Education & Outreach
Specialist

Visitation Spotlight

About 1.8 million visits in 2025

Overall visitation slightly decreased from the previous year

Visitation was estimated at 23 properties and 6 regional trails

13 vehicle and 22 trail counters were monitored at 35 access points

The minimum estimated number of visits to Boulder County Parks & Open Space (BCPOS) parks in 2025 was 1,784,228. This was a small decrease in visitation from the previous year’s visitation number of 1,828,734.

All trail and vehicle counters are TRAFx counters that record timestamped hourly data for visitation. These counters make it possible to monitor hourly, daily, weekly, and monthly visitation at properties to identify trends.

Methodology

Education & Outreach and Resource Protection staff are assigned property-specific data collection duties. At the beginning of every month, staff download data from each counter. Counter data is uploaded to TRAFx Data Net, a web-based system to view and analyze the count data. Each month, the following adjustments are applied:

$$\frac{\{(Counter\ data)\ X\ (Average\ \#\ visitors\ per\ vehicle\ at\ park)\}}{2} = Total\ for\ that\ month$$

Counter data is divided by two for any trails and parking lots where visitors enter and exit from the same access point. For parking lots with one-way entrances, the counter's number is not divided by two. For vehicle counters, the data is multiplied by the average number of visitors per vehicle. That adjustment is calculated for each property using the 2021 BCPOS Five Year Study visitor survey. For trail counters, the average number of visitors per vehicle in that park is not applied.

Data from 2024 was used in instances when a trail or vehicle counter was malfunctioning for a month or longer. When a counter was malfunctioning for a shorter period of time, an average daily traffic adjustment for that month was used for individual days.

After the adjustments are completed, each month's data is assigned to the appropriate season, which is calculated as follows:

- Winter = December, January, and February
- Spring = March, April, and May
- Summer = June, July, and August
- Fall = September, October, and November

These calculations give us a minimum estimated number of visits to parks with active counters. Please note that "number of visits" is not equal to "number of visitors." That is, the same visitor may visit the same park many times throughout the year.

Parks fall into three categories for visitor use:

- Low use < 50,000 visits per year
- Medium use 50,000 - 100,000 visits per year
- High use > 100,000 visits per year

Since 11 public parks and neighborhood trails do not have counters, their visitation must be estimated. The annual estimates provided by observational studies at Twin Lakes (103,139 visits) and the Coal Creek, Rock Creek, and LOBO trails (268,000 total visits) have been adjusted to reflect the overall percent change in visitation estimated by properties with counters and included in the overall minimum estimated number of visits. Visitation at the Beech property is calculated using picnic shelter reservations, since the trails are managed by the City of Boulder.

For the properties where observational data has not been collected, estimates are based on averages from properties with similar visitation that do have counters. Using data from those counters, we estimate the average visitation for other parks in that visitor-use category and apply that average to each of the parks in categories that do not have counters.

Notes for Properties with Counters

Boulder County experienced a colder-than-average year in 2025, marked by significant temperature swings. January was an exceptionally cold and snowy start to the year, with a low of -9°F , while summer in contrast brought intense heat, including a high of 101°F in July. August saw smoky conditions from regional wildfires before turning cooler and wetter. The annual precipitation was above normal overall, but in the fall the first measurable snow fell unusually late on November 29, setting a record. And the year ended with a mild and windy December.

The Lagerman Agricultural Preserve parking lot and the Lagerman Trail was closed in mid-July to mid-December for improvements, although the Open Sky Loop remained open. The Meadowlark Trail was closed for cattle grazing from September 1 through October 31.

Ron Stewart Preserve at Rabbit Mountain was closed Monday and Tuesday, January 1 to January 28, for elk management. For eight years, limited hunting was allowed at the park. Management objectives have been met, and hunting is not needed in the foreseeable future.

Hall Ranch, Heil Valley Ranch, and Ron Stewart Preserve at Rabbit Mountain experienced intermittent muddy trail closures throughout the year. Hall Ranch, Heil Valley Ranch, Ron Stewart Preserve at Rabbit Mountain, Mud Lake, and Caribou Ranch were closed due to high wind and hazardous conditions for a few days in December.

At Walden Ponds Wildlife Habitat many vehicles drive through both parking lots during a trip to the property, passing through the lot at Wally Toevs Pond on the way to park at the Cottonwood Trailhead. Some visitation from January through mid-March includes construction traffic passing through the Cottonwood Trailhead for the City of Boulder's Main Sewer Improvements Project.

Caribou Ranch has an annual closure from April 1 through June 30, which is reflected in the low number of estimated visits for the spring season.

More detailed information about specific properties can be found in individual property reports.

Park Visitation

The estimates provided here are minimum estimates. Visitation numbers may be higher, but they are probably not any lower. Some parks have separate access points without counters, or they receive visitors who are biking, running, riding, or walking, rather than driving a vehicle into a park with a vehicle counter. Additionally, vehicle counters are calibrated to estimate visits from people arriving in cars, SUVs, and small trucks, not longer-length vehicles, such as school buses or RVs. The properties are listed from highest to lowest estimated number of visits in 2025.

Estimated Number of Visits at Properties with Counters

Visitation at Properties Without Counters

Category of Visitor Use	Property	Total 2025
Low Visitation	Cattail Pond	28,432
Low Visitation	Harney Lastoka	28,432
Low Visitation	Reynolds Ranch	28,432
Low Visitation	Sugarloaf Mountain	28,432
Low Visitation	Dodd Reservoir	28,432
Low Visitation	Beech Shelter	1,574
Medium Visitation	Niwot Trails	67,036
High Visitation	Regional Trails (LoBo, Coal Creek, and Rock Creek Trails)	314,993
High Visitation	Twin Lakes	121,307
Total	All Properties	647,070

In 2012, an observational spot study was completed at Twin Lakes to estimate annual visitation. The annual visitation at three regional trails was estimated by a 2013 small grant study conducted by Schulte and Flohr. The annual estimates provided by these studies for Twin Lakes (103,139 visits) and the Coal Creek, Rock Creek, and LOBO trails (268,000 total visits) have been adjusted to reflect the average percent change in visitation at properties with counters in the years since the research was conducted. Visitation at the Beech property is calculated using picnic shelter reservations since the trails are managed by the City of Boulder.

For the properties where observational or counter data has not been collected, estimates are based on averages from properties with similar visitation that do have counters (low <50,000 visits, medium 50,000 - 100,000 visits, or high >100,000 visits). Using data from those counters, we estimate the average visitation for other parks in that visitor-use category and apply that average to each of the parks in categories that do not have counters.

2025 Visitation	Total
Vehicle and Trail Counters	1,137,158
Properties without Counters	647,070
Total Visitation	1,784,228

Park Visitor Activities

Paid staff and Volunteer Ranger Corps volunteers observed 24,781 visitors on BCPOS lands that were open to the public in 2025. This table summarizes park visitors' activities at those areas. These numbers reflect only the visitors that were seen by staff and volunteers. The data was mostly collected during the warmer months and often on weekends. See the results of the [Five Year Visitor Study](#) for a system-wide representative sample of visitor activities, demographics, and opinions.
