PURPOSE OF LAT (CRS 1-7-509 AND SOS ELECTION RULE 11)

The purpose of the LAT is to test the compatibility of the election ballots through the scanning and tabulation equipment to confirm that every voting position on the ballot is accurately counted where a properly marked selection is made.

TESTING BOARD MEMBER RESPONSIBILITIES

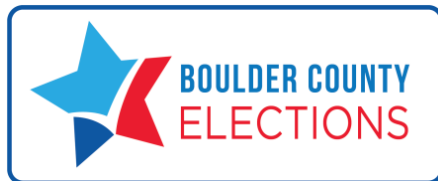

- You will be participating in all parts of the LAT, ensuring all requirements are met.
- You will attest to this at the end of the process and document the successful completion of testing.
- No process shall be delayed due to the absence of a Testing Board member.

GUIDELINES FOR OBSERVERS AT THE LOGIC AND ACCURACY TEST

- The LAT shall be open to representatives of the political parties, the press, and the public to the extent allowable and pursuant to section (CRS 1-7-509(2)(b)). The designated election official may limit the number of representatives from each group because of space limitations. (Rule 11.3.2(b)).
- Each major political party, minor political party, ballot issue committee that has an issue on the ballot, and coordinating entity may designate one person, who shall be allowed to witness all public tests and the counting of pretest votes. (CRS 1-7-509(2)(b))
- If an observer or designee hinders or disturbs the test process, the designated election official may remove the person from the test area. An observer or designee who has been removed from a public test may be barred from future tests. (CRS 1-7-509(2)(b))
- The absence of observers or designees shall not delay or stop the public test. (CRS 1-7-509(2)(b))
- The election official will provide name tags and badges to all participants and observers. Participants and observers are required to sign-in to enter our ballot processing area. A copy of the LAT Information Packet will be available for observers.
- The Logic & Accuracy Testing will take substantially all the Elections staff time and resources today. Therefore, any questions should be directed to Stephanie Gnoza, Elections Director, or her designee.

- Personal belongings
- Cameras or other recording devices
- Memory devices

ACRONYMS AND DEFINITIONS

Adjudication: Refers to both the process of reviewing a ballot manually to determine tabulation decisions, and to the application on the voting system which facilitates the adjudication process.

BMD: Ballot Marking Device, an electronic device which allows a voter to mark a ballot through any combination of touchscreen, audio output, and accessible devices. BMDs print a voter-verifiable ballot, which is scanned and tabulated the same way as a hand-marked paper ballot.

County test deck: County test deck, a prepared deck of ballots comprised of all ballot types, with some ballots from each print source that will be used in the election, and with all choices marked for each contest including undervotes and overvotes. There is a calculated, expected tally with a different result for each choice per contest to verify the accurate tabulation of each choice.

ICC: ImageCast Central, the type of tabulator in use at Boulder County. Can refer to both the tabulator stations and the application on the computers which facilitates ballot scanning and tabulation.

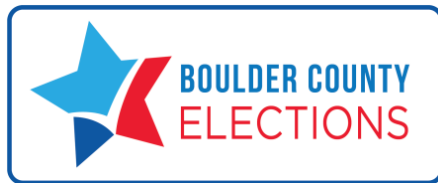

IRV: Instant Runoff Voting, a form of Ranked Choice Voting where multiple runoff elections are simulated by eliminating the candidate with the fewest votes, until one candidate has more than 50% of the vote.

RCV: Ranked Choice Voting, an electoral system in which voters preferentially rank candidates, rather than vote for only one candidate.

RTR: Results Tally and Reporting is the application which combines all tabulated results after adjudication and generates voting reports.

LAT Testing Board Procedures

Ballot Marking

The county has provided a packet of test ballots to each Testing Board member that includes 25 unique precinct-district style ballots. This is in addition to the ballots prepared to fulfill the county test deck requirements. If there is an RCV contest, additional ballots and procedures will be provided.

1. Confirm the number of ballots, verify they are all labeled "TEST."
2. Number each ballot at the top, 1 through 25.
3. Use the following instructions for marking ballots while creating the tally sheet. Do not start marking your ballots until you have read through the tally sheet instructions and have your tally sheets prepared as this is a team activity.
 - When marking your ballots, follow the "instructions for voting" printed on the ballot.
 - ✓ Use the pen provided and fill in the oval completely; no X or V.
 - ✓ Voting for more than the maximum number of allowed choices is considered an Overvote.
 - ✓ Voting for less than the maximum number of allowed choices is considered an Undervote.

- How to correct a mistake:

NOTE: Ballots that are damaged or improperly marked will be reviewed and/or rejected prior to the scanner portion of testing. Catching and correcting a mistake immediately prevents delays in testing later.

