to 60,000 per year to support this growth
- Growth in the 65+ population reflect aging in place

Source: State Demography Office, vintage 2023 estimates and projections.
<https://demography.dola.colorado.gov/assets/html/population.html>

Workers vs. Retirees in Colorado

CO

Ratio of those Age 25 to 54 to those 65+

Economic impacts of aging will depend on several factors, including:

- Wealth, retirement saving, spending patterns
- Labor force participation among those 65+

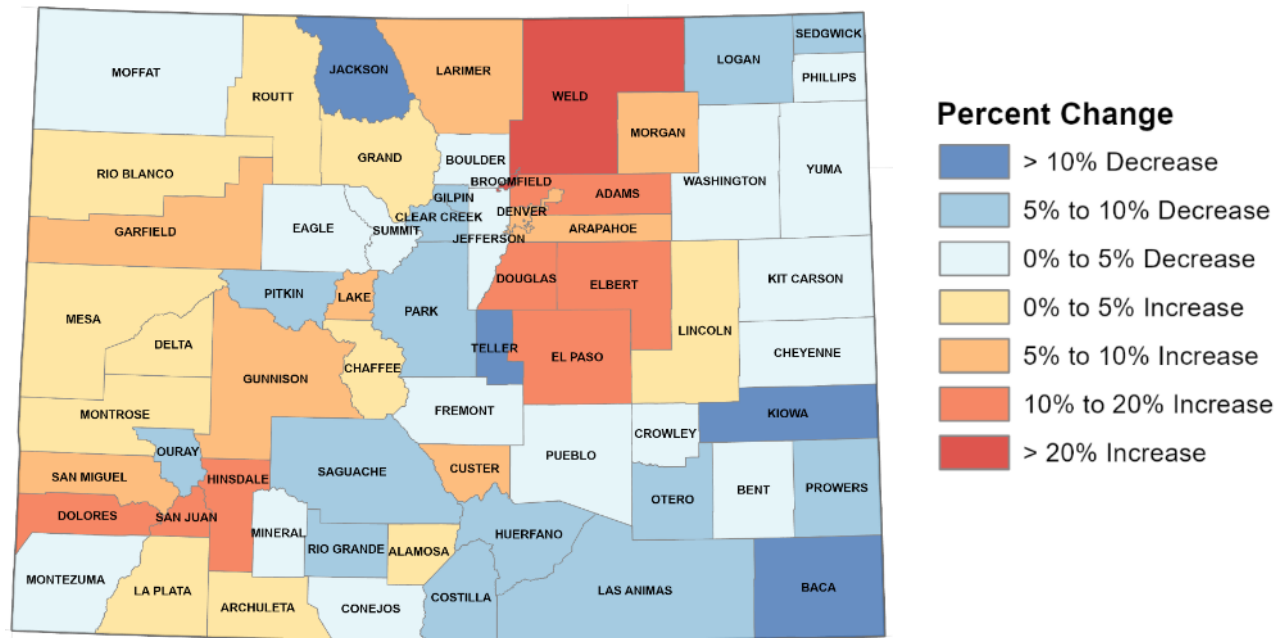

Source: State Demography Office, vintage 2023 estimates and projections.
<https://demography.dola.colorado.gov/assets/html/population.html>

Declines in the traditional working age population expected in half of Colorado's counties

CO

Change in 16 to 64 Year Old Population, 2020 to 2030

Source: State Demography Office, vintage 2023 estimates and projections.
<https://demography.dola.colorado.gov/assets/html/population.html>