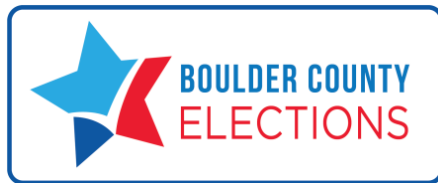

(Vote for one)		
CHOICE A		(Fill in the oval to the right of your choice)
CHOICE B		(Draw a line through the choice you did not mean to choose)

- If a mistake (wrong choice, stray mark, hesitant mark) is made, request a replacement ballot from staff.
- Write-In votes (If there is a qualified Write-in candidate for a candidacy):
 - ✓ A certified write-in candidate name shall be noted on the tally sheet.
 - ✓ Uncertified candidates are counted as an undervote if no other choice is marked.
 - ✓ A write-in vote will be counted if you:
 - Completely fill in the oval provided to the right of the words "Write-in"
 - Write **at least the last name** of the certified candidate.
 - a. For the Presidential contest the last name of both President and Vice President must be written in.
 - Do not vote for more than the maximum number of allowed choices.
 - A list of certified write-in candidates will be provided for reference, if applicable.

Creating the Tally

Testing Board members are to use the provided tally sheet to track the markings made on their ballots. On each sheet of the tally sheet, follow this procedure to create a tally for your test ballots:

1. Print both participant names on the first page of your tally sheet and initial subsequent pages.
 - This document will be available to the public so please do not add your signature.
2. Person A reads aloud each contest name then reads aloud their mark as they mark the ballot.

3. Person B will record the selections read aloud by Person A on the tally sheet for the appropriate contest option read and will make notation of any abnormal markings as indicated.
 - If a contest has not been voted, the appropriate number of “Undervotes” must be recorded for that contest. For example, if a contest allows up to 3 votes, and only 1 vote was recorded, there are 2 undervotes.
 - If more choices are made than the contest allows, be sure to mark the “Overvote” row.
 - If a contest does not appear on a specific ballot style, make no tally mark for that contest in the tally sheet column associated with that contest.
4. Add up the selections for each contest option and record this number in the applicable “Total” field.
5. After verification has been completed, notify election support staff.
6. Election support staff will review the Tally sheet and ballot markings for accuracy.

County Test Deck on Scanners

The county is required to prepare a test deck of ballots that includes every ballot style and, where applicable, precinct. The county test deck must include enough ballots to:

- Mark every vote position for every contest, including write-in candidates
- Allow for situations where a contest permits an elector to vote for two or more positions
- Include overvotes and undervotes for each contest where applicable
- Includes a sufficient number of ballots so that each vote position in each contest receives a unique, known vote total for that contest

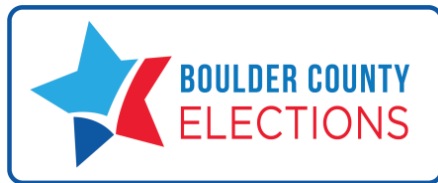

In addition to the packets provided to the Testing Board, the county has prepared a deck and tally that meets the above requirement.

As is required for the Testing Board ballots, the county ballots are counted on one or more scanners, adjudicated, and then tabulated for comparison against the county tally. Results are then generated and provided to the Testing Board, where the Testing Board then verifies that the results exactly match the pre-determined tally.

BMD Test (Ballot Marking Device)

The Ballot Marking Device (BMD) visually displays or audibly presents ballots and allows voters to print a paper ballot. A BMD also provides voting accessibility to voters who may be otherwise unable to mark a paper ballot privately and independently. It includes an audio ballot playback feature with headphones and can accept adaptive devices for voters with mobility impairments.

1. Record which BMD you are testing in the upper right-hand corner of the tally sheet.
2. Bring your test ballots to the selected BMD where you will:
 - Mark and print all test ballots on the BMD in the same manner you manually marked the test ballots.
 - i. A contest cannot be overvoted on an BMD, so any hand-marked overvotes shall instead be voted as a blank/unvoted contest on the BMD.
 1. An IRV contest similarly cannot be marked with an overvote, duplicate ranking, or skipped ranking.
 - Verify that the ballot style, contests, and selections printed from the BMD match the paper ballot (overvotes reflecting as a blank contest).
 - Validate the BMD audio and screen content for at least one manually marked test ballot.
3. Mark a ballot using the audio ballot playback and accessible input device:

- Person A will listen to audio instruction and uses accessible input device (paddles) to make ballot selections.
 - Person B will verify that the BMD selection made matches the manually marked ballot selection.
4. In the upper right-hand corner of the BMD ballot, write in the ballot number that coincides with the manually marked ballot used for testing (1, 2, 3, etc.).
 5. Staff will check the BMD ballots to ensure they match the hand-marked ballots, and that the tally sheets match.