Aging and the Economy

Housing & Wealth

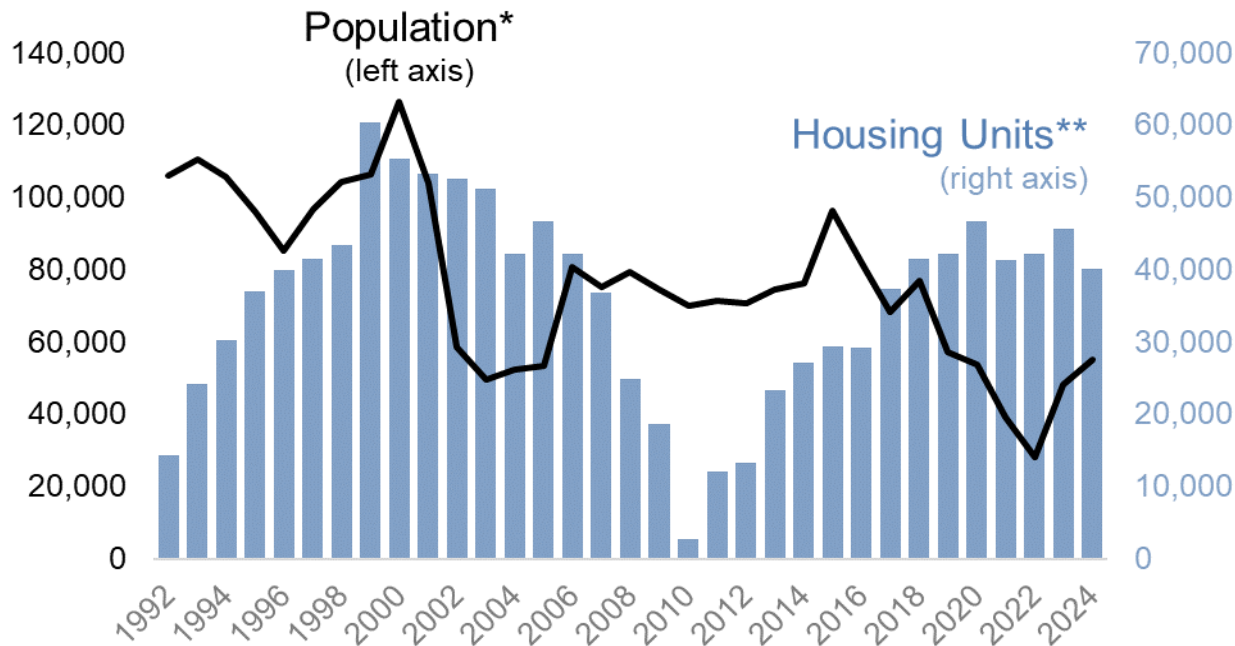

- Slower growth among young adults moving forward (less demand for housing?)
 - Retirees aging in place
 - 82% of those 65+ are homeowners
 - Living longer
 - Moving less
 - 42% of those 65+ live alone
 - More demand for rehab/re-model to age in place
- } Pressure on the housing stock
- Housing transition and wealth transfer
 - Age 80-84 primary group aging into needing care or moving into care communities
 - What will happen to these homes?
 - Where will wealth be transferred?

Housing supply played catch up with demand in recent years

CO

Annual Change in Colorado Population and Housing Units

... yet construction activity has slowed considerably in 2024 and 2025

Source: Colorado State Demography Office preliminary 2024 population estimates.

*Population estimates reflect the household population, which excludes group quarters. On average in 2023 there were 2.45 persons per household. **Housing units are based on permit data provided by local governments and adjusted for the time to build.

SDO Statewide Housing Shortfall Estimates

Colorado Housing Shortfall (Housing Units)

- 106,000 units short as of 2023
- Down 25% from the peak in 2019
- Yet, housing affordability issues have continued to worsen with time
- 34,100 additional units needed each year to hold the shortage constant and keep up with projected population growth over the next 10 years

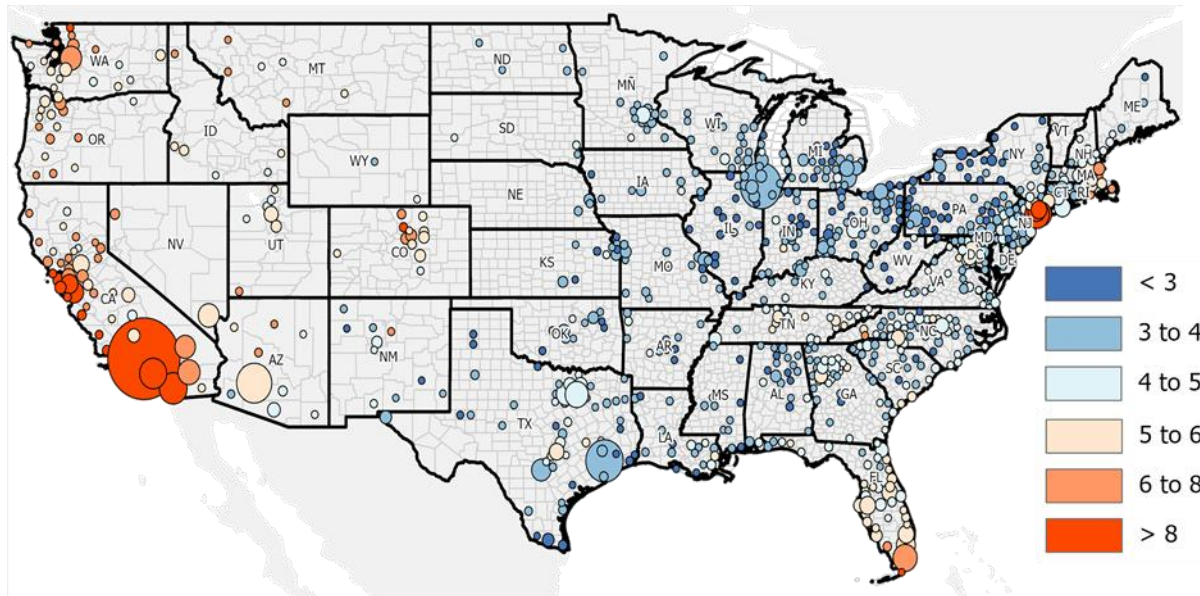

Source: Colorado State Demography Office. Research brief available at:
<https://demography.dola.colorado.gov/assets/html/researchbriefs.html>

Incomes haven't kept up with housing costs

Years of median income needed to buy a median value home, 2023

Dot size proportional to population.

Colorado ranks 6th among states* at 5.9 years, up from 3.5 in 2000

2023 County Rankings

- #22 Boulder (8.0 years)
- #47 Denver (6.7 years)
- #57 Larimer (6.5 years)
- #66 Jefferson (6.3 years)
- #84 Broomfield (5.9 years)

Source: U.S. Census Bureau American Community Survey 1-year estimates and Colorado State Demography Office calculations.

Note: Map includes data only for counties with populations greater than 65,000.

*Colorado ranks 6th after Hawaii, California, DC, Washington State, and Oregon.

The 75+ population is the fastest growing cohort

CO

Colorado Population Aged 75+

Health issues and need for assistance tend to increase at age 80+

230,000 new 75+ year olds expected over the next 10 years (56% increase)

Likely to contribute to state budgetary pressures through Medicaid expenditures

Source: State Demography Office, vintage 2023 estimates and projections.
<https://demography.dola.colorado.gov/assets/html/population.html>

Total Change

- 0 - 100
- 101 - 500
- 501 - 1,000
- 1,001 - 5,000
- 5,001 - 15,000
- > 15,000

cdola.colorado.gov

Colorado School Age Population

CO

Population Aged 5 to 17

Long-term growth driven by net migration, which could be lower (or higher) than forecast.