Scanner Test (Mail and In-Person paper ballot counting device)

An ICC scan station is designed to capture an image of a voter's paper ballot, process the image of that ballot, and capture the voter's choices.

This test ensures properly marked choices are being accurately captured and recorded; we want to make sure that a choice for Candidate A is recorded as a vote for Candidate A, and not Candidate B and that there is compatibility between the ballots (proper printing and alignment), and the equipment.

An adjudication station provides for the resolution of voter intent as prescribed by the Colorado Secretary of State. Ballots which are blank, have overvoted contests, or have write-ins will be automatically flagged by the voting system and adjudicated per state guidelines.

1. Before the start of any scanner testing, the Testing Board will verify the zero report on RTR, confirm that the Total Ballots Accepted on the scan screen on each ICC is zero, and verify that there are no batches listed in the Batch Reporting section of the ICC Status screen.
2. Testing Board ballots (manually marked and BMD marked) are brought to the selected ICC scan station. Record the ICC station ID in the upper right-hand corner of your tally sheet and check that the Batch Size on the scan screen is zero.
3. Testing Board ballots are then processed on the scanner and votes captured.
 - Each set of test ballots are scanned in and saved, to capture and process ballot images.
 - Scan count is validated by the Test Board.
 - Applicable ballots are adjudicated if needed, following state rule and guidelines.

Scanner Results Tabulated and Verified

The RTR application tabulates vote records to produce combined election results. This process confirms that votes are accurately tabulated and aggregated by the scanner and tabulation system.

1. Before starting the scanner test, the RTR Election Summary Report showing "0" votes cast is presented to the Testing Board for verification that the system has been set to zero. They also verify that no batch results have been received in RTR.
 - Both Testing Board members initial and date the report, documenting that it has been verified.
2. After tabulation, reports will be generated for the tabulation of the Testing Board's ballots.
 - A separate Election Summary Report is generated for hand-marked and BMD-marked ballots.
 - For any IRV contests, an RCV Short Report is generated for hand-marked and BMD-marked ballots.

3. The Test Boards will compare the results report to their team tally sheet, validating that the tabulated results exactly correspond to the team's predetermined tally of the manually marked and BMD marked test ballots.
4. When the team concludes the counts to be accurate, both team members initial and date the results report, attesting to the accuracy of the count and the machine.

Discrepancy Resolution (in order of escalation)

1. Review for tally errors:
 - Review tally sheet for too few or too many votes captured.
 - Review ballots with tally sheet for incorrect recording and recount if needed.
 - Review Adjudication and Audit Marks for resolution differences (if applicable).
 - Review comparison and recount if needed.
2. If error is identified as a hardware or software error on single device:
 - Validate other tested equipment was not impacted.
 - Mark device unsatisfactory, replace and test alternative/new device.
3. If error is identified on more than one device and devices are failing in similar fashion:
 - Test multiple devices that could reasonably have same error.
 - Mark devices unsatisfactory, replace and test alternative/new devices.
 - If enough resources are not available for replacement, error shall be corrected, and retesting will be completed.
4. If error is identified as a software or ballot programming error:
 - Correct software or ballot programming error and restart testing from beginning.

Reporting and Back Up

While all individual results are being verified, the county will generate files needed for testing Election Night Reporting, and backup the election project.

Resetting and Sealing of Equipment

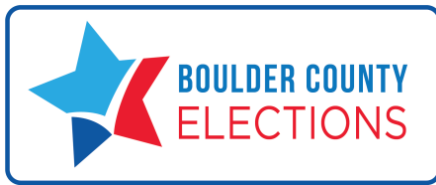

After testing, the Testing Board must watch the county reset and seal each voting device, as applicable. As part of the Statement of Qualification, the Testing Board and Clerk must attest to the seal number attached to the voting device at the end of testing.

1. Testing Board participates in the resetting and sealing of the BMD equipment, verifying the seal numbers attached to each device.
2. Testing Board witnesses the resetting of scan stations and Results Tally and Reporting, verifying that the Total Ballots Accepted on the ICCs is "0" and that the Election Summary Report is regenerated and shows "0" votes cast.

Completion of Testing

After the devices are reset and sealed and tabulation results are reviewed with the Clerk and Testing Board the Testing Board and the County Clerk must sign a written statement attesting to the qualification of each device successfully tested, the number of the seal attached to the voting device at the end of the test, any problems discovered, and any other documentation necessary to provide a full and accurate account of the condition of a given device.

1. Testing Board and Clerk complete the Statement of Qualification.

Secure Storage of All LAT Materials and Ballots

The county must keep all test materials, when not in use, in a durable, secure box. Each member of the Testing Board must verify the seals and initial the chain-of-custody log maintained by the county clerk. If the records are opened for inspection, at least two election officials must verify the seals and initial the chain-of-custody log.

LAT Testing Board Procedures – RCV Addendum

Ballot Marking

The county has provided a packet of test ballots to each Testing Board member that includes 25 ballots which have the RCV contest included. This is in addition to the ballots prepared to fulfill the county test deck requirements.

1. Confirm the number of ballots, verify they are all labeled “TEST.”
2. Number each ballot at the top, R1 through R25.
3. Only mark the *City of Boulder Mayoral Candidates* race on these 25 ballots.
4. The same instructions for marking ballots applies to RCV as for other contests, see page 7 “Ballot Marking” on the LAT Participants Info and Procedures Packet.
5. Following are additional guidelines for marking the RCV ballots:
 - a. To test RCV sufficiently, the contest must go to at least a second round. Ensure there are no candidates with >50% of the votes for this reason.
 - i. If there are 25 ballots with a scored 1st choice, that means no more than 12 votes for any candidate.
 - ii. If you test any outstack conditions, such as an overvote, on any of your 1st choices, that threshold will be lower. (Examples of outstack conditions may be found on the back of this page.)
 - b. Please note that there are no Totals calculated for 2nd, 3rd, 4th, 5th, or 6th choices on the grid because only ballots with 1st choices with an eliminated candidate will have their 2nd choices tallied, and so on. That is, the second round is not a sum of the 2nd choice votes, it is a combination of 1st and 2nd choices dependent on who was eliminated in round 1.
 - c. Outstack conditions: You may mark any of your ballots with a skip rank, a duplicate ranking, an overvote, or a blank contest. All these conditions are tested in the county test deck; it is not required and it will increase the complexity of your tabulation if you include them.

Example: **Skip Rank**

If any of the candidates have 13+ votes, please redo your votes (request new ballots).

It is possible for 2 candidates to be eliminated via batch elimination. This occurs if the lowest-scoring two candidates have fewer combined votes than the second-highest-scoring candidate.

Example:

Candidate A – 12 votes

Candidate B – 8 votes

Candidate C – 4 votes

Candidate D – 1 vote

Candidates C and D have $4 + 1 = 5$ combined votes; 5 is less than Candidate B's 8 votes, so both Candidates C and D will be batch eliminated.

If there is a tie for the candidate to be eliminated, please inform staff and we will duplicate the tie-break process per rule.

The candidate(s) with the lowest number of 1st choice votes is/are eliminated:

LaGrave

The number of votes the eliminated candidate(s) had in round 1 is the maximum number of vote transfers to round 2 – follow the steps below.

9. The maximum number of vote transfers to round 2 is: 4

If any of the candidates have 13+ votes, please redo your votes (request new ballots).

It is possible for 2 candidates to be eliminated via batch elimination. This occurs if the lowest-scoring two candidates have fewer combined votes than the second-highest-scoring candidate.

Example:

Candidate A – 12 votes

Candidate B – 8 votes

Candidate C – 4 votes

Candidate D – 1 vote

Candidates C and D have $4 + 1 = 5$ combined votes; 5 is less than Candidate B's 8 votes, so both Candidates C and D will be batch eliminated.

If there is a tie for the candidate to be eliminated, please inform staff and we will duplicate the tie-break process per rule.

The candidate(s) with the lowest number of 1st choice votes is/are eliminated:

Goldstein

The number of votes the eliminated candidate(s) had in round 1 is the maximum number of vote transfers to round 2 – follow the steps below.

Boulder County 2026 General Election LAT Ranked Choice Vote Plan

Automated Test Deck

Ballots 1 - 35 are generated by the automated test deck. The ATD creates a marking pattern where 1st position gets ranked 1st once, 2nd position gets ranked first twice, 3rd position gets ranked first 3 times, etc. This pattern is repeated 4 times across district style 01, 05, 29, and 30. Then it is duplicated in Spanish. So this pattern will occur a total of 8 times in the county test deck. Note: Ballot 34 was removed from the English deck on DS-01 and DS-30 to vary 1st rank totals. This is reflected in round 1 totals for Lisa Ann Jacobs by subtracting 2.

Simple 1 of Each Pattern

Ballots 36 - 59 are generated by handmarking and automated decks. Each position gets ranked 1st through 6th, on district style 01, 05, 29, and 30. This pattern is repeated on the Internal Simple ATD, the Roundtrip handmarked deck, the ICX Simple ATD (English), the ICX Simple ATD (Spanish), and the ICX Audio deck. So this pattern will occur 5 times across the entire county test deck.