Trends differ across the state, with declines expected to continue in several areas, strong growth in others

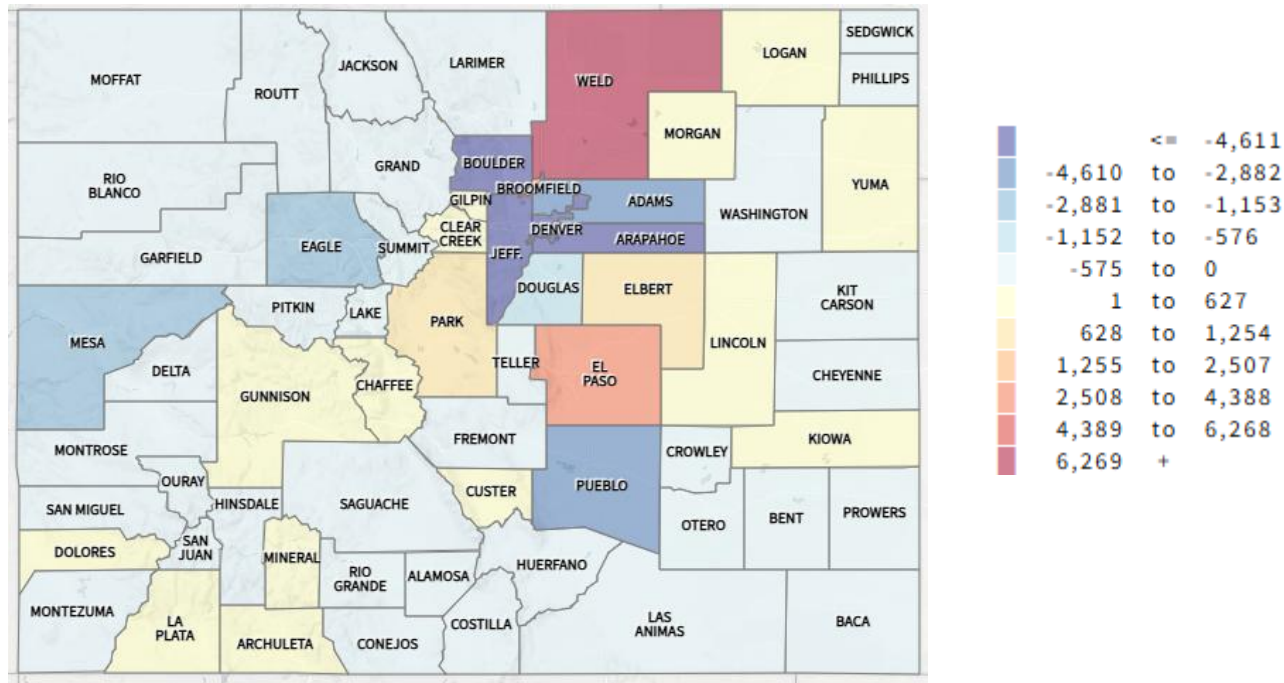

Source: State Demography Office, vintage 2023 estimates and projections.
<https://demography.dola.colorado.gov/assets/html/population.html>

Change in the School Age population

CO

Forecast Change in Age 5 to 19 Population, 2020 to 2030

Source: State Demography Office, vintage 2023 estimates and projections.
<https://gis.dola.colorado.gov/AgeMap/>

Risks to the Forecast

- **National population growth**
 - Immigration policy
 - Geopolitical events
- **Push/pull relative to other states, counties**
 - Housing affordability
 - Competition for labor
 - Natural disasters, water availability
- **Economic activity**
 - Net migration tied to the business cycle
- **Remote/hybrid work:** Less concentrated growth or return to work?
- **Housing turnover:** Will more Coloradan's move out freeing up supply?
- **Automation & AI:** Will AI impact labor markets?

Plan and invest with resiliency (many possible futures) in mind.

Strategic Growth *and* Strategic Aging

- How do we attract and retain talent?
- How do we meet the needs and wants of our aging populations?
- How can we better leverage the talents of our aging populations?
- How do we grow economies (or rethink economic growth) when our population or labor force shrinks?
- How might we better leverage technology?

There's no better time than now to plan for what our changing demographics will bring.

Questions?
